MEMORIES AND PORTRAITS

The first collected edition of *Memories and Portraits* appeared in 1887.

The individual essays, which had previously appeared, were first printed as follows:

- I. *The Cornhill Magazine*, May, 1882.
- II. *The New Amphion, being the Book of the Edinburgh University Union Fancy Fair*, December, 1886.
- III. *Longman's Magazine*, May, 1884.
- V. *Edinburgh University Magazine*, March, 1871.
- VI. *Longman's Magazine*, April, 1887.
- VII. *Scribner's Magazine*, May, 1887.
- IX. *The Contemporary Review*, June, 1887.
- X. *The Cornhill Magazine*, April, 1882.
- XI. *The Cornhill Magazine*, August, 1882.
- XII. *The English Illustrated Magazine*, May, 1883.
- XIII. *The Magazine of Art*, April, 1884.
- XV. *Longman's Magazine*, November, 1882.
- XVI. *Longman's Magazine*, December, 1884.

TO

*and present sorrow*  
*I dedicate*  
*these memories and*  
*portraits*

*S. S. "Ludgate Hill"*  
*within sight of Cape Race*

## A NOTE FOR THE READER

THIS volume of papers, unconnected as they are, it will be better to read through from the beginning, rather than dip into at random. A certain thread of meaning binds them. Memories of childhood and youth, portraits of those who have gone before us in the battle,—taken together, they build up a face that “I have loved long since and lost awhile,” the face of what was once myself. This has come by accident; I had no design at first to be autobiographical; I was but led away by the charm of beloved memories and by regret for the irrevocable dead; and when my own young face (which is a face of the dead also) began to appear in the well as by a kind of magic, I was the first to be surprised at the occurrence.

My grandfather the pious child, my father the idle eager sentimental youth, I have thus unconsciously exposed. Of their descendant, the person of to-day, I wish to keep the secret: not because I love him better, but because, with him, I am still in a business partnership, and cannot divide interests.

Of the papers which make up the volume, some have appeared already in *The Cornhill*, *Longman's*, *Scribner's*, *The English Illustrated*, *The Magazine of Art*, *The Contemporary Review*; three are here in print for the first time; and two others have enjoyed only what may be regarded as a private circulation.

Letter to Professor Saintsbury  
signed with note by  
Saintsbury and Kipling

*Two clats in p...*

#  
Dear Saintsbury,

Thanks for yours. Why did I call Lockhart a cad? That

calls for answer, and I give it.

"Scorpion literature seems at the best no very fit employment for a man of  
genius - which Lockhart was - and none at all for a gentleman. But if a man  
does go in for such a trade he must be ready for the consequences; and I do  
not conceive a gentleman as a coward; the white feather is not his crest,  
it almost excludes and I put the almost with reluctance. Well, how about the  
diel? (Even he) Ami turned up on the terrain? Et responsam est ab  
senibus non est inventa, I have often wondered how Scott took that episode.

[I do not know how this view will strike you; it seems to me the good old  
honest fashion of our fathers though I own it does not agree with the "new  
nobility" and may be perhaps an expression too vivacious and not well chosen;  
it is at least upon my view substantially just.

Now, if you mean to comb my wig, comb it from the right parting; I know you  
will comb it well,

An infinitely small feat occurs to me in connection with the historic umbre-  
lla; and perhaps the infinite smallness delights me would you mind adding  
it on to "Fifteen Ruyard" with the enclosed note? This seems to me fitting to  
consecrate and commemorate this most absurd episode

Yours very sincerely

Robert Louis Stevenson

# MEMORIES AND PORTRAITS

## I

### THE FOREIGNER AT HOME

“This is no’ my ain house;  
I ken by the biggin’ o’t.”

WO recent books, one by Mr. Grant White on England, one on France by the diabolically clever Mr. Hillebrand, may well have set people thinking on the divisions of races and nations. Such thoughts should arise with particular congruity and force to inhabitants of that United Kingdom, peopled from so many different stocks, babbling so many different dialects, and offering in its extent such singular contrasts, from the busiest over-population to the unkindest desert, from the Black Country to the Moor of Rannoch. It is not only when we cross the seas that we go abroad; there are foreign parts of England; and the race that has conquered so wide an empire has not yet managed to assimilate the islands whence she sprang. Ireland, Wales, and the Scottish mountains still cling, in part, to their old Gaelic speech. It was but the

## MEMORIES AND PORTRAITS

other day that English triumphed in Cornwall, and they still show in Mousehole, on St. Michael's Bay, the house of the last Cornish-speaking woman. English itself, which will now frank the traveller through the most of North America, through the greater South Sea Islands, in India, along much of the coast of Africa, and in the ports of China and Japan, is still to be heard, in its home country, in half a hundred varying stages of transition. You may go all over the States, and—setting aside the actual intrusion and influence of foreigners, negro, French, or Chinese—you shall scarce meet with so marked a difference of accent as in the forty miles between Edinburgh and Glasgow, or of dialect as in the hundred miles between Edinburgh and Aberdeen. Book English has gone round the world, but at home we still preserve the racy idioms of our fathers, and every county, in some parts every dale, has its own quality of speech, vocal or verbal. In like manner, local custom and prejudice, even local religion and local law, linger on into the latter end of the nineteenth century—*imperia in imperio*, foreign things at home.

In spite of these promptings to reflection, ignorance of his neighbours is the character of the typical John Bull. His is a domineering nature, steady in fight, imperious to command, but neither curious nor quick about the life of others. In French colonies, and still more in the

## THE FOREIGNER AT HOME

Dutch, I have read that there is an immediate and lively contact between the dominant and the dominated race, that a certain sympathy is begotten, or at the least a transfusion of prejudices, making life easier for both. But the Englishman sits apart, bursting with pride and ignorance. He figures among his vassals in the hour of peace with the same disdainful air that led him on to victory. A passing enthusiasm for some foreign art or fashion may deceive the world, it cannot impose upon his intimates. He may be amused by a foreigner as by a monkey, but he will never condescend to study him with any patience. Miss Bird, an authoress with whom I profess myself in love, declares all the viands of Japan to be uneatable—a staggering pretension. So, when the Prince of Wales's marriage was celebrated at Mentone by a dinner to the Mentonese, it was proposed to give them solid English fare—roast beef and plum pudding, and no tomfoolery. Here we have either pole of the Britannic folly. We will not eat the food of any foreigner; nor, when we have the chance, will we suffer him to eat of it himself. The same spirit inspired Miss Bird's American missionaries, who had come thousands of miles to change the faith of Japan, and openly professed their ignorance of the religions they were trying to supplant.

I quote an American in this connection without scruple. Uncle Sam is better than John

## MEMORIES AND PORTRAITS

Bull, but he is tarred with the English stick. For Mr. Grant White the States are the New England States and nothing more. He wonders at the amount of drinking in London; let him try San Francisco. He wittily reproves English ignorance as to the status of women in America; but has he not himself forgotten Wyoming? The name Yankee, of which he is so tenacious, is used over the most of the great Union as a term of reproach. The Yankee States, of which he is so staunch a subject, are but a drop in the bucket. And we find in his book a vast virgin ignorance of the life and prospects of America; every view partial, parochial, not raised to the horizon; the moral feeling proper, at the largest, to a clique of States; and the whole scope and atmosphere not American, but merely Yankee. I will go far beyond him in reprobating the assumption and the incivility of my countryfolk to their cousins from beyond the sea; I grill in my blood over the silly rudeness of our newspaper articles; and I do not know where to look when I find myself in company with an American and see my countrymen unbending to him as to a performing dog. But in the case of Mr. Grant White example were better than precept. Wyoming is, after all, more readily accessible to Mr. White than Boston to the English, and the New England self-sufficiency no better justified than the Britannic.

## THE FOREIGNER AT HOME

It is so, perhaps, in all countries; perhaps in all, men are most ignorant of the foreigners at home. John Bull is ignorant of the States; he is probably ignorant of India; but considering his opportunities, he is far more ignorant of countries nearer his own door. There is one country, for instance—its frontier not so far from London, its people closely akin, its language the same in all essentials with the English—of which I will go bail he knows nothing. His ignorance of the sister kingdom cannot be described; it can only be illustrated by anecdote. I once travelled with a man of plausible manners and good intelligence,—a University man, as the phrase goes,—a man, besides, who had taken his degree in life and knew a thing or two about the age we live in. We were deep in talk, whirling between Peterborough and London; among other things, he began to describe some piece of legal injustice he had recently encountered, and I observed in my innocence that things were not so in Scotland. “I beg your pardon,” said he, “this is a matter of law.” He had never heard of the Scots law; nor did he choose to be informed. The law was the same for the whole country, he told me roundly; every child knew that. At last, to settle matters, I explained to him that I was a member of a Scottish legal body, and had stood the brunt of an examination in the very law in question. Thereupon he looked me for a moment full in

## MEMORIES AND PORTRAITS

the face and dropped the conversation. This is a monstrous instance, if you like, but it does not stand alone in the experience of Scots.

England and Scotland differ, indeed, in law, in history, in religion, in education, and in the very look of nature and men's faces, not always widely, but always trenchantly. Many particulars that struck Mr. Grant White, a Yankee, struck me, a Scot, no less forcibly; he and I felt ourselves foreigners on many common provocations. A Scotsman may tramp the better part of Europe and the United States, and never again receive so vivid an impression of foreign travel and strange lands and manners as on his first excursion into England. The change from a hilly to a level country strikes him with delighted wonder. Along the flat horizon there arise the frequent venerable towers of churches. He sees at the end of airy vistas the revolution of the windmill sails. He may go where he pleases in the future; he may see Alps, and pyramids, and lions; but it will be hard to beat the pleasure of that moment. There are, indeed, few merrier spectacles than that of many windmills bickering together in a fresh breeze over a woody country; their halting alacrity of movement, their pleasant business, making bread all day with uncouth gesticulations, their air, gigantically human, as of a creature half alive, put a spirit of romance into the tamest landscape. When the Scottish child sees them first he falls

## THE FOREIGNER AT HOME

immediately in love; and from that time forward windmills keep turning in his dreams. And so, in their degree, with every feature of the life and landscape. The warm, habitable age of towns and hamlets, the green, settled, ancient look of the country; the lush hedgerows, stiles and privy pathways in the fields; the sluggish, brimming rivers; chalk and smock-frocks; chimes of bells and the rapid, pertly-sounding English speech—they are all new to the curiosity; they are all set to English airs in the child's story that he tells himself at night. The sharp edge of novelty wears off; the feeling is scotched, but I doubt whether it is ever killed. Rather it keeps returning, ever the more rarely and strangely, and even in scenes to which you have been long accustomed suddenly awakes and gives a relish to enjoyment or heightens the sense of isolation.

One thing especially continues unfamiliar to the Scotsman's eye—the domestic architecture, the look of streets and buildings; the quaint, venerable age of many, and the thin walls and warm colouring of all. We have, in Scotland, far fewer ancient buildings, above all in country places; and those that we have are all of hewn or harled masonry. Wood has been sparingly used in their construction; the window-frames are sunken in the wall, not flat to the front, as in England; the roofs are steeper-pitched; even a hill farm will have a massy, square, cold and permanent appearance. Eng-

## MEMORIES AND PORTRAITS

lish houses, in comparison, have the look of cardboard toys, such as a puff might shatter. And to this the Scotsman never becomes used. His eye can never rest consciously on one of these brick houses—rickles of brick, as he might call them—or on one of these flat-chested streets, but he is instantly reminded where he is, and instantly travels back in fancy to his home. “This is no’ my ain house; I ken by the biggin’ o’t.” And yet perhaps it is his own, bought with his own money, the key of it long polished in his pocket; but it has not yet and never will be, thoroughly adopted by his imagination; nor does he cease to remember that, in the whole length and breadth of his native country, there was no building even distantly resembling it.

But it is not alone in scenery and architecture that we count England foreign. The constitution of society, the very pillars of the empire, surprise and even pain us. The dull, neglected peasant, sunk in matter, insolent, gross and servile, makes a startling contrast with our own long-legged, long-headed, thoughtful, Bible-quoting ploughman. A week or two in such a place as Suffolk leaves the Scotsman gasping. It seems incredible that within the boundaries of his own island a class should have been thus forgotten. Even the educated and intelligent, who hold our own opinions and speak in our own words, yet seem to hold them

## THE FOREIGNER AT HOME

with a difference or from another reason, and to speak on all things with less interest and conviction. The first shock of English society is like a cold plunge. It is possible that the Scot comes looking for too much, and to be sure his first experiment will be in the wrong direction. Yet surely his complaint is grounded; surely the speech of Englishmen is too often lacking in generous ardour, the better part of the man too often withheld from the social commerce, and the contact of mind with mind evaded as with terror. A Scottish peasant will talk more liberally out of his own experience. He will not put you by with conversational counters and small jests; he will give you the best of himself, like one interested in life and man's chief end. A Scotsman is vain, interested in himself and others, eager for sympathy, setting forth his thoughts and experience in the best light. The egoism of the Englishman is self-contained. He does not seek to proselytise. He takes no interest in Scotland or the Scots, and, what is the unkindest cut of all, he does not care to justify his indifference. Give him the wages of going on and being an Englishman, that is all he asks; and in the meantime, while you continue to associate, he would rather not be reminded of your baser origin. Compared with the grand, tree-like self-sufficiency of his demeanour, the vanity and curiosity of the Scot seem uneasy, vulgar and immodest. That you should continually try to

## MEMORIES AND PORTRAITS

establish human and serious relations, that you should actually feel an interest in John Bull, and desire and invite a return of interest from him, may argue something more awake and lively in your mind, but it still puts you in the attitude of a suitor and a poor relation. Thus even the lowest class of the educated English towers over a Scotsman by the head and shoulders.

Different indeed is the atmosphere in which Scottish and English youth begin to look about them, come to themselves in life, and gather up those first apprehensions which are the material of future thought and, to a great extent, the rule of future conduct. I have been to school in both countries, and I found, in the boys of the North, something at once rougher and more tender, at once more reserve and more expansion, a greater habitual distance chequered by glimpses of a nearer intimacy, and on the whole wider extremes of temperament and sensibility. The boy of the South seems more wholesome, but less thoughtful; he gives himself to games as to a business, striving to excel, but is not readily transported by imagination; the type remains with me as cleaner in mind and body, more active, fonder of eating, endowed with a lesser and a less romantic sense of life and of the future, and more immersed in present circumstances. And certainly, for one thing, English boys are younger for their age. Sabbath observance makes a series of grim, and perhaps serviceable,

## THE FOREIGNER AT HOME

pauses in the tenor of Scottish boyhood—days of great stillness and solitude for the rebellious mind, when in the dearth of books and play, and in the intervals of studying the Shorter Catechism, the intellect and senses prey upon and test each other. The typical English Sunday, with the huge midday dinner and the plethoric afternoon, leads perhaps to different results. About the very cradle of the Scot there goes a hum of metaphysical divinity; and the whole of two divergent systems is summed up, not merely speciously, in the two first questions of the rival catechisms, the English tritely inquiring, “What is your name?” the Scottish striking at the very roots of life with, “What is the chief end of man?” and answering nobly, if obscurely, “To glorify God and to enjoy Him for ever.” I do not wish to make an idol of the Shorter Catechism; but the fact of such a question being asked opens to us Scots a great field of speculation; and the fact that it is asked of all of us, from the peer to the ploughboy, binds us more nearly together. No Englishman of Byron’s age, character, and history, would have had patience for long theological discussions on the way to fight for Greece; but the daft Gordon blood and the Aberdonian schooldays kept their influence to the end. We have spoken of the material conditions; nor need much more be said of these: of the land lying everywhere more exposed, of the wind always louder and bleaker,

## MEMORIES AND PORTRAITS

of the black, roaring winters, of the gloom of high-lying, old stone cities, imminent on the windy seaboard; compared with the level streets, the warm colouring of the brick, the domestic quaintness of the architecture, among which English children begin to grow up and come to themselves in life. As the stage of the University approaches, the contrast becomes more express. The English lad goes to Oxford or Cambridge; there, in an ideal world of gardens, to lead a semi-scenic life, costumed, disciplined and drilled by proctors. Nor is this to be regarded merely as a stage of education; it is a piece of privilege besides, and a step that separates him further from the bulk of his compatriots. At an earlier age the Scottish lad begins his greatly different experience of crowded class-rooms, of a gaunt quadrangle, of a bell hourly booming over the traffic of the city to recall him from the public-house where he has been lunching, or the streets where he has been wandering fancy-free. His college life has little of restraint, and nothing of necessary gentility. He will find no quiet clique of the exclusive, studious and cultured; no rotten borough of the arts. All classes rub shoulders on the greasy benches. The raffish young gentleman in gloves must measure his scholarship with the plain, clownish laddie from the parish school. They separate, at the session's end, one to smoke cigars about a watering-place, the other to re-

## THE FOREIGNER AT HOME

sume the labours of the field beside his peasant family. The first muster of a college class in Scotland is a scene of curious and painful interest; so many lads, fresh from the heather, hang round the stove in cloddish embarrassment, ruffled by the presence of their smarter comrades, and afraid of the sound of their own rustic voices. It was in these early days, I think, that Professor Blackie won the affection of his pupils, putting these uncouth, umbrageous students at their ease with ready human geniality. Thus, at least, we have a healthy democratic atmosphere to breathe in while at work; even when there is no cordiality there is always a juxtaposition of the different classes, and in the competition of study the intellectual power of each is plainly demonstrated to the other. Our tasks ended, we of the North go forth as freemen into the humming, lamplit city. At five o'clock you may see the last of us hiving from the college gates, in the glare of the shop windows, under the green glimmer of the winter sunset. The frost tingles in our blood; no proctor lies in wait to intercept us; till the bell sounds again, we are the masters of the world; and some portion of our lives is always Saturday, *la trêve de Dieu*.

Nor must we omit the sense of the nature of his country and his country's history gradually growing in the child's mind from story and from observation. A Scottish child hears much of

## MEMORIES AND PORTRAITS

shipwreck, outlying iron skerries, pitiless breakers, and great sea-lights; much of heathery mountains, wild clans, and hunted Covenanters. Breaths come to him in song of the distant Cheviots and the ring of foraying hoofs. He glories in his hard-fisted forefathers, of the iron girdle and the handful of oatmeal, who rode so swiftly and lived so sparsely on their raids. Poverty, ill-luck, enterprise, and constant resolution are the fibres of the legend of his country's history. The heroes and kings of Scotland have been tragically fated; the most marking incidents in Scottish history—Flodden, Darien, or the Forty-five—were still either failures or defeats; and the fall of Wallace and the repeated reverses of the Bruce combine with the very smallness of the country to teach rather a moral than a material criterion for life. Britain is altogether small, the mere taproot of her extended empire; Scotland, again, which alone the Scottish boy adopts in his imagination, is but a little part of that, and avowedly cold, sterile and unpopulous. It is not so for nothing. I once seemed to have perceived in an American boy a greater readiness of sympathy for lands that are great, and rich, and growing, like his own. It proved to be quite otherwise: a mere dumb piece of boyish romance, that I had lacked penetration to divine. But the error serves the purpose of my argument; for I am sure, at least, that the heart of young Scotland will be always touched more

## THE FOREIGNER AT HOME

nearly by paucity of number and Spartan poverty of life.

So we may argue, and yet the difference is not explained. That Shorter Catechism which I took as being so typical of Scotland, was yet composed in the city of Westminster. The division of races is more sharply marked within the borders of Scotland itself than between the countries. Galloway and Buchan, Lothian and Lochar, are like foreign parts; yet you may choose a man from any of them, and, ten to one, he shall prove to have the headmark of a Scot. A century and a half ago the Highlander wore a different costume, spoke a different language, worshipped in another church, held different morals, and obeyed a different social constitution from his fellow-countrymen either of the south or north. Even the English, it is recorded, did not loathe the Highlander and the Highland costume as they were loathed by the remainder of the Scots. Yet the Highlander felt himself a Scot. He would willingly raid into the Scottish lowlands; but his courage failed him at the border, and he regarded England as a perilous, unhomely land. When the Black Watch, after years of foreign service, returned to Scotland, veterans leaped out and kissed the earth at Port Patrick. They had been in Ireland, stationed among men of their own race and language, where they were well liked and treated with affection; but it was the soil of Galloway

## MEMORIES AND PORTRAITS

that they kissed at the extreme end of the hostile lowlands, among a people who did not understand their speech, and who had hated, harried, and hanged them since the dawn of history. Last, and perhaps most curious, the sons of chieftains were often educated on the continent of Europe. They went abroad speaking Gaelic; they returned speaking, not English, but the broad dialect of Scotland. Now, what idea had they in their minds when they thus, in thought, identified themselves with their ancestral enemies? What was the sense in which they were Scottish and not English, or Scottish and not Irish? Can a bare name be thus influential on the minds and affections of men, and a political aggregation blind them to the nature of facts? The story of the Austrian Empire would seem to answer, No; the far more galling business of Ireland clenches the negative from nearer home. Is it common education, common morals, a common language or a common faith, that join men into nations? There were practically none of these in the case we are considering.

The fact remains: in spite of the difference of blood and language, the Lowlander feels himself the sentimental countryman of the Highlander. When they meet abroad, they fall upon each other's necks in spirit; even at home there is a kind of clannish intimacy in their talk. But from his compatriot in the south the Lowlander stands consciously apart. He has had a

## THE FOREIGNER AT HOME

different training; he obeys different laws; he makes his will in other terms, is otherwise divorced and married; his eyes are not at home in an English landscape or with English houses; his ear continues to remark the English speech; and even though his tongue acquire the Southern knack, he will still have a strong Scots accent of the mind.

## II

### SOME COLLEGE MEMORIES

I AM asked to write something (it is not specifically stated what) to the profit and glory of my *Alma Mater*; and the fact is I seem to be in very nearly the same case with those who addressed me, for while I am willing enough to write something, I know not what to write. Only one point I see, that if I am to write at all, it should be of the University itself and my own days under its shadow; of the things that are still the same and of those that are already changed: such talk, in short, as would pass naturally between a student of to-day and one of yesterday, supposing them to meet and grow confidential.

The generations pass away swiftly enough on the high seas of life; more swiftly still in the little bubbling backwater of the quadrangle; so that we see there, on a scale startlingly diminished, the flight of time and the succession of men. I looked for my name the other day in last year's case-book of the Speculative. Naturally enough I looked for it near the end; it was not there, nor

## SOME COLLEGE MEMORIES

yet in the next column, so that I began to think it had been dropped at press; and when at last I found it, mounted on the shoulders of so many successors, and looking in that posture like the name of a man of ninety, I was conscious of some of the dignity of years. This kind of dignity of temporal precession is likely, with prolonged life, to become more familiar, possibly less welcome; but I felt it strongly then, it is strongly on me now, and I am the more emboldened to speak with my successors in the tone of a parent and a praiser of things past.

For, indeed, that which they attend is but a fallen University; it has doubtless some remains of good, for human institutions decline by gradual stages; but decline, in spite of all seeming embellishments, it does; and what is perhaps more singular, began to do so when I ceased to be a student. Thus, by an odd chance, I had the very last of the very best of *Alma Mater*; the same thing, I hear (which makes it the more strange), had previously happened to my father; and if they are good and do not die, something not at all unsimilar will be found in time to have befallen my successors of to-day. Of the specific points of change, of advantage in the past, of shortcoming in the present, I must own that, on a near examination, they look wondrous cloudy. The chief and far the most lamentable change is the absence of a certain lean, ugly, idle, unpopular student, whose presence was for

## MEMORIES AND PORTRAITS

me the gist and heart of the whole matter; whose changing humours, fine occasional purposes of good, flinching acceptance of evil, shiverings on wet, east-windy, morning journeys up to class, infinite yawnings during lecture and unquenchable gusto in the delights of truantry, made up the sunshine and shadow of my college life. You cannot fancy what you missed in missing him; his virtues, I make sure, are inconceivable to his successors, just as they were apparently concealed from his contemporaries, for I was practically alone in the pleasure I had in his society. Poor soul, I remember how much he was cast down at times, and how life (which had not yet begun) seemed to be already at an end, and hope quite dead, and misfortune and dishonour, like physical presences, dogging him as he went. And it may be worth while to add that these clouds rolled away in their season, and that all clouds roll away at last, and the troubles of youth in particular are things but of a moment. So this student, whom I have in my eye, took his full share of these concerns, and that very largely by his own fault; but he still clung to his fortune, and in the midst of much misconduct, kept on in his own way learning how to work; and at last, to his wonder, escaped out of the stage of studentship not openly shamed; leaving behind him the University of Edinburgh shorn of a good deal of its interest for myself.

But while he is (in more senses than one) the

## SOME COLLEGE MEMORIES

first person, he is by no means the only one whom I regret, or whom the students of to-day, if they knew what they had lost, would regret also. They have still Tait, to be sure—long may they have him!—and they have still Tait's classroom, cupola and all; but think of what a different place it was when this youth of mine (at least on roll days) would be present on the benches, and at the near end of the platform, Lindsay senior was airing his robust old age. It is possible my successors may have never even heard of Old Lindsay; but when he went, a link snapped with the last century. He had something of a rustic air, sturdy and fresh and plain; he spoke with a ripe east-country accent which I used to admire; his reminiscences were all of journeys on foot or highways busy with post-chaises—a Scotland before steam; he had seen the coal fire on the Isle of May, and he regaled me with tales of my own grandfather. Thus he was for me a mirror of things perished; it was only in his memory that I could see the huge shock of flames of the May beacon stream to leeward, and the watchers, as they fed the fire, lay hold unscorched of the windward bars of the furnace; it was only thus that I could see my grandfather driving swiftly in a gig along the seaboard road from Pittenweem to Crail, and for all his business hurry, drawing up to speak good-humouredly with those he met. And now, in his turn, Lindsay is gone also; inhabits only

## MEMORIES AND PORTRAITS

the memories of other men, till these shall follow him; and figures in my reminiscences as my grandfather figured in his.

To-day, again, they have Professor Butcher, and I hear he has a prodigious deal of Greek; and they have Professor Chrystal, who is a man filled with the mathematics. And doubtless these are set-offs. But they cannot change the fact that Professor Blackie has retired, and that Professor Kelland is dead. No man's education is complete or truly liberal who knew not Kelland. There were unutterable lessons in the mere sight of that frail old clerical gentleman, lively as a boy, kind like a fairy godfather, and keeping perfect order in his class by the spell of that very kindness. I have heard him drift into reminiscences in class-time, though not for long, and give us glimpses of old-world life in out-of-the-way English parishes when he was young; thus playing the same part as Lindsay—the part of the surviving memory, signalling out of the dark backward and abysm of time the images of perished things. But it was a part that scarce became him; he somehow lacked the means: for all his silver hair and worn face, he was not truly old; and he had too much of the unrest and petulant fire of youth, and too much invincible innocence of mind, to play the veteran well. The time to measure him best, to taste (in the old phrase) his gracious nature, was when he received his class at home.

## SOME COLLEGE MEMORIES

What a pretty simplicity would he then show, trying to amuse us like children with toys; and what an engaging nervousness of manner, as fearing that his efforts might not succeed! Truly he made us all feel like children, and like children embarrassed, but at the same time filled with sympathy for the conscientious, troubled elderly boy who was working so hard to entertain us. A theorist has held the view that there is no feature in man so tell-tale as his spectacles; that the mouth may be compressed and the brow smoothed artificially, but the sheen of the barnacles is diagnostic. And truly it must have been thus with Kelland; for as I still fancy I behold him frisking actively about the platform, pointer in hand, that which I seem to see most clearly is the way his glasses glittered with affection. I never knew but one other man who had (if you will permit the phrase) so kind a spectacle; and that was Dr. Appleton.<sup>1</sup> But the light in his case was tempered and passive; in Kelland's it danced, and changed, and flashed vivaciously among the students, like a perpetual challenge to goodwill.

I cannot say so much about Professor Blackie, for a good reason. Kelland's class I attended, once even gained there a certificate of merit, the only distinction of my University career. But although I am the holder of a certificate of attendance in the Professor's own hand, I can-

<sup>1</sup>Founder and first editor of the *Academy*.

## MEMORIES AND PORTRAITS

not remember to have been present in the Greek class above a dozen times. Professor Blackie was even kind enough to remark (more than once) while in the very act of writing the document above referred to, that he did not know my face. Indeed, I denied myself many opportunities; acting upon an extensive and highly rational system of truancy, which cost me a great deal of trouble to put in exercise—perhaps as much as would have taught me Greek—and sent me forth into the world and the profession of letters with the merest shadow of an education. But they say it is always a good thing to have taken pains, and that success is its own reward, whatever be its nature; so that, perhaps, even upon this I should plume myself, that no one ever played the truant with more deliberate care, and none ever had more certificates for less education. One consequence, however, of my system is that I have much less to say of Professor Blackie than I had of Professor Kelland; and as he is still alive, and will long, I hope, continue to be so, it will not surprise you very much that I have no intention of saying it.

Meanwhile, how many others have gone—Jenkin, Hodgson, and I know not who besides; and of that tide of students that used to throng the arch and blacken the quadrangle, how many are scattered into the remotest parts of the earth, and how many more have lain down beside their fathers in their “resting-graves!”

## SOME COLLEGE MEMORIES .

And again, how many of these last have not found their way there, all too early, through the stress of education! That was one thing, at least, from which my truantry protected me. I am sorry indeed that I have no Greek, but I should be sorrier still if I were dead; nor do I know the name of that branch of knowledge which is worth acquiring at the price of a brain fever. There are many sordid tragedies in the life of the student, above all if he be poor, or drunken, or both; but nothing more moves a wise man's pity than the case of the lad who is in too much hurry to be learned. And so, for the sake of a moral at the end, I will call up one more figure, and have done. A student, ambitious of success by that hot, intemperate manner of study that now grows so common, read night and day for an examination. As he went on, the task became more easy to him, sleep was more easily banished, his brain grew hot and clear and more capacious, the necessary knowledge daily fuller and more orderly. It came to the eve of the trial and he watched all night in his high chamber, reviewing what he knew, and already secure of success. His window looked eastward, and being (as I said) high up, and the house itself standing on a hill, commanded a view over dwindling suburbs to a country horizon. At last my student drew up his blind, and still in quite a jocund humour, looked abroad. Day was breaking, the east was tinging with

## MEMORIES AND PORTRAITS

strange fires, the clouds breaking up for the coming of the sun; and at the sight, nameless terror seized upon his mind. He was sane, his senses were undisturbed; he saw clearly, and knew what he was seeing, and knew that it was normal; but he could neither bear to see it nor find the strength to look away, and fled in panic from his chamber into the enclosure of the street. In the cool air and silence, and among the sleeping houses, his strength was renewed. Nothing troubled him but the memory of what had passed, and an abject fear of its return.

*“Gallo canente, spes redit,  
Aegris salus refunditur,  
Lapsis fides revertitur,”*

as they sang of old in Portugal in the Morning Office. But to him that good hour of cock-crow, and the changes of the dawn, had brought panic, and lasting doubt, and such terror as he still shook to think of. He dared not return to his lodging; he could not eat; he sat down, he rose up, he wandered; the city woke about him with its cheerful bustle, the sun climbed overhead; and still he grew but the more absorbed in the distress of his recollection and the fear of his past fear. At the appointed hour, he came to the door of the place of examination; but when he was asked, he had forgotten his name. Seeing him so disordered, they had not the heart to send him away, but gave him a paper

## SOME COLLEGE MEMORIES

and admitted him, still nameless, to the Hall. Vain kindness, vain efforts. He could only sit in a still growing horror, writing nothing, ignorant of all, his mind filled with a single memory of the breaking day and his own intolerable fear. And that same night he was tossing in a brain fever.

People are afraid of war and wounds and dentists, all with excellent reason; but these are not to be compared with such chaotic terrors of the mind as fell on this young man, and made him cover his eyes from the innocent morning. We all have by our bedsides the box of the Merchant Abudah, thank God, securely enough shut; but when a young man sacrifices sleep to labour, let him have a care, for he is playing with the lock.

### III

## OLD MORTALITY

#### I

**T**HERE is a certain graveyard, looked upon on the one side by a prison, on the other by the windows of a quiet hotel; below, under a steep cliff, it beholds the traffic of many lines of rail, and the scream of the engine and the shock of meeting buffers mount to it all day long. The aisles are lined with the inclosed sepulchres of families, door beyond door, like houses in the street; and in the morning the shadows of the prison turrets, and of many tall memorials, fall upon the graves. There, in the hot fits of youth, I came to be unhappy. Pleasant incidents are woven with my memory of the place. I here made friends with a certain plain old gentleman, a visitor on sunny mornings, gravely cheerful, who, with one eye upon the place that awaited him, chirped about his youth like winter sparrows; a beautiful housemaid of the hotel once, for some days together, dumbly flirted with me from a window and kept my wild heart flying; and once—she possibly re-

## OLD MORTALITY

members—the wise Eugenia followed me to that austere inclosure. Her hair came down, and in the shelter of the tomb my trembling fingers helped her to repair the braid. But for the most part I went there solitary and, with irrevocable emotion, pored on the names of the forgotten. Name after name, and to each the conventional attributions and the idle dates: a regiment of the unknown that had been the joy of mothers, and had thrilled with the illusions of youth, and at last, in the dim sick-room, wrestled with the pangs of old mortality. In that whole crew of the silenced there was but one of whom my fancy had received a picture; and he, with his comely, florid countenance, bewigged and habited in scarlet, and in his day combining fame and popularity, stood forth, like a taunt, among that company of phantom appellations. It was then possible to leave behind us something more explicit than these severe, monotonous, and lying epitaphs; and the thing left, the memory of a painted picture and what we call the immortality of a name, was hardly more desirable than mere oblivion. Even David Hume, as he lay composed beneath that “circular idea,” was fainter than a dream; and when the housemaid, broom in hand, smiled and beckoned from the open window, the fame of that bewigged philosopher melted like a rain-drop in the sea.

And yet in soberness I cared as little for the

## MEMORIES AND PORTRAITS

housemaid as for David Hume. The interests of youth are rarely frank; his passions, like Noah's dove, come home to roost. The fire, sensibility, and volume of his own nature, that is all that he has learned to recognise. The tumultuary and grey tide of life, the empire of routine, the unrejoicing faces of his elders, fill him with contemptuous surprise; there also he seems to walk among the tombs of spirits; and it is only in the course of years, and after much rubbing with his fellow-men, that he begins by glimpses to see himself from without and his fellows from within: to know his own for one among the thousand undenoted countenances of the city street, and to divine in others the throb of human agony and hope. In the meantime he will avoid the hospital doors, the pale faces, the cripple, the sweet whiff of chloroform—for there, on the most thoughtless, the pains of others are burned home; but he will continue to walk, in a divine self-pity, the aisles of the forgotten graveyard. The length of man's life, which is endless to the brave and busy, is scorned by his ambitious thought. He cannot bear to have come for so little, and to go again so wholly. He cannot bear, above all, in that brief scene, to be still idle, and by way of cure, neglects the little that he has to do. The parable of the talent is the brief epitome of youth. To believe in immortality is one thing, but it is first needful to believe in life. Denunciatory

## OLD MORTALITY

preachers seem not to suspect that they may be taken gravely and in evil part; that young men may come to think of time as of a moment, and with the pride of Satan wave back the inadequate gift. Yet here is a true peril; this it is that sets them to pace the graveyard alleys and to read, with strange extremes of pity and derision, the memorials of the dead.

Books were the proper remedy: books of vivid human import, forcing upon their minds the issues, pleasures, busyness, importance and immediacy of that life in which they stand; books of smiling or heroic temper, to excite or to console; books of a large design, shadowing the complexity of that game of consequences to which we all sit down, the hanger-back not least. But the average sermon flees the point, disporting itself in that eternity of which we know, and need to know, so little; avoiding the bright, crowded, and momentous fields of life where destiny awaits us. Upon the average book a writer may be silent; he may set it down to his ill-hap that when his own youth was in the acrid fermentation, he should have fallen and fed upon the cheerless fields of Obermann. Yet to Mr. Matthew Arnold, who led him to these pastures, he still bears a grudge. The day is perhaps not far off when people will begin to count *Moll Flanders*, ay, or *The Country Wife*, more wholesome and more pious diet than these guide-books to consistent egoism.

## MEMORIES AND PORTRAITS

But the most inhuman of boys soon wearies of the inhumanity of Obermann. And even while I still continued to be a haunter of the graveyard, I began insensibly to turn my attention to the grave-diggers, and was weaned out of myself to observe the conduct of visitors. This was dayspring, indeed, to a lad in such great darkness. Not that I began to see men, or to try to see them, from within, nor to learn charity and modesty and justice from the sight; but still stared at them externally from the prison windows of my affectation. Once I remember to have observed two working-women with a baby halting by a grave; there was something monumental in the grouping, one upright carrying the child, the other with bowed face crouching by her side. A wreath of immortelles under a glass dome had thus attracted them; and, drawing near, I overheard their judgment on that wonder. "Eh! what extravagance!" To a youth afflicted with the callosity of sentiment, this quaint and pregnant saying appeared merely base.

My acquaintance with grave-diggers, considering its length, was unremarkable. One, indeed, whom I found plying his spade in the red evening, high above Allan Water and in the shadow of Dunblane Cathedral, told me of his acquaintance with the birds that still attended on his labours; how some would even perch about him, waiting for their prey; and in a true Sex-

## OLD MORTALITY

ton's Calendar, how the species varied with the season of the year. But this was the very poetry of the profession. The others whom I knew were somewhat dry. A faint flavour of the gardener hung about them, but sophisticated and disbloomed. They had engagements to keep, not alone with the deliberate series of the seasons, but with mankind's clocks and hour-long measurement of time. And thus there was no leisure for the relishing pinch, or the hour-long gossip, foot on spade. They were men wrapped up in their grim business; they liked well to open long-closed family vaults, blowing in the key and throwing wide the grating; and they carried in their minds a calendar of names and dates. It would be "in fifty-twa" that such a tomb was last opened for "Miss Jemimy." It was thus they spoke of their past patients—familiarly but not without respect, like old family servants. Here is indeed a servant, whom we forget that we possess; who does not wait at the bright table, or run at the bell's summons, but patiently smokes his pipe beside the mortuary fire, and in his faithful memory notches the burials of our race. To suspect Shakespeare in his maturity of a superficial touch savours of paradox; yet he was surely in error when he attributed insensibility to the digger of the grave. But perhaps it is on Hamlet that the charge should lie; or perhaps the English sexton differs from the Scottish. The "good-man delver,"

## MEMORIES AND PORTRAITS

reckoning up his years of office, might have at least suggested other thoughts. It is a pride common among sextons. A cabinet-maker does not count his cabinets, nor even an author his volumes, save when they stare upon him from the shelves; but the grave-digger numbers his graves. He would indeed be something different from human if his solitary open-air and tragic labours left not a broad mark upon his mind. There, in his tranquil aisle, apart from city clamour, among the cats and robins and the ancient effigies and legends of the tomb, he waits the continual passage of his contemporaries, falling like minute drops into eternity. As they fall, he counts them; and this enumeration, which was at first perhaps appalling to his soul, in the process of years and by the kindly influence of habit grows to be his pride and pleasure. There are many common stories telling how he piques himself on crowded cemeteries. But I will rather tell of the old grave-digger of Monkton, to whose unsuffering bedside the minister was summoned. He dwelt in a cottage built into the wall of the churchyard; and through a bull's-eye pane above his bed he could see, as he lay dying, the rank grasses and the upright and recumbent stones. Dr. Laurie was, I think, a Moderate: 'tis certain, at least, that he took a very Roman view of death-bed dispositions; for he told the old man that he had lived beyond man's natural years, that his life had been easy

## OLD MORTALITY

and reputable, that his family had all grown up and been a credit to his care, and that it now behoved him unregretfully to gird his loins and follow the majority. The grave-digger heard him out; then he raised himself upon one elbow, and with the other hand pointed through the window to the scene of his life-long labours. "Doctor," he said, "I hae laid three hunner and fower-score in that kirkyaird; an it had been His wull," indicating Heaven, "I would hae likit weel to hae made out the fower hunner." But it was not to be; this tragedian of the fifth act had now another part to play; and the time had come when others were to gird and carry him.

### II

I would fain strike a note that should be more heroical; but the ground of all youth's suffering, solitude, hysteria, and haunting of the grave, is nothing else than naked, ignorant selfishness. It is himself that he sees dead; those are his virtues that are forgotten; his is the vague epitaph. Pity him but the more, if pity be your cue; for where a man is all pride, vanity, and personal aspiration, he goes through fire unshielded. In every part and corner of our life, to lose oneself is to be gainer; to forget oneself is to be happy; and this poor, laughable and tragic fool has not yet learned the rudiments; himself, giant Prometheus, is still ironed on the peaks of Caucasus. But by and by his truant interests will leave that

## MEMORIES AND PORTRAITS

tortured body, slip abroad and gather flowers. Then shall death appear before him in an altered guise; no longer as a doom peculiar to himself, whether fate's crowning injustice or his own last vengeance upon those who fail to value him; but now as a power that wounds him far more tenderly, not without solemn compensations, taking and giving, bereaving and yet storing up.

The first step for all is to learn to the dregs our own ignoble fallibility. When we have fallen through story after story of our vanity and aspiration, and sit rueful among the ruins, then it is that we begin to measure the stature of our friends: how they stand between us and our own contempt, believing in our best; how, linking us with others, and still spreading wide the influential circle, they weave us in and in with the fabric of contemporary life; and to what petty size they dwarf the virtues and the vices that appeared gigantic in our youth. So that at the last, when such a pin falls out—when there vanishes in the least breath of time one of those rich magazines of life on which we drew for our supply—when he who had first dawned upon us as a face among the faces of the city, and, still growing, came to bulk on our regard with those clear features of the loved and living man, falls in a breath to memory and shadow, there falls along with him a whole wing of the palace of our life.

## OLD MORTALITY

### III

One such face I now remember; one such blank some half a dozen of us labour to dissemble. In his youth he was most beautiful in person, most serene and genial by disposition; full of racy words and quaint thoughts. Laughter attended on his coming. He had the air of a great gentleman, jovial and royal with his equals, and to the poorest student gentle and attentive. Power seemed to reside in him exhaustless; we saw him stoop to play with us, but held him marked for higher destinies; we loved his notice; and I have rarely had my pride more gratified than when he sat at my father's table, my acknowledged friend. So he walked among us, both hands full of gifts, carrying with nonchalance the seeds of a most influential life.

The powers and the ground of friendship is a mystery; but, looking back, I can discern that, in part, we loved the thing he was, for some shadow of what he was to be. For with all his beauty, power, breeding, urbanity, and mirth, there was in those days something soulless in our friend. He would astonish us by sallies, witty, innocent and inhumane; and by a misapplied Johnsonian pleasantry, demolish honest sentiment. I can still see and hear him, as he went his way along the lamplit streets, *Là ci darem la mano* on his lips, a noble figure of a youth, but following vanity and incredulous of

## MEMORIES AND PORTRAITS

good; and sure enough, somewhere on the high seas of life, with his health, his hopes, his patrimony, and his self-respect, miserably went down.

From this disaster, like a spent swimmer, he came desperately ashore, bankrupt of money and consideration; creeping to the family he had deserted; with broken wing, never more to rise. But in his face there was a light of knowledge that was new to it. Of the wounds of his body he was never healed; died of them gradually, with clear-eyed resignation; of his wounded pride, we knew only from his silence. He returned to that city where he had lorded it in his ambitious youth; lived there alone, seeing few; striving to retrieve the irretrievable; at times still grappling with that mortal frailty that had brought him down; still joying in his friend's successes; his laugh still ready but with kindlier music; and over all his thoughts the shadow of that unalterable law which he had disavowed and which had brought him low. Lastly, when his bodily evils had quite disabled him, he lay a great while dying, still without complaint, still finding interests; to his last step gentle, urbane, and with the will to smile.

The tale of this great failure is, to those who remained true to him, the tale of a success. In his youth he took thought for no one but himself; when he came ashore again, his whole armada lost, he seemed to think of none but others. Such was his tenderness for others, such his in-

## OLD MORTALITY

stinct of fine courtesy and pride, that of that impure passion of remorse he never breathed a syllable; even regret was rare with him, and pointed with a jest. You would not have dreamed, if you had known him then, that this was that great failure, that beacon to young men, over whose fall a whole society had hissed and pointed fingers. Often have we gone to him, red-hot with our own hopeful sorrows, railing on the rose-leaves in our princely bed of life, and he would patiently give ear and wisely counsel; and it was only upon some return of our own thoughts that we were reminded what manner of man this was to whom we disembosomed: a man, by his own fault, ruined, shut out of the garden of his gifts; his whole city of hope both ploughed and salted; silently awaiting the deliverer. Then something took us by the throat; and to see him there, so gentle, patient, brave, and pious, oppressed but not cast down, sorrow was so swallowed up in admiration that we could not dare to pity him. Even if the old fault flashed out again, it but awoke our wonder that, in that lost battle, he should have still the energy to fight. He had gone to ruin with a kind of kingly *abandon*, like one who condescended; but once ruined, with the lights all out, he fought as for a kingdom. Most men, finding themselves the authors of their own disgrace, rail the louder against God or destiny. Most men, when they repent, oblige their friends to share the bitter-

## MEMORIES AND PORTRAITS

ness of that repentance. But he had held an inquest and passed sentence: *mene, mene*; and condemned himself to smiling silence. He had given trouble enough; had earned misfortune amply, and foregone the right to murmur.

Thus was our old comrade, like Samson, careless in his days of strength; but on the coming of adversity, and when that strength was gone that had betrayed him—"for our strength is weakness"—he began to blossom and bring forth. Well, now, he is out of the fight: the burden that he bore thrown down before the great deliverer. We

"in the vast cathedral leave him:  
God accept him,  
Christ receive him!"

### IV

If we go now and look on these innumerable epitaphs, the pathos and the irony are strangely fled. They do not stand merely to the dead, these foolish monuments; they are pillars and legends set up to glorify the difficult but not desperate life of man. This ground is hallowed by the heroes of defeat.

I see the indifferent pass before my friend's last resting-place; pause, with a shrug of pity, marvelling that so rich an argosy had sunk. A pity, now that he is done with suffering, a pity most uncalled for, and an ignorant wonder. Before those who loved him, his memory shines like a reproach; they honour him for silent les-

## OLD MORTALITY

sons; they cherish his example; and in what remains before them of their toil, fear to be unworthy of the dead. For this proud man was one of those who prospered in the valley of humiliation;—of whom Bunyan wrote that, “Though Christian had the hard hap to meet in the valley with Apollyon, yet I must tell you, that in former times men have met with angels here; have found pearls here; and have in this place found the words of life.”

IV  
A COLLEGE MAGAZINE

I

ALL through my boyhood and youth, I was known and pointed out for the pattern of an idler; and yet I was always busy on my own private end, which was to learn to write. I kept always two books in my pocket, one to read, one to write in. As I walked, my mind was busy fitting what I saw with appropriate words; when I sat by the roadside, I would either read, or a pencil and a penny version-book would be in my hand, to note down the features of the scene or commemorate some halting stanzas. Thus I lived with words. And what I thus wrote was for no ulterior use, it was written consciously for practice. It was not so much that I wished to be an author (though I wished that too) as that I had vowed that I would learn to write. That was a proficiency that tempted me; and I practised to acquire it, as men learn to whittle, in a wager with myself. Description was the principal field of my exercise; for to any one with senses there is always something

## A COLLEGE MAGAZINE

worth describing, and town and country are but one continuous subject. But I worked in other ways also; often accompanied my walks with dramatic dialogues, in which I played many parts; and often exercised myself in writing down conversations from memory.

This was all excellent, no doubt; so were the diaries I sometimes tried to keep, but always and very speedily discarded, finding them a school of posturing and melancholy self-deception. And yet this was not the most efficient part of my training. Good though it was, it only taught me (so far as I have learned them at all) the lower and less intellectual elements of the art, the choice of the essential note and the right word: things that to a happier constitution had perhaps come by nature. And regarded as training, it had one grave defect; for it set me no standard of achievement. So that there was perhaps more profit, as there was certainly more effort, in my secret labours at home. Whenever I read a book or a passage that particularly pleased me, in which a thing was said or an effect rendered with propriety, in which there was either some conspicuous force or some happy distinction in the style, I must sit down at once and set myself to ape that quality. I was unsuccessful, and I knew it; and tried again, and was again unsuccessful and always unsuccessful; but at least in these vain bouts, I got some practice in rhythm, in harmony, in con-

## MEMORIES AND PORTRAITS

struction and the co-ordination of parts. I have thus played the sedulous ape to Hazlitt, to Lamb, to Wordsworth, to Sir Thomas Browne, to Defoe, to Hawthorne, to Montaigne, to Baudelaire, and to Obermann. I remember one of these monkey tricks, which was called *The Vanity of Morals*: it was to have had a second part, *The Vanity of Knowledge*; and as I had neither morality nor scholarship, the names were apt; but the second part was never attempted, and the first part was written (which is my reason for recalling it, ghost-like, from its ashes) no less than three times: first in the manner of Hazlitt, second in the manner of Ruskin who had cast on me a passing spell, and third, in a laborious pasticcio of Sir Thomas Browne. So with my other works: *Cain*, an epic, was (save the mark!) an imitation of *Sordello*: *Robin Hood*, a tale in verse, took an eclectic middle course among the fields of Keats, Chaucer, and Morris: in *Monmouth*, a tragedy, I reclined on the bosom of Mr. Swinburne; in my innumerable gouty-footed lyrics, I followed many masters; in the first draft of *The King's Pardon*, a tragedy, I was on the trail of no lesser man than John Webster; in the second draft of the same piece, with staggering versatility, I had shifted my allegiance to Congreve, and of course conceived my fable in a less serious vein—for it was not Congreve's verse, it was his exquisite prose, that I admired and sought to copy. Even at the age of thirteen I had tried to do jus-

## A COLLEGE MAGAZINE

tice to the inhabitants of the famous city of Peebles in the style of the *Book of Snobs*. So I might go on for ever, through all my abortive novels, and down to my later plays of which I think more tenderly, for they were not only conceived at first under the bracing influence of old Dumas, but have met with resurrections: one, strangely bettered by another hand, came on the stage itself and was played by bodily actors; the other, originally known as *Semiramis: a Tragedy*, I have observed on bookstalls under the alias of *Prince Otto*. But enough has been said to show by what arts of impersonation, and in what purely ventriloquial efforts I first saw my words on paper.

That, like it or not, is the way to learn to write; whether I have profited or not, that is the way. It was so Keats learned, and there was never a finer temperament for literature than Keats's; it was so, if we could trace it out, that all men have learned; and that is why a revival of letters is always accompanied or heralded by a cast back to earlier and fresher models. Perhaps I hear some one cry out: But this is not the way to be original! It is not; nor is there any way but to be born so. Nor yet, if you are born original, is there anything in this training that shall clip the wings of your originality. There can be none more original than Montaigne, neither could any be more unlike Cicero; yet no craftsman can fail to see how much the one

## MEMORIES AND PORTRAITS

must have tried in his time to imitate the other. Burns is the very type of a prime force in letters: he was of all men the most imitative. Shakespeare himself, the imperial, proceeds directly from a school. It is only from a school that we can expect to have good writers; it is almost invariably from a school that great writers, these lawless exceptions, issue. Nor is there anything here that should astonish the considerate. Before he can tell what cadences he truly prefers, the student should have tried all that are possible; before he can choose and preserve a fitting key of words, he should long have practised the literary scales; and it is only after years of such gymnastic that he can sit down at last, legions of words swarming to his call, dozens of turns of phrase simultaneously bidding for his choice, and he himself knowing what he wants to do and (within the narrow limit of a man's ability) able to do it.

And it is the great point of these imitations that there still shines beyond the student's reach his inimitable model. Let him try as he please, he is still sure of failure; and it is a very old and a very true saying that failure is the only high-road to success. I must have had some disposition to learn; for I clear-sightedly condemned my own performances. I liked doing them indeed; but when they were done, I could see they were rubbish. In consequence, I very rarely showed them even to my friends; and such

## A COLLEGE MAGAZINE

friends as I chose to be my confidants I must have chosen well, for they had the friendliness to be quite plain with me. "Padding," said one. Another wrote: "I cannot understand why you do lyrics so badly." No more could I! Thrice I put myself in the way of a more authoritative rebuff, by sending a paper to a magazine. These were returned; and I was not surprised nor even pained. If they had not been looked at, as (like all amateurs) I suspected was the case, there was no good in repeating the experiment; if they had been looked at—well, then I had not yet learned to write, and I must keep on learning and living. Lastly, I had a piece of good fortune which is the occasion of this paper, and by which I was able to see my literature in print, and to measure experimentally how far I stood from the favour of the public.

### II

The Speculative Society is a body of some antiquity, and has counted among its members Scott, Brougham, Jeffrey, Horner, Benjamin Constant, Robert Emmet, and many a legal and local celebrity besides. By an accident, variously explained, it has its rooms in the very buildings of the University of Edinburgh: a hall, Turkey-carpeted, hung with pictures, looking, when lighted up at night with fire and candle, like some goodly dining-room; a passage-like library, walled with books in their wire

## MEMORIES AND PORTRAITS

cages; and a corridor with a fireplace, benches, a table, many prints of famous members, and a mural tablet to the virtues of a former secretary. Here a member can warm himself and loaf and read; here, in defiance of *Senatus-consults*, he can smoke. The *Senatus* looks askance at these privileges; looks even with a somewhat vinegar aspect on the whole society; which argues a lack of proportion in the learned mind, for the world, we may be sure, will prize far higher this haunt of dead lions than all the living dogs of the professoriate.

I sat one December morning in the library of the *Speculative*; a very humble-minded youth, though it was a virtue I never had much credit for; yet proud of my privileges as a member of the *Spec.*; proud of the pipe I was smoking in the teeth of the *Senatus*; and in particular, proud of being in the next room to three very distinguished students, who were then conversing beside the corridor fire. One of these has now his name on the back of several volumes, and his voice, I learn, is influential in the law courts. Of the death of the second, you have just been reading what I had to say. And the third also has escaped out of that battle of life in which he fought so hard, it may be so unwisely. They were all three, as I have said, notable students; but this was the most conspicuous. Wealthy, handsome, ambitious, adventurous, diplomatic, a reader of Balzac, and of all men that I have

## A COLLEGE MAGAZINE

known, the most like to one of Balzac's characters, he led a life, and was attended by an ill fortune, that could be properly set forth only in the *Comédie Humaine*. He had then his eye on Parliament; and soon after the time of which I write, he made a showy speech at a political dinner, was cried up to heaven next day in the *Courant*, and the day after was dashed lower than earth with a charge of plagiarism in the *Scotsman*. Report would have it (I daresay, very wrongly) that he was betrayed by one in whom he particularly trusted, and that the author of the charge had learned its truth from his own lips. Thus, at least, he was up one day on a pinnacle, admired and envied by all; and the next, though still but a boy, he was publicly disgraced. The blow would have broken a less finely tempered spirit; and even him I suppose it rendered reckless; for he took flight to London, and there, in a fast club, disposed of the bulk of his considerable patrimony in the space of one winter. For years thereafter he lived I know not how; always well dressed, always in good hotels and good society, always with empty pockets. The charm of his manner may have stood him in good stead; but though my own manners are very agreeable, I have never found in them a source of livelihood; and to explain the miracle of his continued existence, I must fall back upon the theory of the philosopher, that in his case, as in all of the same kind, "there was

## MEMORIES AND PORTRAITS

a suffering relative in the background." From this genteel eclipse he reappeared upon the scene, and presently sought me out in the character of a generous editor. It is in this part that I best remember him; tall, slender, with a not ungraceful stoop; looking quite like a refined gentleman, and quite like an urbane adventurer; smiling with an engaging ambiguity; cocking at you one peaked eyebrow with a great appearance of finesse; speaking low and sweet and thick, with a touch of burr; telling strange tales with singular deliberation and, to a patient listener, excellent effect. After all these ups and downs, he seemed still, like the rich student that he was of yore, to breathe of money; seemed still perfectly sure of himself and certain of his end. Yet he was then upon the brink of his last overthrow. He had set himself to found the strangest thing in our society: one of those periodical sheets from which men suppose themselves to learn opinions; in which young gentlemen from the universities are encouraged, at so much a line, to garble facts, insult foreign nations, and calumniate private individuals; and which are now the source of glory, so that if a man's name be often enough printed there, he becomes a kind of demigod; and people will pardon him when he talks back and forth, as they do for Mr. Gladstone; and crowd him to suffocation on railway platforms, as they did the other day to General Boulanger; and buy his literary works, as I hope

## A COLLEGE MAGAZINE

you have just done for me. Our fathers, when they were upon some great enterprise, would sacrifice a life; building, it may be, a favourite slave into the foundations of their palace. It was with his own life that my companion disarmed the envy of the gods. He fought his paper single-handed; trusting no one, for he was something of a cynic; up early and down late, for he was nothing of a sluggard; daily earwigging influential men, for he was a master of ingratiating. In that slender and silken fellow there must have been a rare vein of courage, that he should thus have died at his employment; and doubtless ambition spoke loudly in his ear, and doubtless love also, for it seems there was a marriage in his view had he succeeded. But he died, and his paper died after him; and of all this grace, and tact, and courage, it must seem to our blind eyes as if there had come literally nothing.

These three students sat, as I was saying, in the corridor, under the mural tablet that records the virtues of Macbean, the former secretary. We would often smile at that ineloquent memorial, and thought it a poor thing to come into the world at all and leave no more behind one than Macbean. And yet of these three, two are gone and have left less; and this book, perhaps, when it is old and foxy, and some one picks it up in a corner of a book-shop, and glances through it, smiling at the old, graceless turns of

## MEMORIES AND PORTRAITS

speech, and perhaps for the love of *Alma Mater* (which may be still extant and flourishing) buys it, not without haggling, for some pence—this book may alone preserve a memory of James Walter Ferrier and Robert Glasgow Brown.

Their thoughts ran very differently on that December morning; they were all on fire with ambition; and when they had called me in to them, and made me a sharer in their design, I too became drunken with pride and hope. We were to found a University magazine. A pair of little, active brothers—Livingstone by name, great skippers on the foot, great rubbers of the hands, who kept a book-shop over against the University building—had been debauched to play the part of publishers. We four were to be conjunct editors and, what was the main point of the concern, to print our own works; while, by every rule of arithmetic—that flatterer of credulity—the adventure must succeed and bring great profit. Well, well: it was a bright vision. I went home that morning, walking upon air. To have been chosen by these three distinguished students was to me the most unspeakable advance; it was my first draught of consideration; it reconciled me to myself and to my fellow-men; and as I steered round the railings at the Tron, I could not withhold my lips from smiling publicly. Yet, in the bottom of my heart, I knew that magazine would be a grim fiasco; I knew it would not be worth read-

## A COLLEGE MAGAZINE

ing; I knew, even if it were, that nobody would read it; and I kept wondering how I should be able, upon my compact income of twelve pounds per annum, payable monthly, to meet my share in the expense. It was a comfortable thought to me that I had a father.

The magazine appeared, in a yellow cover which was the best part of it, for at least it was unassuming; it ran four months in undisturbed obscurity, and died without a gasp. The first number was edited by all four of us with prodigious bustle; the second fell principally into the hands of Ferrier and me; the third I edited alone; and it has long been a solemn question who it was that edited the fourth. It would perhaps be still more difficult to say who read it. Poor yellow sheet, that looked so hopefully in the Livingstones' window! Poor, harmless paper, that might have gone to print a *Shakespeare* on, and was instead so clumsily defaced with nonsense! And, shall I say, Poor Editors? I cannot pity myself, to whom it was all pure gain. It was no news to me, but only the wholesome confirmation of my judgment, when the magazine struggled into half-birth, and instantly sickened and subsided into night. I had sent a copy to the lady with whom my heart was at that time somewhat engaged, and who did all that in her lay to break it; and she, with some tact, passed over the gift and my cherished contributions in silence. I will not say that I was

## MEMORIES AND PORTRAITS

pleased at this; but I will tell her now, if by any chance she takes up the work of her former servant, that I thought the better of her taste. I cleared the decks after this lost engagement; had the necessary interview with my father, which passed off not amiss; paid over my share of the expense to the two little, active brothers, who rubbed their hands as much but methought skipped rather less than formerly, having perhaps, these two also, embarked upon the enterprise with some graceful illusions; and then, reviewing the whole episode, I told myself that the time was not yet ripe, nor the man ready; and to work I went again with my penny version-books, having fallen back in one day from the printed author to the manuscript student.

### III

From this defunct periodical I am going to reprint one of my own papers. The poor little piece is all tail-foremost. I have done my best to straighten its array, I have pruned it fearlessly, and it remains invertebrate and wordy. No self-respecting magazine would print the thing; and here you behold it in a bound volume not for any worth of its own, but for the sake of the man whom it purports dimly to represent and some of whose sayings it preserves; so that in this volume of Memories and Portraits, Robert Young, the Swanston gardener, may stand alongside of John Todd, the Swanston shepherd.

## A COLLEGE MAGAZINE

Not that John and Robert drew very close together in their lives; for John was rough, he smelt of the windy brae; and Robert was gentle, and smacked of the garden in the hollow. Perhaps it is to my shame that I liked John the better of the two; he had grit and dash, and that salt of the Old Adam that pleases men with any savage inheritance of blood; and he was a wayfarer besides, and took my gipsy fancy. But however that may be, and however Robert's profile may be blurred in the boyish sketch that follows, he was a man of a most quaint and beautiful nature, whom, if it were possible to recast a piece of work so old, I should like well to draw again with a maturer touch. And as I think of him and of John, I wonder in what other country two such men would be found dwelling together, in a hamlet of some twenty cottages, in the woody fold of a green hill.

## V

## AN OLD SCOTS GARDENER

I THINK I might almost have said the last: somewhere, indeed, in the uttermost glens of the Lammermuir or among the south-western hills there may yet linger a decrepit representative of this bygone good fellowship; but as far as actual experience goes, I have only met one man in my life who might fitly be quoted in the same breath with Andrew Fairservice,—though without his vices. He was a man whose very presence could impart a savour of quaint antiquity to the baldest and most modern flower-plots. There was a dignity about his tall stooping form, and an earnestness in his wrinkled face that recalled Don Quixote; but a Don Quixote who had come through the training of the Covenant, and been nourished in his youth on *Walker's Lives* and *The Hind let Loose*.

Now, as I could not bear to let such a man pass away with no sketch preserved of his old-fashioned virtues, I hope the reader will take this as an excuse for the present paper, and judge as kindly as he can the infirmities of my descrip-

## AN OLD SCOTS GARDENER

tion. To me, who find it so difficult to tell the little that I know, he stands essentially as a *genius loci*. It is impossible to separate his spare form and old straw hat from the garden in the lap of the hill, with its rocks overgrown with clematis, its shadowy walks, and the splendid breadth of champaign that one saw from the north-west corner. The garden and gardener seem part and parcel of each other. When I take him from his right surroundings and try to make him appear for me on paper, he looks unreal and phantasmal: the best that I can say may convey some notion to those that never saw him, but to me it will be ever impotent.

The first time that I saw him, I fancy Robert was pretty old already: he had certainly begun to use his years as a stalking-horse. Latterly he was beyond all the impudencies of logic, considering a reference to the parish register worth all the reasons in the world. "*I am old and well stricken in years,*" he was wont to say; and I never found any one bold enough to answer the argument. Apart from this vantage that he kept over all who were not yet octogenarian, he had some other drawbacks as a gardener. He shrank the very place he cultivated. The dignity and reduced gentility of his appearance made the small garden cut a sorry figure. He was full of tales of greater situations in his younger days. He spoke of castles and parks with a humbling familiarity. He told of places

## MEMORIES AND PORTRAITS

where under-gardeners had trembled at his looks, where there were meres and swanneries, labyrinths of walk and wildernesses of sad shrubbery in his control, till you could not help feeling that it was condescension on his part to dress your humbler garden plots. You were thrown at once into an invidious position. You felt that you were profiting by the needs of dignity, and that his poverty and not his will consented to your vulgar rule. Involuntarily you compared yourself with the swineherd that made Alfred watch his cakes, or some bloated citizen who may have given his sons and his condescension to the fallen Dionysius. Nor were the disagreeables purely fanciful and metaphysical, for the sway that he exercised over your feelings he extended to your garden, and, through the garden, to your diet. He would trim a hedge, throw away a favourite plant, or fill the most favoured and fertile section of the garden with a vegetable that none of us could eat, in supreme contempt for our opinion. If you asked him to send you in one of your own artichokes, "*That I wull, mem,*" he would say, "*with pleasure, for it is mair blessed to give than to receive.*" Ay, and even when, by extra twisting of the screw, we prevailed on him to prefer our commands to his own inclination, and he went away, stately and sad, professing that "*our wull was his pleasure,*" but yet reminding us that he would do it "*with feelin's,*"—even then, I say, the triumphant mas-

## AN OLD SCOTS GARDENER

ter felt humbled in his triumph, felt that he ruled on sufferance only, that he was taking a mean advantage of the other's low estate, and that the whole scene had been one of those "slights that patient merit of the unworthy takes."

In flowers his taste was old-fashioned and catholic; affecting sunflowers and dahlias, wall-flowers and roses, and holding in supreme aversion whatsoever was fantastic, new-fashioned or wild. There was one exception to this sweeping ban. Foxgloves, though undoubtedly guilty on the last count, he not only spared, but loved; and when the shrubbery was being thinned, he stayed his hand and dexterously manipulated his bill in order to save every stately stem. In boyhood, as he told me once, speaking in that tone that only actors and the old-fashioned common folk can use nowadays, his heart grew "*proud*" within him when he came on a burn-course among the braes of Manor that shone purple with their graceful trophies; and not all his apprenticeship and practice for so many years of precise gardening had banished these boyish recollections from his heart. Indeed, he was a man keenly alive to the beauty of all that was bygone. He abounded in old stories of his boyhood, and kept pious account of all his former pleasures; and when he went (on a holiday) to visit one of the fabled great places of the earth where he had served before, he came back full of little pre-Raphaelite reminiscences that showed

## MEMORIES AND PORTRAITS

real passion for the past, such as might have shaken hands with Hazlitt or Jean-Jacques.

But however his sympathy with his old feelings might affect his liking for the foxgloves, the very truth was that he scorned all flowers together. They were but garnishings, childish toys, trifling ornaments for ladies' chimney-shelves. It was towards his cauliflowers and peas and cabbage that his heart grew warm. His preference for the more useful growths was such that cabbages were found invading the flower-plots, and an outpost of savoys was once discovered in the centre of the lawn. He would prelect over some thriving plant with wonderful enthusiasm, piling reminiscence on reminiscence of former and perhaps yet finer specimens. Yet even then he did not let the credit leave himself. He had, indeed, raised "*finer o' them*"; but it seemed that no one else had been favoured with a like success. All other gardeners, in fact, were mere foils to his own superior attainments; and he would recount, with perfect soberness of voice and visage, how so and so had wondered, and such another could scarcely give credit to his eyes. Nor was it with his rivals only that he parted praise and blame. If you remarked how well a plant was looking, he would gravely touch his hat and thank you with solemn unction; all credit in the matter falling to him. If, on the other hand, you called his attention to some back-going vegetable, he would quote

## AN OLD SCOTS GARDENER

Scripture: "*Paul may plant and Apollos may water*"; all blame being left to Providence, on the score of deficient rain or untimely frosts.

There was one thing in the garden that shared his preference with his favourite cabbages and rhubarb, and that other was the bee-hive. Their sound, their industry, perhaps their sweet product also, had taken hold of his imagination and heart, whether by way of memory or no I cannot say, although perhaps the bees too were linked to him by some recollection of Manor braes and his country childhood. Nevertheless, he was too chary of his personal safety or (let me rather say) his personal dignity to mingle in any active office towards them. But he could stand by while one of the contemned rivals did the work for him, and protest that it was quite safe in spite of his own considerate distance and the cries of the distressed assistant. In regard to bees, he was rather a man of word than deed, and some of his most striking sentences had the bees for text. "*They are indeed wonderfu' creatures, mem,*" he said once. "*They just mind me o' what the Queen of Sheba said to Solomon—and I think she said it wi' a sigh—'The half of it hath not been told unto me.'*"

As far as the Bible goes he was deeply read. Like the old Covenanters, of whom he was the worthy representative, his mouth was full of sacred quotations; it was the book that he had studied most and thought upon most deeply.

## MEMORIES AND PORTRAITS

To many people in his station the Bible, and perhaps Burns, are the only books of any vital literary merit that they read, feeding themselves, for the rest, on the draff of country newspapers, and the very instructive but not very palatable pabulum of some cheap educational series. This was Robert's position. All day long he had dreamed of the Hebrew stories, and his head had been full of Hebrew poetry and Gospel ethics; until they had struck deep root into his heart, and the very expressions had become a part of him; so that he rarely spoke without some antique idiom or Scripture mannerism that gave a raciness to the merest trivialities of talk. But the influence of the Bible did not stop here. There was more in Robert than quaint phrase and ready store of reference. He was imbued with a spirit of peace and love: he interposed between man and wife: he threw himself between the angry, touching his hat the while with all the ceremony of an usher: he protected the birds from everybody but himself, seeing, I suppose, a great difference between official execution and wanton sport. His mistress telling him one day to put some ferns into his master's particular corner, and adding, "Though indeed, Robert, he doesn't deserve them, for he wouldn't help me to gather them," "*Eh, mem,*" replies Robert, "*but I wouldna say that, for I think he's just a most deservin' gentleman.*" Again, two of our friends, who were on intimate terms, and

## AN OLD SCOTS GARDENER

accustomed to use language to each other, somewhat without the bounds of the parliamentary, happened to differ about the position of a seat in the garden. The discussion, as was usual when these two were at it, soon waxed tolerably insulting on both sides. Every one accustomed to such controversies several times a day was quietly enjoying this prize-fight of somewhat abusive wit—every one but Robert, to whom the perfect good faith of the whole quarrel seemed unquestionable, and who, after having waited till his conscience would suffer him to wait no more, and till he expected every moment that the disputants would fall to blows, cut suddenly in with tones of almost tearful entreaty: “*Eh, but, gentlemen, I wad hae nae mair words about it!*” One thing was noticeable about Robert’s religion: it was neither dogmatic nor sectarian. He never expatiated (at least, in my hearing) on the doctrines of his creed, and he never condemned anybody else. I have no doubt that he held all Roman Catholics, Atheists, and Mahometans as considerably out of it; I don’t believe he had any sympathy for Prelacy; and the natural feelings of man must have made him a little sore about Free-Churchism; but at least, he never talked about these views, never grew controversially noisy, and never openly aspersed the belief or practice of anybody. Now all this is not generally characteristic of Scots piety; Scots sects being churches militant with a ven-

## MEMORIES AND PORTRAITS

geance, and Scots believers perpetual crusaders the one against the other, and missionaries the one to the other. Perhaps Robert's originally tender heart was what made the difference; or, perhaps, his solitary and pleasant labour among fruits and flowers had taught him a more sunshiny creed than those whose work is among the tares of fallen humanity; and the soft influences of the garden had entered deep into his spirit,

"Annihilating all that's made  
To a green thought in a green shade."

But I could go on for ever chronicling his golden sayings or telling of his innocent and living piety. I had meant to tell of his cottage, with the German pipe hung reverently above the fire, and the shell box that he had made for his son, and of which he would say pathetically: "*He was real pleased wi' it at first, but I think he's got a kind o' tired o' it now*"—the son being then a man about forty. But I will let all these pass. "'Tis more significant: he's dead." The earth, that he had digged so much in his life, was dug out by another for himself; and the flowers that he had tended drew their life still from him, but in a new and nearer way. A bird flew about the open grave, as if it too wished to honour the obsequies of one who had so often quoted Scripture in favour of its kind: "Are not two sparrows sold for one farthing? and yet not one of them falleth to the ground."

## AN OLD SCOTS GARDENER

Yes, he is dead. But the kings did not rise in the place of death to greet him "with taunting proverbs" as they rose to greet the haughty Babylonian; for in his life he was lowly, and a peacemaker and a servant of God.

VI  
PASTORAL

**T**O leave home in early life is to be stunned and quickened with novelties; but to leave it when years have come, only casts a more endearing light upon the past. As in those composite photographs of Mr. Galton's, the image of each new sitter brings out but the more clearly the central features of the race; when once youth has flown, each new impression only deepens the sense of nationality and the desire of native places. So may some cadet of Royal Écossais or the Albany Regiment, as he mounted guard about French citadels, so may some officer marching his company of the Scots-Dutch among the polders, have felt the soft rains of the Hebrides upon his brow, or started in the ranks at the remembered aroma of peat-smoke. And the rivers of home are dear in particular to all men. This is as old as Naaman, who was jealous for Abana and Pharpar; it is confined to no race nor country, for I know one of Scottish blood but a child of Suffolk, whose fancy still lingers about the lilyed lowland waters of that shire. But the

## PASTORAL

streams of Scotland are incomparable in themselves—or I am only the more Scottish to suppose so—and their sound and colour dwell for ever in the memory. How often and willingly do I not look again in fancy on Tummel, or Manor, or the talking Airdle, or Dee swirling in its Lynn; on the bright burn of Kinnaird, or the golden burn that pours and sulks in the den behind Kingussie! I think shame to leave out one of these enchantresses, but the list would grow too long if I remembered all; only I may not forget Allan Water, nor birch-wetting Rogie, nor yet Almond; nor, for all its pollutions, that Water of Leith of the many and well-named mills—Bell's Mills, and Canon Mills, and Silver Mills; nor Redford Burn of pleasant memories; nor yet, for all its smallness, that nameless trickle that springs in the green bosom of Allermuir, and is fed from Halkerside with a perennial teacupful, and threads the moss under the Shearer's Knowe, and makes one pool there, overhung by a rock, where I loved to sit and make bad verses, and is then kidnapped in its infancy by subterranean pipes for the service of the sea-beholding city in the plain. From many points in the moss you may see at one glance its whole course and that of all its tributaries; the geographer of this Lilliput may visit all its corners without sitting down, and not yet begin to be breathed; Shearer's Knowe and Halkerside are but names of adjacent cantons on a single shoulder of a

## MEMORIES AND PORTRAITS

hill, as names are squandered (it would seem to the inexpert, in superfluity) upon these upland sheepwalks; a bucket would receive the whole discharge of the toy river; it would take it an appreciable time to fill your morning bath; for the most part, besides, it soaks unseen through the moss; and yet for the sake of auld lang syne, and the figure of a certain *genius loci*, I am condemned to linger a while in fancy by its shores; and if the nymph (who cannot be above a span in stature) will but inspire my pen, I would gladly carry the reader along with me.

John Todd, when I knew him, was already "the oldest herd on the Pentlands," and had been all his days faithful to that curlew-scattering, sheep-collecting life. He remembered the droving days, when the drove-roads, that now lie green and solitary through the heather, were thronged thoroughfares. He had himself often marched flocks into England, sleeping on the hillsides with his caravan; and by his account it was a rough business not without danger. The drove-roads lay apart from habitation; the drovers met in the wilderness, as to-day the deep-sea fishers meet off the banks in the solitude of the Atlantic; and in the one as in the other case rough habits and fist-law were the rule. Crimes were committed, sheep filched, and drovers robbed and beaten; most of which offences had a moorland burial and were never heard of in the courts of justice. John, in those days, was at

## PASTORAL

least once attacked,—by two men after his watch,—and at least once, betrayed by his habitual anger, fell under the danger of the law and was clapped into some rustic prison-house, the doors of which he burst in the night and was no more heard of in that quarter. When I knew him, his life had fallen in quieter places, and he had no cares beyond the dulness of his dogs and the inroads of pedestrians from town. But for a man of his propensity to wrath these were enough; he knew neither rest nor peace, except by snatches; in the grey of the summer morning, and already from far up the hill, he would wake the “toun” with the sound of his shoutings; and in the lambing-time, his cries were not yet silenced late at night. This wrathful voice of a man unseen might be said to haunt that quarter of the Pentlands, an audible bogie; and no doubt it added to the fear in which men stood of John a touch of something legendary. For my own part, he was at first my enemy, and I, in my character of a rambling boy, his natural abhorrence. It was long before I saw him near at hand, knowing him only by some sudden blast of bellowing from far above, bidding me “c’way oot amang the sheep.” The quietest recesses of the hill harboured this ogre; I skulked in my favourite wilderness like a Cameronian of the Killing Time, and John Todd was my Claverhouse, and his dogs my questing dragoons. Little by little we dropped into civilities; his hail at

## MEMORIES AND PORTRAITS

sight of me began to have less of the ring of a war-slogan; soon, we never met but he produced his snuff-box, which was with him, like the calumet with the Red Indian, a part of the heraldry of peace; and at length in the ripeness of time, we grew to be a pair of friends, and when I lived alone in these parts in the winter, it was a settled thing for John to "give me a cry" over the garden wall as he set forth upon his evening round, and for me to overtake and bear him company.

That dread voice of his that shook the hills when he was angry, fell in ordinary talk very pleasantly upon the ear, with a kind of honied, friendly whine, not far off singing, that was eminently Scottish. He laughed not very often, and when he did, with a sudden, loud haw-haw, hearty but somehow joyless, like an echo from a rock. His face was permanently set and coloured; ruddy and stiff with weathering; more like a picture than a face; yet with a certain strain and a threat of latent anger in the expression, like that of a man trained too fine and harassed with perpetual vigilance. He spoke in the richest dialect of Scots I ever heard; the words in themselves were a pleasure and often a surprise to me, so that I often came back from one of our patrols with new acquisitions; and this vocabulary he would handle like a master, stalking a little before me, "beard on shoulder," the plaid hanging loosely about him, the yellow

## PASTORAL

staff clapped under his arm, and guiding me uphill by that devious, tactical ascent which seems peculiar to men of his trade. I might count him with the best talkers; only that talking Scots and talking English seem incomparable acts. He touched on nothing at least, but he adorned it; when he narrated, the scene was before you; when he spoke (as he did mostly) of his own antique business, the thing took on a colour of romance and curiosity that was surprising. The clans of sheep with their particular territories on the hill, and how, in the yearly killings and purchases, each must be proportionally thinned and strengthened; the midnight busyness of animals, the signs of the weather, the cares of the snowy season, the exquisite stupidity of sheep, the exquisite cunning of dogs: all these he could present so humanly, and with so much old experience and living gusto, that weariness was excluded. And in the midst he would suddenly straighten his bowed back, the stick would fly abroad in demonstration, and the sharp thunder of his voice roll out a long itinerary for the dogs, so that you saw at last the use of that great wealth of names for every knowe and howe upon the hillside; and the dogs, having hearkened with lowered tails and raised faces, would run up their flags again to the mast-head and spread themselves upon the indicated circuit. It used to fill me with wonder how they could follow and retain so long a story. But

## MEMORIES AND PORTRAITS

John denied these creatures all intelligence; they were the constant butt of his passion and contempt; it was just possible to work with the like of them, he said,—not more than possible. And then he would expand upon the subject of the really good dogs that he had known, and the one really good dog that he had himself possessed. He had been offered forty pounds for it; but a good collie was worth more than that, more than anything to a “herd”; he did the herd’s work for him. “As for the like of them!” he would cry, and scornfully indicate the scouring tails of his assistants.

Once—I translate John’s Lallan, for I cannot do it justice, being born *Britannis in montibus*, indeed, but alas! *inerudito sæculo*—once, in the days of his good dog, he had bought some sheep in Edinburgh, and on the way out, the road being crowded, two were lost. This was a reproach to John, and a slur upon the dog; and both were alive to their misfortune. Word came, after some days, that a farmer about Braid had found a pair of sheep; and thither went John and the dog to ask for restitution. But the farmer was a hard man and stood upon his rights. “How were they marked?” he asked; and since John had bought right and left from many sellers and had no notion of the marks—“Very well,” said the farmer, “then it’s only right that I should keep them.”—“Well,” said John, “it’s a fact that I canna tell the sheep; but if my dog

## PASTORAL

can, will ye let me have them?" The farmer was honest as well as hard, and besides I dare say he had little fear of the ordeal; so he had all the sheep upon his farm into one large park, and turned John's dog into their midst. The hairy man of business knew his errand well; he knew that John and he had bought two sheep and (to their shame) lost them about Boroughmuirhead; he knew besides (the Lord knows how, unless by listening) that they were come to Braid for their recovery; and without pause or blunder singled out, first one and then another, the two waifs. It was that afternoon the forty pounds were offered and refused. And the shepherd and his dog—what do I say? the true shepherd and his man—set off together by Fairmilehead in jocund humour, and "smiled to ither" all the way home, with the two recovered ones before them. So far, so good; but intelligence may be abused. The dog, as he is by little man's inferior in mind, is only by little his superior in virtue; and John had another collie tale of quite a different complexion. At the foot of the moss behind Kirk Yetton (Caer Ketton, wise men say) there is a scrog of low wood and a pool with a dam for washing sheep. John was one day lying under a bush in the scrog, when he was aware of a collie on the far hillside skulking down through the deepest of the heather with obtrusive stealth. He knew the dog; knew him for a clever, rising practitioner from quite a distant farm; one whom

## MEMORIES AND PORTRAITS

perhaps he had coveted as he saw him masterfully steering flocks to market. But what did the practitioner so far from home? and why this guilty and secret manœuvring towards the pool?—for it was towards the pool that he was heading. John lay the closer under his bush, and presently saw the dog come forth upon the margin; look all about to see if he were anywhere observed, plunge in and repeatedly wash himself over head and ears, and then (but now openly and with tail in air) strike homeward over the hills. That same night word was sent his master, and the rising practitioner, shaken up from where he lay, all innocence before the fire, was had out to a dykeside and promptly shot; for alas! he was that foulest of criminals under trust, a sheep-eater; and it was from the maculation of sheep's blood that he had come so far to cleanse himself in the pool behind Kirk Yetton.

A trade that touches nature, one that lies at the foundations of life, in which we have all had ancestors employed, so that on a hint of it ancestral memories revive, lends itself to literary use, vocal or written. The fortune of a tale lies not alone in the skill of him that writes, but as much, perhaps, in the inherited experience of him who reads; and when I hear with a particular thrill of things that I have never done or seen, it is one of that innumerable army of my ancestors rejoicing in past deeds. Thus novels begin to

## PASTORAL

touch not the fine *dilettante* but the gross mass of mankind, when they leave off to speak of parlours and shades of manner and still-born niceties of motive, and begin to deal with fighting, sailing, adventure, death, or child-birth; and thus ancient out-door crafts and occupations, whether Mr. Hardy wields the shepherd's crook or Count Tolstoi swings the scythe, lift romance into a near neighbourhood with epic. These aged things have on them the dew of man's morning; they lie near, not so much to us, the semi-artificial flowerets, as to the trunk and aboriginal taproot of the race. A thousand interests spring up in the process of the ages, and a thousand perish; that is now an eccentricity or a lost art which was once the fashion of an empire; and those only are perennial matters that rouse us to-day, and that roused men in all epochs of the past. There is a certain critic, not indeed of execution but of matter, whom I dare be known to set before the best: a certain low-browed, hairy gentleman, at first a percher in the fork of trees, next (as they relate) a dweller in caves, and whom I think I see squatting in cave-mouths, of a pleasant afternoon, to munch his berries—his wife, that accomplished lady, squatting by his side: his name I never heard, but he is often described as Probably Arboreal, which may serve for recognition. Each has his own tree of ancestors, but at the top of all sits Probably Arboreal; in all our veins there run

## MEMORIES AND PORTRAITS

some minims of his old, wild, tree-top blood; our civilised nerves still tingle with his rude terrors and pleasures; and to that which would have moved our common ancestor, all must obediently thrill.

We have not so far to climb to come to shepherds; and it may be I had one for an ascendant who has largely moulded me. But yet I think I owe my taste for that hillside business rather to the art and interest of John Todd. He it was that made it live for me, as the artist can make all things live. It was through him the simple strategy of massing sheep upon a snowy evening, with its attendant scampering of earnest, shaggy aides-de-camp, was an affair that I never wearied of seeing, and that I never weary of recalling to mind: the shadow of the night darkening on the hills, inscrutable black blots of snow-shower moving here and there like night already come, huddles of yellow sheep and dartings of black dogs upon the snow, a bitter air that took you by the throat, unearthly harpings of the wind along the moors; and for centre-piece to all these features and influences, John winding up the brae, keeping his captain's eye upon all sides, and breaking, ever and again, into a spasm of bellying that seemed to make the evening bleaker. It is thus that I still see him in my mind's eye, perched on a hump of the declivity not far from Halkerside, his staff in airy flourish, his great voice taking hold upon the hills and echoing

## PASTORAL

terror to the lowlands; I, meanwhile, standing somewhat back, until the fit should be over, and, with a pinch of snuff, my friend relapse into his easy, even conversation.

## VII

### THE MANSE

I HAVE named, among many rivers that make music in my memory, that dirty Water of Leith. Often and often I desire to look upon it again; and the choice of a point of view is easy to me. It should be at a certain water-door, embowered in shrubbery. The river is there dammed back for the service of the flour-mill just below, so that it lies deep and darkling, and the sand slopes into brown obscurity with a glint of gold; and it has but newly been recruited by the borrowings of the snuff-mill just above, and these, tumbling merrily in, shake the pool to its black heart, fill it with drowsy eddies, and set the curded froth of many other mills solemnly steering to and fro upon the surface. Or so it was when I was young; for change, and the masons, and the pruning-knife, have been busy; and if I could hope to repeat a cherished experience, it must be on many and impossible conditions. I must choose, as well as the point of view, a certain moment in my growth, so that the scale may be exaggerated, and the trees on

## THE MANSE

the steep opposite side may seem to climb to heaven, and the sand by the water-door, where I am standing, seem as low as Styx. And I must choose the season also, so that the valley may be brimmed like a cup with sunshine and the songs of birds;—and the year of grace, so that when I turn to leave the river-side I may find the old manse and its inhabitants unchanged.

It was a place in that time like no other: the garden cut into provinces by a great hedge of beech, and overlooked by the church and the terrace of the churchyard, where the tombstones were thick, and after nightfall “spunkies” might be seen to dance, at least by children; flower-plots lying warm in sunshine; laurels and the great yew making elsewhere a pleasing horror of shade; the smell of water rising from all round, with an added tang of paper-mills; the sound of water everywhere, and the sound of mills—the wheel and the dam singing their alternate strain; the birds on every bush and from every corner of the overhanging woods pealing out their notes until the air throbbed with them; and in the midst of this, the manse. I see it, by the standard of my childish stature, as a great and roomy house. In truth, it was not so large as I supposed, nor yet so convenient, and, standing where it did, it is difficult to suppose that it was healthful. Yet a large family of stalwart sons and tall daughters was housed and reared, and came to man and womanhood in that nest

## MEMORIES AND PORTRAITS

of little chambers; so that the face of the earth was peppered with the children of the manse, and letters with outlandish stamps became familiar to the local postman, and the walls of the little chambers brightened with the wonders of the East. The dullest could see this was a house that had a pair of hands in divers foreign places: a well-beloved house—its image fondly dwelt on by many travellers.

Here lived an ancestor of mine, who was a herd of men. I read him, judging with older criticism the report of childish observation, as a man of singular simplicity of nature; unemotional, and hating the display of what he felt; standing contented on the old ways; a lover of his life and innocent habits to the end. We children admired him: partly for his beautiful face and silver hair, for none more than children are concerned for beauty and, above all, for beauty in the old; partly for the solemn light in which we beheld him once a week, the observed of all observers, in the pulpit. But his strictness and distance, the effect, I now fancy, of old age, slow blood, and settled habit, oppressed us with a kind of terror. When not abroad, he sat much alone, writing sermons or letters to his scattered family in a dark and cold room with a library of bloodless books—or so they seemed in those days, although I have some of them now on my own shelves and like well enough to read them; and these lonely hours wrapped him

## THE MANSE

in the greater gloom for our imaginations. But the study had a redeeming grace in many Indian pictures, gaudily coloured and dear to young eyes. I cannot depict (for I have no such passions now) the greed with which I beheld them; and when I was once sent in to say a psalm to my grandfather, I went, quaking indeed with fear, but at the same time glowing with hope that, if I said it well, he might reward me with an Indian picture.

“Thy foot He’ll not let slide, nor will  
He slumber that thee keeps,”

it ran: a strange conglomerate of the unpronounceable, a sad model to set in childhood before one who was himself to be a versifier, and a task in recitation that really merited reward. And I must suppose the old man thought so too, and was either touched or amused by the performance; for he took me in his arms with most unwonted tenderness, and kissed me, and gave me a little kindly sermon for my psalm; so that, for that day, we were clerk and parson. I was struck by this reception into so tender a surprise that I forgot my disappointment. And indeed the hope was one of those that childhood forges for a pastime, and with no design upon reality. Nothing was more unlikely than that my grandfather should strip himself of one of those pictures, love-gifts and reminders of his absent sons; nothing more unlikely than that he

## MEMORIES AND PORTRAITS

should bestow it upon me. He had no idea of spoiling children, leaving all that to my aunt; he had fared hard himself, and blubbered under the rod in the last century; and his ways were still Spartan for the young. The last word I heard upon his lips was in this Spartan key. He had over-walked in the teeth of an east wind, and was now near the end of his many days. He sat by the dining-room fire, with his white hair, pale face, and bloodshot eyes, a somewhat awful figure; and my aunt had given him a dose of our good old Scots medicine, Dr. Gregory's powder. Now that remedy, as the work of a near kinsman of Rob Roy himself, may have a savour of romance for imagination; but it comes uncouthly to the palate. The old gentleman had taken it with a wry face; and that being accomplished, sat with perfect simplicity, like a child's, munching a "barley-sugar kiss." But when my aunt, having the canister open in her hands, proposed to let me share in the sweets, he interfered at once. I had had no Gregory; then I should have no barley-sugar kiss: so he decided with a touch of irritation. And just then the phaeton coming opportunely to the kitchen door—for such was our unlordly fashion—I was taken for the last time from the presence of my grandfather.

Now I often wonder what I have inherited from this old minister. I must suppose, indeed, that he was fond of preaching sermons,

## THE MANSE

and so am I, though I never heard it maintained that either of us loved to hear them. He sought health in his youth in the Isle of Wight, and I have sought it in both hemispheres; but whereas he found and kept it, I am still on the quest. He was a great lover of Shakespeare, whom he read aloud, I have been told, with taste; well, I love my Shakespeare also, and am persuaded I can read him well, though I own I never have been told so. He made embroidery, designing his own patterns; and in that kind of work I never made anything but a kettle-holder in Berlin wool, and an odd garter of knitting, which was as black as the chimney before I had done with it. He loved port, and nuts, and porter; and so do I, but they agreed better with my grandfather, which seems to me a breach of contract. He had chalk-stones in his fingers; and these, in good time, I may possibly inherit, but I would much rather have inherited his noble presence. Try as I please, I cannot join myself on with the reverend doctor; and all the while, no doubt, and even as I write the phrase, he moves in my blood, and whispers words to me, and sits efficient in the very knot and centre of my being. In his garden, as I played there, I learned the love of mills—or had I an ancestor a miller?—and a kindness for the neighbourhood of graves, as homely things not without their poetry—or had I an ancestor a sexton? But what of the garden where he played himself?—

## MEMORIES AND PORTRAITS

for that, too, was a scene of my education. Some part of me played there in the eighteenth century, and ran races under the green avenue at Pilrig; some part of me trudged up Leith Walk, which was still a country place, and sat on the High School benches, and was thrashed, perhaps, by Dr. Adam. The house where I spent my youth was not yet thought upon; but we made holiday parties among the cornfields on its site, and ate strawberries and cream near by at a gardener's. All this I had forgotten; only my grandfather remembered and once reminded me. I have forgotten, too, how we grew up, and took orders, and went to our first Ayrshire parish, and fell in love with and married a daughter of Burns's Dr. Smith—"Smith opens out his cauld harangues." I have forgotten, but I was there all the same, and heard stories of Burns at first hand.

And there is a thing stranger than all that; for this *homunculus* or part-man of mine that walked about the eighteenth century with Dr. Balfour in his youth, was in the way of meeting other *homunculi* or part-men, in the persons of my other ancestors. These were of a lower order, and doubtless we looked down upon them duly. But as I went to college with Dr. Balfour, I may have seen the lamp and oil man taking down the shutters from his shop beside the Tron;—we may have had a rabbit-hutch or a bookshelf made for us by a certain carpenter in I know not

## THE MANSE

what wynd of the old, smoky city; or, upon some holiday excursion we may have looked into the windows of a cottage in a flower-garden and seen a certain weaver plying his shuttle. And these were all kinsmen of mine upon the other side; and from the eyes of the lamp and oil man one-half of my unborn father, and one-quarter of myself, looked out upon us as we went by to college. Nothing of all this would cross the mind of the young student, as he posted up the Bridges with trim, stockinged legs, in that city of cocked hats and good Scots still unadulterated. It would not cross his mind that he should have a daughter; and the lamp and oil man, just then beginning, by a not unnatural metastasis, to bloom into a lighthouse-engineer, should have a grandson; and that these two, in the fulness of time, should wed; and some portion of that student himself should survive yet a year or two longer in the person of their child.

But our ancestral adventures are beyond even the arithmetic of fancy; and it is the chief recommendation of long pedigrees, that we can follow backward the careers of our *homunculi* and be reminded of our antenatal lives. Our conscious years are but a moment in the history of the elements that build us. Are you a bank-clerk, and do you live at Peckham? It was not always so. And though to-day I am only a man of letters, either tradition errs or I was present when there landed at St. Andrews a

## MEMORIES AND PORTRAITS

French barber-surgeon, to tend the health and the beard of the great Cardinal Beaton; I have shaken a spear in the Debatable Land and shouted the slogan of the Elliots; I was present when a skipper, plying from Dundee, smuggled Jacobites to France after the '15; I was in a West India merchant's office, perhaps next door to Bailie Nichol Jarvie's, and managed the business of a plantation in St. Kitt's; I was with my engineer-grandfather (the son-in-law of the lamp and oil man) when he sailed north about Scotland on the famous cruise that gave us the *Pirate* and the *Lord of the Isles*; I was with him, too, on the Bell Rock, in the fog, when the *Smeaton* had drifted from her moorings, and the Aberdeen men, pick in hand, had seized upon the only boats, and he must stoop and lap sea-water before his tongue could utter audible words; and once more with him when the Bell Rock beacon took a "thrawe," and his workmen fled into the tower, then nearly finished, and he sat unmoved reading in his Bible—or affecting to read—till one after another slunk back with confusion of countenance to their engineer. Yes, parts of me have seen life, and met adventures, and sometimes met them well. And away in the still cloudier past, the threads that make me up can be traced by fancy into the bosoms of thousands and millions of ascendants: Picts who rallied round Macbeth and the old (and highly preferable) system of descent by females, fleërs from

## THE MANSE

before the legions of Agricola, marchers in Pannonian morasses, star-gazers on Chaldæan plateaus; and, furthest of all, what face is this that fancy can see peering through the disparted branches? What sleeper in green tree-tops, what muncher of nuts, concludes my pedigree? Probably arboreal in his habits. . . .

And I know not which is the more strange, that I should carry about with me some fibres of my minister-grandfather; or that in him, as he sat in his cool study, grave, reverend, contented gentleman, there was an aboriginal frisking of the blood that was not his; tree-top memories, like undeveloped negatives, lay dormant in his mind; tree-top instincts awoke and were trod down; and Probably Arboreal (scarce to be distinguished from a monkey) gambolled and chattered in the brain of the old divine.

## VIII

### MEMOIRS OF AN ISLET

THOSE who try to be artists use, time after time, the matter of their recollections, setting and resetting little coloured memories of men and scenes, rigging up (it may be) some especial friend in the attire of a buccaneer, and decreeing armies to manoeuvre, or murder to be done, on the playground of their youth. But the memories are a fairy gift which cannot be worn out in using. After a dozen services in various tales, the little sunbright pictures of the past still shine in the mind's eye with not a lineament defaced, not a tint impaired. *Glück und Unglück wird Gesang*, if Goethe pleases; yet only by endless avatars, the original reëmbodiment after each. So that a writer, in time, begins to wonder at the perdurable life of these impressions; begins, perhaps, to fancy that he wrongs them when he weaves them in with fiction; and looking back on them with ever-growing kindness, puts them at last, substantive jewels, in a setting of their own.

## MEMOIRS OF AN ISLET

One or two of these pleasant spectres I think I have laid. I used one but the other day: a little eyot of dense, freshwater sand, where I once waded deep in butterburrs, delighting to hear the song of the river on both sides, and to tell myself that I was indeed and at last upon an island. Two of my puppets lay there a summer's day, hearkening to the shearers at work in river-side fields and to the drums of the gray old garrison upon the neighbouring hill. And this was, I think, done rightly: the place was rightly peopled—and now belongs not to me but to my puppets—for a time at least. In time, perhaps, the puppets will grow faint; the original memory swim up instant as ever; and I shall once more lie in bed, and see the little sandy isle in Allan Water as it is in nature, and the child (that once was me) wading there in butterburrs; and wonder at the instancy and virgin freshness of that memory; and be pricked again, in season and out of season, by the desire to weave it into art.

There is another isle in my collection, the memory of which besieges me. I put a whole family there, in one of my tales; and later on, threw upon its shores, and condemned to several days of rain and shellfish on its tumbled boulders, the hero of another. The ink is not yet faded; the sound of the sentences is still in my mind's ear; and I am under a spell to write of that island again.

# MEMORIES AND PORTRAITS

## I

The little isle of Earraid lies close in to the south-west corner of the Ross of Mull: the sound of Iona on one side, across which you may see the isle and church of Columba; the open sea to the other, where you shall be able to mark, on a clear, surfy day, the breakers running white on many sunken rocks. I first saw it, or first remember seeing it, framed in the round bull's-eye of a cabin port, the sea lying smooth along its shores like the waters of a lake, the colourless, clear light of the early morning making plain its heathery and rocky hummocks. There stood upon it in these days, a single rude house of uncemented stones, approached by a pier of wreck-wood. It must have been very early, for it was then summer, and in summer, in that latitude, day scarcely withdraws; but even at that hour the house was making a sweet smoke of peats which came to me over the bay, and the bare-legged daughters of the cotter were wading by the pier. The same day we visited the shores of the isle in the ship's boats; rowed deep into Fiddler's Hole, sounding as we went, and having taken stock of all possible accommodations, pitched on the northern inlet as the scene of operations. For it was no accident that had brought the lighthouse steamer to anchor in the Bay of Earraid. Fifteen miles away to seaward, a certain black rock stood environed by the

## MEMOIRS OF AN ISLET

Atlantic rollers, the outpost of the Torran reefs. Here was a tower to be built, and a star lighted, for the conduct of seamen. But as the rock was small, and hard of access, and far from land, the work would be one of years; and my father was now looking for a shore station, where the stones might be quarried and dressed, the men live, and the tender, with some degree of safety, lie at anchor.

I saw Earraid next from the stern-thwart of an Iona lugger, Sam Bough and I sitting there cheek by jowl, with our feet upon our baggage, in a beautiful, clear, northern summer eve. And behold! there was now a pier of stone, there were rows of sheds, railways, travelling-cranes, a street of cottages, an iron house for the resident engineer, wooden bothies for the men, a stage where the courses of the tower were put together experimentally, and behind the settlement a great gash in the hillside where granite was quarried. In the bay, the steamer lay at her moorings. All day long there hung about the place the music of chinking tools; and even in the dead of night, the watchman carried his lantern to and fro in the dark settlement, and could light the pipe of any midnight muser. It was, above all, strange to see Earraid on the Sunday when the sound of the tools ceased and there fell a crystal quiet. All about the green compound men would be sauntering in their Sunday's best, walking with those lax joints of the reposing

## MEMORIES AND PORTRAITS

toiler, thoughtfully smoking, talking small, as if in honour of the stillness, or hearkening to the wailing of the gulls. And it was strange to see our Sabbath services, held, as they were, in one of the bothies, with Mr. Brebner reading at a table, and the congregation perched about in the double tier of sleeping bunks; and to hear the singing of the psalms, "the chapters," the inevitable Spurgeon's sermon, and the old, eloquent lighthouse prayer.

In fine weather, when by the spy-glass on the hill the sea was observed to run low upon the reef, there would be a sound of preparation in the very early morning; and before the sun had risen from behind Ben More, the tender would steam out of the bay. Over fifteen sea-miles of the great blue Atlantic rollers she ploughed her way, trailing at her tail a brace of wallowing stone-lighters. The open ocean widened upon either board, and the hills of the mainland began to go down on the horizon, before she came to her unhomely destination, and lay-to at last where the rock clapped its black head above the swell, with the tall iron barrack on its spider legs and the truncated tower, and the cranes waving their arms, and the smoke of the engine-fire rising in the mid-sea. An ugly reef is this of the Dhu Heartach; no pleasant assemblage of shelves, and pools, and creeks, about which a child might play for a whole summer without weariness, like the Bell Rock or the Skerryvore,

## MEMOIRS OF AN ISLET

but one oval nodule of black-trap, sparsely bedabbled with an inconspicuous fucus, and alive in every crevice with a dingy insect between a slater and a bug. No other life was there but that of sea-birds, and of the sea itself, that here ran like a mill-race, and growled about the outer reef for ever, and ever and again, in the calmest weather, roared and spouted on the rock itself. Times were different upon Dhu Heartach when it blew, and the night fell dark, and the neighbour lights of Skerryvore and Rhu-val were quenched in fog, and the men sat prisoned high up in their iron drum, that then resounded with the lashing of the sprays. Fear sat with them in their sea-beleaguered dwelling; and the colour changed in anxious faces when some greater billow struck the barrack, and its pillars quivered and sprang under the blow. It was then that the foreman builder, Mr. Goodwillie, whom I see before me still in his rock-habit of undecipherable rags, would get his fiddle down and strike up human minstrelsy amid the music of the storm. But it was in sunshine only that I saw Dhu-Heartach; and it was in sunshine, or the yet lovelier summer afterglow, that the steamer would return to Earraid, ploughing an enchanted sea; the obedient lighters, relieved of their deck cargo, riding in her wake more quietly; and the steersman upon each, as she rose on the long swell, standing tall and dark against the shining west.

# MEMORIES AND PORTRAITS

## II

But it was in Earraid itself that I delighted chiefly. The lighthouse settlement scarce encroached beyond its fences; over the top of the first brae the ground was all virgin, the world all shut out, the face of things unchanged by any of man's doings. Here was no living presence, save for the limpets on the rocks, for some old, grey, rain-beaten ram that I might rouse out of a ferny den betwixt two boulders, or for the haunting and the piping of the gulls. It was older than man; it was found so by incoming Celts, and seafaring Norsemen, and Columba's priests. The earthy savour of the bog plants, the rude disorder of the boulders, the inimitable seaside brightness of the air, the brine and the iodine, the lap of the billows among the weedy reefs, the sudden springing up of a great run of dashing surf along the sea-front of the isle, all that I saw and felt my predecessors must have seen and felt with scarce a difference. I steeped myself in open air and in past ages.

“Delightful would it be to me to be in *Uchd Ailiun*  
On the pinnacle of a rock,  
That I might often see  
The face of the ocean;  
That I might hear the song of the wonderful birds,  
Source of happiness;  
That I might hear the thunder of the crowding waves  
Upon the rocks:

## MEMOIRS OF AN ISLET

At times at work without compulsion——  
This would be delightful;  
At times plucking dulse from the rocks;  
At times at fishing.”

So, about the next island of Iona, sang Columba himself twelve hundred years before. And so might I have sung of Earraid.

And all the while I was aware that this life of sea-bathing and sun-burning was for me but a holiday. In that year cannon were roaring for days together on French battlefields; and I would sit in my isle (I call it mine, after the use of lovers) and think upon the war, and the loudness of these far-away battles, and the pain of the men's wounds, and the weariness of their marching. And I would think too of that other war which is as old as mankind, and is indeed the life of man: the unsparing war, the grinding slavery of competition; the toil of seventy years, dear-bought bread, precarious honour, the perils and pitfalls, and the poor rewards. It was a long look forward; the future summoned me as with trumpet calls, it warned me back as with a voice of weeping and beseeching; and I thrilled and trembled on the brink of life, like a childish bather on the beach.

There was another young man on Earraid in these days, and we were much together, bathing, clambering on the boulders, trying to sail a boat and spinning round instead in the oily whirlpools of the roost. But the most part of

## MEMORIES AND PORTRAITS

the time we spoke of the great uncharted desert of our futures; wondering together what should there befall us; hearing with surprise the sound of our own voices in the empty vestibule of youth. As far, and as hard, as it seemed then to look forward to the grave, so far it seems now to look backward upon these emotions; so hard to recall justly that loath submission, as of the sacrificial bull, with which we stooped our necks under the yoke of destiny. I met my old companion but the other day; I cannot tell of course what he was thinking; but, upon my part, I was wondering to see us both so much at home, and so composed and sedentary in the world; and how much we had gained, and how much we had lost, to attain to that composure; and which had been upon the whole our best estate: when we sat there prating sensibly like men of some experience, or when we shared our timorous and hopeful counsels in a western islet.

## IX

### THOMAS STEVENSON

#### CIVIL ENGINEER

THE death of Thomas Stevenson will mean not very much to the general reader. His service to mankind took on forms of which the public knows little and understands less. He came seldom to London, and then only as a task, remaining always a stranger and a convinced provincial; putting up for years at the same hotel where his father had gone before him; faithful for long to the same restaurant, the same church, and the same theatre, chosen simply for propinquity; steadfastly refusing to dine out. He had a circle of his own, indeed, at home; few men were more beloved in Edinburgh, where he breathed an air that pleased him; and wherever he went, in railway carriages or hotel smoking-rooms, his strange, humorous vein of talk and his transparent honesty, raised him up friends and admirers. But to the general public and the world of London, except about the parliamentary committee-rooms, he remained unknown. All the time, his lights were in every part of the

## MEMORIES AND PORTRAITS

world, guiding the mariner; his firm were consulting engineers to the Indian, the New Zealand, and the Japanese Lighthouse Boards, so that Edinburgh was a world centre for that branch of applied science; in Germany, he had been called "the Nestor of lighthouse illumination"; even in France, where his claims were long denied, he was at last, on the occasion of the late Exposition, recognised and medalled. And to show by one instance the inverted nature of his reputation, comparatively small at home, yet filling the world, a friend of mine was this winter on a visit to the Spanish main, and was asked by a Peruvian if he "knew Mr. Stevenson the author, because his works were much esteemed in Peru?" My friend supposed the reference was to the writer of tales; but the Peruvian had never heard of *Dr. Jekyll*; what he had in his eye, what was esteemed in Peru, were the volumes of the engineer.

Thomas Stevenson was born at Edinburgh in the year 1818, the grandson of Thomas Smith, first engineer to the Board of Northern Lights, son of Robert Stevenson, brother of Alan and David; so that his nephew, David Alan Stevenson, joined with him at the time of his death in the engineership, is the sixth of the family who has held, successively or conjointly, that office. The Bell Rock, his father's great triumph, was finished before he was born; but he served under his brother Alan in the building of Skerryvore,

## THOMAS STEVENSON

the noblest of all extant deep-sea lights, and, in conjunction with his brother David, he added two—the Chickens and Dhu Heartach—to that small number of man's extreme outposts in the ocean. Of shore lights, the two brothers last named erected no fewer than twenty-seven; of beacons<sup>1</sup> about twenty-five. Many harbours were successfully carried out: one, the harbour of Wick, the chief disaster of my father's life, was a failure; the sea proved too strong for man's arts; and after expedients hitherto unthought of, and on a scale hyper-cyclopean, the work must be deserted, and now stands a ruin in that bleak, God-forsaken bay, ten miles from John-o'-Groat's. In the improvement of rivers the brothers were likewise in a large way of practice over both England and Scotland, nor had any British engineer anything approaching their experience.

It was about this nucleus of his professional labours that all my father's scientific inquiries and inventions centred; these proceeded from, and acted back upon, his daily business. Thus it was as a harbour engineer that he became interested in the propagation and reduction of waves; a difficult subject in regard to which he has left behind him much suggestive matter and some valuable approximate results. Storms

<sup>1</sup>In Dr. Murray's admirable new dictionary, I have remarked a flaw *sub voce* Beacon. In its express, technical sense, a beacon may be defined as "a founded, artificial sea-mark, not lighted."

## MEMORIES AND PORTRAITS

were his sworn adversaries, and it was through the study of storms that he approached that of meteorology at large. Many who knew him not otherwise, knew—perhaps have in their gardens—his louvre-boarded screen for instruments. But the great achievement of his life was, of course, in optics as applied to lighthouse illumination. Fresnel had done much; Fresnel had settled the fixed light apparatus on a principle that still seems unimprovable; and when Thomas Stevenson stepped in and brought to a comparable perfection the revolving light, a not unnatural jealousy and much painful controversy rose in France. It had its hour; and, as I have told already, even in France it has blown by. Had it not, it would have mattered the less since all through his life my father continued to justify his claim by fresh advances. New apparatus for lights in new situations was continually being designed with the same unwearied search after perfection, the same nice ingenuity of means; and though the holophotal revolving light perhaps still remains his most elegant contrivance, it is difficult to give it the palm over the much later condensing system, with its thousand possible modifications. The number and the value of these improvements entitle their author to the name of one of mankind's benefactors. In all parts of the world a safer landfall awaits the mariner. Two things must be said: and, first, that Thomas Stevenson was no mathematician.

## THOMAS STEVENSON

Natural shrewdness, a sentiment of optical laws, and a great intensity of consideration led him to just conclusions; but to calculate the necessary formulæ for the instruments he had conceived was often beyond him, and he must fall back on the help of others, notably on that of his cousin and lifelong intimate friend, *emeritus* Professor Swan,<sup>1</sup> of St. Andrews, and his later friend, Professor P. G. Tait. It is a curious enough circumstance, and a great encouragement to others, that a man so ill equipped should have succeeded in one of the most abstract and arduous walks of applied science. The second remark is one that applies to the whole family, and only particularly to Thomas Stevenson from the great number and importance of his inventions: holding as the Stevensons did a Government appointment, they regarded their original work as something due already to the nation, and none of them has ever taken out a patent. It is another cause of the comparative obscurity of the name: for a patent not only brings in money, it infallibly spreads reputation; and my father's instruments enter anonymously into a hundred light-rooms, and are passed anonymously over in a hundred reports, where the least considerable patent would stand out and tell its author's story.

But the life-work of Thomas Stevenson re-

<sup>1</sup>William Swan, Professor of Natural Philosophy in the University of St. Andrews.

## MEMORIES AND PORTRAITS

mains; what we have lost, what we now rather try to recall, is the friend and companion. He was a man of a somewhat antique strain: with a blended sternness and softness that was wholly Scottish and at first somewhat bewildering; with a profound essential melancholy of disposition and (what often accompanies it) the most humorous geniality in company; shrewd and childish; passionately attached, passionately prejudiced; a man of many extremes, many faults of temper, and no very stable foothold for himself among life's troubles. Yet he was a wise adviser; many men, and these not inconsiderable, took counsel with him habitually. "I sat at his feet," writes one of these, "when I asked his advice, and when the broad brow was set in thought and the firm mouth said his say, I always knew that no man could add to the worth of the conclusion." He had excellent taste, though whimsical and partial; collected old furniture and delighted specially in sunflowers long before the days of Mr. Wilde; took a lasting pleasure in prints and pictures; was a devout admirer of Thomson of Duddingston at a time when few shared the taste; and though he read little, was constant to his favourite books. He had never any Greek; Latin he happily re-taught himself after he had left school, where he was a mere consistent idler: happily, I say, for Lactantius, Vossius, and Cardinal Bona were his chief authors. The first he must have read for twenty years uninterruptedly,

## THOMAS STEVENSON

keeping it near him in his study, and carrying it in his bag on journeys. Another old theologian, Brown of Wamphray, was often in his hands. When he was indisposed, he had two books, *Guy Mannering* and *The Parent's Assistant*, of which he never wearied. He was a strong Conservative, or, as he preferred to call himself, a Tory; except in so far as his views were modified by a hot-headed chivalrous sentiment for women. He was actually in favour of a marriage law under which any woman might have a divorce for the asking, and no man on any ground whatever; and the same sentiment found another expression in a Magdalen Mission in Edinburgh, founded and largely supported by himself. This was but one of the many channels of his public generosity; his private was equally unstrained. The Church of Scotland, of which he held the doctrines (though in a sense of his own) and to which he bore a clansman's loyalty, profited often by his time and money; and though, from a morbid sense of his own unworthiness, he would never consent to be an office-bearer, his advice was often sought, and he served the Church on many committees. What he perhaps valued highest in his work were his contributions to the defence of Christianity; one of which, in particular, was praised by Hutchinson Stirling and reprinted at the request of Professor Crawford.

His sense of his own unworthiness I have call-

## MEMORIES AND PORTRAITS

ed morbid; morbid, too, were his sense of the fleetingness of life and his concern for death. He had never accepted the conditions of man's life or his own character; and his inmost thoughts were ever tinged with the Celtic melancholy. Cases of conscience were sometimes grievous to him, and that delicate employment of a scientific witness cost him many qualms. But he found respite from these troublesome humours in his work, in his lifelong study of natural science, in the society of those he loved, and in his daily walks, which now would carry him far into the country with some congenial friend, and now keep him dangling about the town from one old book-shop to another, and scraping romantic acquaintance with every dog that passed. His talk, compounded of so much sterling sense and so much freakish humour, and clothed in language so apt, droll, and emphatic, was a perpetual delight to all who knew him before the clouds began to settle on his mind. His use of language was both just and picturesque; and when at the beginning of his illness he began to feel the ebbing of this power, it was strange and painful to hear him reject one word after another as inadequate, and at length desist from the search and leave his phrase unfinished rather than finish it without propriety. It was perhaps another Celtic trait that his affections and emotions, passionate as these were, and liable to passionate ups and downs, found the most elo-

## THOMAS STEVENSON

quent expression both in words and gestures. Love, anger, and indignation shone through him and broke forth in imagery, like what we read of Southern races. For all these emotional extremes, and in spite of the melancholy ground of his character, he had upon the whole a happy life; nor was he less fortunate in his death, which at the last came to him unaware.

# TALK AND TALKERS

“Sir, we had a good talk.”—JOHNSON.

“As we must account for every idle word, so we must for every idle silence.”—FRANKLIN.

### I

**T**HERE can be no fairer ambition than to excel in talk; to be affable, gay, ready, clear, and welcome; to have a fact, a thought, or an illustration, pat to every subject; and not only to cheer the flight of time among our intimates, but bear our part in that great international congress, always sitting, where public wrongs are first declared, public errors first corrected, and the course of public opinion shaped, day by day, a little nearer to the right. No measure comes before Parliament but it has been long ago prepared by the grand jury of the talkers; no book is written that has not been largely composed by their assistance. Literature in many of its branches is no other than the shadow of good talk; but the imitation falls far short of the original in life, freedom and effect. There are always two to a talk, giving and taking, comparing experience and according conclusions. Talk is fluid, tentative, continually “in further search

## TALK AND TALKERS

and progress"; while written words remain fixed, become idols even to the writer, found wooden dogmatisms, and preserve flies of obvious error in the amber of the truth. Last and chief, while literature, gagged with linsey-woolsey, can only deal with a fraction of the life of man, talk goes fancy free and may call a spade a spade. Talk has none of the freezing immunities of the pulpit. It cannot, even if it would, become merely æsthetic or merely classical like literature. A jest intervenes, the solemn humbug is dissolved in laughter, and speech runs forth out of the contemporary groove into the open fields of nature, cheery and cheering, like schoolboys out of school. And it is in talk alone that we can learn our period and ourselves. In short, the first duty of a man is to speak; that is his chief business in this world; and talk, which is the harmonious speech of two or more, is by far the most accessible of pleasures. It costs nothing in money; it is all profit; it completes our education, founds and fosters our friendships, and can be enjoyed at any age and in almost any state of health.

The spice of life is battle; the friendliest relations are still a kind of contest; and if we would not forego all that is valuable in our lot, we must continually face some other person, eye to eye, and wrestle a fall whether in love or enmity. It is still by force of body, or power of character or intellect, that we attain to worthy pleasures.

## MEMORIES AND PORTRAITS

Men and women contend for each other in the lists of love, like rival mesmerists; the active and adroit decide their challenges in the sports of the body; and the sedentary sit down to chess or conversation. All sluggish and pacific pleasures are, to the same degree, solitary and selfish; and every durable bond between human beings is founded in or heightened by some element of competition. Now, the relation that has the least root in matter is undoubtedly that airy one of friendship; and hence, I suppose, it is that good talk most commonly arises among friends. Talk is, indeed, both the scene and instrument of friendship. It is in talk alone that the friends can measure strength, and enjoy that amicable counter-assertion of personality which is the gauge of relations and the sport of life.

A good talk is not to be had for the asking. Humours must first be accorded in a kind of overture or prologue; hour, company, and circumstance be suited; and then, at a fit juncture, the subject, the quarry of two heated minds, spring up like a deer out of the wood. Not that the talker has any of the hunter's pride, though he has all and more than all his ardour. The genuine artist follows the stream of conversation as an angler follows the windings of a brook, not dallying where he fails to "kill." He trusts implicitly to hazard; and he is rewarded by continual variety, continual pleasure, and those changing prospects of the truth that are the best

## TALK AND TALKERS

of education. There is nothing in a subject, so called, that we should regard it as an idol, or follow it beyond the promptings of desire. Indeed, there are few subjects; and so far as they are truly talkable, more than the half of them may be reduced to three: that I am I, that you are you, and that there are other people dimly understood to be not quite the same as either. Wherever talk may range, it still runs half the time on these eternal lines. The theme being set, each plays on himself as on an instrument; asserts and justifies himself; ransacks his brain for instances and opinions, and brings them forth new-minted, to his own surprise and the admiration of his adversary. All natural talk is a festival of ostentation; and by the laws of the game each accepts and fans the vanity of the other. It is from that reason that we venture to lay ourselves so open, that we dare to be so warmly eloquent, and that we swell in each other's eyes to such a vast proportion. For talkers, once launched, begin to overflow the limits of their ordinary selves, tower up to the height of their secret pretensions, and give themselves out for the heroes, brave, pious, musical, and wise, that in their most shining moments they aspire to be. So they weave for themselves with words and for a while inhabit a palace of delights, temple at once and theatre, where they fill the round of the world's dignities, and feast with the gods, exulting in Kudos. And when the talk is

## MEMORIES AND PORTRAITS

over, each goes his way, still flushed with vanity and admiration, still trailing clouds of glory; each declines from the height of his ideal orgie, not in a moment, but by slow declension. I remember, in the *entr'acte* of an afternoon performance, coming forth into the sunshine, in a beautiful green, gardened corner of a romantic city; and as I sat and smoked, the music moving in my blood, I seemed to sit there and evaporate *The Flying Dutchman* (for it was that I had been hearing) with a wonderful sense of life, warmth, well-being, and pride; and the noises of the city, voices, bells, and marching feet, fell together in my ears like a symphonious orchestra. In the same way, the excitement of a good talk lives for a long while after in the blood, the heart still hot within you, the brain still simmering, and the physical earth swimming around you with the colours of the sunset.

Natural talk, like ploughing, should turn up a large surface of life, rather than dig mines into geological strata. Masses of experience, anecdote, incident, cross-lights, quotation, historical instances, the whole flotsam and jetsam of two minds forced in and in upon the matter in hand from every point of the compass, and from every degree of mental elevation and abasement—these are the material with which talk is fortified, the food on which the talkers thrive. Such argument as is proper to the exercise should still be brief and seizing. Talk should proceed by in-

## TALK AND TALKERS

stances; by the apposite, not the expository. It should keep close along the lines of humanity, near the bosoms and businesses of men, at the level where history, fiction, and experience intersect and illuminate each other. I am I, and you are you, with all my heart; but conceive how these lean propositions change and brighten when, instead of words, the actual you and I sit cheek by jowl, the spirit housed in the live body, and the very clothes uttering voices to corroborate the story in the face. Not less surprising is the change when we leave off to speak of generalities—the bad, the good, the miser, and all the characters of Theophrastus—and call up other men, by anecdote or instance, in their very trick and feature; or trading on a common knowledge, toss each other famous names, still glowing with the hues of life. Communication is no longer by words, but by the instancing of whole biographies, epics, systems of philosophy, and epochs of history, in bulk. That which is understood excels that which is spoken in quantity and quality alike; ideas thus figured and personified, change hands, as we may say, like coin; and the speakers imply without effort the most obscure and intricate thoughts. Strangers who have a large common ground of reading will, for this reason, come the sooner to the grapple of genuine converse. If they know Othello and Napoleon, Consuelo and Clarissa Harlowe, Vautrin and Steenie Steenson,

## MEMORIES AND PORTRAITS

they can leave generalities and begin at once to speak by figures.

Conduct and art are the two subjects that arise most frequently and that embrace the widest range of facts. A few pleasures bear discussion for their own sake, but only those which are most social or most radically human; and even these can only be discussed among their devotees. A technicality is always welcome to the expert, whether in athletics, art, or law; I have heard the best kind of talk on technicalities from such rare and happy persons as both know and love their business. No human being ever spoke of scenery for above two minutes at a time, which makes me suspect we hear too much of it in literature. The weather is regarded as the very nadir and scoff of conversational topics. And yet the weather, the dramatic element in scenery, is far more tractable in language, and far more human both in import and suggestion than the stable features of the landscape. Sailors and shepherds, and the people generally of coast and mountain, talk well of it; and it is often excitingly presented in literature. But the tendency of all living talk draws it back and back into the common focus of humanity. Talk is a creature of the street and market-place, feeding on gossip; and its last resort is still in a discussion on morals. That is the heroic form of gossip; heroic in virtue of its high pretensions; but still gossip, because it turns on personali-

## TALK AND TALKERS

ties. You can keep no men long, nor Scotsmen at all, off moral or theological discussion. These are to all the world what law is to lawyers; they are everybody's technicalities; the medium through which all consider life, and the dialect in which they express their judgments. I knew three young men who walked together daily for some two months in a solemn and beautiful forest and in cloudless summer weather; daily they talked with unabated zest, and yet scarce wandered that whole time beyond two subjects—theology and love. And perhaps neither a court of love nor an assembly of divines would have granted their premises or welcomed their conclusions.

Conclusions, indeed, are not often reached by talk any more than by private thinking. That is not the profit. The profit is in the exercise, and above all in the experience; for when we reason at large on any subject, we review our state and history in life. From time to time, however, and specially, I think, in talking art, talk becomes effective, conquering like war, widening the boundaries of knowledge like an exploration. A point arises; the question takes a problematical, a baffling, yet a likely air; the talkers begin to feel lively presentiments of some conclusion near at hand; towards this they strive with emulous ardour, each by his own path, and struggling for first utterance; and then one leaps upon the summit of that matter with a shout,

## MEMORIES AND PORTRAITS

and almost at the same moment the other is beside him; and behold they are agreed. Like enough, the progress is illusory, a mere cat's cradle having been wound and unwound out of words. But the sense of joint discovery is none the less giddy and inspiriting. And in the life of the talker such triumphs, though imaginary, are neither few nor far apart; they are attained with speed and pleasure, in the hour of mirth; and by the nature of the process, they are always worthily shared.

There is a certain attitude, combative at once and deferential, eager to fight yet most averse to quarrel, which marks out at once the talkable man. It is not eloquence, not fairness, not obstinacy, but a certain proportion of all of these that I love to encounter in my amicable adversaries. They must not be pontiffs holding doctrine, but huntsmen questing after elements of truth. Neither must they be boys to be instructed, but fellow-teachers with whom I may wrangle and agree on equal terms. We must reach some solution, some shadow of consent; for without that, eager talk becomes a torture. But we do not wish to reach it cheaply, or quickly, or without the tussle and effort wherein pleasure lies.

The very best talker, with me, is one whom I shall call Spring-Heel'd Jack. I say so, because I never knew any one who mingled so largely the possible ingredients of converse. In the

## TALK AND TALKERS

Spanish proverb, the fourth man necessary to compound a salad, is a madman to mix it: Jack is that madman. I know not which is more remarkable; the insane lucidity of his conclusions, the humorous eloquence of his language, or his power of method, bringing the whole of life into the focus of the subject treated, mixing the conversational salad like a drunken god. He doubles like the serpent, changes and flashes like the shaken kaleidoscope, transmigrates bodily into the views of others, and so, in the twinkling of an eye and with a heady rapture, turns questions inside out and flings them empty before you on the ground, like a triumphant conjuror. It is my common practice when a piece of conduct puzzles me, to attack it in the presence of Jack with such grossness, such partiality, and such wearing iteration, as at length shall spur him up in its defence. In a moment he transmigrates, dons the required character, and with moonstruck philosophy justifies the act in question. I can fancy nothing to compare with the *vigour* of these impersonations, the strange scale of language, flying from Shakespeare to Kant, and from Kant to Major Dyngwell—

“As fast as a musician scatters sounds  
Out of an instrument—”

the sudden, sweeping generalisations, the absurd irrelevant particularities, the wit, wisdom, folly, humour, eloquence, and bathos, each star-

## MEMORIES AND PORTRAITS

ting in its kind, and yet all luminous in the admired disorder of their combination. A talker of a different calibre, though belonging to the same school, is Burly. Burly is a man of a great presence; he commands a larger atmosphere, gives the impression of a grosser mass of character than most men. It has been said of him that his presence could be felt in a room you entered blindfold; and the same, I think, has been said of other powerful constitutions condemned to much physical inaction. There is something boisterous and piratic in Burly's manner of talk which suits well enough with this impression. He will roar you down, he will bury his face in his hands, he will undergo passions of revolt and agony; and meanwhile his attitude of mind is really both conciliatory and receptive; and after Pistol has been out-Pistol'd, and the welkin rung for hours, you begin to perceive a certain subsidence in these spring torrents, points of agreement issue, and you end arm-in-arm, and in a glow of mutual admiration. The outcry only serves to make your final union the more unexpected and precious. Throughout there has been perfect sincerity, perfect intelligence, a desire to hear although not always to listen, and an unaffected eagerness to meet concessions. You have, with Burly, none of the dangers that attend debate with Spring-Heel'd Jack; who may at any moment turn his powers of transmigration on yourself, create for you a view you

## TALK AND TALKERS

never held, and then furiously fall on you for holding it. These, at least, are my two favourites, and both are loud, copious, intolerant talkers. This argues that I myself am in the same category; for if we love talking at all, we love a bright, fierce adversary, who will hold his ground, foot by foot, in much our own manner, sell his attention dearly, and give us our full measure of the dust and exertion of battle. Both these men can be beat from a position, but it takes six hours to do it; a high and hard adventure, worth attempting. With both you can pass days in an enchanted country of the mind, with people, scenery, and manners of its own; live a life apart, more arduous, active, and glowing than any real existence; and come forth again when the talk is over, as out of a theatre or a dream, to find the east wind still blowing and the chimneys of the old battered city still around you. Jack has the far finer mind, Burly the far more honest; Jack gives us the animated poetry, Burly the romantic prose, of similar themes; the one glances high like a meteor and makes a light in darkness; the other, with many changing hues of fire, burns at the sea-level, like a conflagration; but both have the same humour and artistic interests, the same unquenched ardour in pursuit, the same gusts of talk and thunderclaps of contradiction.

Cockshot<sup>1</sup> is a different article, but vastly en-

<sup>1</sup>The late Fleeming Jenkin.

## MEMORIES AND PORTRAITS

tertaining, and has been meat and drink to me for many a long evening. His manner is dry, brisk, and pertinacious, and the choice of words not much. The point about him is his extraordinary readiness and spirit. You can propound nothing but he has either a theory about it ready-made, or will have one instantly on the stocks, and proceed to lay its timbers and launch it in your presence. "Let me see," he will say. "Give me a moment. I *should* have some theory for that." A blither spectacle than the vigour with which he sets about the task, it were hard to fancy. He is possessed by a demoniac energy, welding the elements for his life, and bending ideas, as an athlete bends a horseshoe, with a visible and lively effort. He has, in theorising, a compass, an art; what I would call the synthetic gusto; something of a Herbert Spencer, who should see the fun of the thing. You are not bound, and no more is he, to place your faith in these brand-new opinions. But some of them are right enough, durable even for life; and the poorest serve for a cock-shy—as when idle people, after picnics, float a bottle on a pond and have an hour's diversion ere it sinks. Which-ever they are, serious opinions or humours of the moment, he still defends his ventures with indefatigable wit and spirit, hitting savagely himself, but taking punishment like a man. He knows and never forgets that people talk, first of all, for the sake of talking; conducts him-

## TALK AND TALKERS

self in the ring, to use the old slang, like a thorough "glutton," and honestly enjoys a telling facer from his adversary. Cockshot is bottled effervescency, the sworn foe of sleep. Three-in-the-morning Cockshot, says a victim. His talk is like the driest of all imaginable dry champagnes. Sleight of hand and inimitable quickness are the qualities by which he lives. Athelred, on the other hand, presents you with the spectacle of a sincere and somewhat slow nature thinking aloud. He is the most unready man I ever knew to shine in conversation. You may see him sometimes wrestle with a refractory jest for a minute or two together, and perhaps fail to throw it in the end. And there is something singularly engaging, often instructive, in the simplicity with which he thus exposes the process as well as the result, the works as well as the dial of the clock. Withal he has his hours of inspiration. Apt words come to him as if by accident, and, coming from deeper down, they smack the more personally, they have the more of fine old crusted humanity, rich in sediment and humour. There are sayings of his in which he has stamped himself into the very grain of the language; you would think he must have worn the words next his skin and slept with them. Yet it is not as a sayer of particular good things that Athelred is most to be regarded, rather as the stalwart woodman of thought. I have pulled on a light cord often enough, while

## MEMORIES AND PORTRAITS

he has been wielding the broad-axe; and between us, on this unequal division, many a specious fallacy has fallen. I have known him to battle the same question night after night for years, keeping it in the reign of talk, constantly applying it and re-applying it to life with humorous or grave intention, and all the while, never hurrying, nor flagging, nor taking an unfair advantage of the facts. Jack at a given moment, when arising, as it were, from the tripod, can be more radiantly just to those from whom he differs; but then the tenor of his thoughts is even calumnious; while Athelred, slower to forge excuses, is yet slower to condemn, and sits over the welter of the world, vacillating but still judicial, and still faithfully contending with his doubts.

Both the last talkers deal much in points of conduct and religion studied in the "dry light" of prose. Indirectly and as if against his will the same elements from time to time appear in the troubled and poetic talk of Opalstein.<sup>1</sup> His various and exotic knowledge, complete although unready sympathies, and fine, full, discriminative flow of language, fit him out to be the best of talkers; so perhaps he is with some, not *quite* with me—*proxime accessit*, I should say. He sings the praises of the earth and the arts, flowers and jewels, wine and music, in a moonlight, serenading manner, as to the light guitar; even wisdom comes from his tongue like sing-

<sup>1</sup>The late John Addington Symonds.

## TALK AND TALKERS

ing; no one is, indeed, more tuneful in the upper notes. But even while he sings the song of the Sirens, he still hearkens to the barking of the Sphinx. Jarring Byronic notes interrupt the flow of his Horatian humours. His mirth has something of the tragedy of the world for its perpetual background; and he feasts like Don Giovanni to a double orchestra, one lightly sounding for the dance, one pealing Beethoven in the distance. He is not truly reconciled either with life or with himself; and this instant war in his members sometimes divides the man's attention. He does not always, perhaps not often, frankly surrender himself in conversation. He brings into the talk other thoughts than those which he expresses; you are conscious that he keeps an eye on something else, that he does not shake off the world, nor quite forget himself. Hence arise occasional disappointments; even an occasional unfairness for his companions, who find themselves one day giving too much, and the next, when they are wary out of season, giving perhaps too little. Purcel is in another class from any I have mentioned. He is no debater but appears in conversation, as occasion rises, in two distinct characters, one of which I admire and fear, and the other love. In the first, he is radiantly civil and rather silent, sits on a high, courtly hilltop, and from that vantage-ground drops you his remarks like favours. He seems not to share in our sublunary contentions;

## MEMORIES AND PORTRAITS

he wears no sign of interest; when on a sudden there falls in a crystal of wit, so polished that the dull do not perceive it, but so right that the sensitive are silenced. True talk should have more body and blood, should be louder, vainer, and more declaratory of the man; the true talker should not hold so steady an advantage over whom he speaks with; and that is one reason out of a score why I prefer my Purcel in his second character, when he unbends into a strain of graceful gossip, singing like the fireside kettle. In these moods he has an elegant homeliness that rings of the true Queen Anne. I know another person who attains, in his moments, to the insolence of a Restoration comedy, speaking, I declare, as Congreve wrote; but that is a sport of nature, and scarce falls under the rubric, for there is none, alas! to give him answer.

One last remark occurs: It is the mark of genuine conversation that the sayings can scarce be quoted with their full effect beyond the circle of common friends. To have their proper weight they should appear in a biography, and with the portrait of the speaker. Good talk is dramatic; it is like an impromptu piece of acting where each should represent himself to the greatest advantage; and that is the best kind of talk where each speaker is most fully and candidly himself, and where, if you were to shift the speeches round from one to another, there would be the greatest loss in significance and perspicuity. It

## TALK AND TALKERS

is for this reason that talk depends so wholly on our company. We should like to introduce Falstaff and Mercutio, or Falstaff and Sir Toby; but Falstaff in talk with Cordelia seems even painful. Most of us, by the Protean quality of man, can talk to some degree with all; but the true talk, that strikes out all the slumbering best of us, comes only with the peculiar brethren of our spirits, is founded as deep as love in the constitution of our being, and is a thing to relish with all our energy, while yet we have it, and to be grateful for for ever.

### TALK AND TALKERS<sup>1</sup>

#### II

IN the last paper there was perhaps too much about mere debate; and there was nothing said at all about that kind of talk which is merely luminous and restful, a higher power of silence, the quiet of the evening shared by ruminating friends. There is something, aside from personal preference, to be alleged in support of this omission. Those who are no chimney-cornerers, who rejoice in the social thunderstorm, have a ground in reason for their choice. They get little rest indeed; but restfulness is a quality for cattle; the virtues are all active, life is alert, and it is in repose that men prepare themselves for evil. On the other hand, they are bruised into a knowledge of themselves and others; they have in a high degree the fencer's pleasure in dexterity displayed and proved; what they get they get upon life's terms, paying for it as they go; and once the talk is launched, they are assured

<sup>1</sup>This sequel was called forth by an excellent article in *The Spectator*.

## TALK AND TALKERS

of honest dealing from an adversary eager like themselves. The aboriginal man within us, the cave-dweller, still lusty as when he fought tooth and nail for roots and berries, scents this kind of equal battle from afar; it is like his old primæval days upon the crags, a return to the sincerity of savage life from the comfortable fictions of the civilised. And if it be delightful to the Old Man, it is none the less profitable to his younger brother, the conscientious gentleman. I feel never quite sure of your urbane and smiling co-teries; I fear they indulge a man's vanities in silence, suffer him to encroach, encourage him on to be an ass, and send him forth again, not merely contemned for the moment, but radically more contemptible than when he entered. But if I have a flushed, blustering fellow for my opposite, bent on carrying a point, my vanity is sure to have its ears rubbed, once at least, in the course of the debate. He will not spare me when we differ; he will not fear to demonstrate my folly to my face.

For many natures there is not much charm in the still, chambered society, the circle of bland countenances, the digestive silence, the admired remark, the flutter of affectionate approval. They demand more atmosphere and exercise; "a gale upon their spirits," as our pious ancestors would phrase it; to have their wits well breathed in an uproarious Valhalla. And I suspect that the choice, given their character and faults, is one to be defended. The purely wise are si-

## MEMORIES AND PORTRAITS

lenced by facts; they talk in a clear atmosphere, problems lying around them like a view in nature; if they can be shown to be somewhat in the wrong, they digest the reproof like a thrashing, and make better intellectual blood. They stand corrected by a whisper; a word or a glance reminds them of the great eternal law. But it is not so with all. Others in conversation seek rather contact with their fellow-men than increase of knowledge or clarity of thought. The drama, not the philosophy, of life is the sphere of their intellectual activity. Even when they pursue truth, they desire as much as possible of what we may call human scenery along the road they follow. They dwell in the heart of life; the blood sounding in their ears, their eyes laying hold of what delights them with a brutal avidity that makes them blind to all besides, their interest riveted on people, living, loving, talking, tangible people. To a man of this description, the sphere of argument seems very pale and ghostly. By a strong expression, a perturbed countenance, floods of tears, an insult which his conscience obliges him to swallow, he is brought round to knowledge which no syllogism would have conveyed to him. His own experience is so vivid, he is so superlatively conscious of himself, that if, day after day, he is allowed to hector and hear nothing but approving echoes, he will lose his hold on the soberness of things and take himself in earnest for a god.

## TALK AND TALKERS

Talk might be to such an one the very way of moral ruin; the school where he might learn to be at once intolerable and ridiculous.

This character is perhaps commoner than philosophers suppose. And for persons of that stamp to learn much by conversation, they must speak with their superiors, not in intellect, for that is a superiority that must be proved, but in station. If they cannot find a friend to bully them for their good, they must find either an old man, a woman, or some one so far below them in the artificial order of society, that courtesy may be particularly exercised.

The best teachers are the aged. To the old our mouths are always partly closed; we must swallow our obvious retorts and listen. They sit above our heads, on life's raised dais, and appeal at once to our respect and pity. A flavour of the old school, a touch of something different in their manner—which is freer and rounder, if they come of what is called a good family, and often more timid and precise if they are of the middle class—serves, in these days, to accentuate the difference of age and add a distinction to grey hairs. But their superiority is founded more deeply than by outward marks or gestures. They are before us in the march of man; they have more or less solved the irking problem; they have battled through the equinox of life; in good and evil they have held their course; and now, without open shame, they near the crown

## MEMORIES AND PORTRAITS

and harbour. It may be we have been struck with one of fortune's darts; we can scarce be civil, so cruelly is our spirit tossed. Yet long before we were so much as thought upon, the like calamity befell the old man or woman that now, with pleasant humour, rallies us upon our inattention, sitting composed in the holy evening of man's life, in the clear shining after rain. We grow ashamed of our distresses, new and hot and coarse, like villainous roadside brandy; we see life in aerial perspective, under the heavens of faith; and out of the worst, in the mere presence of contented elders, look forward and take patience. Fear shrinks before them "like a thing reprov'd," not the flitting and ineffectual fear of death, but the instant, dwelling terror of the responsibilities and revenges of life. Their speech, indeed, is timid; they report lions in the path; they counsel a meticulous footing; but their serene, marred faces are more eloquent and tell another story. Where they have gone, we will go also, not very greatly fearing; what they have endured unbroken, we also, God helping us, will make a shift to bear.

Not only is the presence of the aged in itself remedial, but their minds are stored with antidotes, wisdom's simples, plain considerations overlooked by youth. They have matter to communicate, be they never so stupid. Their talk is not merely literature, it is great literature; classic in virtue of the speaker's detachment,

## TALK AND TALKERS

studded, like a book of travel, with things we should not otherwise have learnt. In virtue, I have said, of the speaker's detachment,—and this is why, of two old men, the one who is not your father speaks to you with the more sensible authority; for in the paternal relation the oldest have lively interests and remain still young. Thus I have known two young men great friends; each swore by the other's father; the father of each swore by the other lad; and yet each pair of parent and child were perpetually by the ears. This is typical: it reads like the germ of some kindly comedy.

The old appear in conversation in two characters: the critically silent and the garrulous anecdotic. The last is perhaps what we look for; it is perhaps the more instructive. An old gentleman, well on in years, sits handsomely and naturally in the bow-window of his age, scanning experience with reverted eye; and chirping and smiling, communicates the accidents and reads the lesson of his long career. Opinions are strengthened, indeed, but they are also weeded out in the course of years. What remains steadily present to the eye of the retired veteran in his hermitage, what still ministers to his content, what still quickens his old honest heart—these are “the real long-lived things” that Whitman tells us to prefer. Where youth agrees with age, not where they differ, wisdom lies; and it is when the young disciple finds his heart to beat

## MEMORIES AND PORTRAITS

in tune with his grey-bearded teacher's that a lesson may be learned. I have known one old gentleman, whom I may name, for he is now gathered to his stock—Robert Hunter, Sheriff of Dumbarton, and author of an excellent law-book still re-edited and republished. Whether he was originally big or little is more than I can guess. When I knew him he was all fallen away and fallen in; crooked and shrunken; buckled into a stiff waistcoat for support; troubled by ailments which kept him hobbling in and out of the room; one foot gouty; a wig for decency, not for deception, on his head; close shaved, except under his chin—and for that he never failed to apologise, for it went sore against the traditions of his life. You can imagine how he would fare in a novel by Miss Mather; yet this rag of a Chelsea veteran lived to his last year in the plenitude of all that is best in man, brimming with human kindness, and staunch as a Roman soldier under his manifold infirmities. You could not say that he had lost his memory, for he would repeat Shakespeare and Webster and Jeremy Taylor and Burke by the page together; but the parchment was filled up, there was no room for fresh inscriptions, and he was capable of repeating the same anecdote on many successive visits. His voice survived in its full power, and he took a pride in using it. On his last voyage as Commissioner of Lighthouses, he hailed a ship at sea and made himself clearly audible

## TALK AND TALKERS

without a speaking trumpet, ruffling the while with a proper vanity in his achievement. He had a habit of eking out his words with interrogative hems, which was puzzling and a little wearisome, suited ill with his appearance, and seemed a survival from some former stage of bodily portliness. Of yore, when he was a great pedestrian and no enemy to good claret, he may have pointed with these minute guns his allocutions to the bench. His humour was perfectly equable, set beyond the reach of fate; gout, rheumatism, stone, and gravel might have combined their forces against that frail tabernacle, but when I came round on Sunday evening, he would lay aside Jeremy Taylor's *Life of Christ* and greet me with the same open brow, the same kind formality of manner. His opinions and sympathies dated the man almost to a decade. He had begun life, under his mother's influence, as an admirer of Junius, but on maturer knowledge had transferred his admiration to Burke. He cautioned me, with entire gravity, to be punctilious in writing English; never to forget that I was a Scotsman, that English was a foreign tongue, and that if I attempted the colloquial, I should certainly be shamed: the remark was apposite, I suppose, in the days of David Hume. Scott was too new for him; he had known the author—known him, too, for a Tory; and to the genuine classic a contemporary is always something of a trouble. He had the old, serious

## MEMORIES AND PORTRAITS

love of the play; had even, as he was proud to tell, played a certain part in the history of Shakespearian revivals, for he had successfully pressed on Murray, of the old Edinburgh Theatre, the idea of producing Shakespeare's fairy pieces with great scenic display. A moderate in religion, he was much struck in the last years of his life by a conversation with two young lads, revivalists. "H'm," he would say—"new to me. I have had—h'm—no such experience." It struck him, not with pain, rather with a solemn philosophic interest, that he, a Christian as he hoped, and a Christian of so old a standing, should hear these young fellows talking of his own subject, his own weapons that he had fought the battle of life with,—“and—h'm—not understand.” In this wise and graceful attitude he did justice to himself and others, reposed unshaken in his old beliefs, and recognised their limits without anger or alarm. His last recorded remark, on the last night of his life, was after he had been arguing against Calvinism with his minister and was interrupted by an intolerable pang. “After all,” he said, “of all the 'isms, I know none so bad as rheumatism.” My own last sight of him was some time before, when we dined together at an inn; he had been on circuit, for he stuck to his duties like a chief part of his existence; and I remember it as the only occasion on which he ever soiled his lips with slang—a thing he loathed. We were both Roberts; and as we took our

## TALK AND TALKERS

places at table, he addressed me with a twinkle: "We are just what you would call two bob." He offered me port, I remember, as the proper milk of youth; spoke of "twenty-shilling notes"; and throughout the meal was full of old-world pleasantry and quaintness, like an ancient boy on a holiday. But what I recall chiefly was his confession that he had never read *Othello* to an end. Shakespeare was his continual study. He loved nothing better than to display his knowledge and memory by adducing parallel passages from Shakespeare, passages where the same word was employed, or the same idea differently treated. But *Othello* had beaten him. "That noble gentleman and that noble lady—h'm—too painful for me." The same night the hoardings were covered with posters, "Burlesque of *Othello*," and the contrast blazed up in my mind like a bonfire. An unforgettable look it gave me into that kind man's soul. His acquaintance was indeed a liberal and pious education. All the humanities were taught in that bare dining-room beside his gouty footstool. He was a piece of good advice; he was himself the instance that pointed and adorned his various talk. Nor could a young man have found elsewhere a place so set apart from envy, fear, discontent, or any of the passions that debase; a life so honest and composed; a soul like an ancient violin, so subdued to harmony, responding to a touch in music—as in that dining-room,

## MEMORIES AND PORTRAITS

with Mr. Hunter chatting at the eleventh hour, under the shadow of eternity, fearless and gentle.

The second class of old people are not anecdotic; they are rather hearers than talkers; listening to the young with an amused and critical attention. To have this sort of intercourse to perfection, I think we must go to old ladies. Women are better hearers than men, to begin with; they learn, I fear in anguish, to bear with the tedious and infantile vanity of the other sex; and we will take more from a woman than even from the oldest man in the way of biting comment. Biting comment is the chief part, whether for profit or amusement, in this business. The old lady that I have in my eye is a very caustic speaker, her tongue, after years of practice, in absolute command, whether for silence or attack. If she chance to dislike you, you will be tempted to curse the malignity of age. But if you chance to please even slightly, you will be listened to with a particular laughing grace of sympathy, and from time to time chastised, as if in play, with a parasol as heavy as a pole-axe. It requires a singular art, as well as the vantage-ground of age, to deal these stunning corrections among the coxcombs of the young. The pill is disguised in sugar of wit; it is administered as a compliment—if you had not pleased, you would not have been censured; it is a personal affair—a hyphen, a *trait d'union*, between you and your censor; age's philander-

## TALK AND TALKERS

ing, for her pleasure and your good. Incontestably the young man feels very much of a fool; but he must be a perfect Malvolio, sick with self-love, if he cannot take an open buffet and still smile. The correction of silence is what kills; when you know you have transgressed, and your friend says nothing and avoids your eye. If a man were made of gutta-percha, his heart would quail at such a moment. But when the word is out, the worst is over; and a fellow with any good-humour at all may pass through a perfect hail of witty criticism, every bare place on his soul hit to the quick with a shrewd missile, and reappear, as if after a dive, tingling with a fine moral reaction, and ready, with a shrinking readiness, one-third loath, for a repetition of the discipline.

There are few women, not well sunned and ripened, and perhaps toughened, who can thus stand apart from a man and say the true thing with a kind of genial cruelty. Still there are some—and I doubt if there be any man who can return the compliment. The class of man represented by Vernon Whitford in *The Egoist* says, indeed, the true thing, but he says it stockishly. Vernon is a noble fellow, and makes, by the way, a noble and instructive contrast to Daniel Deronda; his conduct is the conduct of a man of honour; but we agree with him, against our consciences, when he remorsefully considers “its astonishing dryness.” He is the best of

## MEMORIES AND PORTRAITS

men, but the best of women manage to combine all that and something more. Their very faults assist them; they are helped even by the falseness of their position in life. They can retire into the fortified camp of the proprieties. They can touch a subject and suppress it. The most adroit employ a somewhat elaborate reserve as a means to be frank, much as they wear gloves when they shake hands. But a man has the full responsibility of his freedom, cannot evade a question, can scarce be silent without rudeness, must answer for his words upon the moment, and is not seldom left face to face with a damning choice, between the more or less dishonourable wriggling of Deronda and the downright woodenness of Vernon Whitford.

But the superiority of women is perpetually menaced; they do not sit throned on infirmities like the old; they are suitors as well as sovereigns; their vanity is engaged, their affections are too apt to follow; and hence much of the talk between the sexes degenerates into something unworthy of the name. The desire to please, to shine with a certain softness of lustre and to draw a fascinating picture of oneself, banishes from conversation all that is sterling and most of what is humorous. As soon as a strong current of mutual admiration begins to flow, the human interest triumphs entirely over the intellectual, and the commerce of words, consciously or not, becomes secondary to the commercing of eyes.

## TALK AND TALKERS

But even where this ridiculous danger is avoided, and a man and woman converse equally and honestly, something in their nature or their education falsifies the strain. An instinct prompts them to agree; and where that is impossible, to agree to differ. Should they neglect the warning, at the first suspicion of an argument, they find themselves in different hemispheres. About any point of business or conduct, any actual affair demanding settlement, a woman will speak and listen, hear and answer arguments, not only with natural wisdom, but with candour and logical honesty. But if the subject of debate be something in the air, an abstraction, an excuse for talk, a logical Aunt Sally, then may the male debater instantly abandon hope; he may employ reason, adduce facts, be supple, be smiling, be angry, all shall avail him nothing; what the woman said first, that (unless she has forgotten it) she will repeat at the end. Hence, at the very junctures when a talk between men grows brighter and quicker and begins to promise to bear fruit, talk between the sexes is menaced with dissolution. The point of difference, the point of interest, is evaded by the brilliant woman, under a shower of irrelevant conversational rockets; it is bridged by the discreet woman with a rustle of silk, as she passes smoothly forward to the nearest point of safety. And this sort of prestidigitation, juggling the dangerous topic out of sight until it can be re-

## MEMORIES AND PORTRAITS

introduced with safety in an altered shape, is a piece of tactics among the true drawing-room queens.

The drawing-room is, indeed, an artificial place; it is so by our choice and for our sins. The subjection of women; the ideal imposed upon them from the cradle, and worn, like a hair-shirt, with so much constancy; their motherly, superior tenderness to man's vanity and self-importance; their managing arts—the arts of a civilised slave among good-natured barbarians—are all painful ingredients and all help to falsify relations. It is not till we get clear of that amusing artificial scene that genuine relations are founded, or ideas honestly compared. In the garden, on the road or the hillside, or *tête-à-tête* and apart from interruptions, occasions arise when we may learn much from any single woman; and nowhere more often than in married life. Marriage is one long conversation, chequered by disputes. The disputes are valueless; they but ingrain the difference; the heroic heart of woman prompting her at once to nail her colours to the mast. But in the intervals, almost unconsciously and with no desire to shine, the whole material of life is turned over and over, ideas are struck out and shared, the two persons more and more adapt their notions one to suit the other, and in process of time, without sound of trumpet, they conduct each other into new worlds of thought.

## XII

### THE CHARACTER OF DOGS

**T**HE civilisation, the manners, and the morals of dogkind are to a great extent subordinated to those of his ancestral master, man. This animal, in many ways so superior, has accepted a position of inferiority, shares the domestic life, and humours the caprices of the tyrant. But the potentate, like the British in India, pays small regard to the character of his willing client, judges him with listless glances, and condemns him in a byword. Listless have been the looks of his admirers, who have exhausted idle terms of praise, and buried the poor soul below exaggerations. And yet more idle and, if possible, more unintelligent has been the attitude of his express detractors; those who are very fond of dogs "but in their proper place"; who say "poo' fellow, poo' fellow," and are themselves far poorer; who whet the knife of the vivisectionist or heat his oven; who are not ashamed to admire "the creature's instinct"; and flying far beyond folly, have dared to resuscitate the theory of animal machines. The

## MEMORIES AND PORTRAITS

“dog’s instinct” and the “automaton-dog,” in this age of psychology and science, sound like strange anachronisms. An automaton he certainly is; a machine working independently of his control, the heart like the mill-wheel, keeping all in motion, and the consciousness, like a person shut in the mill garret, enjoying the view out of the window and shaken by the thunder of the stones; an automaton in one corner of which a living spirit is confined; an automaton like man. Instinct again he certainly possesses. Inherited aptitudes are his, inherited frailties. Some things he at once views and understands as though he were awakened from a sleep, as though he came “trailing clouds of glory.” But with him, as with man, the field of instinct is limited; its utterances are obscure and occasional; and about the far larger part of life both the dog and his master must conduct their steps by deduction and observation.

The leading distinction between dog and man, after and perhaps before the different duration of their lives, is that the one can speak and that the other cannot. The absence of the power of speech confines the dog in the development of his intellect. It hinders him from many speculations, for words are the beginning of metaphysic. At the same blow it saves him from many superstitions, and his silence has won for him a higher name for virtue than his conduct justifies. The faults of the dog are many. He

## THE CHARACTER OF DOGS

is vainer than man, singularly greedy of notice, singularly intolerant of ridicule, suspicious like the deaf, jealous to the degree of frenzy, and radically devoid of truth. The day of an intelligent small dog is passed in the manufacture and the laborious communication of falsehood; he lies with his tail, he lies with his eye, he lies with his protesting paw; and when he rattles his dish or scratches at the door his purpose is other than appears. But he has some apology to offer for the vice. Many of the signs which form his dialect have come to bear an arbitrary meaning, clearly understood both by his master and himself; yet when a new want arises he must either invent a new vehicle of meaning or wrest an old one to a different purpose; and this necessity frequently recurring must tend to lessen his idea of the sanctity of symbols. Meanwhile the dog is clear in his own conscience, and draws, with a human nicety, the distinction between formal and essential truth. Of his punning perversions, his legitimate dexterity with symbols, he is even vain; but when he has told and been detected in a lie, there is not a hair upon his body but confesses guilt. To a dog of gentlemanly feeling theft and falsehood are disgraceful vices. The canine, like the human, gentleman demands in his misdemeanours Montaigne's "*je ne sais quoi de généreux*." He is never more than half ashamed of having barked or bitten; and for those faults into which he has been led

## MEMORIES AND PORTRAITS

by the desire to shine before a lady of his race, he retains, even under physical correction, a share of pride. But to be caught lying, if he understands it, instantly uncurls his fleece.

Just as among dull observers he preserves a name for truth, the dog has been credited with modesty. It is amazing how the use of language blunts the faculties of man—that because vain-glory finds no vent in words, creatures supplied with eyes have been unable to detect a fault so gross and obvious. If a small spoiled dog were suddenly to be endowed with speech, he would prate interminably, and still about himself; when we had friends, we should be forced to lock him in a garret; and what with his whining jealousies and his foible for falsehood, in a year's time he would have gone far to weary out our love. I was about to compare him to Sir Willoughby Patterne, but the Patternes have a manlier sense of their own merits; and the parallel, besides, is ready. Hans Christian Andersen, as we behold him in his startling memoirs, thrilling from top to toe with an excruciating vanity, and scouting even along the street for shadows of offence—here was the talking dog.

It is just this rage for consideration that has betrayed the dog into his satellite position as the friend of man. The cat, an animal of franker appetites, preserves his independence. But the dog, with one eye ever on the audience, has been wheedled into slavery, and praised and patted

## THE CHARACTER OF DOGS

into the renunciation of his nature. Once he ceased hunting and became man's plate-licker, the Rubicon was crossed. Thenceforth he was a gentleman of leisure; and except the few whom we keep working, the whole race grew more and more self-conscious, mannered, and affected. The number of things that a small dog does naturally is strangely small. Enjoying better spirits and not crushed under material cares, he is far more theatrical than average man. His whole life, if he be a dog of any pretension of gallantry, is spent in a vain show, and in the hot pursuit of admiration. Take out your puppy for a walk, and you will find the little ball of fur clumsy, stupid, bewildered, but natural. Let but a few months pass, and when you repeat the process you will find nature buried in convention. He will do nothing plainly; but the simplest processes of our material life will all be bent into the forms of an elaborate and mysterious etiquette. Instinct, says the fool, has awakened. But it is not so. Some dogs—some, at the very least—if they be kept separate from others, remain quite natural; and these, when at length they meet with a companion of experience, and have the game explained to them, distinguish themselves by the severity of their devotion to its rules. I wish I were allowed to tell a story which would radiantly illuminate the point; but men, like dogs, have an elaborate and mysterious etiquette. It is their bond

## MEMORIES AND PORTRAITS

of sympathy that both are the children of convention.

The person, man or dog, who has a conscience is eternally condemned to some degree of humbug; the sense of the law in their members fatally precipitates either towards a frozen and affected bearing. And the converse is true; and in the elaborate and conscious manners of the dog, moral opinions and the love of the ideal stand confessed. To follow for ten minutes in the street some swaggering, canine cavalier, is to receive a lesson in dramatic art and the cultured conduct of the body; in every act and gesture you see him true to a refined conception; and the dullest cur, beholding him, pricks up his ear and proceeds to imitate and parody that charming ease. For to be a high-mannered and high-minded gentleman, careless, affable, and gay, is the inborn pretension of the dog. The large dog, so much lazier, so much more weighed upon with matter, so majestic in repose, so beautiful in effort, is born with the dramatic means to wholly represent the part. And it is more pathetic and perhaps more instructive to consider the small dog in his conscientious and imperfect efforts to outdo Sir Philip Sidney. For the ideal of the dog is feudal and religious; the ever-present polytheism, the whip-bearing Olympus of mankind, rules them on the one hand; on the other, their singular difference of size and strength among themselves effectually

## THE CHARACTER OF DOGS

prevents the appearance of the democratic notion. Or we might more exactly compare their society to the curious spectacle presented by a school—ushers, monitors, and big and little boys—qualified by one circumstance, the introduction of the other sex. In each, we should observe a somewhat similar tension of manner, and somewhat similar points of honour. In each the larger animal keeps a contemptuous good humour; in each the smaller annoys him with wasp-like impudence, certain of practical immunity; in each we shall find a double life producing double characters, and an excursive and noisy heroism combined with a fair amount of practical timidity. I have known dogs, and I have known school heroes that, set aside the fur, could hardly have been told apart; and if we desire to understand the chivalry of old, we must turn to the school playfields or the dung-heap where the dogs are trooping.

Woman, with the dog, has been long enfranchised. Incessant massacre of female innocents has changed the proportions of the sexes and perverted their relations. Thus, when we regard the manners of the dog, we see a romantic and monogamous animal, once perhaps as delicate as the cat, at war with impossible conditions. Man has much to answer for; and the part he plays is yet more damnable and parlous than Corin's in the eyes of Touchstone. But his intervention has at least created an imperial situation for the

## MEMORIES AND PORTRAITS

rare surviving ladies. In that society they reign without a rival: conscious queens; and in the only instance of a canine wife-beater that has ever fallen under my notice, the criminal was somewhat excused by the circumstances of his story. He is a little, very alert, well-bred, intelligent Skye as black as a hat, with a wet bramble for a nose and two cairngorms for eyes. To the human observer, he is decidedly well-looking; but to the ladies of his race he seems abhorrent. A thorough elaborate gentleman, of the plume and sword-knot order, he was born with a nice sense of gallantry to women. He took at their hands the most outrageous treatment; I have heard him bleating like a sheep, I have seen him streaming blood, and his ear tattered like a regimental banner; and yet he would scorn to make reprisals. Nay more, when a human lady upraised the contumelious whip against the very dame who had been so cruelly misusing him, my little great-heart gave but one hoarse cry and fell upon the tyrant tooth and nail. This is the tale of a soul's tragedy. After three years of unavailing chivalry, he suddenly, in one hour, threw off the yoke of obligation; had he been Shakespeare he would then have written *Troilus and Cressida* to brand the offending sex; but being only a little dog, he began to bite them. The surprise of the ladies whom he attacked indicated the monstrosity of his offence; but he had fairly beaten off his better angel, fairly com-

## THE CHARACTER OF DOGS

mitted moral suicide; for almost in the same hour, throwing aside the last rags of decency, he proceeded to attack the aged also. The fact is worth remark, showing, as it does, that ethical laws are common both to dogs and men; and that with both a single deliberate violation of the conscience loosens all. "But while the lamp holds on to burn," says the paraphrase, "the greatest sinner may return." I have been cheered to see symptoms of effectual penitence in my sweet ruffian; and by the handling that he accepted uncomplainingly the other day from an indignant fair one, I begin to hope the period of *Sturm und Drang* is closed.

All these little gentlemen are subtle casuists. The duty to the female dog is plain; but where competing duties rise, down they will sit and study them out, like Jesuit confessors. I knew another little Skye, somewhat plain in manner and appearance, but a creature compact of amiability and solid wisdom. His family going abroad for a winter, he was received for that period by an uncle in the same city. The winter over, his own family home again, and his own house (of which he was very proud) reopened, he found himself in a dilemma between two conflicting duties of loyalty and gratitude. His old friends were not to be neglected, but it seemed hardly decent to desert the new. This was how he solved the problem. Every morning, as soon as the door was opened, off posted Coolin to his

## MEMORIES AND PORTRAITS

uncle's, visited the children in the nursery, saluted the whole family, and was back at home in time for breakfast and his bit of fish. Nor was this done without a sacrifice on his part, sharply felt; for he had to forego the particular honour and jewel of his day—his morning's walk with my father. And, perhaps from this cause, he gradually wearied of and relaxed the practice, and at length returned entirely to his ancient habits. But the same decision served him in another and more distressing case of divided duty, which happened not long after. He was not at all a kitchen dog, but the cook had nursed him with unusual kindness during the distemper; and though he did not adore her as he adored my father—although (born snob) he was critically conscious of her position as “only a servant”—he still cherished for her a special gratitude. Well, the cook left, and retired some streets away to lodgings of her own; and there was Coolin in precisely the same situation with any young gentleman who has had the inestimable benefit of a faithful nurse. The canine conscience did not solve the problem with a pound of tea at Christmas. No longer content to pay a flying visit, it was the whole forenoon that he dedicated to his solitary friend. And so, day by day, he continued to comfort her solitude until (for some reason which I could never understand and cannot approve) he was kept locked up to break him of the graceful habit. Here, it is not

## THE CHARACTER OF DOGS

the similarity, it is the difference, that is worthy of remark; the clearly marked degrees of gratitude and the proportional duration of his visits. Anything further removed from instinct it were hard to fancy; and one is even stirred to a certain impatience with a character so destitute of spontaneity, so passionless in justice, and so priggishly obedient to the voice of reason.

There are not many dogs like this good Coolin, and not many people. But the type is one well marked, both in the human and the canine family. Gallantry was not his aim, but a solid and somewhat oppressive respectability. He was a sworn foe to the unusual and the conspicuous, a praiser of the golden mean, a kind of city uncle modified by Cheeryble. And as he was precise and conscientious in all the steps of his own blameless course, he looked for the same precision and an even greater gravity in the bearing of his deity, my father. It was no sinecure to be Coolin's idol: he was exacting like a rigid parent; and at every sign of levity in the man whom he respected, he announced loudly the death of virtue and the proximate fall of the pillars of the earth.

I have called him a snob; but all dogs are so, though in varying degrees. It is hard to follow their snobbery among themselves; for though I think we can perceive distinctions of rank, we cannot grasp what is the criterion. Thus in Edinburgh, in a good part of the town, there

## MEMORIES AND PORTRAITS

were several distinct societies or clubs that met in the morning to—the phrase is technical—to “rake the buckets” in a troop. A friend of mine, the master of three dogs, was one day surprised to observe that they had left one club and joined another; but whether it was a rise or a fall, and the result of an invitation or an expulsion, was more than he could guess. And this illustrates pointedly our ignorance of the real life of dogs, their social ambitions and their social hierarchies. At least, in their dealings with men they are not only conscious of sex, but of the difference of station. And that in the most snobbish manner; for the poor man’s dog is not offended by the notice of the rich, and keeps all his ugly feeling for those poorer or more ragged than his master. And again, for every station they have an ideal of behaviour, to which the master, under pain of derogation, will do wisely to conform. How often has not a cold glance of an eye informed me that my dog was disappointed; and how much more gladly would he not have taken a beating than to be thus wounded in the seat of piety!

I knew one disrespectable dog. He was far liker a cat; cared little or nothing for men, with whom he merely co-existed as we do with cattle, and was entirely devoted to the art of poaching. A house would not hold him, and to live in a town was what he refused. He led, I believe, a life of troubled but genuine pleasure, and per-

## THE CHARACTER OF DOGS

ished beyond all question in a trap. But this was an exception, a marked reversion to the ancestral type; like the hairy human infant. The true dog of the nineteenth century, to judge by the remainder of my fairly large acquaintance, is in love with respectability. A street-dog was once adopted by a lady. While still an Arab, he had done as Arabs do, gambolling in the mud, charging into butchers' stalls, a cat-hunter, a sturdy beggar, a common rogue and vagabond; but with his rise into society he laid aside these inconsistent pleasures. He stole no more, he hunted no more cats; and conscious of his collar, he ignored his old companions. Yet the canine upper class was never brought to recognise the upstart, and from that hour, except for human countenance, he was alone. Friendless, shorn of his sports and the habits of a lifetime, he still lived in a glory of happiness, content with his acquired respectability, and with no care but to support it solemnly. Are we to condemn or praise this self-made dog? We praise his human brother. And thus to conquer vicious habits is as rare with dogs as with men. With the more part, for all their scruple-mongering and moral thought, the vices that are born with them remain invincible throughout; and they live all their years, glorying in their virtues, but still the slaves of their defects. Thus the sage Coolin was a thief to the last; among a thousand peccadilloes, a whole goose and a whole cold leg

## MEMORIES AND PORTRAITS

of mutton lay upon his conscience; but Woggs,<sup>1</sup> whose soul's shipwreck in the matter of gallantry I have recounted above, has only twice been known to steal, and has often nobly conquered the temptation. The eighth is his favourite commandment. There is something painfully human in these unequal virtues and mortal frailties of the best. Still more painful is the bearing of those "stammering professors" in the house of sickness and under the terror of death. It is beyond a doubt to me that, somehow or other, the dog connects together, or confounds, the uneasiness of sickness and the consciousness of guilt. To the pains of the body he often adds the tortures of the conscience; and at these times his haggard protestations form, in regard to the human deathbed, a dreadful parody or parallel.

I once supposed that I had found an inverse relation between the double etiquette which dogs obey; and that those who were most addicted to the showy street life among other dogs were less careful in the practice of home virtues for the tyrant man. But the female dog, that mass of carneying affectations, shines equally in either sphere; rules her rough posse of attendant swains with unwearying tact and gusto; and with her master and mistress pushes the

<sup>1</sup>Walter, Watty, Woggy, Woggs, Wogg, and lastly Bogue; under which last name he fell in battle some twelve months ago. Glory was his aim and he attained it; for his icon, by the hand of Caldecott, now lies among the treasures of the nation at the British Museum.

## THE CHARACTER OF DOGS

arts of insinuation to their crowning point. The attention of man and the regard of other dogs flatter (it would thus appear) the same sensibility; but perhaps, if we could read the canine heart, they would be found to flatter it in very different degrees. Dogs live with man as courtiers round a monarch, steeped in the flattery of his notice and enriched with sinecures. To push their favour in this world of pickings and caresses is, perhaps, the business of their lives; and their joy may lie outside. I am in despair at our persistent ignorance. I read in the lives of our companions the same processes of reason, the same antique and fatal conflicts of the right against the wrong, and of unbitted nature with too rigid custom; I see them with our weaknesses, vain, false, inconstant against appetite, and with our one stalk of virtue, devoted to the dream of an ideal; and yet, as they hurry by me on the street with tail in air, or come singly to solicit my regard, I must own the secret purport of their lives is still inscrutable to man. Is man the friend, or is he the patron only? Have they indeed forgotten nature's voice? or are those moments snatched from courtiership when they touch noses with the tinker's mongrel, the brief reward and pleasure of their artificial lives? Doubtless, when man shares with his dog the toils of a profession and the pleasures of an art, as with the shepherd or the poacher, the affection warms and strengthens till it fills the soul.

## MEMORIES AND PORTRAITS

But doubtless, also, the masters are, in many cases, the object of a merely interested cultus, sitting aloft like Louis Quatorze, giving and receiving flattery and favour; and the dogs, like the majority of men, have but foregone their true existence and become the dupes of their ambition.

### XIII

#### A PENNY PLAIN AND TWO- PENCE COLOURED

THESE words will be familiar to all students of Skelt's Juvenile Drama. That national monument, after having changed its name to Park's, to Webb's, to Redington's, and last of all to Pollock's, has now become, for the most part, a memory. Some of its pillars, like Stonehenge, are still afoot, the rest clean vanished. It may be the Museum numbers a full set; and Mr. Ionides perhaps, or else her gracious Majesty, may boast their great collections; but to the plain private person they are become, like Raphaels, unattainable. I have, at different times, possessed *Aladdin*, *The Red Rover*, *The Blind Boy*, *The Old Oak Chest*, *The Wood Dæmon*, *Jack Sheppard*, *The Miller and his Men*, *Der Freischütz*, *The Smuggler*, *The Forest of Bondy*, *Robin Hood*, *The Waterman*, *Richard I*, *My Poll and my Partner Joe*, *The Inchcape Bell* (imperfect), and *Three-Fingered Jack*, the *Terror of Jamaica*; and I have assisted others in the illumination of *The Maid of the Inn* and *The Battle of*

## MEMORIES AND PORTRAITS

*Waterloo.* In this roll-call of stirring names you read the evidences of a happy childhood; and though not half of them are still to be procured of any living stationer, in the mind of their once happy owner all survive, kaleidoscopes of changing pictures, echoes of the past.

There stands, I fancy, to this day (but now how fallen!) a certain stationer's shop at a corner of the wide thoroughfare that joins the city of my childhood with the sea. When, upon any Saturday, we made a party to behold the ships, we passed that corner; and since in those days I loved a ship as a man loves Burgundy or day-break, this of itself had been enough to hallow it. But there was more than that. In the Leith Walk window, all the year round, there stood displayed a theatre in working order, with a "forest set," a "combat," and a few "robbers carousing" in the slides; and below and about, dearer tenfold to me! the plays themselves, those budgets of romance, lay tumbled one upon another. Long and often have I lingered there with empty pockets. One figure, we shall say, was visible in the first plate of characters, bearded, pistol in hand, or drawing to his ear the cloth-yard arrow; I would spell the name: was it Maccaire, or Long Tom Coffin, or Grindoff, 2d dress? O, how I would long to see the rest! how—if the name by chance were hidden—I would wonder in what play he figured, and what immortal legend justified his attitude and strange apparel!

## 1 d. PLAIN, 2 d. COLOURED

And then to go within, to announce yourself as an intending purchaser, and, closely watched, be suffered to undo those bundles and breathlessly devour those pages of gesticulating villains, epileptic combats, bosky forest, palaces and war-ships, frowning fortresses and prison vaults—it was a giddy joy. That shop, which was dark and smelt of Bibles, was a loadstone rock for all that bore the name of boy. They could not pass it by nor, having entered, leave it. It was a place besieged; the shopmen, like the Jews rebuilding Salem, had a double task. They kept us at the stick's end, frowned us down, snatched each play out of our hand ere we were trusted with another; and, incredible as it may sound, used to demand of us upon our entrance, like banditti, if we came with money or with empty hand. Old Mr. Smith himself, worn out with my eternal vacillation, once swept the treasures from before me, with the cry: "I do not believe, child, that you are an intending purchaser at all!" These were the dragons of the garden; but for such joys of paradise we could have faced the Terror of Jamaica himself. Every sheet we fingered was another lightning glance into obscure, delicious story; it was like wallowing in the raw stuff of story-books. I know nothing to compare with it save now and then in dreams, when I am privileged to read in certain unwrit stories of adventure, from which I awake to find the world all vanity. The *crux*

## MEMORIES AND PORTRAITS

of Buridan's donkey was as nothing to the uncertainty of the boy as he handled and lingered and doated on these bundles of delight; there was a physical pleasure in the sight and touch of them which he would jealously prolong; and when at length the deed was done, the play selected, and the impatient shopman had brushed the rest into the grey portfolio, and the boy was forth again, a little late for dinner, the lamps springing into light in the blue winter's even, and *The Miller*, or *The Rover*, or some kindred drama clutched against his side—on what gay feet he ran, and how he laughed aloud in exultation! I can hear that laughter still. Out of all the years of my life, I can recall but one home-coming to compare with these, and that was on the night when I brought back with me the *Arabian Entertainments* in the fat, old, double-columned volume with the prints. I was just well into the story of the Hunchback, I remember, when my clergyman-grandfather (a man we counted pretty stiff) came in behind me. I grew blind with terror. But instead of ordering the book away, he said he envied me. Ah, well he might!

The purchase and the first half-hour at home, that was the summit. Thenceforth the interest declined by little and little. The fable, as set forth in the play-book, proved to be not worthy of the scenes and characters: what fable would not? Such passages as: "Scene 6. The Her-

## 1d. PLAIN, 2d. COLOURED

mitage. Night set scene. Place back of scene 1, No. 2, at back of stage and hermitage, Fig. 2, out of set piece, R. H. in a slanting direction"—such passages, I say, though very practical, are hardly to be called good reading. Indeed, as literature, these dramas did not much appeal to me. I forget the very outline of the plots. Of *The Blind Boy*, beyond the fact that he was a most injured prince and once, I think, abducted, I know nothing. And *The Old Oak Chest*, what was it all about? that proscrip (1st dress), that prodigious number of banditti, that old woman with the broom, and the magnificent kitchen in the third act (was it in the third?)—they are all fallen in a deliquium, swim faintly in my brain, and mix and vanish.

I cannot deny that joy attended the illumination; nor can I quite forgive that child who, wilfully foregoing pleasure, stoops to "two-pence coloured." With crimson lake (hark to the sound of it—crimson lake!—the horns of elf-land are not richer on the ear)—with crimson lake and Prussian blue a certain purple is to be compounded which, for cloaks especially, Titian could not equal. The latter colour with gamboge, a hated name although an exquisite pigment, supplied a green of such a savoury greenness that to-day my heart regrets it. Nor can I recall without a tender weakness the very aspect of the water where I dipped my brush. Yes, there was pleasure in the painting. But when

## MEMORIES AND PORTRAITS

all was painted, it is needless to deny it, all was spoiled. You might, indeed, set up a scene or two to look at; but to cut the figures out was simply sacrilege; nor could any child twice court the tedium, the worry, and the long-drawn disenchantment of an actual performance. Two days after the purchase the honey had been sucked. Parents used to complain; they thought I wearied of my play. It was not so: no more than a person can be said to have wearied of his dinner when he leaves the bones and dishes; I had got the marrow of it and said grace.

Then was the time to turn to the back of the play-book and to study that enticing double file of names, where poetry, for the true child of Skelt, reigned happy and glorious like her Majesty the Queen. Much as I have travelled in these realms of gold, I have yet seen, upon that map or abstract, names of El Dorados that still haunt the ear of memory, and are still but names. *The Floating Beacon*—why was that denied me? or *The Wreck Ashore*? *Sixteen-String Jack*, whom I did not even guess to be a highwayman, troubled me awake and haunted my slumbers; and there is one sequence of three from that enchanted calendar that I still at times recall, like a loved verse of poetry: *Lodoiska*, *Silver Palace*, *Echo of Westminster Bridge*. Names, bare names are surely more to children than we poor, grown-up, obliterated fools remember.

The name of Skelt itself has always seemed a

1*d.* PLAIN, 2*d.* COLOURED

part and parcel of the charm of his productions. It may be different with the rose, but the attraction of this paper drama sensibly declined when Webb had crept into the rubric: a poor cuckoo, flaunting in Skelt's nest. And now we have reached Pollock, sounding deeper gulfs. Indeed, this name of Skelt appears so stagey and piratic, that I will adopt it boldly to design these qualities. Skeltery, then, is a quality of much art. It is even to be found, with reverence be it said, among the works of nature. The stagey is its generic name; but it is an old, insular, home-bred staginess; not French, domestically British; not of to-day, but smacking of O. Smith, Fitzball, and the great age of melodrama: a peculiar fragrance haunting it; uttering its unimportant message in a tone of voice that has the charm of fresh antiquity. I will not insist upon the art of Skelt's purveyors. These wonderful characters that once so thrilled our soul with their bold attitude, array of deadly engines and incomparable costume, to-day look somewhat pallidly; the extreme hard favour of the heroine strikes me, I had almost said with pain; the villain's scowl no longer thrills me like a trumpet; and the scenes themselves, those once unparalleled landscapes, seem the efforts of a prentice hand. So much of fault we find; but on the other side the impartial critic rejoices to remark the presence of a great unity of gusto; of those direct clap-trap appeals, which a man is dead

## MEMORIES AND PORTRAITS

and buriable when he fails to answer; of the foot-light glamour, the ready-made, bare-faced, transpontine picturesque, a thing not one with cold reality, but how much dearer to the mind!

The scenery of Skeltdom—or, shall we say, the Kingdom of Transpontus?—had a prevailing character. Whether it set forth Poland as in *The Blind Boy*, or Bohemia with *The Miller and his Men*, or Italy with *The Old Oak Chest*, still it was Transpontus. A botanist could tell it by the plants. The hollyhock was all-pervasive, running wild in deserts; the dock was common, and the bending reed; and overshadowing these were poplar, palm, potato tree, and *Quercus Skeltica*—brave growths. The caves were all embowelled in the Surreyside formation; the soil was all betrodde by the light pump of T. P. Cooke. Skelt, to be sure, had yet another, an oriental string: he held the gorgeous east in fee; and in the new quarter of Hyères, say, in the garden of the Hôtel des Isles d'Or, you may behold these blessed visions realised. But on these I will not dwell; they were an outwork; it was in the occidental scenery that Skelt was all himself. It had a strong flavour of England; it was a sort of indigestion of England and drop-scenes, and I am bound to say was charming. How the roads wander, how the castle sits upon the hill, how the sun radiates from behind the cloud, and how the congregated clouds themselves up-roll, as stiff as bolsters! Here is the cottage in-

## 1*d.* PLAIN, 2*d.* COLOURED

terior, the usual first flat, with the cloak upon the nail, the rosaries of onions, the gun and powder-horn and corner-cupboard; here is the inn (this drama must be nautical, I foresee Captain Luff and Bold Bob Bowsprit) with the red curtain, pipes, spittoons, and eight-day clock; and there again is that impressive dungeon with the chains, which was so dull to colour. England, the hedgerow elms, the thin brick houses, windmills, glimpses of the navigable Thames—England, when at last I came to visit it, was only Skelt made evident: to cross the border was, for the Scotsman, to come home to Skelt; there was the inn-sign and there the horse-trough, all foreshadowed in the faithful Skelt. If, at the ripe age of fourteen years, I bought a certain cudgel, got a friend to load it, and thenceforth walked the tame ways of the earth my own ideal, radiating pure romance—still I was but a puppet in the hand of Skelt; the original of that regretted bludgeon, and surely the antitype of all the bludgeon kind, greatly improved from Cruikshank, had adorned the hand of Jonathan Wild, pl. 1. “This is mastering me,” as Whitman cries, upon some lesser provocation. What am I? what are life, art, letters, the world, but what my Skelt has made them? He stamped himself upon my immaturity. The world was plain before I knew him, a poor penny world; but soon it was all coloured with romance. If I go to the theatre to see a good old melodrama, 'tis but

## MEMORIES AND PORTRAITS

Skelt a little faded. If I visit a bold scene in nature, Skelt would have been bolder; there had been certainly a castle on that mountain, and the hollow tree—that set piece—I seem to miss it in the foreground. Indeed, out of this cut-and-dry, dull, swaggering, obtrusive and infantile art, I seem to have learned the very spirit of my life's enjoyment; met there the shadows of the characters I was to read about and love in a late future; got the romance of *Der Freischütz* long ere I was to hear of Webster or the mighty Formes; acquired a gallery of scenes and characters with which, in the silent theatre of the brain, I might enact all novels and romances; and took from these rude cuts an enduring and transforming pleasure. Reader—and yourself?

A word of moral: it appears that B. Pollock, late J. Redington, No. 73 Hoxton Street, not only publishes twenty-three of these old stage favourites, but owns the necessary plates and displays a modest readiness to issue other thirty-three. If you love art, folly, or the bright eyes of children, speed to Pollock's, or to Clarke's of Garrick Street. In Pollock's list of publicanda I perceive a pair of my ancient aspirations: *Wreck Ashore* and *Sixteen-String Jack*; and I cherish the belief that when these shall see once more the light of day, B. Pollock will remember this apologist. But, indeed, I have a dream at times that is not all a dream. I seem to myself to wander in a ghostly street—E. W., I think, the postal

1 *d.* PLAIN, 2 *d.* COLOURED

district—close below the fool's-cap of St. Paul's, and yet within easy hearing of the echo of the Abbey bridge. There in a dim shop, low in the roof and smelling strong of glue and footlights, I find myself in quaking treaty with great Skelt himself, the aboriginal, all dusty from the tomb. I buy, with what a choking heart—I buy them all, all but the pantomimes; I pay my mental money, and go forth; and lo! the packets are dust.

#### XIV

### A GOSSIP ON A NOVEL OF DUMAS'S

THE books that we re-read the oftenest are not always those that we admire the most; we choose and we revisit them for many and various reasons, as we choose and revisit human friends. One or two of Scott's novels, Shakespeare, Molière, Montaigne, *The Egoist*, and the *Vicomte de Bragelonne*, form the inner circle of my intimates. Behind these comes a good troop of dear acquaintances; *The Pilgrim's Progress* in the front rank, *The Bible in Spain* not far behind. There are besides a certain number that look at me with reproach as I pass them by on my shelves: books that I once thumbed and studied: houses which were once like home to me, but where I now rarely visit. I am on these sad terms (and blush to confess it) with Wordsworth, Horace, Burns, and Hazlitt. Last of all, there is the class of book that has its hour of brilliancy—glows, sings, charms, and then fades again into insignificance until the fit return. Chief of those who thus smile and frown

## A NOVEL OF DUMAS'S

on me by turns, I must name Virgil and Herrick, who, were they but

“Their sometime selves the same throughout the year,”

must have stood in the first company with the six names of my continual literary intimates. To these six, incongruous as they seem, I have long been faithful, and hope to be faithful to the day of death. I have never read the whole of Montaigne, but I do not like to be long without reading some of him, and my delight in what I do read never lessens. Of Shakespeare I have read all but *Richard III*, *Henry VI*, *Titus Andronicus*, and *All's Well that Ends Well*; and these, having already made all suitable endeavour, I now know that I shall never read—to make up for which unfaithfulness I could read much of the rest for ever. Of Molière—surely the next greatest name of Christendom—I could tell a very similar story; but in a little corner of a little essay these princes are too much out of place, and I prefer to pay my fealty and pass on. How often I have read *Guy Mannering*, *Rob Roy*, or *Redgauntlet*, I have no means of guessing, having begun young. But it is either four or five times that I have read *The Egoist*, and either five or six that I have read the *Vicomte de Bragelonne*.

Some, who would accept the others, may wonder that I should have spent so much of

## MEMORIES AND PORTRAITS

this brief life of ours over a work so little famous as the last. And, indeed, I am surprised myself; not at my own devotion, but the coldness of the world. My acquaintance with the *Vicomte* began, somewhat indirectly, in the year of grace 1863, when I had the advantage of studying certain illustrated dessert plates in a hotel at Nice. The name of d'Artagnan in the legends I already saluted like an old friend, for I had met it the year before in a work of Miss Yonge's. My first perusal was in one of those pirated editions that swarmed at that time out of Brussels, and ran to such a troop of neat and dwarfish volumes. I understood but little of the merits of the book; my strongest memory is of the execution of d'Eyméric and Lyodot—a strange testimony to the dulness of a boy, who could enjoy the rough-and-tumble in the Place de Grève, and forget d'Artagnan's visits to the two financiers. My next reading was in winter-time, when I lived alone upon the Pentlands. I would return in the early night from one of my patrols with the shepherd; a friendly face would meet me in the door, a friendly retriever scurry up-stairs to fetch my slippers; and I would sit down with the *Vicomte* for a long, silent, solitary lamp-lit evening by the fire. And yet I know not why I call it silent, when it was enlivened with such a clatter of horse-shoes, and such a rattle of musketry, and such a stir of talk; or why I call those evenings solitary in

## A NOVEL OF DUMAS'S

which I gained so many friends. I would rise from my book and pull the blind aside, and see the snow and the glittering hollies chequer a Scottish garden, and the winter moonlight brighten the white hills. Thence I would turn again to that crowded and sunny field of life in which it was so easy to forget myself, my cares, and my surroundings: a place busy as a city, bright as a theatre, thronged with memorable faces, and sounding with delightful speech. I carried the thread of that epic into my slumbers, I woke with it unbroken, I rejoiced to plunge into the book again at breakfast, it was with a pang that I must lay it down and turn to my own labours; for no part of the world has ever seemed to me so charming as these pages, and not even my friends are quite so real, perhaps quite so dear, as d'Artagnan.

Since then I have been going to and fro at very brief intervals in my favourite book; and I have now just risen from my last (let me call it my fifth) perusal, having liked it better and admired it more seriously than ever. Perhaps I have a sense of ownership, being so well known in these six volumes. Perhaps I think that d'Artagnan delights to have me read of him, and Louis Quatorze is gratified, and Fouquet throws me a look, and Aramis, although he knows I do not love him, yet plays to me with his best graces, as to an old patron of the show. Perhaps, if I am not careful, something may

## MEMORIES AND PORTRAITS

befall me like what befell George IV about the battle of Waterloo, and I may come to fancy the *Vicomte* one of the first, and Heaven knows the best, of my own works. At least, I avow myself a partisan; and when I compare the popularity of the *Vicomte* with that of *Monte Cristo*, or its own elder brother, the *Trois Mousquetaires*, I confess I am both pained and puzzled.

To those who have already made acquaintance with the titular hero in the pages of *Vingt Ans Après*, perhaps the name may act as a deterrent. A man might well stand back if he supposed he were to follow, for six volumes, so well-conducted, so fine-spoken, and withal so dreary a cavalier as Bragelonne. But the fear is idle. I may be said to have passed the best years of my life in these six volumes, and my acquaintance with Raoul has never gone beyond a bow; and when he, who has so long pretended to be alive, is at last suffered to pretend to be dead, I am sometimes reminded of a saying in an earlier volume: "*Enfin, dit Miss Stewart,*"—and it was of Bragelonne she spoke—"*enfin il a fait quelque chose: c'est, ma foi! bien heureux.*" I am reminded of it, as I say; and the next moment, when Athos dies of his death, and my dear d'Artagnan bursts into his storm of sobbing, I can but deplore my flippancy.

Or perhaps it is La Vallière that the reader of *Vingt Ans Après* is inclined to flee. Well, he is right there too, though not so right. Louise is

## A NOVEL OF DUMAS'S

no success. Her creator has spared no pains; she is well-meant, not ill-designed, sometimes has a word that rings out true; sometimes, if only for a breath, she may even engage our sympathies. But I have never envied the King his triumph. And so far from pitying Bragelonne for his defeat, I could wish him no worse (not for lack of malice, but imagination) than to be wedded to that lady. Madame enchants me; I can forgive that royal minx her most serious offences; I can thrill and soften with the King on that memorable occasion when he goes to upbraid and remains to flirt; and when it comes to the "*Allons, aimez-moi donc,*" it is my heart that melts in the bosom of de Guiche. Not so with Louise. Readers cannot fail to have remarked that what an author tells us of the beauty or the charm of his creatures goes for nought; that we know instantly better; that the heroine cannot open her mouth but what, all in a moment, the fine phrases of preparation fall from round her like the robes from Cinderella, and she stands before us, self-betrayed, as a poor, ugly, sickly wench, or perhaps a strapping market-woman. Authors, at least, know it well; a heroine will too often start the trick of "getting ugly"; and no disease is more difficult to cure. I said authors; but indeed I had a side eye to one author in particular with whose works I am very well acquainted, though I cannot read them, and who has spent many

## MEMORIES AND PORTRAITS

vigils in this cause, sitting beside his ailing puppets and (like a magician) wearying his art to restore them to youth and beauty. There are others who ride too high for these misfortunes. Who doubts the loveliness of Rosalind? Arden itself was not more lovely. Who ever questioned the perennial charm of Rose Jocelyn, Lucy Desborough, or Clara Middleton? fair women with fair names, the daughters of George Meredith. Elizabeth Bennet has but to speak, and I am at her knees. Ah! these are the creators of desirable women. They would never have fallen in the mud with Dumas and poor La Vallière. It is my only consolation that not one of all of them, except the first, could have plucked at the moustache of d'Artagnan.

Or perhaps, again, a proportion of readers stumble at the threshold. In so vast a mansion there were sure to be back stairs and kitchen offices where no one would delight to linger; but it was at least unhappy that the vestibule should be so badly lighted; and until, in the seventeenth chapter, d'Artagnan sets off to seek his friends, I must confess, the book goes heavily enough. But, from thenceforward, what a feast is spread! Monk kidnaped; d'Artagnan enriched; Mazarin's death; the ever delectable adventure of Belle Isle, wherein Aramis outwits d'Artagnan, with its epilogue (vol. v. chap. xxviii.), where d'Artagnan regains the moral superiority; the love adventures

## A NOVEL OF DUMAS'S

at Fontainebleau, with St. Aignan's story of the dryad and the business of de Guiche, de Wardes, and Manicamp; Aramis made general of the Jesuits; Aramis at the Bastille; the night talk in the forest of Sénart; Belle Isle again, with the death of Porthos; and last, but not least, the taming of d'Artagnan the untamable, under the lash of the young King. What other novel has such epic variety and nobility of incident? often, if you will, impossible; often of the order of an Arabian story; and yet all based in human nature. For if you come to that, what novel has more human nature? not studied with the microscope, but seen largely, in plain daylight, with the natural eye? What novel has more good sense, and gaiety, and wit, and unflagging, admirable literary skill? Good souls, I suppose, must sometimes read it in the blackguard travesty of a translation. But there is no style so untranslatable; light as a whipped trifle, strong as silk; wordy like a village tale; pat like a general's despatch; with every fault, yet never tedious; with no merit, yet inimitably right. And, once more, to make an end of commendations, what novel is inspired with a more unstrained or a more wholesome morality?

Yes; in spite of Miss Yonge, who introduced me to the name of d'Artagnan only to dissuade me from a nearer knowledge of the man, I have to add morality. There is no quite good book without a good morality; but the world is wide,

## MEMORIES AND PORTRAITS

and so are morals. Out of two people who have dipped into Sir Richard Burton's *Thousand and One Nights*, one shall have been offended by the animal details; another to whom these were harmless, perhaps even pleasing, shall yet have been shocked in his turn by the rascality and cruelty of all the characters. Of two readers, again, one shall have been pained by the morality of a religious memoir, one by that of the *Vicomte de Bragelonne*. And the point is that neither need be wrong. We shall always shock each other both in life and art; we cannot get the sun into our pictures, nor the abstract right (if there be such a thing) into our books; enough if, in the one, there glimmer some hint of the great light that blinds us from heaven; enough, if, in the other, there shine, even upon foul details, a spirit of magnanimity. I would scarce send to the *Vicomte* a reader who was in quest of what we may call puritan morality. The ventripotent mulatto, the great eater, worker, earner and waster, the man of much and witty laughter, the man of the great heart and alas! of the doubtful honesty, is a figure not yet clearly set before the world; he still awaits a sober and yet genial portrait; but with whatever art that may be touched, and whatever indulgence, it will not be the portrait of a precision. Dumas was certainly not thinking of himself, but of Planchet, when he put into the mouth of d'Artagnan's old servant this excel-

## A NOVEL OF DUMAS'S

lent profession: "*Monsieur, j'étais une de ces bonnes pâtes d'hommes que Dieu a fait pour s'animer pendant un certain temps et pour trouver bonnes toutes choses qui accompagnent leur séjour sur la terre.*" He was thinking, as I say, of Planchet, to whom the words are aptly fitted; but they were fitted also to Planchet's creator; and perhaps this struck him as he wrote, for observe what follows: "*D'Artagnan s'assit alors près de la fenêtre, et, cette philosophie de Planchet lui ayant paru solide, il y rêva.*" In a man who finds all things good, you will scarce expect much zeal for negative virtues: the active alone will have a charm for him; abstinence, however wise, however kind, will always seem to such a judge entirely mean and partly impious. So with Dumas. Chastity is not near his heart; nor yet, to his own sore cost that virtue of frugality which is the armour of the artist. Now, in the *Vicomte*, he had much to do with the contest of Fouquet and Colbert. Historic justice should be all upon the side of Colbert, of official honesty, and fiscal competence. And Dumas knew it well: three times at least he shows his knowledge; once it is but flashed upon us and received with the laughter of Fouquet himself, in the jesting controversy in the gardens of Saint Mandé; once it is touched on by Aramis in the forest of Sénart; in the end, it is set before us clearly in one dignified speech of the triumphant Colbert. But in Fouquet, the waster, the

## MEMORIES AND PORTRAITS

lover of good cheer and wit and art, the swift transactor of much business, "*l'homme de bruit, l'homme de plaisir, l'homme qui n'est que parce que les autres sont,*" Dumas saw something of himself and drew the figure the more tenderly. It is to me even touching to see how he insists on Fouquet's honour; not seeing, you might think that unflawed honour is impossible to spend-thrifts; but rather, perhaps, in the light of his own life, seeing it too well, and clinging the more to what was left. Honour can survive a wound; it can live and thrive without a member. The man rebounds from his disgrace; he begins fresh foundations on the ruins of the old; and when his sword is broken, he will do valiantly with his dagger. So it is with Fouquet in the book; so it was with Dumas on the battlefield of life.

To cling to what is left of any damaged quality is virtue in the man; but perhaps to sing its praises is scarcely to be called morality in the writer. And it is elsewhere, it is in the character of d'Artagnan, that we must look for that spirit of morality, which is one of the chief merits of the book, makes one of the main joys of its perusal, and sets it high above more popular rivals. Athos, with the coming of years, has declined too much into the preacher, and the preacher of a sapless creed; but d'Artagnan has mellowed into a man so witty, rough, kind, and upright, that he takes the heart by storm.

## A NOVEL OF DUMAS'S

There is nothing of the copy-book about his virtues, nothing of the drawing-room in his fine, natural civility; he will sail near the wind; he is no district visitor—no Wesley or Robespierre; his conscience is void of all refinement whether for good or evil; but the whole man rings true like a good sovereign. Readers who have approached the *Vicomte*, not across country, but by the legitimate, five-volumed avenue of the *Mousquetaires* and *Vingt Ans Après*, will not have forgotten d'Artagnan's ungentlemanly and perfectly improbable trick upon Milady. What a pleasure it is, then, what a reward, and how agreeable a lesson, to see the old captain humble himself to the son of the man whom he had personated! Here, and throughout, if I am to choose virtues for myself or my friends, let me choose the virtues of d'Artagnan. I do not say there is no character as well drawn in Shakespeare; I do say there is none that I love so wholly. There are many spiritual eyes that seem to spy upon our actions—eyes of the dead and the absent, whom we imagine to behold us in our most private hours, and whom we fear and scruple to offend: our witnesses and judges. And among these, even if you should think me childish, I must count my d'Artagnan—not d'Artagnan of the memoirs whom Thackeray pretended to prefer—a preference, I take the freedom of saying, in which he stands alone; not the d'Artagnan of flesh and blood, but him of

## MEMORIES AND PORTRAITS

the ink and paper; not Nature's, but Dumas's. And this is the particular crown and triumph of the artist—not to be true merely, but to be lovable; not simply to convince, but to enchant.

There is yet another point in the *Vicomte* which I find incomparable. I can recall no other work of the imagination in which the end of life is represented with so nice a tact. I was asked the other day if Dumas made me laugh or cry. Well, in this my late fifth reading of the *Vicomte*, I did laugh once at the small Coquelin de Volière business, and was perhaps a thought surprised at having done so: to make up for it, I smiled continually. But for tears, I do not know. If you put a pistol to my throat, I must own the tale trips upon a very airy foot—within a measurable distance of unreality; and for those who like the big guns to be discharged and the great passions to appear authentically, it may even seem inadequate from first to last. Not so to me; I cannot count that a poor dinner, or a poor book, where I meet with those I love; and, above all, in this last volume, I find a singular charm of spirit. It breathes a pleasant and a tonic sadness, always brave, never hysterical. Upon the crowded, noisy life of this long tale, evening gradually falls; and the lights are extinguished, and the heroes pass away one by one. One by one they go, and not a regret embitters their departure; the young succeed them in their places, Louis

## A NOVEL OF DUMAS'S

Quatorze is swelling larger and shining broader, another generation and another France dawn on the horizon; but for us and these old men whom we have loved so long the inevitable end draws near and is welcome. To read this well is to anticipate experience. Ah, if only when these hours of the long shadows fall for us in reality and not in figure, we may hope to face them with a mind as quiet!

But my paper is running out; the siege guns are firing on the Dutch frontier; and I must say adieu for the fifth time to my old comrade fallen on the field of glory. *Adieu*—rather *au revoir*! Yet a sixth time, dearest d'Artagnan, we shall kidnap Monk and take horse together for Belle Isle.

## XV

### A GOSSIP ON ROMANCE

**I**N anything fit to be called by the name of reading, the process itself should be absorbing and voluptuous; we should gloat over a book, be rapt clean out of ourselves, and rise from the perusal, our mind filled with the busiest, kaleidoscopic dance of images, incapable of sleep or of continuous thought. The words, if the book be eloquent, should run thenceforward in our ears like the noise of breakers, and the story, if it be a story, repeat itself in a thousand coloured pictures to the eye. It was for this last pleasure that we read so closely, and loved our books so dearly, in the bright, troubled period of boyhood. Eloquence and thought, character and conversation, were but obstacles to brush aside as we dug blithely after a certain sort of incident, like a pig for truffles. For my part, I liked a story to begin with an old wayside inn where, "towards the close of the year 17—," several gentlemen in three-cocked hats were playing bowls. A friend of mine preferred the Malabar coast in a storm, with a ship beat-

## A GOSSIP ON ROMANCE

ing to windward, and a scowling fellow of Herculean proportions striding along the beach; he, to be sure, was a pirate. This was further afield than my home-keeping fancy loved to travel, and designed altogether for a larger canvas than the tales that I affected. Give me a highwayman and I was full to the brim; a Jacobite would do, but the highwayman was my favourite dish. I can still hear that merry clatter of the hoofs along the moonlit lane; night and the coming of day are still related in my mind with the doings of John Rann or Jerry Abershaw; and the words "postchaise," the "great North road," "ostler," and "nag" still sound in my ears like poetry. One and all, at least, and each with his particular fancy, we read story-books in childhood, not for eloquence or character or thought, but for some quality of the brute incident. That quality was not mere bloodshed or wonder. Although each of these was welcome in its place, the charm for the sake of which we read depended on something different from either. My elders used to read novels aloud; and I can still remember four different passages which I heard, before I was ten, with the same keen and lasting pleasure. One I discovered long afterwards to be the admirable opening of *What will he Do with It*: it was no wonder I was pleased with that. The other three still remain unidentified. One is a little vague; it was about a dark, tall house at night,

## MEMORIES AND PORTRAITS

and people groping on the stairs by the light that escaped from the open door of a sickroom. In another, a lover left a ball, and went walking in a cool, dewy park, whence he could watch the lighted windows and the figures of the dancers as they moved. This was the most sentimental impression I think I had yet received, for a child is somewhat deaf to the sentimental. In the last, a poet, who had been tragically wrangling with his wife, walked forth on the sea-beach on a tempestuous night and witnessed the horrors of a wreck.<sup>1</sup> Different as they are, all these early favourites have a common note—they have all a touch of the romantic.

Drama is the poetry of conduct, romance the poetry of circumstance. The pleasure that we take in life is of two sorts—the active and the passive. Now we are conscious of a great command over our destiny; anon we are lifted up by circumstance, as by a breaking wave, and dashed we know not how into the future. Now we are pleased by our conduct, anon merely pleased by our surroundings. It would be hard to say which of these models of satisfaction is the more effective, but the latter is surely the more constant. Conduct is three parts of life, they say; but I think they put it high. There is a vast deal in life and letters both which is not immoral, but simply non-moral; which either does

<sup>1</sup>Since traced by many obliging correspondents to the gallery of Charles Kingsley.

## A GOSSIP ON ROMANCE

not regard the human will at all, or deals with it in obvious and healthy relations; where the interest turns, not upon what a man shall choose to do, but on how he manages to do it; not on the passionate slips and hesitations of the conscience, but on the problems of the body and of the practical intelligence, in clean, open-air adventure, the shock of arms or the diplomacy of life. With such material as this it is impossible to build a play, for the serious theatre exists solely on moral grounds, and is a standing proof of the dissemination of the human conscience. But it is possible to build, upon this ground, the most joyous of verses, and the most lively, beautiful, and buoyant tales.

One thing in life calls for another; there is a fitness in events and places. The sight of a pleasant arbour puts it in our mind to sit there. One place suggests work, another idleness, a third early rising and long rambles in the dew. The effect of night, of any flowing water, of lighted cities, of the peep of day, of ships, of the open ocean, calls up in the mind an army of anonymous desires and pleasures. Something, we feel, should happen; we know not what, yet we proceed in quest of it. And many of the happiest hours of life fleet by us in this vain attendance on the genius of the place and moment. It is thus that tracts of young fir, and low rocks that reach into deep soundings, particularly torture and delight me. Something

## MEMORIES AND PORTRAITS

must have happened in such places, and perhaps ages back, to members of my race; and when I was a child I tried in vain to invent appropriate games for them, as I still try, just as vainly, to fit them with the proper story. Some places speak distinctly. Certain dank gardens cry aloud for a murder; certain old houses demand to be haunted; certain coasts are set apart for shipwreck. Other spots again seem to abide their destiny, suggestive and impenetrable, "miching mallecho." The inn at Burford Bridge, with its arbours and green garden and silent, eddying river—though it is known already as the place where Keats wrote some of his *Endymion* and Nelson parted from his Emma—still seems to wait the coming of the appropriate legend. Within these ivied walls, behind these old green shutters, some further business smoulders, waiting for its hour. The old Hawes Inn at the Queen's Ferry makes a similar call upon my fancy. There it stands, apart from the town, beside the pier, in a climate of its own, half inland, half marine—in front, the ferry bubbling with the tide and the guardship swinging to her anchor; behind, the old garden with the trees. Americans seek it already for the sake of Lovel and Oldbuck, who dined there at the beginning of the *Antiquary*. But you need not tell me—that is not all; there is some story, unrecorded or not yet complete, which must express the meaning of that inn more fully.

## A GOSSIP ON ROMANCE

So it is with names and faces; so it is with incidents that are idle and inconclusive in themselves, and yet seem like the beginning of some quaint romance, which the all-careless author leaves untold. How many of these romances have we not seen determine at their birth; how many people have met us with a look of meaning in their eye, and sunk at once into trivial acquaintances; to how many places have we not drawn near, with express intimations—"here my destiny awaits me"—and we have but dined there and passed on! I have lived both at the Hawes and Burford in a perpetual flutter, on the heels, as it seemed, of some adventure that should justify the place; but though the feeling had me to bed at night and called me again at morning in one unbroken round of pleasure and suspense, nothing befell me in either worth remark. The man or the hour had not yet come; but some day, I think, a boat shall put off from the Queen's Ferry, fraught with a dear cargo, and some frosty night a horseman, on a tragic errand, rattle with his whip upon the green shutters of the inn at Burford.<sup>1</sup>

Now, this is one of the natural appetites with which any lively literature has to count. The desire for knowledge, I had almost added the desire for meat, is not more deeply seated than

<sup>1</sup>Since the above was written I have tried to launch the boat with my own hands in *Kidnapped*. Some day, perhaps, I may try a rattle at the shutters.

## MEMORIES AND PORTRAITS

this demand for fit and striking incident. The dullest of clowns tells, or tries to tell, himself a story, as the feeblest of children uses invention in his play; and even as the imaginative grown person, joining in the game, at once enriches it with many delightful circumstances, the great creative writer shows us the realisation and the apotheosis of the day-dreams of common men. His stories may be nourished with the realities of life, but their true mark is to satisfy the nameless longings of the reader, and to obey the ideal laws of the day-dream. The right kind of thing should fall out in the right kind of place; the right kind of thing should follow; and not only the characters talk aptly and think naturally, but all the circumstances in a tale answer one to another like notes in music. The threads of a story come from time to time together and make a picture in the web; the characters fall from time to time into some attitude to each other or to nature, which stamps the story home like an illustration. Crusoe recoiling from the footprint, Achilles shouting over against the Trojans, Ulysses bending the great bow, Christian running with his fingers in his ears, these are each culminating moments in the legend, and each has been printed on the mind's eye for ever. Other things we may forget; we may forget the words, although they are beautiful; we may forget the author's comment, although perhaps it was ingenious and true; but these

## A GOSSIP ON ROMANCE

epoch-making scenes, which put the last mark of truth upon a story and fill up, at one blow, our capacity for sympathetic pleasure, we so adopt into the very bosom of our mind that neither time nor tide can efface or weaken the impression. This, then, is the plastic part of literature: to embody character, thought, or emotion in some act or attitude that shall be remarkably striking to the mind's eye. This is the highest and hardest thing to do in words; the thing which, once accomplished, equally delights the schoolboy and the sage, and makes, in its own right, the quality of epics. Compared with this, all other purposes in literature, except the purely lyrical or the purely philosophic, are bastard in nature, facile of execution, and feeble in result. It is one thing to write about the inn at Burford, or to describe scenery with the word-painters; it is quite another to seize on the heart of the suggestion and make a country famous with a legend. It is one thing to remark and to dissect, with the most cutting logic, the complications of life, and of the human spirit; it is quite another to give them body and blood in the story of Ajax or of Hamlet. The first is literature, but the second is something besides, for it is likewise art.

English people of the present day are apt, I know not why, to look somewhat down on incident, and reserve their admiration for the clink of teaspoons and the accents of the curate. It

## MEMORIES AND PORTRAITS

is thought clever to write a novel with no story at all, or at least with a very dull one. Reduced even to the lowest terms, a certain interest can be communicated by the art of narrative; a sense of human kinship stirred; and a kind of monotonous fitness, comparable to the words and air of *Sandy's Mull*, preserved among the infinitesimal occurrences recorded. Some people work, in this manner, with even a strong touch. Mr. Trollope's inimitable clergymen naturally arise to the mind in this connection. But even Mr. Trollope does not confine himself to chronicling small beer. Mr. Crawley's collision with the Bishop's wife, Mr. Melmotte dallying in the deserted banquet-room, are typical incidents, epically conceived, fitly embodying a crisis. Or again look at Thackeray. If Rawdon Crawley's blow were not delivered, *Vanity Fair* would cease to be a work of art. That scene is the chief ganglion of the tale; and the discharge of energy from Rawdon's fist is the reward and consolation of the reader. The end of *Esmond* is a yet wider excursion from the author's customary fields; the scene at Castlewood is pure Dumas; the great and wily English borrower has here borrowed from the great, unblushing French thief; as usual, he has borrowed admirably well, and the breaking of the sword rounds off the best of all his books with a manly, martial note. But perhaps nothing can more strongly illustrate the necessity for marking incident than

## A GOSSIP ON ROMANCE

to compare the living fame of *Robinson Crusoe* with the discredit of *Clarissa Harlowe*. *Clarissa* is a book of a far more startling import, worked out, on a great canvas, with inimitable courage and unflagging art. It contains wit, character, passion, plot, conversations full of spirit and insight, letters sparkling with unstrained humanity; and if the death of the heroine be somewhat frigid and artificial, the last days of the hero strike the only note of what we now call Byronism, between the Elizabethans and Byron himself. And yet a little story of a shipwrecked sailor, with not a tenth part of the style nor a thousandth part of the wisdom, exploring none of the arcana of humanity and deprived of the perennial interest of love, goes on from edition to edition, ever young, while *Clarissa* lies upon the shelves unread. A friend of mine, a Welsh blacksmith, was twenty-five years old and could neither read nor write, when he heard a chapter of *Robinson* read aloud in a farm kitchen. Up to that moment he had sat content, huddled in his ignorance, but he left that farm another man. There were day-dreams, it appeared, divine day-dreams, written and printed and bound, and to be bought for money and enjoyed at pleasure. Down he sat that day, painfully learned to read Welsh, and returned to borrow the book. It had been lost, nor could he find another copy but one that was in English. Down he sat once more, learned English, and at length, and with

## MEMORIES AND PORTRAITS

entire delight, read *Robinson*. It is like the story of a love-chase. If he had heard a letter from *Clarissa*, would he have been fired with the same chivalrous ardour? I wonder. Yet *Clarissa* has every quality that can be shown in prose, one alone excepted—pictorial or picture-making romance. While *Robinson* depends, for the most part and with the overwhelming majority of its readers, on the charm of circumstance.

In the highest achievements of the art of words, the dramatic and the pictorial, the moral and romantic interest, rise and fall together by a common and organic law. Situation is animated with passion, passion clothed upon with situation. Neither exists for itself, but each inheres indissolubly with the other. This is high art; and not only the highest art possible in words, but the highest art of all, since it combines the greatest mass and diversity of the elements of truth and pleasure. Such are epics, and the few prose tales that have the epic weight. But as from a school of works, aping the creative, incident and romance are ruthlessly discarded, so may character and drama be omitted or subordinated to romance. There is one book, for example, more generally loved than Shakespeare, that captivates in childhood, and still delights in age—I mean the *Arabian Nights*—where you shall look in vain for moral or for intellectual interest. No human face or voice greets us among that wooden crowd of kings and genies, sorcer-

## A GOSSIP ON ROMANCE

ers and beggarmen. Adventure, on the most naked terms, furnishes forth the entertainment and is found enough. Dumas approaches perhaps nearest of any modern to these Arabian authors in the purely material charm of some of his romances. The early part of *Monte Cristo*, down to the finding of the treasure, is a piece of perfect story-telling; the man never breathed who shared these moving incidents without a tremor; and yet Faria is a thing of packthread and Dantès little more than a name. The sequel is one long-drawn error, gloomy, bloody, unnatural and dull; but as for these early chapters, I do not believe there is another volume extant where you can breathe the same unmingled atmosphere of romance. It is very thin and light, to be sure, as on a high mountain; but it is brisk and clear and sunny in proportion. I saw the other day, with envy, an old and a very clever lady setting forth on a second or third voyage into *Monte Cristo*. Here are stories which powerfully affect the reader, which can be reperused at any age, and where the characters are no more than puppets. The bony fist of the showman visibly propels them; their springs are an open secret; their faces are of wood, their bellies filled with bran; and yet we thrillingly partake of their adventures. And the point may be illustrated still further. The last interview between Lucy and Richard Feverel is pure drama; more than that, it is the strongest

## MEMORIES AND PORTRAITS

scene, since Shakespeare, in the English tongue. Their first meeting by the river, on the other hand, is pure romance; it has nothing to do with character; it might happen to any other boy and maiden, and be none the less delightful for the change. And yet I think he would be a bold man who should choose between these passages. Thus, in the same book, we may have two scenes, each capital in its order: in the one, human passion, deep calling unto deep, shall utter its genuine voice; in the second, according circumstances, like instruments in tune, shall build up a trivial but desirable incident, such as we love to prefigure for ourselves; and in the end, in spite of the critics, we may hesitate to give the preference to either. The one may ask more genius—I do not say it does; but at least the other dwells as clearly in the memory.

True romantic art, again, makes a romance of all things. It reaches into the highest abstraction of the ideal; it does not refuse the most pedestrian realism. *Robinson Crusoe* is as realistic as it is romantic: both qualities are pushed to an extreme, and neither suffers. Nor does romance depend upon the material importance of the incidents. To deal with strong and deadly elements, banditti, pirates, war, and murder, is to conjure with great names, and, in the event of failure, to double the disgrace. The arrival of Haydon and Consuelo at the Canon's villa is a very trifling incident; yet we may read a dozen

## A GOSSIP ON ROMANCE

boisterous stories from beginning to end, and not receive so fresh and stirring an impression of adventure. It was the scene of Crusoe at the wreck, if I remember rightly, that so bewitched my blacksmith. Nor is the fact surprising. Every single article the castaway recovers from the hulk is "a joy for ever" to the man who reads of them. They are the things that should be found, and the bare enumeration stirs the blood. I found a glimmer of the same interest the other day in a new book, *The Sailor's Sweetheart*, by Mr. Clark Russell. The whole business of the brig *Morning Star* is very rightly felt and spiritedly written; but the clothes, the books and the money satisfy the reader's mind like things to eat. We are dealing here with the old cut-and-dry, legitimate interest of treasure-trove. But even treasure-trove can be made dull. There are few people who have not groaned under the plethora of goods that fell to the lot of the *Swiss Family Robinson*, that dreary family. They found article after article, creature after creature, from milk-kine to pieces of ordnance, a whole consignment; but no informing taste had presided over the selection, there was no smack or relish in the invoice; and these riches left the fancy cold. The box of goods in Verne's *Mysterious Island* is another case in point: there was no gusto and no glamour about that; it might have come from a shop. But the two hundred and seventy-eight Australian sov-

## MEMORIES AND PORTRAITS

ereigns on board the *Morning Star* fell upon me like a surprise that I had expected; whole vistas of secondary stories, besides the one in hand, radiated forth from that discovery, as they radiate from a striking particular in life; and I was made for the moment as happy as a reader has the right to be.

To come at all at the nature of this quality of romance, we must bear in mind the peculiarity of our attitude to any art. No art produces illusion; in the theatre we never forget that we are in the theatre; and while we read a story, we sit wavering between two minds, now merely clapping our hands at the merit of the performance, now condescending to take an active part in fancy with the characters. This last is the triumph of romantic story-telling: when the reader consciously plays at being the hero, the scene is a good scene. Now, in character-studies the pleasure that we take is critical; we watch, we approve, we smile at incongruities, we are moved to sudden heats of sympathy with courage, suffering, or virtue. But the characters are still themselves, they are not us; the more clearly they are depicted, the more widely do they stand away from us, the more imperiously do they thrust us back into our place as a spectator. I cannot identify myself with Rawdon Crawley or with Eugène de Rastignac, for I have scarce a hope or fear in common with them. It is not character but incident that woos us out of our

## A GOSSIP ON ROMANCE

reserve. Something happens as we desire to have it happen to ourselves; some situation, that we have long dallied with in fancy, is realised in the story with enticing and appropriate details. Then we forget the characters; then we push the hero aside; then we plunge into the tale in our own person and bathe in fresh experience; and then, and then only, do we say we have been reading a romance. It is not only pleasurable things that we imagine in our day-dreams; there are lights in which we are willing to contemplate even the idea of our own death; ways in which it seems as if it would amuse us to be cheated, wounded, or calumniated. It is thus possible to construct a story, even of tragic import, in which every incident, detail, and trick of circumstance shall be welcome to the reader's thoughts. Fiction is to the grown man what play is to the child; it is there that he changes the atmosphere and tenor of his life; and when the game so chimes with his fancy that he can join in it with all his heart, when it pleases him with every turn, when he loves to recall it and dwells upon its recollection with entire delight, fiction is called romance.

Walter Scott is out and away the king of the romantics. *The Lady of the Lake* has no indisputable claim to be a poem beyond the inherent fitness and desirability of the tale. It is just such a story as a man would make up for himself, walking, in the best health and temper,

## MEMORIES AND PORTRAITS

through just such scenes as it is laid in. Hence it is that a charm dwells undefinable among these slovenly verses, as the unseen cuckoo fills the mountains with his note; hence, even after we have flung the book aside, the scenery and adventures remain present to the mind, a new and green possession, not unworthy of that beautiful name, *The Lady of the Lake*, or that direct, romantic opening,—one of the most spirited and poetical in literature,—“The stag at eve had drunk his fill.” The same strength and the same weaknesses adorn and disfigure the novels. In that ill-written, ragged book, *The Pirate*, the figure of Cleveland—cast up by the sea on the resounding foreland of Dunrossness—moving, with the blood on his hands and the Spanish words on his tongue, among the simple islanders—singing a serenade under the window of his Shetland mistress—is conceived in the very highest manner of romantic invention. The words of his song, “Through groves of palm,” sung in such a scene and by such a lover, clinch, as in a nutshell, the emphatic contrast upon which the tale is built. In *Guy Mannering*, again, every incident is delightful to the imagination; and the scene when Harry Bertram lands at Ellangowan is a model instance of romantic method.

“‘I remember the tune well,’ he says, ‘though I cannot guess what should at present so strongly recall it to my memory.’ He took his flageo-

## A GOSSIP ON ROMANCE

let from his pocket and played a simple melody. Apparently the tune awoke the corresponding associations of a damsel. . . . She immediately took up the song—

“‘Are these the links of Forth, she said;  
Or are they the crooks of Dee,  
Or the bonny woods of Warroch Head  
That I so fain would see?’

“‘By heaven!’ said Bertram, ‘it is the very ballad.’”

On this quotation two remarks fall to be made. First, as an instance of modern feeling for romance, this famous touch of the flageolet and the old song is selected by Miss Braddon for omission. Miss Braddon’s idea of a story, like Mrs. Todgers’s idea of a wooden leg, were something strange to have expounded. As a matter of personal experience, Meg’s appearance to old Mr. Bertram on the road, the ruins of Derncleugh, the scene of the flageolet, and the Dominie’s recognition of Harry, are the four strong notes that continue to ring in the mind after the book is laid aside. The second point is still more curious. The reader will observe a mark of excision in the passage as quoted by me. Well, here is how it runs in the original: “a damsel, who, close behind a fine spring about half-way down the descent, and which had once supplied the castle with water, was engaged in bleaching linen.” A man who gave in such

## MEMORIES AND PORTRAITS

copy would be discharged from the staff of a daily paper. Scott has forgotten to prepare the reader for the presence of the "damsel"; he has forgotten to mention the spring and its relation to the ruin; and now, face to face with his omission, instead of trying back and starting fair, crams all this matter, tail foremost, into a single shambling sentence. It is not merely bad English, or bad style; it is abominably bad narrative besides.

Certainly the contrast is remarkable; and it is one that throws a strong light upon the subject of this paper. For here we have a man of the finest creative instinct touching with perfect certainty and charm the romantic junctures of his story; and we find him utterly careless, almost, it would seem, incapable, in the technical matter of style, and not only frequently weak, but frequently wrong in points of drama. In character parts, indeed, and particularly in the Scots, he was delicate, strong, and truthful; but the trite, obliterated features of too many of his heroes have already wearied two generations of readers. At times his characters will speak with something far beyond propriety with a true heroic note; but on the next page they will be wading wearily forward with an ungrammatical and undramatic rigmarole of words. The man who could conceive and write the character of Elspeth of the Craighburnfoot, as Scott has conceived and written it, had not only splen-

## A GOSSIP ON ROMANCE

did romantic, but splendid tragic gifts. How comes it, then, that he could so often fob us off with languid, inarticulate twaddle?

It seems to me that the explanation is to be found in the very quality of his surprising merits. As his books are play to the reader, so were they play to him. He conjured up the romantic with delight, but he had hardly patience to describe it. He was a great day-dreamer, a seer of fit and beautiful and humorous visions, but hardly a great artist; hardly, in the manful sense, an artist at all. He pleased himself, and so he pleases us. Of the pleasures of his art he tasted fully; but of its toils and vigils and distresses never man knew less. A great romantic—an idle child.

## XVI

### A HUMBLE REMONSTRANCE<sup>1</sup>

#### I

WE have recently enjoyed a quite peculiar pleasure: hearing, in some detail, the opinions, about the art they practise, of Mr. Walter Besant and Mr. Henry James; two men certainly of very different calibre: Mr. James so precise of outline, so cunning of fence, so scrupulous of finish, and Mr. Besant so genial, so friendly, with so persuasive and humorous a vein of whim: Mr. James the very type of the deliberate artist, Mr. Besant the impersonation of good nature. That such doctors should differ will excite no great surprise; but one point in which they seem to agree fills me, I confess, with wonder. For they are both content to talk about the "art of fiction"; and Mr. Besant, waxing exceedingly bold, goes on to oppose this so-called "art of fiction" to the "art of poetry." By the art of poetry he can mean nothing but the art of verse, an art of handicraft, and only comparable with

<sup>1</sup>This paper, which does not otherwise fit the present volume, is reprinted here as the proper continuation of the last.

## A HUMBLE REMONSTRANCE

the art of prose. For that heat and height of sane emotion which we agree to call by the name of poetry, is but a libertine and vagrant quality; present, at times, in any art, more often absent from them all; too seldom present in the prose novel, too frequently absent from the ode and epic. Fiction is in the same case; it is no substantive art, but an element which enters largely into all the arts but architecture. Homer, Wordsworth, Phidias, Hogarth, and Salvini, all deal in fiction; and yet I do not suppose that either Hogarth or Salvini, to mention but these two, entered in any degree into the scope of Mr. Besant's interesting lecture or Mr. James's charming essay. The art of fiction, then, regarded as a definition, is both too ample and too scanty. Let me suggest another; let me suggest that what both Mr. James and Mr. Besant had in view was neither more nor less than the art of narrative.

But Mr. Besant is anxious to speak solely of "the modern English novel," the stay and breadwinner of Mr. Mudie; and in the author of the most pleasing novel on that roll, *All Sorts and Conditions of Men*, the desire is natural enough. I can conceive then, that he would hasten to propose two additions, and read thus: the art of *fictitious* narrative *in prose*.

Now the fact of the existence of the modern English novel is not to be denied; materially, with its three volumes, leaded type, and gilded

## MEMORIES AND PORTRAITS

lettering, it is easily distinguishable from other forms of literature; but to talk at all fruitfully of any branch of art, it is needful to build our definitions on some more fundamental ground than binding. Why, then, are we to add "in prose"? *The Odyssey* appears to me the best of romances; *The Lady of the Lake* to stand high in the second order; and Chaucer's tales and prologues to contain more of the matter and art of the modern English novel than the whole treasury of Mr. Mudie. Whether a narrative be written in blank verse or the Spenserian stanza, in the long period of Gibbon or the chipped phrase of Charles Reade, the principles of the art of narrative must be equally observed. The choice of a noble and swelling style in prose affects the problem of narration in the same way, if not to the same degree, as the choice of measured verse; for both imply a closer synthesis of events, a higher key of dialogue, and a more picked and stately strain of words. If you are to refuse *Don Juan*, it is hard to see why you should include *Zanoni* or (to bracket works of very different value) *The Scarlet Letter*; and by what discrimination are you to open your doors to *The Pilgrim's Progress* and close them on *The Faery Queen*? To bring things closer home, I will here propound to Mr. Besant a conundrum. A narrative called *Paradise Lost* was written in English verse by one John Milton; what was it then? It was next

## A HUMBLE REMONSTRANCE

translated by Chateaubriand into French prose; and what was it then? Lastly, the French translation was, by some inspired compatriot of George Gilfillan (and of mine) turned bodily into an English novel; and, in the name of clearness, what was it then?

But, once more, why should we add “fictitious”? The reason why is obvious. The reason why not, if something more recondite, does not want for weight. The art of narrative, in fact, is the same, whether it is applied to the selection and illustration of a real series of events or of an imaginary series. Boswell’s *Life of Johnson* (a work of cunning and inimitable art) owes its success to the same technical manoeuvres as (let us say) *Tom Jones*: the clear conception of certain characters of man, the choice and presentation of certain incidents out of a great number that offered, and the invention (yes, invention) and preservation of a certain key in dialogue. In which these things are done with the more art—in which with the greater air of nature—readers will differently judge. Boswell’s is, indeed, a very special case, and almost a generic; but it is not only in Boswell, it is in every biography with any salt of life, it is in every history where events and men, rather than ideas, are presented—in Tacitus, in Carlyle, in Michelet, in Macaulay—that the novelist will find many of his own methods most conspicuously and adroitly handled. He will find

## MEMORIES AND PORTRAITS

besides that he, who is free—who has the right to invent or steal a missing incident, who has the right, more precious still, of wholesale omission—is frequently defeated, and, with all his advantages, leaves a less strong impression of reality and passion. Mr. James utters his mind with a becoming fervour on the sanctity of truth to the novelist; on a more careful examination truth will seem a word of very debatable propriety, not only for the labours of the novelist, but for those of the historian. No art—to use the daring phrase of Mr. James—can successfully “compete with life”; and the art that seeks to do so is condemned to perish *montibus aviis*. Life goes before us, infinite in complication; attended by the most various and surprising meteors; appealing at once to the eye, to the ear, to the mind—the seat of wonder, to the touch—so thrillingly delicate, and to the belly—so imperious when starved. It combines and employs in its manifestation the method and material, not of one art only, but of all the arts. Music is but an arbitrary trifling with a few of life’s majestic chords; painting is but a shadow of its pageantry of light and colour; literature does but drily indicate that wealth of incident, of moral obligation, of virtue, vice, action, rapture and agony, with which it teems. To “compete with life,” whose sun we cannot look upon, whose passions and diseases waste and slay us—to compete with the flavour of wine, the beauty

## A HUMBLE REMONSTRANCE

of the dawn, the scorching of fire, the bitterness of death and separation—here is, indeed, a projected escalade of heaven; here are, indeed, labours for a Hercules in a dress coat, armed with a pen and a dictionary to depict the passions, armed with a tube of superior flake-white to paint the portrait of the insufferable sun. No art is true in this sense: none can “compete with life:” not even history, built indeed of indisputable facts, but these facts robbed of their vivacity and sting; so that even when we read of the sack of a city or the fall of an empire, we are surprised, and justly commend the author’s talent, if our pulse be quickened. And mark, for a last differentia, that this quickening of the pulse is, in almost every case, purely agreeable; that these phantom reproductions of experience, even at their most acute, convey decided pleasure; while experience itself, in the cockpit of life, can torture and slay.

What, then, is the object, what the method, of an art, and what the source of its power? The whole secret is that no art does “compete with life.” Man’s one method, whether he reasons or creates, is to half-shut his eyes against the dazzle and confusion of reality. The arts, like arithmetic and geometry, turn away their eyes from the gross, coloured and mobile nature at our feet, and regard instead a certain figmentary abstraction. Geometry will tell us of a circle, a thing never seen in nature; asked about

## MEMORIES AND PORTRAITS

a green circle or an iron circle, it lays its hand upon its mouth. So with the arts. Painting, ruefully comparing sunshine and flake-white, gives up truth of colour, as it had already given up relief and movement; and instead of vying with nature, arranges a scheme of harmonious tints. Literature, above all in its most typical mood, the mood of narrative, similarly flees the direct challenge and pursues instead an independent and creative aim. So far as it imitates at all, it imitates not life but speech: not the facts of human destiny, but the emphasis and the suppressions with which the human actor tells of them. The real art that dealt with life directly was that of the first men who told their stories round the savage camp-fire. Our art is occupied, and bound to be occupied, not so much in making stories true as in making them typical; not so much in capturing the lineaments of each fact, as in marshalling all of them towards a common end. For the welter of impressions, all forcible but all discreet, which life presents, it substitutes a certain artificial series of impressions, all indeed most feebly represented, but all aiming at the same effect, all eloquent of the same idea, all chiming together like consonant notes in music or like the graduated tints in a good picture. From all its chapters, from all its pages, from all its sentences, the well-written novel echoes and re-echoes its one creative and controlling thought; to this must every incident

## A HUMBLE REMONSTRANCE

and character contribute; the style must have been pitched in unison with this; and if there is anywhere a word that looks another way, the book would be stronger, clearer, and (I had almost said) fuller without it. Life is monstrous, infinite, illogical, abrupt and poignant; a work of art, in comparison, is neat, finite, self-contained, rational, flowing and emasculate. Life imposes by brute energy, like inarticulate thunder; art catches the ear, among the far louder noises of experience, like an air artificially made by a discreet musician. A proposition of geometry does not compete with life; and a proposition of geometry is a fair and luminous parallel for a work of art. Both are reasonable, both untrue to the crude fact; both inhere in nature, neither represents it. The novel, which is a work of art, exists, not by its resemblances to life, which are forced and material, as a shoe must still consist of leather, but by its immeasurable difference from life, which is designed and significant, and is both the method and the meaning of the work.

The life of man is not the subject of novels, but the inexhaustible magazine from which subjects are to be selected; the name of these is legion; and with each new subject—for here again I must differ by the whole width of heaven from Mr. James—the true artist will vary his method and change the point of attack. That which was in one case an excellence, will become a defect in another; what was the making of one

## MEMORIES AND PORTRAITS

book, will in the next be impertinent or dull. First each novel, and then each class of novels, exists by and for itself. I will take, for instance, three main classes, which are fairly distinct: first, the novel of adventure, which appeals to certain almost sensual and quite illogical tendencies in man; second, the novel of character, which appeals to our intellectual appreciation of man's foibles and mingled and inconstant motives; and third, the dramatic novel, which deals with the same stuff as the serious theatre, and appeals to our emotional nature and moral judgment.

And first for the novel of adventure. Mr. James refers, with singular generosity of praise, to a little book about a quest for hidden treasure; but he lets fall, by the way, some rather startling words. In this book he misses what he calls the "immense luxury" of being able to quarrel with his author. The luxury, to most of us, is to lay by our judgment, to be submerged by the tale as by a billow, and only to awake, and begin to distinguish and find fault, when the piece is over and the volume laid aside. Still more remarkable is Mr. James's reason. He cannot criticise the author, as he goes, "because," says he, comparing it with another work, "*I have been a child, but I have never been on a quest for buried treasure.*" Here is, indeed, a wilful paradox; for if he has never been on a quest for buried treasure, it can be demonstrated that he

## A HUMBLE REMONSTRANCE

has never been a child. There never was a child (unless Master James) but has hunted gold, and been a pirate, and a military commander, and a bandit of the mountains; but has fought, and suffered shipwreck and prison, and imbrued its little hands in gore, and gallantly retrieved the lost battle, and triumphantly protected innocence and beauty. Elsewhere in his essay Mr. James has protested with excellent reason against too narrow a conception of experience; for the born artist, he contends, the "faintest hints of life" are converted into revelations; and it will be found true, I believe, in a majority of cases, that the artist writes with more gusto and effect of those things which he has only wished to do, than of those which he has done. Desire is a wonderful telescope, and Pisgah the best observatory. Now, while it is true that neither Mr. James nor the author of the work in question has ever, in the fleshy sense, gone questing after gold, it is probable that both have ardently desired and fondly imagined the details of such a life in youthful day-dreams; and the author, counting upon that, and well aware (cunning and low-minded man!) that this class of interest, having been frequently treated, finds a readily accessible and beaten road to the sympathies of the reader, addressed himself throughout to the building up and circumstantiation of this boyish dream. Character to the boy is a sealed book; for him, a pirate

## MEMORIES AND PORTRAITS

is a beard, a pair of wide trousers and a liberal complement of pistols. The author, for the sake of circumstantiation and because he was himself more or less grown up, admitted character, within certain limits, into his design; but only within certain limits. Had the same puppets figured in a scheme of another sort, they had been drawn to very different purpose; for in this elementary novel of adventure, the characters need to be presented with but one class of qualities—the warlike and formidable. So as they appear insidious in deceit and fatal in the combat, they have served their end. Danger is the matter with which this class of novel deals; fear, the passion with which it idly trifles; and the characters are portrayed only so far as they realise the sense of danger and provoke the sympathy of fear. To add more traits, to be too clever, to start the hare of moral or intellectual interest while we are running the fox of material interest, is not to enrich but to stultify your tale. The stupid reader will only be offended, and the clever reader lose the scent.

The novel of character has this difference from all others: that it requires no coherency of plot, and for this reason, as in the case of *Gil Blas*, it is sometimes called the novel of adventure. It turns on the humours of the persons represented; these are, to be sure, embodied in incidents, but the incidents themselves, being tributary, need not march in a progression; and the char-

## A HUMBLE REMONSTRANCE

acters may be statically shown. As they enter, so they may go out; they must be consistent, but they need not grow. Here Mr. James will recognise the note of much of his own work: he treats, for the most part, the statics of character, studying it at rest or only gently moved; and, with his usual delicate and just artistic instinct, he avoids those stronger passions which would deform the attitudes he loves to study, and change his sitters from the humourists of ordinary life to the brute forces and bare types of more emotional moments. In his recent *Author of Beltraffio*, so just in conception, so nimble and neat in workmanship, strong passion is indeed employed; but observe that it is not displayed. Even in the heroine the working of the passion is suppressed; and the great struggle, the true tragedy, the *scène-à-faire*, passes unseen behind the panels of a locked door. The delectable invention of the young visitor is introduced, consciously or not, to this end: that Mr. James, true to his method, might avoid the scene of passion. I trust no reader will suppose me guilty of undervaluing this little masterpiece. I mean merely that it belongs to one marked class of novel, and that it would have been very differently conceived and treated had it belonged to that other marked class, of which I now proceed to speak.

I take pleasure in calling the dramatic novel by that name, because it enables me to point

## MEMORIES AND PORTRAITS

out by the way a strange and peculiarly English misconception. It is sometimes supposed that the drama consists of incident. It consists of passion, which gives the actor his opportunity; and that passion must progressively increase, or the actor, as the piece proceeded, would be unable to carry the audience from a lower to a higher pitch of interest and emotion. A good serious play must therefore be founded on one of the passionate *cruces* of life, where duty and inclination come nobly to the grapple; and the same is true of what I call, for that reason, the dramatic novel. I will instance a few worthy specimens, all of our own day and language; Meredith's *Rhoda Fleming*, that wonderful and painful book, long out of print,<sup>1</sup> and hunted for at book-stalls like an Aldine; Hardy's *Pair of Blue Eyes*; and two of Charles Reade's, *Griffith Gaunt* and *The Double Marriage*, originally called *White Lies*, and founded (by an an accident quaintly favourable to my nomenclature) on a play by Maquet, the partner of the great Dumas. In this kind of novel the closed door of *The Author of Beltraffio* must be broken open; passion must appear upon the scene and utter its last word; passion is the be-all and the end-all, the plot of the solution, the protagonist and the *deus ex machina* in one. The characters may come anyhow upon the stage: we do not care; the point is, that, before they leave it,

<sup>1</sup>Now no longer so, thank Heaven!

## A HUMBLE REMONSTRANCE

they shall become transfigured and raised out of themselves by passion. It may be part of the design to draw them with detail; to depict a full-length character, and then behold it melt and change in the furnace of emotion. But there is no obligation of the sort; nice portraiture is not required; and we are content to accept mere abstract types, so they be strongly and sincerely moved. A novel of this class may be even great, and yet contain no individual figure; it may be great, because it displays the workings of the perturbed heart and the impersonal utterance of passion; and with an artist of the second class it is, indeed, even more likely to be great, when the issue has thus been narrowed and the whole force of the writer's mind directed to passion alone. Cleverness again, which has its fair field in the novel of character, is debarred all entry upon this more solemn theatre. A far-fetched motive, an ingenious evasion of the issue, a witty instead of a passionate turn, offend us like an insincerity. All should be plain, all straightforward to the end. Hence it is that, in *Rhoda Fleming*, Mrs. Lovel raises such resentment in the reader; her motives are too flimsy, her ways are too equivocal, for the weight and strength of her surroundings. Hence the hot indignation of the reader when Balzac, after having begun the *Duchess de Langeais* in terms of strong if somewhat swollen passion, cuts the knot by the derangement of

## MEMORIES AND PORTRAITS

the hero's clock. Such personages and incidents belong to the novel of character; they are out of place in the high society of the passions; when the passions are introduced in art at their full height, we look to see them, not baffled and impotently striving, as in life, but towering above circumstance and acting substitutes for fate.

And here I can imagine Mr. James, with his lucid sense, to intervene. To much of what I have said he would apparently demur; in much he would, somewhat impatiently, acquiesce. It may be true; but it is not what he desired to say or to hear said. He spoke of the finished picture and its worth when done; I, of the brushes, the palette, and the north light. He uttered his views in the tone and for the ear of good society; I, with the emphasis and technicalities of the obtrusive student. But the point, I may reply, is not merely to amuse the public, but to offer helpful advice to the young writer. And the young writer will not so much be helped by genial pictures of what an art may aspire to at its highest, as by a true idea of what it must be on the lowest terms. The best that we can say to him is this: Let him choose a motive, whether of character or passion; carefully construct his plot so that every incident is an illustration of the motive, and every property employed shall bear to it a near relation of congruity or contrast; avoid a sub-plot, unless, as sometimes in Shake-

## A HUMBLE REMONSTRANCE

speare, the sub-plot be a reversion or complement of the main intrigue; suffer not his style to flag below the level of the argument: pitch the key of conversation, not with any thought of how men talk in parlours, but with a single eye to the degree of passion he may be called on to express; and allow neither himself in the narrative nor any character in the course of the dialogue, to utter one sentence that is not part and parcel of the business of the story or the discussion of the problem involved. Let him not regret if this shortens his book; it will be better so; for to add irrelevant matter is not to lengthen but to bury. Let him not mind if he miss a thousand qualities, so that he keeps unflinchingly in pursuit of the one he has chosen. Let him not care particularly if he miss the tone of conversation, the pungent material detail of the day's manners, the reproduction of the atmosphere and the environment. These elements are not essential: a novel may be excellent, and yet have none of them; a passion or a character is so much the better depicted as it rises clearer from material circumstance. In this age of the particular, let him remember the ages of the abstract, the great books of the past, the brave men that lived before Shakespeare and before Balzac. And as the root of the whole matter, let him bear in mind that his novel is not a transcript of life, to be judged by its exactitude; but a simplification of some side or point of life, to

## MEMORIES AND PORTRAITS

stand or fall by its significant simplicity. For although, in great men, working upon great motives, what we observe and admire is often their complexity, yet underneath appearances the truth remains unchanged: that simplification was their method, and that simplicity is their excellence.

### II

Since the above was written another novelist has entered repeatedly the lists of theory: one well worthy of mention, Mr. W. D. Howells; and none ever couched a lance with narrower convictions. His own work and those of his pupils and masters singly occupy his mind; he is the bondsman, the zealot of his school; he dreams of an advance in art like what there is in science; he thinks of past things as radically dead; he thinks a form can be outlived: a strange immersion in his own history; a strange forgetfulness of the history of the race! Meanwhile, by a glance at his own works (could he see them with the eager eyes of his readers) much of this illusion would be dispelled. For while he holds all the poor little orthodoxies of the day—no poorer and no smaller than those of yesterday, or to-morrow, poor and small, indeed, only so far as they are exclusive—the living quality of much that he has done is of a contrary, I had almost said of a heretical, complexion. A man, as I read him, of an originally strong ro-

## A HUMBLE REMONSTRANCE

mantic bent—a certain glow of romance still resides in many of his books, and lends them their distinction. As by accident he runs out and revels in the exceptional; and it is then, as often as not, that his reader rejoices—justly, as I contend. For in all this excessive eagerness to be centrally human, is there not one central human thing that Mr. Howells is too often tempted to neglect: I mean himself? A poet, a finished artist, a man in love with the appearances of life, a cunning reader of the mind, he has other passions and aspirations than those he loves to draw. And why should he suppress himself and do such reverence to the Lemuel Barkers? The obvious is not of necessity the normal; fashion rules and deforms; the majority fall tamely into the contemporary shape, and thus attain, in the eyes of the true observer, only a higher power of insignificance; and the danger is lest, in seeking to draw the normal, a man should draw the null, and write the novel of society instead of the romance of man.

RANDOM MEMORIES  
AND OTHER ESSAYS

The papers of this group were contributed to *Scribner's Magazine* and appeared during 1888, in the order in which they are here printed. The paper for August, *Epilogue to An Inland Voyage*, has been transferred in this edition to its proper place after *An Inland Voyage*.

TO  
PAUL BOURGET

*Traveller and student and curious as you are, you will never have heard the name of Vailima, most likely not even that of Upolu, and Samoa itself may be strange to your ears. To these barbaric seats there came the other day a yellow book with your name on the title, and filled in every page with the exquisite gifts of your art. Let me take and change your own words: J'ai beau admirer les autres de toutes mes forces, c'est avec vous que je me complais à vivre.*

### A CHAPTER ON DREAMS

THE past is all of one texture—whether feigned or suffered—whether acted out in three dimensions, or only witnessed in that small theatre of the brain which we keep brightly lighted all night long, after the jets are down, and darkness and sleep reign undisturbed in the remainder of the body. There is no distinction on the face of our experiences; one is vivid indeed, and one dull, and one pleasant, and another agonising to remember; but which of them is what we call true, and which a dream, there is not one hair to prove. The past stands on a precarious footing; another straw split in the field of metaphysic, and behold us robbed of it. There is scarce a family that can count four generations but lays a claim to some dormant title or some castle and estate: a claim not prosecutable in any court of law; but flattering to the fancy and a great alleviation of idle hours.

## RANDOM MEMORIES

A man's claim to his own past is yet less valid. A paper might turn up (in proper story-book fashion) in the secret drawer of an old ebony secretary, and restore your family to its ancient honours, and reinstate mine in a certain West Indian islet (not far from St. Kitt's, as beloved tradition hummed in my young ears) which was once ours, and is now unjustly some one else's, and for that matter (in the state of the sugar trade) is not worth anything to anybody. I do not say that these revolutions are likely; only no man can deny that they are possible; and the past, on the other hand, is lost for ever: our old days and deeds, our old selves, too, and the very world in which these scenes were acted, all brought down to the same faint residuum as a last night's dream, to some incontinuous images, and an echo in the chambers of the brain. Not an hour, not a mood, not a glance of the eye, can we revoke; it is all gone, past conjuring. And yet conceive us robbed of it, conceive that little thread of memory that we trail behind us broken at the pocket's edge; and in what naked nullity should we be left! for we only guide ourselves, and only know ourselves, by these air-painted pictures of the past.

Upon these grounds, there are some among us who claimed to have lived longer and more richly than their neighbours; when they lay asleep they claim they were still active; and among the treasures of memory that all men review for their

## A CHAPTER ON DREAMS

amusement, these count in no second place the harvests of their dreams. There is one of this kind whom I have in my eye, and whose case is perhaps unusual enough to be described. He was from a child an ardent and uncomfortable dreamer. When he had a touch of fever at night, and the room swelled and shrank, and his clothes, hanging on a nail, now loomed up instant to the bigness of a church, and now drew away into a horror of infinite distance and infinite littleness, the poor soul was very well aware of what must follow, and struggled hard against the approaches of that slumber which was the beginning of sorrows. But his struggles were in vain; sooner or later the night-hag would have him by the throat, and pluck him, strangling and screaming, from his sleep. His dreams were at times commonplace enough, at times very strange: at times they were almost formless, he would be haunted, for instance, by nothing more definite than a certain hue of brown, which he did not mind in the least while he was awake, but feared and loathed while he was dreaming; at times, again, they took on every detail of circumstance, as when once he supposed he must swallow the populous world, and awoke screaming with the horror of the thought. The two chief troubles of his very narrow existence—the practical and everyday trouble of school tasks and the ultimate and airy one of hell and judgment—were often confounded together into

## RANDOM MEMORIES

one appalling nightmare. He seemed to himself to stand before the Great White Throne; he was called on, poor little devil, to recite some form of words, on which his destiny depended; his tongue stuck, his memory was blank, hell gasped for him; and he would awake, clinging to the curtain-rod with his knees to his chin.

These were extremely poor experiences, on the whole; and at that time of life my dreamer would have very willingly parted with his power of dreams. But presently, in the course of his growth, the cries and physical contortions passed away, seemingly for ever; his visions were still for the most part miserable, but they were more constantly supported; and he would awake with no more extreme symptom than a flying heart, a freezing scalp, cold sweats, and the speechless midnight fear. His dreams, too, as befitted a mind better stocked with particulars, became more circumstantial, and had more the air and continuity of life. The look of the world beginning to take hold on his attention, scenery came to play a part in his sleeping as well as in his waking thoughts, so that he would take long, uneventful journeys and see strange towns and beautiful places as he lay in bed. And, what is more significant, an odd taste that he had for the Georgian costume and for stories laid in that period of English history, began to rule the features of his dreams; so that he masqueraded there in a three-cornered hat, and was much

## A CHAPTER ON DREAMS

engaged with Jacobite conspiracy between the hour for bed and that for breakfast. About the same time, he began to read in his dreams—tales, for the most part, and for the most part after the manner of G. P. R. James, but so incredibly more vivid and moving than any printed book, that he has ever since been malcontent with literature.

And then, while he was yet a student, there came to him a dream-adventure which he has no anxiety to repeat; he began, that is to say, to dream in sequence and thus to lead a double life—one of the day, one of the night—one that he had every reason to believe was the true one, another that he had no means of proving to be false. I should have said he studied, or was by way of studying, at Edinburgh College, which (it may be supposed) was how I came to know him. Well, in his dream-life, he passed a long day in the surgical theatre, his heart in his mouth, his teeth on edge, seeing monstrous malformations and the abhorred dexterity of surgeons. In a heavy, rainy, foggy evening he came forth into the South Bridge, turned up the High Street, and entered the door of a tall *land*, at the top of which he supposed himself to lodge. All night long, in his wet clothes, he climbed the stairs, stair after stair in endless series, and at every second flight a flaring lamp with a reflector. All night long, he brushed by single persons passing downward—beggarly women of the

## RANDOM MEMORIES

street, great, weary, muddy labourers, poor scarecrows of men, pale parodies of women—but all drowsy and weary like himself, and all single, and all brushing against him as they passed. In the end, out of a northern window, he would see day beginning to whiten over the Firth, give up the ascent, turn to descend, and in a breath be back again upon the streets, in his wet clothes, in the wet, haggard dawn, trudging to another day of monstrosities and operations. Time went quicker in the life of dreams, some seven hours (as near as he can guess) to one; and it went, besides, more intensely, so that the gloom of these fancied experiences clouded the day, and he had not shaken off their shadow ere it was time to lie down and to renew them. I cannot tell how long it was that he endured this discipline; but it was long enough to leave a great black blot upon his memory, long enough to send him, trembling for his reason, to the doors of a certain doctor; whereupon with a simple draught he was restored to the common lot of man.

The poor gentleman has since been troubled by nothing of the sort; indeed, his nights were for some while like other men's, now blank, now chequered with dreams, and these sometimes charming, sometimes appalling, but except for an occasional vividness, of no extraordinary kind. I will just note one of these occasions, ere I pass on to what makes my dreamer

## A CHAPTER ON DREAMS

truly interesting. It seemed to him that he was in the first floor of a rough hill-farm. The room showed some poor efforts at gentility, a carpet on the floor, a piano, I think, against the wall; but, for all these refinements, there was no mistaking he was in a moorland place, among hillside people, and set in miles of heather. He looked down from the window upon a bare farm-yard, that seemed to have been long disused. A great, uneasy stillness lay upon the world. There was no sign of the farm-folk or of any live-stock, save for an old, brown, curly dog of the retriever breed, who sat close in against the wall of the house and seemed to be dozing. Something about this dog disquieted the dreamer; it was quite a nameless feeling, for the beast looked right enough—indeed; he was so old and dull and dusty and broken down, that he should rather have awakened pity; and yet the conviction came and grew upon the dreamer that this was no proper dog at all, but something hellish. A great many dozing summer flies hummed about the yard; and presently the dog thrust forth his paw, caught a fly in his open palm, carried it to his mouth like an ape, and looking suddenly up at the dreamer in the window, winked to him with one eye. The dream went on, it matters not how it went; it was a good dream as dreams go; but there was nothing in the sequel worthy of that devilish brown dog. And the point of interest for me lies partly in

## RANDOM MEMORIES

that very fact: that having found so singular an incident, my imperfect dreamer should prove unable to carry the tale to a fit end and fall back on indescribable noises and indiscriminate horrors. It would be different now; he knows his business better!

For, to approach at last the point: This honest fellow had long been in the custom of setting himself to sleep with tales, and so had his father before him; but these were irresponsible inventions, told for the teller's pleasure, with no eye to the crass public or the thwart reviewer: tales where a thread might be dropped, or one adventure quitted for another, on fancy's least suggestion. So that the little people who manage man's internal theatre had not as yet received a very rigorous training; and played upon their stage like children who should have slipped into the house and found it empty, rather than like drilled actors performing a set piece to a huge hall of faces. But presently my dreamer began to turn his former amusement of story-telling to (what is called) account; by which I mean that he began to write and sell his tales. Here was he, and here were the little people who did that part of his business, in quite new conditions. The stories must now be trimmed and pared and set upon all fours, they must run from a beginning to an end and fit (after a manner) with the laws of life; the pleasure, in one word, had become a business; and that not only for the dream-

## A CHAPTER ON DREAMS

er, but for the little people of his theatre. These understood the change as well as he. When he lay down to prepare himself for sleep, he no longer sought amusement, but printable and profitable tales; and after he had dozed off in his box-seat, his little people continued their evolutions with the same mercantile designs. All other forms of dream deserted him but two: he still occasionally reads the most delightful books, he still visits at times the most delightful places; and it is perhaps worthy of note that to these same places, and to one in particular, he returns at intervals of months and years, finding new field-paths, visiting new neighbours, beholding that happy valley under new effects of noon and dawn and sunset. But all the rest of the family of visions is quite lost to him: the common, mangled version of yesterday's affairs, the raw-head-and-bloody-bones nightmare, rumoured to be the child of toasted cheese—these and their like are gone; and, for the most part, whether awake or asleep, he is simply occupied—he or his little people—in consciously making stories for the market. This dreamer (like many other persons) has encountered some trifling vicissitudes of fortune. When the bank begins to send letters and the butcher to linger at the back gate, he sets to belabouring his brains after a story, for that is his readiest money-winner; and, behold! at once the little people begin to bestir themselves in the same quest, and

## RANDOM MEMORIES

labour all night long, and all night long set before him truncheons of tales upon their lighted theatre. No fear of his being frightened now; the flying heart and the frozen scalp are things by-gone; applause, growing applause, growing interest, growing exultation in his own cleverness (for he takes all the credit), and at last a jubilant leap to wakefulness, with the cry, "I have it, that'll do!" upon his lips: with such and similar emotions he sits at these nocturnal dramas, with such outbreaks, like Claudius in the play, he scatters the performance in the midst. Often enough the waking is a disappointment: he has been too deep asleep, as I explain the thing; drowsiness has gained his little people, they have gone stumbling and maundering through their parts; and the play, to the awakened mind, is seen to be a tissue of absurdities. And yet how often have these sleepless Brownies done him honest service, and given him, as he sat idly taking his pleasure in the boxes, better tales than he could fashion for himself.

Here is one, exactly as it came to him. It seemed he was the son of a very rich and wicked man, the owner of broad acres and a most damnable temper. The dreamer (and that was the son) had lived much abroad, on purpose to avoid his parent; and when at length he returned to England, it was to find him married again to a young wife, who was supposed to suffer cruelly and to loathe her yoke. Because of

## A CHAPTER ON DREAMS

this marriage (as the dreamer indistinctly understood) it was desirable for father and son to have a meeting; and yet both being proud and both angry, neither would condescend upon a visit. Meet they did accordingly, in a desolate, sandy country by the sea; and there they quarrelled, and the son, stung by some intolerable insult, struck down the father dead. No suspicion was aroused; the dead man was found and buried, and the dreamer succeeded to the broad estates, and found himself installed under the same roof with his father's widow, for whom no provision had been made. These two lived very much alone, as people may after a bereavement, sat down to table together, shared the long evenings, and grew daily better friends; until it seemed to him of a sudden that she was prying about dangerous matters, that she had conceived a notion of his guilt, that she watched him and tried him with questions. He drew back from her company as men draw back from a precipice suddenly discovered; and yet so strong was the attraction that he would drift again and again into the old intimacy, and again and again be startled back by some suggestive question or some inexplicable meaning in her eye. So they lived at cross purposes, a life full of broken dialogue, challenging glances, and suppressed passion; until, one day, he saw the woman slipping from the house in a veil, followed her to the station, followed her in the

## RANDOM MEMORIES

train to the sea-side country, and out over the sand-hills to the very place where the murder was done. There she began to grope among the bents, he watching her, flat upon his face; and presently she had something in her hand—I cannot remember what it was, but it was deadly evidence against the dreamer—and as she held it up to look at it, perhaps from the shock of the discovery, her foot slipped, and she hung at some peril on the brink of the tall sand-wreaths. He had no thought but to spring up and rescue her; and there they stood face to face, she with that deadly matter openly in her hand—his very presence on the spot another link of proof. It was plain she was about to speak, but this was more than he could bear—he could bear to be lost, but not to talk of it with his destroyer; and he cut her short with trivial conversation. Arm in arm, they returned together to the train, talking he knew not what, made the journey back in the same carriage, sat down to dinner, and passed the evening in the drawing-room as in the past. But suspense and fear drummed in the dreamer's bosom. "She has not denounced me yet"—so his thoughts ran—"when will she denounce me? Will it be to-morrow?" And it was not to-morrow, nor the next day, nor the next; and their life settled back on the old terms, only that she seemed kinder than before, and that, as for him, the burthen of his suspense and wonder grew daily

## A CHAPTER ON DREAMS

more unbearable, so that he wasted away like a man with a disease. Once, indeed, he broke all bounds of decency, seized an occasion when she was abroad, ransacked her room, and at last, hidden away among her jewels, found the damning evidence. There he stood, holding this thing, which was his life, in the hollow of his hand, and marvelling at her inconsequent behaviour, that she should seek, and keep, and yet not use it; and then the door opened, and behold herself. So, once more, they stood, eye to eye, with the evidence between them; and once more she raised to him a face brimming with some communication; and once more he shied away from speech and cut her off. But before he left the room, which he had turned upside down, he laid back his death-warrant where he had found it; and at that, her face lighted up. The next thing he heard, she was explaining to her maid, with some ingenious falsehood, the disorder of her things. Flesh and blood could bear the strain no longer; and I think it was the next morning (though chronology is always hazy in the theatre of the mind) that he burst from his reserve. They had been breakfasting together in one corner of a great, parqueted, sparsely furnished room of many windows; all the time of the meal she had tortured him with sly allusions; and no sooner were the servants gone and these two protagonists alone together, than he leaped to his feet. She too

## RANDOM MEMORIES

sprang up, with a pale face; with a pale face, she heard him as he raved out his complaint: Why did she torture him so? she knew all, she knew he was no enemy to her; why did she not denounce him at once? what signified her whole behaviour? why did she torture him? and yet again, why did she torture him? And when he had done, she fell upon her knees, and with outstretched hands: "Do you not understand?" she cried. "I love you!"

Hereupon, with a pang of wonder and mercantile delight, the dreamer awoke. His mercantile delight was not of long endurance; for it soon became plain that in this spirited tale there were unmarketable elements; which is just the reason why you have it here so briefly told. But his wonder has still kept growing; and I think the reader's will also, if he consider it ripely. For now he sees why I speak of the little people as of substantive inventors and performers. To the end they had kept their secret. I will go bail for the dreamer (having excellent grounds for valuing his candour) that he had no guess whatever at the motive of the woman—the hinge of the whole well-invented plot—until the instant of that highly dramatic declaration. It was not his tale; it was the little people's! And observe: not only was the secret kept, the story was told with really guileful craftsmanship. The conduct of both actors is (in the cant phrase) psychologically correct, and

## A CHAPTER ON DREAMS

the emotion aptly graduated up to the surprising climax. I am awake now, and I know this trade; and yet I cannot better it. I am awake, and I live by this business; and yet I could not outdo—could not perhaps equal—that crafty artifice (as of some old, experienced carpenter of plays, some Dennery or Sardou) by which the same situation is twice presented and the two actors twice brought face to face over the evidence, only once it is in her hand, once in his—and these in their due order, the least dramatic first. The more I think of it, the more I am moved to press upon the world my question: Who are the Little People? They are near connections of the dreamer's, beyond doubt; they share in his financial worries and have an eye to the bank-book; they share plainly in his training; they have plainly learned like him to build the scheme of a considerate story and to arrange emotion in progressive order; only I think they have more talent; and one thing is beyond doubt, they can tell him a story piece by piece, like a serial, and keep him all the while in ignorance of where they aim. Who are they, then? and who is the dreamer?

Well, as regards the dreamer, I can answer that, for he is no less a person than myself;—as I might have told you from the beginning, only that the critics murmur over my consistent egotism;—and as I am positively forced to tell you now, or I could advance but little farther

## RANDOM MEMORIES

with my story. And for the Little People, what shall I say they are but just my Brownies, God bless them! who do one-half my work for me while I am fast asleep, and in all human likelihood, do the rest for me as well, when I am wide awake and fondly suppose I do it for myself. That part which is done while I am sleeping is the Brownies' part beyond contention; but that which is done when I am up and about is by no means necessarily mine, since all goes to show the Brownies have a hand in it even then. Here is a doubt that much concerns my conscience. For myself—what I call I, my conscience ego, the denizen of the pineal gland unless he has changed his residence since Descartes, the man with the conscience and the variable bank-account, the man with the hat and the boots, and the privilege of voting and not carrying his candidate at the general elections—I am sometimes tempted to suppose he is no story-teller at all, but a creature as matter of fact as any cheesemonger or any cheese, and a realist bemired up to the ears in actuality; so that, by that account, the whole of my published fiction should be the single-handed product of some Brownie, some Familiar, some unseen collaborator, whom I keep locked in a back garret, while I get all the praise and he but a share (which I cannot prevent him getting) of the pudding. I am an excellent adviser, something like Molière's servant; I pull

## A CHAPTER ON DREAMS

back and I cut down; and I dress the whole in the best words and sentences that I can find and make; I hold the pen, too; and I do the sitting at the table, which is about the worst of it; and when all is done, I make up the manuscript and pay for the registration; so that, on the whole, I have some claim to share, though not so largely as I do, in the profits of our common enterprise.

I can but give an instance or so of what part is done sleeping and what part awake, and leave the reader to share what laurels there are, at his own nod, between myself and my collaborators; and to do this I will first take a book that a number of persons have been polite enough to read, the *Strange Case of Dr. Jekyll and Mr. Hyde*. I had long been trying to write a story on this subject, to find a body, a vehicle, for that strong sense of man's double being which must at times come in upon and overwhelm the mind of every thinking creature. I had even written one, *The Travelling Companion*, which was returned by an editor on the plea that it was a work of genius and indecent, and which I burned the other day on the ground that it was not a work of genius, and that *Jekyll* had supplanted it. Then came one of those financial fluctuations to which (with an elegant modesty) I have hitherto referred in the third person. For two days I went about racking my brains for a plot of any sort; and on the second

## RANDOM MEMORIES

night I dreamed the scene at the window, and a scene afterwards split in two, in which Hyde, pursued for some crime, took the powder and underwent the change in the presence of his pursuers. All the rest was made awake, and consciously, although I think I can trace in much of it the manner of my Brownies. The meaning of the tale is therefore mine, and had long pre-existed in my garden of Adonis, and tried one body after another in vain; indeed, I do most of the morality, worse luck! and my Brownies have not a rudiment of what we call a conscience. Mine, too, is the setting, mine the characters. All that was given me was the matter of three scenes, and the central idea of a voluntary change becoming involuntary. Will it be thought ungenerous, after I have been so liberally ladling out praise to my unseen collaborators, if I here toss them over, bound hand and foot, into the arena of the critics? For the business of the powders, which so many have censured, is, I am relieved to say, not mine at all but the Brownies'. Of another tale, in case the reader should have glanced at it, I may say a word: the not very defensible story of *Olalla*. Here the court, the mother, the mother's niche, *Olalla*, *Olalla's* chamber, the meetings on the stair, the broken window, the ugly scene of the bite, were all given me in bulk and detail as I have tried to write them; to this I added only the external scenery (for in my dream I never

## A CHAPTER ON DREAMS

was beyond the court), the portrait, the characters of Felipe and the priest, the moral, such as it is, and the last pages, such as, alas! they are. And I may even say that in this case the moral itself was given me; for it arose immediately on a comparison of the mother and the daughter, and from the hideous trick of atavism in the first. Sometimes a parabolic sense is still more undeniably present in a dream; sometimes I cannot but suppose my Brownies have been aping Bunyan, and yet in no case with what would possibly be called a moral in a tract; never with the ethical narrowness; conveying hints instead of life's larger limitations and that sort of sense which we seem to perceive in the arabesque of time and space.

For the most part, it will be seen, my Brownies are somewhat fantastic, like their stories hot and hot, full of passion and the picturesque, alive with animating incident; and they have no prejudice against the supernatural. But the other day they gave me a surprise, entertaining me with a love-story, a little April comedy, which I ought certainly to hand over to the author of *A Chance Acquaintance*, for he could write it as it should be written, and I am sure (although I mean to try) that I cannot.—But who would have supposed that a Brownie of mine should invent a tale for Mr. Howells?

## II

### THE LANTERN-BEARERS

#### I

THESE boys congregated every autumn about a certain easterly fisher-village, where they tasted in a high degree the glory of existence. The place was created seemingly on purpose for the diversion of young gentlemen. A street or two of houses, mostly red and many of them tiled; a number of fine trees clustered about the manse and the kirkyard, and turning the chief street into a shady alley; many little gardens more than usually bright with flowers; nets a-drying, and fisher-wives scolding in the backward parts; a smell of fish, a genial smell of seaweed; whiffs of blowing sand at the street-corners; shops with golf-balls and bottled lollipops; another shop with penny pickwicks (that remarkable cigar) and the *London Journal*, dear to me for its startling pictures, and a few novels, dear for their suggestive names: such, as well as memory serves me, were the ingredients of the town. These, you are to conceive posted on a spit between two sandy bays, and sparsely flanked

## LANTERN-BEARERS

with villas—enough for the boys to lodge in with their subsidiary parents, not enough (not yet enough) to cocknify the scene: a haven in the rocks in front: in front of that, a file of grey islets: to the left, endless links and sand-wreaths, a wilderness of hiding-holes, alive with popping rabbits and soaring gulls; to the right, a range of seaward crags, one rugged brow beyond another; the ruins of a mighty and ancient fortress on the brink of one; coves between—now charmed into sunshine quiet, now whistling with wind and clamorous with bursting surges; the dens and sheltered hollows redolent of thyme and southernwood, the air at the cliff's edge brisk and clean and pungent of the sea—in front of all, the Bass Rock, tilted seaward like a doubtful bather, the surf ringing it with white, the solan-geese hanging round its summit like a great and glittering smoke. This choice piece of seaboard was sacred, besides, to the wrecker; and the Bass, in the eye of fancy, still flew the colours of King James; and in the ear of fancy the arches of Tantallon still rang with horse-shoe iron, and echoed to the commands of Bell-the-Cat.

There was nothing to mar your days, if you were a boy summering in that part, but the embarrassment of pleasure. You might golf if you wanted; but I seem to have been better employed. You might secrete yourself in the Lady's Walk, a certain sunless dingle of elders, all

## RANDOM MEMORIES

mossed over by the damp as green as grass, and dotted here and there by the stream-side with roofless walls, the cold homes of anchorites. To fit themselves for life, and with a special eye to acquire the art of smoking, it was even common for the boys to harbour there; and you might have seen a single penny pickwick, honestly shared in lengths with a blunt knife, bestrew the glen with these apprentices. Again, you might join our fishing-parties, where we sat perched as thick as solan-geese, a covey of little anglers, boy and girl, angling over each other's heads, to the much entanglement of lines and loss of podleys and consequent shrill recrimination—shrill as the geese themselves. Indeed, had that been all, you might have done this often; but though fishing be a fine pastime, the podley is scarce to be regarded as a dainty for the table; and it was a point of honour that a boy should eat all that he had taken. Or again, you might climb the Law, where the whale's jawbone stood landmark in the buzzing wind, and behold the face of many counties, and the smoke and spires of many towns, and the sails of distant ships. You might bathe, now in the flaws of fine weather, that we pathetically call our summer, now in a gale of wind, with the sand scourging your bare hide, your clothes thrashing abroad from underneath their guardian stone, the froth of the great breakers casting you headlong ere it had drowned your knees.

## LANTERN-BEARERS

Or you might explore the tidal rocks, above all in the ebb of springs, when the very roots of the hills were for the nonce discovered; following my leader from one group to another, groping in slippery tangle for the wreck of ships, wading in pools after the abominable creatures of the sea, and ever with an eye cast backward on the march of the tide and the menaced line of your retreat. And then you might go Crusoeing, a word that covers all extempore eating in the open air: digging perhaps a house under the margin of the links, kindling a fire of the sea-ware, and cooking apples there—if they were truly apples, for I sometimes suppose the merchant must have played us off with some inferior and quite local fruit, capable of resolving, in the neighbourhood of fire, into mere sand and smoke and iodine; or perhaps pushing to Tantallon, you might lunch on sandwiches and visions in the grassy court, while the wind hummed in the crumbling turrets; or clambering along the coast, eat geans<sup>1</sup> (the worst, I must suppose, in Christendom) from an adventurous gean-tree that had taken root under a cliff, where it was shaken with an ague of east wind, and silvered after gales with salt, and grew so foreign among its bleak surroundings that to eat of its produce was an adventure in itself.

There are mingled some dismal memories with so many that were joyous. Of the fisher-wife,

<sup>1</sup>Wild cherries.

## RANDOM MEMORIES

for instance, who had cut her throat at Canty Bay; and of how I ran with the other children to the top of the Quadrant, and beheld a posse of silent people escorting a cart, and on the cart, bound in a chair, her throat bandaged, and the bandage all bloody—horror!—the fisher-wife herself, who continued thenceforth to hag-ride my thoughts, and even to-day (as I recall the scene) darkens daylight. She was lodged in the little old jail in the chief street; but whether or no she died there, with a wise terror of the worst, I never inquired. She had been tippling; it was but a dingy tragedy; and it seems strange and hard that, after all these years, the poor crazy sinner should be still pilloried on her cart in the scrap-book of my memory. Nor shall I readily forget a certain house in the Quadrant where a visitor died, and a dark old woman continued to dwell alone with the dead body; nor how this old woman conceived a hatred to myself and one of my cousins, and in the dread hour of the dusk, as we were clambering on the garden-walls, opened a window in that house of mortality and cursed us in a shrill voice and with a marrowy choice of language. It was a pair of very colourless urchins that fled down the lane from this remarkable experience! But I recall with a more doubtful sentiment, compounded out of fear and exultation, the coil of equinoctial tempests; trumpeting squalls, scouring flaws of rain; the boats with their reefed lugsails scudding for the

## LANTERN-BEARERS

harbour mouth, where danger lay, for it was hard to make when the wind had any east in it; the wives clustered with blowing shawls at the pier-head, where (if fate was against them) they might see boat and husband and sons—their whole wealth and their whole family—engulfed under their eyes; and (what I saw but once) a troop of neighbours forcing such an unfortunate homeward, and she squalling and battling in their midst, a figure scarcely human, a tragic Mænad.

These are things that I recall with interest; but what my memory dwells upon the most I have been all this while withholding. It was a sport peculiar to the place, and indeed to a week or so of our two months' holiday there. Maybe it still flourishes in its native spot; for boys and their pastimes are swayed by periodic forces inscrutable to man; so that tops and marbles reappear in their due season, regular like the sun and moon; and the harmless art of knucklebones has seen the fall of the Roman empire and the rise of the United States. It may still flourish in its native spot, but nowhere else, I am persuaded; for I tried myself to introduce it on Tweedside, and was defeated lamentably; its charm being quite local, like a country wine that cannot be exported.

The idle manner of it was this:—

Toward the end of September, when school-time was drawing near and the nights were al-

## RANDOM MEMORIES

ready black, we would begin to sally from our respective villas, each equipped with a tin bull's-eye lantern. The thing was so well known that it had worn a rut in the commerce of Great Britain; and the grocers, about the due time, began to garnish their windows with our particular brand of luminary. We wore them buckled to the waist upon a cricket belt, and over them, such was the rigour of the game, a buttoned top-coat. They smelled noisomely of blistered tin; they never burned aright, though they would always burn our fingers; their use was naught; the pleasure of them merely fanciful; and yet a boy with a bull's-eye under his top-coat asked for nothing more. The fishermen used lanterns about their boats, and it was from them, I suppose, that we had got the hint; but theirs were not bull's-eyes, nor did we ever play at being fishermen. The police carried them at their belts, and we had plainly copied them in that; yet we did not pretend to be policemen. Burglars, indeed, we may have had some haunting thoughts of; and we had certainly an eye to past ages when lanterns were more common, and to certain story-books in which we had found them to figure very largely. But take it for all in all, the pleasure of the thing was substantive; and to be a boy with a bull's-eye under his top-coat was good enough for us.

When two of these asses met, there would be an anxious "Have you got your lantern?" and

## LANTERN-BEARERS

a gratified "Yes!" That was the shibboleth, and very needful too; for, as it was the rule to keep our glory contained, none could recognise a lantern-bearer, unless (like the pole-cat) by the smell. Four or five would sometimes climb into the belly of a ten-man lugger, with nothing but the thwarts above them—for the cabin was usually locked; or choose out some hollow of the links where the wind might whistle overhead. There the coats would be unbuttoned and the bull's-eyes discovered; and in the chequering glimmer, under the huge windy hall of the night, and cheered by a rich steam of toasting tinware, these fortunate young gentlemen would crouch together in the cold sand of the links or on the scaly bilges of the fishing-boat, and delight themselves with inappropriate talk. Woe is me that I may not give some specimens—some of their foresights of life, or deep inquiries into the rudiments of man and nature, these were so fiery and so innocent, they were so richly silly, so romantically young. But the talk, at any rate, was but a condiment; and these gatherings themselves only accidents in the career of the lantern-bearer. The essence of this bliss was to walk by yourself in the black night; the slide shut, the top-coat buttoned; not a ray escaping, whether to conduct your footsteps or to make your glory public; a mere pillar of darkness in the dark; and all the while, deep down in the privacy of your fool's heart, to know you had a

## RANDOM MEMORIES

bull's-eye at your belt, and to exult and sing over the knowledge.

### II

It is said that a poet has died young in the breast of the most stolid. It may be contended, rather, that this (somewhat minor) bard in almost every case survives, and is the spice of life to his possessor. Justice is not done to the versatility and the unplumbed childishness of man's imagination. His life from without may seem but a rude mound of mud; there will be some golden chamber at the heart of it, in which he dwells delighted; and for as dark as his pathway seems to the observer, he will have some kind of a bull's-eye at his belt.

It would be hard to pick out a career more cheerless than that of Dancer, the miser, as he figures in the "Old Bailey Reports," a prey to the most sordid persecutions, the butt of his neighbourhood, betrayed by his hired man, his house beleaguered by the impish school-boy, and he himself grinding and fuming and impotently fleeing to the law against these pin-pricks. You marvel at first that any one should willingly prolong a life so destitute of charm and dignity; and then you call to memory that had he chosen, had he ceased to be a miser, he could have been freed at once from these trials, and might have built himself a castle and gone escorted by a squadron. For the love of more recondite joys, which we

## LANTERN-BEARERS

cannot estimate, which, it may be, we should envy, the man had willingly foregone both comfort and consideration. "His mind to him a kingdom was"; and sure enough, digging into that mind, which seems at first a dust-heap, we unearth some priceless jewels. For Dancer must have had the love of power and the disdain of using it, a noble character in itself; disdain of many pleasures, a chief part of what is commonly called wisdom; disdain of the inevitable end, that finest trait of mankind; scorn of men's opinions, another element of virtue; and at the back of all, a conscience just like yours and mine, whining like a cur, swindling like a thimble-rigger, but still pointing (there or thereabout) to some conventional standard. Here were a cabinet portrait to which Hawthorne perhaps had done justice; and yet not Hawthorne either, for he was mildly minded, and it lay not in him to create for us that throb of the miser's pulse, his fretful energy of gusto, his vast arms of ambition clutching in he knows not what: insatiable, insane, a god with a muck-rake. Thus, at least, looking in the bosom of the miser, consideration detects the poet in the full tide of life, with more, indeed, of the poetic fire than usually goes to epics; and tracing that mean man about his cold hearth, and to and fro in his uncomfortable house, spies within him a blazing bonfire of delight. And so with others, who do not live by bread alone, but by some

## RANDOM MEMORIES

cherished and perhaps fantastic pleasure; who are meat salesmen to the external eye, and possibly to themselves are Shakespeares, Napoleons, or Beethovens; who have not one virtue to rub against another in the field of active life, and yet perhaps, in the life of contemplation, sit with the saints. We see them on the street, and we can count their buttons; but Heaven knows in what they pride themselves! Heaven knows where they have set their treasure!

There is one fable that touches very near the quick of life: the fable of the monk who passed into the woods, heard a bird break into song, hearkened for a trill or two, and found himself on his return a stranger at his convent gates; for he had been absent fifty years, and of all his comrades there survived but one to recognise him. It is not only in the woods that this enchanter carols, though perhaps he is native there. He sings in the most doleful places. The miser hears him and chuckles, and the days are moments. With no more apparatus than an ill-smelling lantern I have evoked him on the naked links. All life that is not merely mechanical is spun out of two strands: seeking for that bird and hearing him. And it is just this that makes life so hard to value, and the delight of each so incommunicable. And just a knowledge of this, and a remembrance of those fortunate hours in which the bird has sung to us, that fills us with such wonder when we turn the pages of the real-

## LANTERN-BEARERS

ist. There, to be sure, we find a picture of life in so far as it consists of mud and of old iron, cheap desires and cheap fears, that which we are ashamed to remember and that which we are careless whether we forget; but of the note of that time-devouring nightingale we hear no news.

The case of these writers of romance is most obscure. They have been boys and youths; they have lingered outside the window of the beloved, who was then most probably writing to some one else; they have sat before a sheet of paper, and felt themselves mere continents of congested poetry, not one line of which would flow; they have walked alone in the woods, they have walked in cities under the countless lamps; they have been to sea, they have hated, they have feared, they have longed to knife a man, and maybe done it; the wild taste of life has stung their palate. Or, if you deny them all the rest, one pleasure at least they have tasted to the full—their books are there to prove it—the keen pleasure of successful literary composition. And yet they fill the globe with volumes, whose cleverness inspires me with despairing admiration, and whose consistent falsity to all I care to call existence, with despairing wrath. If I had no better hope than to continue to revolve among the dreary and petty businesses, and to be moved by the paltry hopes and fears with which they surround and animate their heroes, I declare I would die now. But there

## RANDOM MEMORIES

has never an hour of mine gone quite so dully yet; if it were spent waiting at a railway junction, I would have some scattering thoughts, I could count some grains of memory, compared to which the whole of one of these romances seems but dross.

These writers would retort (if I take them properly) that this was very true; that it was the same with themselves and other persons of (what they call) the artistic temperament; that in this we were exceptional, and should apparently be ashamed of ourselves; but that our works must deal exclusively with (what they call) the average man, who was a prodigious dull fellow, and quite dead to all but the paltriest considerations. I accept the issue. We can only know others by ourselves. The artistic temperament (a plague on the expression!) does not make us different from our fellow-men, or it would make us incapable of writing novels; and the average man (a murrain on the word!) is just like you and me, or he would not be average. It was Whitman who stamped a kind of Birmingham sacredness upon the latter phrase; but Whitman knew very well, and showed very nobly, that the average man was full of joys and full of a poetry of his own. And this harping on life's dulness and man's meanness is a loud profession of incompetence; it is one of two things: the cry of the blind eye, *I cannot see*, or the complaint of the dumb tongue,

## LANTERN-BEARERS

*I cannot utter.* To draw a life without delights is to prove I have not realised it. To picture a man without some sort of poetry—well, it goes near to prove my case, for it shows an author may have little enough. To see Dancer only as a dirty, old, small-minded, impotently fuming man, in a dirty house, besieged by Harrow boys, and probably beset by small attorneys, is to show myself as keen an observer as . . . the Harrow boys. But these young gentlemen (with a more becoming modesty) were content to pluck Dancer by the coat-tails; they did not suppose they had surprised his secret or could put him living in a book: and it is there my error would have lain. Or say that in the same romance—I continue to call these books romances, in the hope of giving pain—say that in the same romance, which now begins really to take shape, I should leave to speak of Dancer, and follow instead the Harrow boys; and say that I came on some such business as that of my lantern-bearers on the links; and described the boys as very cold, spat upon by flurries of rain, and drearily surrounded, all of which they were; and their talk as silly and indecent, which it certainly was. I might upon these lines, and had I Zola's genius, turn out, in a page or so, a gem of literary art, render the lantern-light with the touches of a master, and lay on the indecency with the ungrudging hand of love; and when all was done, what a triumph would my

## RANDOM MEMORIES

picture be of shallowness and dulness! how it would have missed the point! how it would have belied the boys! To the ear of the stenographer, the talk is merely silly and indecent; but ask the boys themselves, and they are discussing (as it is highly proper they should) the possibilities of existence. To the eye of the observer they are wet and cold and drearily surrounded; but ask themselves, and they are in the heaven of a recondite pleasure, the ground of which is an ill-smelling lantern.

### III

For, to repeat, the ground of a man's joy is often hard to hit. It may hinge at times upon a mere accessory, like the lantern, it may reside, like Dancer's in the mysterious inwards of psychology. It may consist with perpetual failure, and find exercise in the continued chase. It has so little bond with externals (such as the observer scribbles in his note-book) that it may even touch them not; and the man's true life, for which he consents to live, lie altogether in the field of fancy. The clergyman, in his spare hours, may be winning battles, the farmer sailing ships, the banker reaping triumph in the arts: all leading another life, plying another trade from that they chose; like the poet's housebuilder, who, after all, is cased in stone,

“By his fireside, as impotent fancy prompts,  
Rebuilds it to his liking.”

## LANTERN-BEARERS

In such a case the poetry runs underground. The observer (poor soul, with his documents!) is all abroad. For to look at the man is but to court deception. We shall see the trunk from which he draws his nourishment; but he himself is above and abroad in the green dome of foliage, hummed through by winds and nested in by nightingales. And the true realism were that of the poets, to climb up after him like a squirrel, and catch some glimpse of the heaven for which he lives. And the true realism, always and everywhere, is that of the poets to find out where joy resides, and give it a voice far beyond singing.

For to miss the joy is to miss all. In the joy of the actors lies the sense of any action. That is the explanation, that the excuse. To one who has not the secret of the lanterns, the scene upon the links is meaningless. And hence the haunting and truly spectral unreality of realistic books. Hence, when we read the English realists, the incredulous wonder with which we observe the hero's constancy under the submerging tide of dulness, and how he bears up with his jibbing sweetheart, and endures the chatter of idiot girls, and stands by his whole unfeatured wilderness of an existence, instead of seeking relief in drink or foreign travel. Hence in the French, in that meat-market of middle-aged sensuality, the disgusted surprise with which we see the hero drift sidelong, and practically quite untempted, into every description of miscon-

## RANDOM MEMORIES

duct and dishonour. In each, we miss the personal poetry, the enchanted atmosphere, that rainbow work of fancy that clothes what is naked and seems to ennoble what is base; in each, life falls dead like dough, instead of soaring away like a balloon into the colours of the sunset; each is true, each inconceivable; for no man lives in the external truth, among salts and acids, but in the warm, phantasmagoric chamber of his brain, with the painted windows and the storied walls.

Of this falsity we have had a recent example from a man who knows far better—Tolstoi's *Powers of Darkness*. Here is a piece full of force and truth, yet quite untrue. For before Mikita was led into so dire a situation he was tempted, and temptations are beautiful at least in part; and a work which dwells on the ugliness of crime and gives no hint of any loveliness in the temptation, sins against the modesty of life, and even when a Tolstoi writes it, sinks to melodrama. The peasants are not understood; they saw their life in fairer colours; even the deaf girl was clothed in poetry for Mikita, or he had never fallen. And so, once again, even an Old Bailey melodrama, without some brightness of poetry and lustre of existence, falls into the inconceivable and ranks with fairy tales.

### IV

In nobler books we are moved with something like the emotions of life; and this emotion is very

## LANTERN-BEARERS

variously provoked. We are so moved when Levine labours in the field, when André sinks beyond emotion, when Richard Feverel and Lucy Desborough meet beside the river, when Antony, "not cowardly, puts off his helmet," when Kent has infinite pity on the dying Lear, when, in Dostoieffsky's *Despised and Rejected*, the uncomplaining hero drains his cup of suffering and virtue. These are notes that please the great heart of man. Not only love, and the fields, and the bright face of danger, but sacrifice and death and unmerited suffering humbly supported, touch in us the vein of the poetic. We love to think of them, we long to try them, we are humbly hopeful that we may prove heroes also.

We have heard, perhaps, too much of lesser matters. Here is the door, here is the open air.

*Itur in antiquam silvam.*

### III

## BEGGARS

#### I

**I**N a pleasant, airy, uphill country, it was my fortune when I was young to make the acquaintance of a certain beggar. I call him beggar, though he usually allowed his coat and his shoes (which were open-mouthed, indeed) to beg for him. He was the wreck of an athletic man, tall, gaunt, and bronzed; far gone in consumption, with that disquieting smile of the mortally stricken on his face; but still active afoot, still with the brisk military carriage, the ready military salute. Three ways led through this piece of country; and as I was inconstant in my choice, I believe he must often have awaited me in vain. But often enough, he caught me; often enough, from some place of ambush by the roadside, he would spring suddenly forth in the regulation attitude, and launching at once into his inconsequential talk, fall into step with me upon my farther course. "A fine morning, sir, though perhaps a trifle inclining to rain. I hope I see you well, sir. Why, no, sir, I don't

## BEGGARS

feel as hearty myself as I could wish, but I am keeping about my ordinary. I am pleased to meet you on the road, sir. I assure you I quite look forward to one of our little conversations." He loved the sound of his own voice inordinately, and though (with something too offhand to call servility) he would always hasten to agree with anything you said, yet he could never suffer you to say it to an end. By what transition he slid to his favourite subject I have no memory; but we had never been long together on the way before he was dealing, in a very military manner, with the English poets. "Shelley was a fine poet, sir, though a trifle atheistical in his opinions. His *Queen Mab*, sir, is quite an atheistical work. Scott, sir, is not so poetical a writer. With the works of Shakespeare I am not so well acquainted, but he was a fine poet. Keats—John Keats, sir—he was a very fine poet." With such references, such trivial criticism, such loving parade of his own knowledge, he would beguile the road, striding forward uphill, his staff now clapped to the ribs of his deep, resonant chest, now swinging in the air with the remembered jauntiness of the private soldier; and all the while his toes looking out of his boots, and his shirt looking out of his elbows, and death looking out of his smile, and his big, crazy frame shaken by accesses of cough.

He would often go the whole way home with

## RANDOM MEMORIES

me: often to borrow a book, and that book always a poet. Off he would march, to continue his mendicant rounds, with the volume slipped into the pocket of his ragged coat; and although he would sometimes keep it quite a while, yet it came always back again at last, not much the worse for its travels into beggardom. And in this way, doubtless, his knowledge grew and his glib, random criticism took a wider range. But my library was not the first he had drawn upon: at our first encounter, he was already brimful of Shelley and the atheistical Queen Mab, and "Keats—John Keats, sir." And I have often wondered how he came by these acquirements; just as I often wondered how he fell to be a beggar. He had served through the Mutiny—of which (like so many people) he could tell practically nothing beyond the names of places, and that it was "difficult work, sir," and very hot, or that so-and-so was "a very fine commander, sir." He was far too smart a man to have remained a private; in the nature of things, he must have won his stripes. And yet here he was without a pension. When I touched on this problem, he would content himself with diffidently offering me advice. "A man should be very careful when he is young, sir. If you'll excuse me saying so, a spirited young gentleman like yourself, sir, should be very careful. I was perhaps a trifle inclined to atheistical opinions myself." For (perhaps with

## BEGGARS

a deeper wisdom than we are inclined in these days to admit) he plainly bracketed agnosticism with beer and skittles.

Keats—John Keats, sir—and Shelley were his favourite bards. I cannot remember if I tried him with Rossetti; but I know his taste to a hair, and if ever I did, he must have doted on that author. What took him was a richness in the speech; he loved the exotic, the unexpected word; the moving cadence of a phrase; a vague sense of emotion (about nothing) in the very letters of the alphabet: the romance of language. His honest head was very nearly empty, his intellect like a child's; and when he read his favourite authors, he can almost never have understood what he was reading. Yet the taste was not only genuine, it was exclusive; I tried in vain to offer him novels; he would none of them; he cared for nothing but romantic language that he could not understand. The case may be commoner than we suppose. I am reminded of a lad who was laid in the next cot to a friend of mine in a public hospital, and who was no sooner installed than he sent out (perhaps with his last pence) for a cheap Shakespeare. My friend pricked up his ears; fell at once in talk with his new neighbour, and was ready, when the book arrived, to make a singular discovery. For this lover of great literature understood not one sentence out of twelve, and his favourite part was that of which he under-

## RANDOM MEMORIES

stood the least—the inimitable, mouth-filling rodomontade of the ghost in *Hamlet*. It was a bright day in hospital when my friend expounded the sense of this beloved jargon: a task for which I am willing to believe my friend was very fit, though I can never regard it as an easy one. I know indeed a point or two, on which I would gladly question Mr. Shakespeare, that lover of big words, could he revisit the glimpses of the moon, or could I myself climb backward to the spacious days of Elizabeth. But in the second case, I should most likely pretermit these questionings, and take my place instead in the pit at the Blackfriars, to hear the actor in his favourite part, playing up to Mr. Burbage, and rolling out—as I seem to hear him—with a ponderous gusto——

“Unhousel'd, disappointed, unanel'd.”

What a pleasant chance, if we could go there in a party! and what a surprise for Mr. Burbage, when the ghost received the honours of the evening!

As for my old soldier, like Mr. Burbage and Mr. Shakespeare, he is long since dead; and now lies buried, I suppose, and nameless and quite forgotten, in some poor city graveyard.—But not for me, you brave heart, have you been buried! For me, you are still afoot, tasting the sun and air, and striding southward. By the groves of Comiston and beside the Hermitage of Braid, by the Hunters' Tryst, and where the curlews

## BEGGARS

and plovers cry around Fairmilehead, I see and hear you, stalwartly carrying your deadly sickness, cheerfully discoursing of uncomprehended poets.

### II

The thought of the old soldier recalls that of another tramp, his counterpart. This was a little, lean, and fiery man, with the eyes of a dog and the face of a gipsy; whom I found one morning encamped with his wife and children and his grinder's wheel, beside the burn of Kinnaird. To this beloved dell I went, at that time, daily; and daily the knife-grinder and I (for as long as his tent continued pleasantly to interrupt my little wilderness) sat on two stones, and smoked, and plucked grass, and talked to the tune of the brown water. His children were mere whelps, they fought and bit among the fern like vermin. His wife was a mere squaw; I saw her gather brush and tend the kettle, but she never ventured to address her lord while I was present. The tent was a mere gipsy hovel, like a sty for pigs. But the grinder himself had the fine self-sufficiency and grave politeness of the hunter and the savage; he did me the honours of this dell, which had been mine but the day before, took me far into the secrets of his life, and used me (I am proud to remember) as a friend.

Like my old soldier, he was far gone in the national complaint. Unlike him, he had a vul-

## RANDOM MEMORIES

gar taste in letters; scarce flying higher than the story papers; probably finding no difference, certainly seeking none, between Tannahill and Burns; his noblest thoughts, whether of poetry or music, adequately embodied in that somewhat obvious ditty,

“ Will ye gang, lassie, gang  
To the braes o’ Balquhiddel’ ”:

—which is indeed apt to echo in the ears of Scottish children, and to him, in view of his experience, must have found a special directness of address. But if he had no fine sense of poetry in letters, he felt with a deep joy the poetry of life. You should have heard him speak of what he loved; of the tent pitched beside the talking water; of the stars overhead at night; of the blest return of morning, the peep of day over the moors, the awaking birds among the birches; how he abhorred the long winter shut in cities; and with what delight, at the return of the spring, he once more pitched his camp in the living out-of-doors. But we were a pair of tramps; and to you, who are doubtless sedentary and a consistent first-class passenger in life, he would scarce have laid himself so open; —to you, he might have been content to tell his story of a ghost—that of a buccaneer with his pistols as he lived—whom he had once encountered in a sea-side cave near Buckie; and that would have been enough, for that would have

## BEGGARS

shown you the mettle of the man. Here was a piece of experience solidly and livingly built up in words, here was a story created, *teres atque rotundus*.

And to think of the old soldier, that lover of the literary bards! He had visited stranger spots than any sea-side cave; encountered men more terrible than any spirit; done and dared and suffered in that incredible, unsung epic of the Mutiny War; played his part with the field force of Delhi, beleaguering and beleaguered; shared in that enduring, savage anger and contempt of death and decency that, for long months together, bedevil'd and inspired the army; was hurled to and fro in the battle-smoke of the assault; was there, perhaps, where Nicholson fell; was there when the attacking column, with hell upon every side, found the soldier's enemy—strong drink, and the lives of tens of thousands trembled in the scale, and the fate of the flag of England staggered. And of all this he had no more to say than "hot work, sir," or "the army suffered a great deal, sir," or "I believe General Wilson, sir, was not very highly thought of in the papers." His life was naught to him, the vivid pages of experience quite blank: in words his pleasure lay—melodious, agitated words—printed words, about that which he had never seen and was connatally incapable of comprehending. We have here two temperaments face to face; both untrained,

## RANDOM MEMORIES

unsophisticated, surprised (we may say) in the egg; both boldly characterized:—that of the artist, the lover and artificer of words; that of the maker, the seeër, the lover and forger of experience. If the one had a daughter and the other had a son, and these married, might not some illustrious writer count descent from the beggar-soldier and the needy knife-grinder?

### III

Every one lives by selling something, whatever be his right to it. The burglar sells at the same time his own skill and courage and my silver plate (the whole at the most moderate figure) to a Jew receiver. The bandit sells the traveller an article of prime necessity: that traveller's life. And as for the old soldier, who stands for central mark to my capricious figures of eight, he dealt in a specialty; for he was the only beggar in the world who ever gave me pleasure for my money. He had learned a school of manners in the barracks and had the sense to cling to it, accosting strangers with a regimental freedom, thanking patrons with a merely regimental difference, sparing you at once the tragedy of his position and the embarrassment of yours. There was not one hint about him of the beggar's emphasis, the outburst of revolting gratitude, the rant and cant, the "God bless you, Kind, Kind gentleman," which insults the smallness of your alms by disproportion-

## B E G G A R S

tionate vehemence, which is so notably false, which would be so unbearable if it were true. I am sometimes tempted to suppose this reading of the beggar's part, a survival of the old days when Shakespeare was intoned upon the stage and mourners keened beside the death-bed; to think that we cannot now accept these strong emotions unless they be uttered in the just note of life; nor (save in the pulpit) endure these gross conventions. They wound us, I am tempted to say, like mockery; the high voice of keening (as it yet lingers on) strikes in the face of sorrow like a buffet; and the rant and cant of the staled beggar stirs in us a shudder of disgust. But the fact disproves these amateur opinions. The beggar lives by his knowledge of the average man. He knows what he is about when he bandages his head, and hires and drugs a babe, and poisons life with *Poor Mary Ann* or *Long, long ago*; he knows what he is about when he loads the critical ear and sickens the nice conscience with intolerable thanks; they know what they are about, he and his crew, when they pervade the slums of cities, ghastly parodies of suffering, hateful parodies of gratitude. This trade can scarce be called an imposition; it has been so blown upon with exposures; it flaunts its fraudulence so nakedly. We pay them as we pay those who show us, in huge exaggeration, the monsters of our drinking-water; or those who daily predict the fall of Britain. We pay

## RANDOM MEMORIES

them for the pain they inflict, pay them, and wince, and hurry on. And truly there is nothing that can shake the conscience like a beggar's thanks; and that polity in which such protestations can be purchased for a shilling, seems no scene for an honest man.

Are there, then, we may be asked, no genuine beggars? And the answer is, Not one. My old soldier was a humbug like the rest; his ragged boots were, in the stage phrase, properties; whole boots were given him again and again, and always gladly accepted; and the next day, there he was on the road as usual, with toes exposed. His boots were his method; they were the man's trade; without his boots he would have starved; he did not live by charity, but by appealing to a gross taste in the public, which loves the lime-light on the actor's face, and the toes out of the beggar's boots. There is a true poverty, which no one sees: a false and merely mimetic poverty, which usurps its place and dress, and lives and above all drinks, on the fruits of the usurpation. The true poverty does not go into the streets; the banker may rest assured, he has never put a penny in its hand. The self-respecting poor beg from each other; never from the rich. To live in the frock-coated ranks of life, to hear canting scenes of gratitude rehearsed for twopence, a man might suppose that giving was a thing gone out of fashion; yet it goes forward on a scale so great as to fill me with surprise. In

## BEGGARS

the houses of the working class, all day long there will be a foot upon the stair; all day long there will be a knocking at the doors; beggars come, beggars go, without stint, hardly with intermission, from morning till night; and meanwhile, in the same city and but a few streets off, the castles of the rich stand unsummoned. Get the tale of any honest tramp, you will find it was always the poor who helped him; get the truth from any workman who has met misfortunes, it was always next door that he would go for help, or only with such exceptions as are said to prove a rule; look at the course of the mimetic beggar, it is through the poor quarters that he trails his passage, showing his bandages to every window, piercing even to the attics with his nasal song. Here is a remarkable state of things in our Christian commonwealths, that the poor only should be asked to give.

### IV

There is a pleasant tale of some worthless, phrasing Frenchman, who was taxed with ingratitude: "*Il faut savoir garder l'indépendance du cœur,*" cried he. I own I feel with him. Gratitude without familiarity, gratitude otherwise than as a nameless element in a friendship, is a thing so near to hatred that I do not care to split the difference. Until I find a man who is pleased to receive obligations, I shall continue to question the tact of those who are eager to

## RANDOM MEMORIES

confer them. What an art it is, to give, even to our nearest friends! and what a test of manners to receive! How, upon either side, we smuggle away the obligation, blushing for each other; how bluff and dull we make the giver; how hasty, how falsely cheerful, the receiver! And yet an act of such difficulty and distress between near friends, it is supposed we can perform to a total stranger and leave the man transfixed with grateful emotions. The last thing you can do to a man is to burthen him with an obligation, and it is what we propose to begin with! But let us not be deceived: unless he is totally degraded to his trade, anger jars in his inside, and he grates his teeth at our gratuity.

We should wipe two words from our vocabulary: gratitude and charity. In real life, help is given out of friendship, or it is not valued; it is received from the hand of friendship, or it is resented. We are all too proud to take a naked gift: we must seem to pay it, if in nothing else, then with the delights of our society. Here, then, is the pitiful fix of the rich man; here is that needle's eye in which he stuck already in the days of Christ, and still sticks to-day, firmer, if possible, than ever: that he has the money and lacks the love which should make his money acceptable. Here and now, just as of old in Palestine, he has the rich to dinner, it is with the rich that he takes his pleasure: and when his turn comes to be charitable, he looks in vain

## B E G G A R S

for a recipient. His friends are not poor, they do not want; the poor are not his friends, they will not take. To whom is he to give? Where to find—note this phrase—the Deserving Poor? Charity is (what they call) centralised; offices are hired; societies founded, with secretaries paid or unpaid: the hunt of the Deserving Poor goes merrily forward. I think it will take more than a merely human secretary to disinter that character. What! a class that is to be in want from no fault of its own, and yet greedily eager to receive from strangers; and to be quite respectable, and at the same time quite devoid of self-respect; and play the most delicate part of friendship, and yet never be seen; and wear the form of man, and yet fly in the face of all the laws of human nature:—and all this, in the hope of getting a belly-god Burgess through a needle's eye! O, let him stick, by all means: and let his polity tumble in the dust; and let his epitaph and all his literature (of which my own works begin to form no inconsiderable part) be abolished even from the history of man! For a fool of this monstrosity of dulness, there can be no salvation: and the fool who looked for the elixir of life was an angel of reason to the fool who looks for the Deserving Poor!

v

And yet there is one course which the unfortunate gentleman may take. He may sub-

## RANDOM MEMORIES

scribe to pay the taxes. There were the true charity, impartial and impersonal, cumbering none with obligation, helping all. There were a destination for loveless gifts; there were the way to reach the pocket of the deserving poor, and yet save the time of secretaries! But, alas! there is no colour of romance in such a course; and people nowhere demand the picturesque so much as in their virtues.

IV  
PULVIS ET UMBRA

**W**E look for some reward of our endeavours and are disappointed; not success, not happiness, not even peace of conscience, crowns our ineffectual efforts to do well. Our frailties are invincible, our virtues barren; the battle goes sore against us to the going down of the sun. The canting moralist tells us of right and wrong; and we look abroad, even on the face of our small earth, and find them change with every climate, and no country where some action is not honoured for a virtue and none where it is not branded for a vice; and we look in our experience, and find no vital congruity in the wisest rules, but at the best a municipal fitness. It is not strange if we are tempted to despair of good. We ask too much. Our religions and moralities have been trimmed to flatter us, till they are all emasculate and sentimentalised, and only please and weaken. Truth is of a rougher strain. In the harsh face of life, faith can read a bracing gospel. The human race is a thing more ancient than the ten commandments; and the bones and

## RANDOM MEMORIES

revolutions of the Kosmos, in whose joints we are but moss and fungus, more ancient still.

### I

Of the Kosmos in the last resort, science reports many doubtful things and all of them appalling. There seems no substance to this solid globe on which we stamp: nothing but symbols and ratios. Symbols and ratios carry us and bring us forth and beat us down; gravity that swings the incommensurable suns and worlds through space, is but a figment varying inversely as the squares of distances; and the suns and worlds themselves, imponderable figures of abstraction,  $\text{NH}_3$  and  $\text{H}_2\text{O}$ . Consideration dares not dwell upon this view; that way madness lies; science carries us into zones of speculation, where there is no habitable city for the mind of man.

But take the Kosmos with a grosser faith, as our senses give it us. We behold space sown with rotatory islands, suns and worlds and the shards and wrecks of systems: some, like the sun, still blazing; some rotting, like the earth; others, like the moon, stable in desolation. All of these we take to be made of something we call matter: a thing which no analysis can help us to conceive; to whose incredible properties no familiarity can reconcile our minds. This stuff, when not purified by the lustration of fire, rots uncleanly into something we call life; seized through all its atoms with a pediculous malady;

## PULVIS ET UMBRA

swelling in tumours that become independent, sometimes even (by an abhorrent prodigy) locomotory; one splitting into millions, millions cohering into one, as the malady proceeds through varying stages. This vital putrescence of the dust, used as we are to-it, yet strikes us with occasional disgust, and the profusion of worms in a piece of ancient turf, or the air of a marsh darkened with insects, will sometimes check our breathing so that we aspire for cleaner places. But none is clean: the moving sand is infected with lice; the pure spring, where it bursts out of the mountain, is a mere issue of worms; even in the hard rock the crystal is forming.

In two main shapes this eruption covers the countenance of the earth: the animal and the vegetable: one in some degree the inversion of the other: the second rooted to the spot; the first coming detached out of its natal mud, and scurrying abroad with the myriad feet of insects or towering into the heavens on the wings of birds: a thing so inconceivable that, if it be well considered, the heart stops. To what passes with the anchored vermin, we have little clue: doubtless they have their joys and sorrows, their delights and killing agonies: it appears not how. But of the locomotory, to which we ourselves belong, we can tell more. These share with us a thousand miracles: the miracles of sight, of hearing, of the projection of sound, things that bridge space; the miracles of memory and reason,

## RANDOM MEMORIES

by which the present is conceived, and when it is gone, its image kept living in the brains of man and brute; the miracle of reproduction, with its imperious desires and staggering consequences. And to put the last touch upon this mountain mass of the revolting and the inconceivable, all these prey upon each other, lives tearing other lives in pieces, cramming them inside themselves, and by that summary process, growing fat: the vegetarian, the whale, perhaps the tree, not less than the lion of the desert; for the vegetarian is only the eater of the dumb.

Meanwhile our rotatory island loaded with predatory life, and more drenched with blood, both animal and vegetable, than ever mutinied ship, scuds through space with unimaginable speed, and turns alternate cheeks to the reverberation of a blazing world, ninety million miles away.

### II

What a monstrous spectre is this man, the disease of the agglutinated dust, lifting alternate feet or lying drugged with slumber; killing, feeding, growing, bringing forth small copies of himself; grown upon with hair like grass, fitted with eyes that move and glitter in his face; a thing to set children screaming;—and yet looked at nearer, known as his fellows know him, how surprising are his attributes! Poor soul, here for so little, cast among so many hardships, filled

## PULVIS ET UMBRA

with desires so incommensurate and so inconsistent, savagely surrounded, savagely descended, irremediably condemned to prey upon his fellow lives: who should have blamed him had he been of a piece with his destiny and a being merely barbarous? And we look and behold him instead filled with imperfect virtues: infinitely childish, often admirably valiant, often touchingly kind; sitting down, amidst his momentary life, to debate of right and wrong and the attributes of the deity; rising up to do battle for an egg or die for an idea; singling out his friends and his mate with cordial affection; bringing forth in pain, rearing with long-suffering solicitude, his young. To touch the heart of his mystery, we find in him one thought, strange to the point of lunacy: the thought of duty; the thought of something owing to himself, to his neighbour, to his God: an ideal of decency, to which he would rise if it were possible; a limit of shame, below which, if it be possible, he will not stoop. The design in most men is one of conformity; here and there, in picked natures, it transcends itself and soars on the other side, arming martyrs with independence; but in all, in their degrees, it is a bosom thought:—Not in man alone, for we trace it in dogs and cats whom we know fairly well, and doubtless some similar point of honour sways the elephant, the oyster, and the louse, of whom we know so little:—But in man, at least, it sways with so

## RANDOM MEMORIES

complete an empire that merely selfish things come second, even with the selfish: that appetites are starved, fears are conquered, pains supported; that almost the dullest shrinks from the reproof of a glance, although it were a child's; and all but the most cowardly stand amid the risks of war; and the more noble, having strongly conceived an act as due to their ideal, affront and embrace death. Strange enough if, with their singular origin and perverted practice, they think they are to be rewarded in some future life: stranger still, if they are persuaded of the contrary, and think this blow, which they solicit, will strike them senseless for eternity. I shall be reminded what a tragedy of misconception and misconduct man at large presents: of organised injustice, cowardly violence, and treacherous crime; and of the damning imperfections of the best. They cannot be too darkly drawn. Man is indeed marked for failure in his efforts to do right. But where the best consistently miscarry, how tenfold more remarkable that all should continue to strive; and surely we should find it both touching and inspiring, that in a field from which success is banished, our race should not cease to labour.

If the first view of this creature, stalking in his rotatory isle, be a thing to shake the courage of the stoutest, on this nearer sight, he startles us with an admiring wonder. It matters not where we look, under what climate we observe him, in

## PULVIS ET UMBRA

what stage of society, in what depth of ignorance, burthened with what erroneous morality; by campfires in Assiniboia, the snow powdering his shoulders, the wind plucking his blanket, as he sits, passing the ceremonial calumet and uttering his grave opinions like a Roman senator; in ships at sea, a man inured to hardship and vile pleasures, his brightest hope a fiddle in a tavern and a bedizened trull who sells herself to rob him, and he for all that simple, innocent, cheerful, kindly like a child, constant to toil, brave to drown, for others; in the slums of cities, moving among indifferent millions to mechanical employments, without hope of change in the future, with scarce a pleasure in the present, and yet true to his virtues, honest up to his lights, kind to his neighbours, tempted perhaps in vain by the bright gin-palace, perhaps long-suffering with the drunken wife that ruins him; in India (a woman this time) kneeling with broken cries and streaming tears, as she drowns her child in the sacred river; in the brothel, the discard of society, living mainly on strong drink fed with affronts, a fool, a thief, the comrade of thieves, and even here keeping the point of honour and the touch of pity, often repaying the world's scorn with service, often standing firm upon a scruple, and at a certain cost, rejecting riches:—everywhere some virtue cherished or affected, everywhere some decency of thought and carriage, everywhere the ensign of man's ineffectual

## RANDOM MEMORIES

goodness:—ah! if I could show you this! if I could show you these men and women, all the world over, in every stage of history, under every abuse of error, under every circumstance of failure, without hope, without help, without thanks, still obscurely fighting the lost fight of virtue, still clinging, in the brothel or on the scaffold, to some rag of honour, the poor jewel of their souls! They may seek to escape, and yet they cannot; it is not alone their privilege and glory, but their doom; they are condemned to some nobility; all their lives long, the desire of good is at their heels, the implacable hunter.

Of all earth's meteors, here at least is the most strange and consoling: that this ennobled lemur, this hair-crowned bubble of the dust, this inheritor of a few years and sorrows, should yet deny himself his rare delights, and add to his frequent pains, and live for an ideal, however misconceived. Nor can we stop with man. A new doctrine, received with screams a little while ago by canting moralists, and still not properly worked into the body of our thoughts, lights us a step farther into the heart of this rough but noble universe. For nowadays the pride of man denies in vain his kinship with the original dust. He stands no longer like a thing apart. Close at his heels we see the dog, prince of another genus: and in him too, we see dumbly testified the same cultus of an unattainable ideal, the same constancy in failure. Does it

## PULVIS ET UMBRA

stop with the dog? We look at our feet where the ground is blackened with the swarming ant: a creature so small, so far from us in the hierarchy of brutes, that we can scarce trace and scarce comprehend his doings; and here also, in his ordered politics and rigorous justice, we see confessed the law of duty and the fact of individual sin. Does it stop, then, with the ant? Rather this desire of well-doing and this doom of frailty run through all the grades of life: rather is this earth, from the frosty top of Everest to the next margin of the internal fire, one stage of ineffectual virtues and one temple of pious tears and perseverance. The whole creation groaneth and travaileth together. It is the common and the godlike law of life. The browsers, the biters, the barkers, the hairy coats of field and forest, the squirrel in the oak, the thousand-footed creeper in the dust, as they share with us the gift of life, share with us the love of an ideal: strive like us—like us are tempted to grow weary of the struggle—to do well; like us receive at times unmerited refreshment, visitings of support, returns of courage; and are condemned like us to be crucified between that double law of the members and the will. Are they like us, I wonder, in the timid hope of some reward, some sugar with the drug? do they, too, stand aghast at unrewarded virtues, at the sufferings of those whom, in our partiality, we take to be just, and the prosperity of such as, in our

## RANDOM MEMORIES

blindness, we call wicked? It may be, and yet God knows what they should look for. Even while they look, even while they repent, the foot of man treads them by thousands in the dust, the yelping hounds burst upon their trail, the bullet speeds, the knives are heating in the den of the vivisectionist; or the dew falls, and the generation of a day is blotted out. For these are creatures, compared with whom our weakness is strength, our ignorance wisdom, our brief span eternity.

And as we dwell, we living things, in our isle of terror and under the imminent hand of death, God forbid it should be man the erected, the reasoner, the wise in his own eyes—God forbid it should be man that wearies in well-doing, that despairs of unrewarded effort, or utters the language of complaint. Let it be enough for faith, that the whole creation groans in mortal frailty, strives with unconquerable constancy: surely not all in vain.

V  
GENTLEMEN

I

WHAT do we mean to-day by that common phrase, a gentleman? By the lights of history, from *gens*, *gentilis*, it should mean a man of family, "one of a kent house," one of notable descent: thus embodying an ancient stupid belief and implying a modern scientific theory. The ancient and stupid belief came to the ground, with a prodigious dust and the collapse of several polities, in the latter half of the last century. There followed upon this an interregnum, during which it was believed that all men were born "free and equal," and that it really did not matter who your father was. Man has always been nobly irrational, bandaging his eyes against the facts of life, feeding himself on the wind of ambitious falsehood, counting his stock to be the children of the gods; and yet perhaps he never showed in a more touching light than when he embraced this boyish theory. Freedom we now know for a thing incompatible with corporate life and a blessing probably pecu-

## RANDOM MEMORIES

liar to the solitary robber; we know besides that every advance in richness of existence, whether moral or material, is paid for by a loss of liberty; that liberty is man's coin in which he pays his way; that luxury and knowledge and virtue, and love and the family affections, are all so many fresh fetters on the naked and solitary freeman. And the ancient stupid belief having come to the ground and the dust of its fall subsided, behold the modern scientific theory beginning to rise very nearly on the old foundation; and individuals no longer (as was fondly imagined) springing into life from God knows where, incalculable, untrammelled, abstract, equal to one another—but issuing modestly from a race; with virtues and vices, fortitudes and frailties, ready made; the slaves of their inheritance of blood; eternally unequal. So that we in the present, and yet more our scientific descendants in the future, must use, when we desire to praise a character, the old expression, gentleman, in nearly the old sense: one of a happy strain of blood, one fortunate in the descent from brave and self-respecting ancestors, whether clowns or counts.

And yet plainly this is of but little help. The intricacy of descent defies prediction; so that even the heir of a hundred sovereigns may be born a brute or a vulgarian. We may be told that a picture is an heirloom; that does not tell us what the picture represents. All qualities are inherited, and all characters; but which are

## GENTLEMEN

the qualities that belong to the gentleman? what is the character that earns and deserves that honourable style?

### II

The current ideas vary with every class, and need scarce be combated, need scarce be mentioned save for the love of fun. In one class, and not long ago, he was regarded as a gentleman who kept a gig. He is a gentleman in one house who does not eat peas with his knife; in another who is not to be discountenanced by any created form of butler. In my own case I have learned to move among pompous menials without much terror, never without much respect. In the narrow sense, and so long as they publicly tread the boards of their profession, it would be difficult to find more finished gentlemen; and it would often be a matter of grave thought with me, sitting in my club, to compare the bearing of the servants with that of those on whom they waited. There could be no question which were the better gentlemen. And yet I was hurried into no democratic theories; for I saw the members' part was the more difficult to play, I saw that to serve was a more graceful attitude than to be served, I knew besides that much of the servants' gentility was *ad hoc* and would be laid aside with their livery jackets; and to put the matter in a nutshell, that some of the members would have made very civil footmen and many

## RANDOM MEMORIES

of the servants intolerable members. For all that, one of the prettiest gentlemen I ever knew was a servant. A gentleman he happened to be, even in the old stupid sense, only on the wrong side of the blanket; and a man besides of much experience, having served in the Guards' Club, and been valet to old Cooke of the *Saturday Review*, and visited the States with Madame Sinico (I think it was) and Portugal with Madame Some-one-else, so that he had studied, at least from the chair-backs, many phases of society. It chanced he was waiter in a hotel where I was staying with my mother; it was mid-winter and we were the only guests; all afternoons, he and I passed together on a perfect equality in the smoking-room; and at meal-time, he waited on my mother and me as a servant. Now here was a trial of manners from which few would have come forth successful. To take refuge in a frozen bearing would have been the timid, the inelegant, resource of almost all. My friend was much more bold; he joined in the talk, he ventured to be jocular, he pushed familiarity to the nice margin, and yet still preserved the indefinable and proper distance of the English servant, and yet never embarrassed, never even alarmed, the comrade with whom he had just been smoking a pipe. It was a masterpiece of social dexterity—on artificial lines no doubt, and dealing with difficulties that should never have existed, that exist much less in France, and that

## GENTLEMEN

will exist nowhere long—but a masterpiece for all that, and one that I observed with despairing admiration, as I have watched Sargent paint.

I say these difficulties should never have existed; for the whole relation of master and servant is to-day corrupt and vulgar. At home in England it is the master who is degraded; here in the States, by a triumph of inverted tact, the servant often so contrives that he degrades himself. He must be above his place; and it is the mark of a gentleman to be at home. He thinks perpetually of his own dignity; it is the proof of a gentleman to be jealous of the dignity of others. He is ashamed of his trade, which is the essence of vulgarity. He is paid to do certain services; yet he does them so gruffly that any man of spirit would resent them if they were gratuitous favours; and this (if he will reflect upon it tenderly) is so far from the genteel as to be not even coarsely honest. Yet we must not blame the man for these mistakes; the vulgarity is in the air. There is a tone in popular literature much to be deplored; deprecating service, like a disgrace; honouring those who are ashamed of it; honouring even (I speak not without book) such as prefer to live by the charity of poor neighbours instead of blacking the shoes of the rich. Blacking shoes is counted (in these works) a thing specially disgraceful. To the philosophic mind, it will seem a less exceptionable trade than to deal in stocks, and one in which it is more easy to be

## RANDOM MEMORIES

honest than to write books. Why, then, should it be marked out for reprobation by the popular authors? It is taken, I think, for a type; inoffensive in itself, it stands for many disagreeable household duties; disagreeable to fulfil, I had nearly said shameful to impose; and with the dulness of their tribe, the popular authors transfer the shame to the wrong party. Truly, in this matter there seems a lack of gentility somewhere; a lack of refinement, of reserve, of common modesty; a strain of the spirit of those ladies in the past, who did not hesitate to bathe before a footman. And one thing at least is easy to prophesy, not many years will have gone by before those shall be held the most "elegant" gentlemen, and those the most "refined" ladies, who wait (in a dozen particulars) upon themselves. But the shame is for the masters only. The servant stands quite clear. He has one of the easiest parts to play upon the face of earth; he must be far misled, if he so grossly fails in it.

### III

It is a fairly common accomplishment to behave with decency in one character and among those to whom we are accustomed and with whom we have been brought up. The trial of gentility lies in some such problem as that of my waiter's, in foreign travel, or in some sudden and sharp change of class. I once sailed on the

## GENTLEMEN

emigrant side from the Clyde to New York; among my fellow-passengers I passed generally as a mason, for the excellent reason that there was a mason on board *who happened to know*; and this fortunate event enabled me to mix with these working people on a footing of equality. I thus saw them at their best, using their own civility; while I, on the other hand, stood naked to their criticism. The workmen were at home, I was abroad, I was the shoe-black in the drawing-room, the Huron at Versailles; and I used to have hot and cold fits, lest perchance I made a beast of myself in this new environment. I had no allowances to hope for; I could not plead that I was "only a gentleman after all," for I was known to be a mason; and I must stand and fall by my transplanted manners on their own intrinsic decency. It chanced there was a Welsh blacksmith on board, who was not only well-mannered himself and a judge of manners, but a fellow besides of an original mind. He had early diagnosed me for a masquerader and a person out of place; and as we had grown intimate upon the voyage, I carried him my troubles. How did I behave? Was I, upon this crucial test, at all a gentleman? I might have asked eight hundred thousand blacksmiths (if Wales or the world contain so many) and they would have held my question for a mockery; but Jones was a man of genuine perception, thought a long time before he answered, looking at me comically

## RANDOM MEMORIES

and reviewing (I could see) the events of the voyage, and then told me that "on the whole" I did "pretty well." Mr. Jones was a humane man and very much my friend, and he could get no further than "on the whole" and "pretty well." I was chagrined at the moment for myself; on a larger basis of experience, I am now only concerned for my class. My co-equals would have done but little better, and many of them worse. Indeed, I have never seen a sight more pitiable than that of the current gentleman unbending; unless it were the current lady! It is these stiff-necked condescensions, it is that graceless assumption, that make the diabolic element in times of riot. A man may be willing to starve in silence like a hero; it is a rare man indeed who can accept the unspoken slights of the unworthy, and not be embittered. There was a visit paid to the steerage quarters on this same voyage, by a young gentleman and two young ladies; and as I was by that time pretty well accustomed to the workman's standard, I had a chance to see my own class from below. God help them, poor creatures! As they ambled back to their saloon, they left behind, in the minds of my companions, and in my mind also, an image and an influence that might well have set them weeping, could they have guessed its nature. I spoke a few lines past of a shoe-black in a drawing-room; it is what I never saw; but I did see that young gentleman

## GENTLEMEN

and these young ladies on the forward deck, and the picture remains with me, and the offence they managed to convey is not forgotten.

### IV

And yet for all this ambiguity, for all these imperfect examples, we know clearly what we mean by the word. When we meet a gentleman of another class, though all contrariety of habits, the essentials of the matter stand confessed: I never had a doubt of Jones. More than that, we recognise the type in books; the actors of history, the characters of fiction, bear the mark upon their brow; at a word, by a bare act, we discern and segregate the mass, this one a gentleman, the others not. To take but the last hundred years, Scott, Gordon, Wellington in his cold way, Grant in his plain way, Shelley for all his follies, these were clearly gentlemen; Napoleon, Byron, Lockhart, these were as surely cads, and the two first cads of a rare water.

Let us take an anecdote of Grant and one of Wellington. On the day of the capitulation, Lee wore his presentation sword; it was the first thing Grant observed, and from that moment he had but one thought: how to avoid taking it. A man, who should perhaps have had the nature of an angel, but assuredly not the special virtues of the gentleman, might have received the sword, and no more words about it: he would have done well in a plain way. One who wished to be a

## RANDOM MEMORIES

gentleman, and knew not how, might have received and returned it: he would have done infamously ill, he would have proved himself a cad; taking the stage for himself, leaving to his adversary confusion of countenance and the ungraceful posture of the man condemned to offer thanks. Grant, without a word said, added to the terms this article: "All officers to retain their side-arms"; and the problem was solved and Lee kept his sword, and Grant went down to posterity, not perhaps a fine gentleman, but a great one. And now for Wellington. The tale is on a lower plane, is elegant rather than noble; yet it is a tale of a gentleman too, and raises besides a pleasant and instructive question. Wellington and Marshal Marmont were adversaries (it will not have been forgotten) in one of the prettiest recorded acts of military fencing, the campaign of Salamanca: it was a brilliant business on both sides, just what Count Tolstoi ought to study before he writes again upon the inutility of generals; indeed, it was so very brilliant on the Marshal's part that on the last day, in one of those extremes of cleverness that come so near stupidity, he fairly overreached himself, was taken "in flagrant delict," was beaten like a sack, and had his own arm shot off as a reminder not to be so clever the next time. It appears he was incurable; a more distinguished example of the same precipitate, ingenious blundering will be present to the minds of all—his treachery

## GENTLEMEN

in 1814; and even the tale I am now telling shows, on a lilliputian scale, the man's besetting weakness. Years after Salamanca, the two generals met, and the Marshal (willing to be agreeable) asked the Duke his opinion of the battle. With that promptitude, wit, and willingness to spare pain which make so large a part of the armoury of the gentleman, Wellington had his answer ready, impossible to surpass on its own ground: "I early perceived your excellency had been wounded." And you see what a pleasant position he had created for the Marshal, who had no more to do than just to bow and smile and take the stage at his leisure. But here we come to our problem. The Duke's answer (whether true or false) created a pleasant position for the Marshal. But what sort of position had the Marshal's question created for the Duke? and had not Marmont the manœuvrer once more manœuvred himself into a false position? I conceive so. It is the man who has gained the victory, not the man who has suffered the defeat, who finds his ground embarrassing. The vanquished has an easy part, it is easy for him to make a handsome reference; but how hard for the victor to make a handsome reply! An unanswerable compliment is the social bludgeon; and Marmont (with the most graceful intentions in the world) had propounded one of the most desperate. Wellington escaped from his embarrassment by a happy and courtly inspiration.

## RANDOM MEMORIES

Grant, I imagine, since he had a genius for silence, would have found some means to hold his peace. Lincoln, with his half-tact and unhappy readiness, might have placed an appropriate anecdote and raised a laugh; not an unkindly laugh, for he was a kindly man; but under the circumstances the best-natured laugh would have been death to Marmont. Shelley (if we can conceive him to have gained a battle at all) would have blushed and stammered, feeling the Marshal's false position like some grossness of his own; and when the blush had communicated itself to the cheeks of his unlucky questioner, some stupid, generous word (such as I cannot invent for him) would have found its way to his lips and set them both at ease. Byron? well, he would have managed to do wrong; I have too little sympathy for that unmatched vulgarian to create his part. Napoleon? that would have depended: had he been angry, he would have left all competitors behind in cruel coarseness: had he been in a good humour, it might have been the other way. For this man, the very model of a cad, was so well served with truths by the clear insight of his mind, and with words by his great though shallow gift of literature, that he has left behind him one of the most gentlemanly utterances on record: "*Madame, respectez le fardeau.*" And he could do the right thing too, as well as say it; and any character in history might envy him that moment when he gave his

## GENTLEMEN

sword, the sword of the world-subduer, to his old, loyal enemy, Macdonald. A strange thing to consider two generations of a Skye family, and two generations of the same virtue, fidelity to the defeated: the father braving the rains of the Hebrides with the tattered beggar-lad that was his rightful sovereign; the son, in that princely house of Fontainebleau, himself a marshal of the Empire, receiving from the gratitude of one whom he had never feared and who had never loved him, the tool and symbol of the world's most splendid domination. I am glad, since I deal with the name of gentlemen, to touch for one moment on its nobler sense, embodied, on the historic scale and with epic circumstance, in the lives of these Macdonalds. Nor is there any man but must be conscious of a thrill of gratitude to Napoleon, for his worthy recognition of the worthiest virtue. Yes, that was done *like* a gentleman; and yet in our hearts we must think that it was done by a performer. For to feel precisely what it is to be a gentleman and what it is to be a cad, we have but to study Napoleon's attitude after Trafalgar, and compare it with that beautiful letter of Louis the Fourteenth's in which he acknowledges the news of Blenheim. We hear much about the Sun-king nowadays, and Michelet is very sad reading about his government, and Thackeray was very droll about his wig; but when we read this letter from the vainest king in Europe smarting under

## RANDOM MEMORIES

the deadliest reverse, we know that at least he was a gentleman. In the battle, Tallard had lost his son, Louis the primacy of Europe; it is only with the son the letter deals. Poor Louis! if his wig had been twice as great, and his sins twice as numerous, here is a letter to throw wide the gates of Heaven for his entrance. I wonder what would Louis have said to Marshal Marmont? Something infinitely condescending; for he was too much of a king to be quite a gentleman. And Marcus Aurelius, how would he have met the question? With some reference to the gods no doubt, uttered not quite without a twang; for the good emperor and great gentleman of Rome was of the Methodists of his day and race.

And now to make the point at which I have been aiming. The perfectly straightforward person who should have said to Marmont, "I was uncommonly glad to get you beaten," would have done the next best to Wellington who had the inspiration of graceful speech; just as the perfectly straightforward person who should have taken Lee's sword and kept it, would have done the next best to Grant who had the inspiration of the truly graceful act. Lee would have given up his sword and preserved his dignity; Marmont might have laughed, his pride need not have suffered. Not to try to spare people's feelings is so much kinder than to try in a wrong way; and not to try to be a gentleman at all is so much

## GENTLEMEN

more gentlemanly than to try and fail! So that this gift, or grace, or virtue, resides not so much in conduct as in knowledge; not so much in refraining from the wrong, as in knowing the precisely right. A quality of exquisite aptitude marks out the gentlemanly act; without an element of wit, we can be only gentlemen by negatives.

### v

More and more, as our knowledge widens, we have to reply to those who ask for a definition: "I can't give you that, but I will tell you a story." We cannot say what a thing will be, nor what it ought to be; but we can say what it has been, and how it came to be what it is: History instead of Definition. It is this which (if we continue teachable) will make short work of all political theories; it is on this we must fall back to explain our word, gentleman.

The life of our fathers was highly ceremonial; a man's steps were counted; his acts, his gestures were prescribed; marriage, sale, adoption, and not only legal contracts, but the simplest necessary movements, must be all conventionally ordered and performed to rule. Life was a rehearsed piece; and only those who had been drilled in the rehearsals could appear with decency in the performance. A gentile man, one of a dominant race, hereditary priest, hereditary leader, was, by the circumstances of his birth

## RANDOM MEMORIES

and education, versed in this symbolic etiquette. Whatever circumstance arose, he would be prepared to utter the sacramental word, to perform the ceremonial act. For every exigence of family or tribal life, peace or war, marriage or sacrifice, fortune or mishap, he stood easily waiting, like the well-graced actor for his cue. The clan that he guided would be safe from shame, it would be ensured from loss; for the man's attitude would be always becoming, his bargains legal, and his sacrifices pleasing to the gods. It is from this gentile man, the priest, the chief, the expert in legal forms and attitudes, the bulwark and the ornament of his tribe, that our name of gentleman descends. So much of the sense still clings to it, it still points the man who, in every circumstance of life, knows what to do and how to do it gracefully; so much of its sense it has lost, for this grace and knowledge are no longer of value in practical affairs; so much of a new sense it has taken on, for as well as the nicest fitness, it now implies a punctual loyalty of word and act. And note the word loyalty; here is a parallel advance from the proficiency of the gentile man to the honour of the gentleman, and from the sense of legality to that of loyalty. With the decay of the ceremonial element in life, the gentleman has lost some of his prestige, I had nearly said some of his importance; and yet his part is the more difficult to play. It is hard to preserve the figures of a dance when

## GENTLEMEN

many of our partners dance at random. It is easy to be a gentleman in a very stiff society, where much of our action is prescribed; it is hard indeed in a very free society where (as it seems) almost any word or act must come by inspiration. The rehearsed piece is at an end; we are now floundering through an impromptu charade. Far more of ceremonial remains (to be sure) traditional in the terms of our association, far more hereditary in the texture of brains, than is dreamed by the superficial; it is our fortress against many perils, the cement of states, the meeting ground of classes. But much of life comes up for the first time, unrehearsed, and must be acted on upon the instant. Knowledge there can here be none; the man must invent an attitude, he must be inspired with speech; and the most perfect gentleman is he who, in these irregular cases, acts and speaks with most aplomb and fitness. His tact simulates knowledge; to see him so easy and secure and graceful you would think he had been through it all before; you would think he was the gentile man of old, repeating for the thousandth time, upon some public business, the sacramental words and ceremonial gestures of his race.

Lastly, the club footman, so long as he is in his livery jacket, appears the perfect gentleman and visibly outshines the members; and the same man, in the public-house, among his equals, becomes perhaps plain and dull, perhaps even bru-

## RANDOM MEMORIES

tal. He has learned the one part of service perfectly; there he has knowledge, he shines in the prepared performance; outside of that he must rely on tact, and sometimes flounders sadly in the unrehearsed charade. The gentleman, again, may be put to open shame as he changes from one country, or from one rank of society to another. The footman was a gentleman only *ad hoc*; the other (at the most) *ad hæc*; and when he has got beyond his knowledge, he begins to flounder in the charade. Even so the gentile man was only gentile among those of his own gens and their subordinates and neighbours; in a distant city, he too was peregrine and inexpert, and must become the client of another, or find his bargains insecure and be excluded from the service of the gods.

## VI

### SOME GENTLEMEN IN FICTION

**T**O make a character at all—so to select, so to describe a few acts, a few speeches, perhaps (though this is quite superfluous) a few details of physical appearance, as that these shall all cohere and strike in the reader's mind a common note of personality—there is no more delicate enterprise, success is nowhere less comprehensible than here. We meet a man, we find his talk to have been racy; and yet if every word were taken down by shorthand, we should stand amazed at its essential insignificance. Physical presence, the speaking eye, the inimitable commentary of the voice, it was in these the spell resided; and these are all excluded from the pages of the novel. There is one writer of fiction whom I have the advantage of knowing; and he confesses to me that his success in this matter (small though it be) is quite surprising to himself. "In one of my books," he writes, "and in one only, the characters took the bit in their mouth; all at once, they became detached from the flat paper, they turned their backs on me

## RANDOM MEMORIES

and walked off bodily; and from that time, my task was stenographic—it was they who spoke, it was they who wrote the remainder of the story. When this miracle of genesis occurred, I was thrilled with joyous surprise; I felt a certain awe—shall we call it superstitious? And yet how small a miracle it was; with what a partial life were my characters endowed; and when all was said, how little did I know of them! It was a form of words that they supplied me with; it was in a form of words that they consisted; beyond and behind was nothing.” The limitation, which this writer felt and which he seems to have deplored, can be remarked in the work of even literary princes. I think it was Hazlitt who declared that, if the names were dropped at press, he could restore any speech in Shakespeare to the proper speaker; and I dare say we could all pick out the words of Nym or Pistol, Caius or Evans; but not even Hazlitt could do the like for the great leading characters, who yet are cast in a more delicate mould, and appear before us far more subtly and far more fully differentiated, than these easy-going ventriloquial puppets. It is just when the obvious expedients of the barrel-organ vocabulary, the droll mispronunciation or the racy dialect, are laid aside, that the true masterpieces are wrought (it would seem) from nothing. Hamlet speaks in character, I potently believe it, and yet see not how. He speaks at least as no man ever spoke in life, and

## SOME GENTLEMEN IN FICTION

very much as many other heroes do in the same volume; now uttering the noblest verse, now prose of the most cunning workmanship; clothing his opinions throughout in that amazing dialect, Shakespearese. The opinions themselves, again, though they are true and forcible and reinforced with excellent images, are not peculiar either to Hamlet, or to any man or class or period; in their admirable generality of appeal resides their merit; they might figure, and they would be applauded, in almost any play and in the mouth of almost any noble and considerate character. The only hint that is given as to his physical man—I speak for myself—is merely shocking, seems merely erroneous, and is perhaps best explained away upon the theory that Shakespeare had Burbage more directly in his eye than Hamlet. As for what the Prince does and what he refrains from doing, all acts and passions are strangely impersonal. A thousand characters, as different among themselves as night from day, should yet, under the like stress of circumstance, have trodden punctually in the footprints of Hamlet and each other. Have you read *André Cornélis*? in which M. Bourget handled over again but yesterday the theme of *Hamlet*, even as Godwin had already rehandled part of it in *Caleb Williams*. You can see the character M. Bourget means with quite sufficient clearness; it is not a masterpiece, but it is adequately indicated; and the character

## RANDOM MEMORIES

is proper to the part, these acts and passions fit him like a glove, he carries the tale, not with so good a grace as Hamlet, but with equal nature. Well, the two personalities are fundamentally distinct: they breathe upon us out of different worlds; in face, in touch, in the subtile atmosphere by which we recognise an individual, in all that goes to build up a character—or at least that shadowy thing, a character in a book—they are even opposed: the same fate involves them, they behave on the same lines, and they have not one hair in common. What, then, remains of Hamlet? and by what magic does he stand forth in our brains, *teres atque rotundus*, solid to the touch, a man to praise, to blame, to pity, ay, and to love?

At bottom, what we hate or love is doubtless some projection of the author; the personal atmosphere is doubtless his; and when we think we know Hamlet, we know but a side of his creator. It is a good old comfortable doctrine, which our fathers have taken for a pillow, which has served as a cradle for ourselves; and yet, in some of its applications, it brings us face to face with difficulties. I said last month that we could tell a gentleman in a novel. Let us continue to take Hamlet. Manners vary, they invert themselves, from age to age; Shakespeare's gentlemen are not quite ours, there is no doubt their talk would raise a flutter in a modern tea-party; but in the old pious phrase, they have the

## SOME GENTLEMEN IN FICTION

root of the matter. All the most beautiful traits of the gentleman adorn this character of Hamlet: it was the side on which Salvini seized, which he so attractively displayed, with which he led theatres captive; it is the side, I think, by which the Prince endears himself to readers. It is true there is one staggering scene, the great scene with his mother. But we must regard this as the author's lost battle; here it was that Shakespeare failed: what to do with the Queen, how to depict her, how to make Hamlet use her, these (as we know) were his miserable problem; it beat him; he faced it with an indecision worthy of his hero; he shifted, he shuffled with it; in the end, he may be said to have left his paper blank. One reason why we do not more generally recognise this failure of Shakespeare's is because we have most of us seen the play performed; and managers, by what seems a stroke of art, by what is really (I daresay) a fortunate necessity, smuggle the problem out of sight—the play, too, for the matter of that; but the glamour of the footlights and the charm of that little strip of fiddlers' heads and elbows, conceal the conjuring. This stroke of art (let me call it so) consists in casting the Queen as an old woman. Thanks to the footlights and the fiddlers' heads, we never pause to inquire why the King should have pawned his soul for this college-bedmaker in masquerade; and thanks to the absurdity of the whole position, and that unconscious un-

## RANDOM MEMORIES

chivalry of audiences (ay, and of authors also) to old women, Hamlet's monstrous conduct passes unobserved or unresented. Were the Queen cast as she should be, a woman still young and beautiful, had she been coherently written by Shakespeare, and were she played with any spirit, even an audience would rise.

But the scene is simply false, effective on the stage, untrue of any son or any mother; in judging the character of Hamlet, it must be left upon one side; and in all other relations we recognise the Prince for a gentleman.

Now, if the personal charm of any verbal puppet be indeed only an emanation from its author, may we conclude, since we feel Hamlet to be a gentleman, that Shakespeare was one too? An instructive parallel occurs. There were in England two writers of fiction, contemporaries, rivals in fame, opposites in character; one descended from a great house, easy, generous, witty, debauched, a favourite in the tap-room and the hunting field, yet withal a man of a high practical intelligence, a distinguished public servant, an ornament of the bench: the other, sprung from I know not whence—but not from kings—buzzed about by second-rate women, and their fit companion, a tea-bibber in parlours, a man of painful propriety, with all the narrowness and much of the animosity of the backshop and the dissenting chapel. Take the pair, they seem like types: Fielding, with all his faults, was undeni-

## SOME GENTLEMEN IN FICTION

ably a gentleman; Richardson, with all his genius and his virtues, as undeniably was not. And now turn to their works. In *Tom Jones*, a novel of which the respectable profess that they could stand the dulness if it were not so blackguardly, and the more honest admit they could forgive the blackguardism if it were not so dull—in *Tom Jones*, with its voluminous bulk and troops of characters, there is no shadow of a gentleman, for Allworthy is only ink and paper. In *Joseph Andrews*, I fear I have always confined my reading to the parson; and Mr. Adams, delightful as he is, has no pretension “to the genteel.” In *Amelia*, things get better; all things get better; it is one of the curiosities of literature that Fielding, who wrote one book that was engaging, truthful, kind, and clean, and another book that was dirty, dull, and false, should be spoken of, the world over, as the author of the second and not the first, as the author of *Tom Jones*, not of *Amelia*. And in *Amelia*, sure enough, we find some gentlefolk; Booth and Dr. Harrison will pass in a crowd, I dare not say they will do more. It is very differently that one must speak of Richardson’s creations. With Sir Charles Grandison I am unacquainted—there are many impediments in this brief life of man; I have more than once, indeed, reconnoitred the first volume with a flying party, but always decided not to break ground before the place till my siege guns came up; and it’s an odd thing—I have been all

## RANDOM MEMORIES

these years in the field, and that powerful artillery is still miles in the rear. The day it overtakes me, Baron Gibbon's fortress shall be beat about his ears, and my flag be planted on the formidable ramparts of the second part of *Faust*. Clarendon, too—— But why should I continue this confession? Let the reader take up the wondrous tale himself, and run over the books that he has tried, and failed withal, and vowed to try again, and now beholds, as he goes about a library, with secret compunction. As to Sir Charles at least, I have the report of spies; and by the papers in the office of my Intelligence Department, it would seem he was a most accomplished baronet. I am the more ready to credit these reports, because the spies are persons thoroughly accustomed to the business; and because my own investigation of a kindred quarter of the globe (*Clarissa Harlowe*) has led me to set a high value on the Richardsonians. Lovelace—in spite of his abominable misbehaviour—Colonel Morden and my Lord M—— are all gentlemen of undisputed quality. They more than pass muster, they excel; they have a gallant, a conspicuous carriage; they roll into the book, four in hand, in gracious attitudes. The best of Fieldings' gentlemen had scarce been at their ease in M—— Hall; Dr. Harrison had seemed a plain, honest man, a trifle below his company; and poor Booth (supposing him to have served in Colonel Morden's corps and to have travelled in the post-

## SOME GENTLEMEN IN FICTION

chaise along with his commandant) had been glad to slink away with Mowbray and crack a bottle in the butler's room.

So that here, on the terms of our theory, we have an odd inversion, tempting to the cynic.

### II

Just the other day, there were again two rival novelists in England: Thackeray and Dickens; and the case of the last is, in this connection, full of interest. Here was a man and an artist, the most strenuous, one of the most endowed; and for how many years he laboured in vain to create a gentleman! With all his watchfulness of men and manners, with all his fiery industry, with his exquisite native gift of characterisation, with his clear knowledge of what he meant to do, there was yet something lacking. In part after part, novel after novel, a whole menagerie of characters, the good, the bad, the droll, and the tragic, came at his beck like slaves about an oriental despot; there was only one who stayed away: the gentleman. If this ill fortune had persisted it might have shaken man's belief in art and industry. But years were given and courage was continued to the indefatigable artist; and at length, after so many and such lamentable failures, success began to attend upon his arms. David Copperfield scrambled through on hands and knees; it was at least a negative success; and Dickens, keenly alive to all he did,

## RANDOM MEMORIES

must have heaved a sigh of infinite relief. Then came the evil days, the days of *Dombey* and *Dorrit*, from which the lover of Dickens willingly averts his eyes; and when that temporary blight had passed away, and the artist began with a more resolute arm to reap the aftermath of his genius, we find him able to create a Carton, a Wrayburn, a Twemlow. No mistake about these three; they are all gentlemen: the sottish Carton, the effete Twemlow, the insolent Wrayburn, all have doubled the cape.

There were never in any book three perfect sentences on end; there was never a character in any volume but it somewhere tripped. We are like dancing dogs and preaching women: the wonder is not that we should do it well, but that we should do it at all. And Wrayburn, I am free to admit, comes on one occasion to the dust. I mean, of course, the scene with the old Jew. I will make you a present of the Jew for a card-board figure; but that is neither here nor there: the ineffectuality of the one presentment does not mitigate the grossness, the baseness, the inhumanity of the other. In this scene, and in one other (if I remember aright) where it is echoed, Wrayburn combines the wit of the omnibus-cad with the good feeling of the Andaman Islander: in all the remainder of the book, throughout a thousand perils, playing (you would say) with difficulty, the author swimmingly steers his hero on the true course. The error

## SOME GENTLEMEN IN FICTION

stands by itself, and it is striking to observe the moment of its introduction. It follows immediately upon one of the most dramatic passages in fiction, that in which Bradley Headstone barks his knuckles on the church-yard wall. To handle Bradley (one of Dickens's superlative achievements) were a thing impossible to almost any man but his creator; and even to him, we may be sure, the effort was exhausting. Dickens was a weary man when he had barked the schoolmaster's knuckles, a weary man and an excited; but the tale of bricks had to be finished, the monthly number waited; and under the false inspiration of irritated nerves, the scene of Wrayburn and the Jew was written and sent forth; and there it is, a blot upon the book and a buffet to the reader.

I make no more account of this passage than of that other in *Hamlet*: a scene that has broken down, the judicious reader cancels for himself. And the general tenor of Wrayburn, and the whole of Carton and Twemlow, are beyond exception. Here, then, we have a man who found it for years an enterprise beyond his art to draw a gentleman, and who in the end succeeded. Is it because Dickens was not a gentleman himself that he so often failed? and if so, then how did he succeed at last? Is it because he was a gentleman that he succeeded? and if so, what made him fail? I feel inclined to stop this paper here, after the manner of conundrums, and offer

## RANDOM MEMORIES

a moderate reward for a solution. But the true answer lies probably deeper than did ever plummet sound. And mine (such as it is) will hardly appear to the reader to disturb the surface.

These verbal puppets (so to call them once again) are things of a divided parentage: the breath of life may be an emanation from their maker, but they themselves are only strings of words and parts of books; they dwell in, they belong to, literature; convention, technical artifice, technical gusto, the mechanical necessities of the art, these are the flesh and blood with which they are invested. If we look only at *Carton* and *Wrayburn*, both leading parts, it must strike us at once that both are most ambitiously attempted; that Dickens was not content to draw a hero and a gentleman plainly and quietly; that, after all his ill-success, he must still handicap himself upon these fresh adventures, and make *Carton* a sot, and sometimes a cantankerous sot, and *Wrayburn* insolent to the verge, and sometimes beyond the verge, of what is pardonable. A moment's thought will show us this was in the nature of his genius, and a part of his literary method. His fierce intensity of design was not to be slaked with any academic portraiture; not all the arts of individualisation could perfectly content him; he must still seek something more definite and more express than nature. All artists, it may be properly argued, do the like; it is their method to discard the mid-

## SOME GENTLEMEN IN FICTION

dling and the insignificant, to disengage the charactered and the precise. But it is only a class of artists that pursue so singly the note of personality; and is it not possible that such a pre-occupation may disable men from representing gentlefolk? The gentleman passes in the stream of the day's manners, inconspicuous. The lover of the individual may find him scarce worth drawing. And even if he draw him, on what will his attention centre but just upon those points in which his model exceeds or falls short of his subdued ideal—but just upon those points in which the gentleman is not genteel? Dickens, in an hour of irritated nerves, and under the pressure of the monthly number, defaced his Wrayburn. Observe what he sacrifices. The ruling passion strong in his hour of weakness, he sacrifices dignity, decency, the essential human beauties of his hero; he still preserves the dialect, the shrill note of personality, the mark of identification. Thackeray, under the strain of the same villainous system, would have fallen upon the other side; his gentleman would still have been a gentleman, he would have only ceased to be an individual figure.

There are incompatible ambitions. You cannot paint a Vandyke and keep it a Franz Hals.

### III

I have preferred to conclude my inconclusive argument before I touched on Thackeray.

## RANDOM MEMORIES

Personally, he scarce appeals to us as the ideal gentleman; if there were nothing else, perpetual nosing after snobbery at least suggests the snob; but about the men he made, there can be no such question of reserve. And whether because he was himself a gentleman in a very high degree, or because his methods were in a very high degree suited to this class of work, or from the common operation of both causes, a gentleman came from his pen by the gift of nature. He could draw him as a character part, full of pettiness, tainted with vulgarity, and yet still a gentleman, in the inimitable Major Pendennis. He could draw him as the full-blown hero in Colonel Esmond. He could draw him—the next thing to the work of God—human and true and noble and frail, in Colonel Newcome. If the art of being a gentleman were forgotten, like the art of staining glass, it might be learned anew from that one character. It is learned there, I dare to say, daily. Mr. Andrew Lang, in a graceful attitude of melancholy, denies the influence of books. I think he forgets his philosophy; for surely there go two elements to the determination of conduct: heredity, and experience—that which is given to us at birth, that which is added and cancelled in the course of life; and what experience is more formative, what step of life is more efficient, than to know and weep for Colonel Newcome? And surely he forgets himself; for I call to mind other pages, beautiful

## SOME GENTLEMEN IN FICTION

pages, from which it may be gathered that the language of *The Newcomes* sings still in his memory, and its gospel is sometimes not forgotten. I call it a gospel: it is the best I know. Error and suffering and failure and death, those calamities that our contemporaries paint upon so vast a scale—they are all depicted here, but in a more true proportion. We may return, before this picture, to the simple and ancient faith. We may be sure (although we know not why) that we give our lives, like coral insects, to build up insensibly, in the twilight of the seas of time, the reef of righteousness. And we may be sure (although we see not how) it is a thing worth doing.

## VII

### POPULAR AUTHORS

THE scene is the deck of an Atlantic liner, close by the doors of the ashpit; where it is warm: the time, night: the persons, an emigrant of an inquiring turn of mind and a deck hand. "Now," says the emigrant, "is there not any book that gives a true picture of a sailor's life?"—"Well," returns the other, with great deliberation and emphasis, "there is *one*; that is *just* a sailor's life. You know all about it, if you know that."—"What do you call it?" asks the emigrant.—"They call it *Tom Holt's Log*," says the sailor. The emigrant entered the fact in his note-book: with a wondering query as to what sort of stuff this *Tom Holt* would prove to be: and a double-headed prophecy that it would prove one of two things: either a solid, dull, admirable piece of truth, or mere ink and banditti. Well, the emigrant was wrong: it was something more curious than either, for it was a work by STEPHENS HAYWARD.

#### I

In this paper I propose to put the authors' names in capital letters; the most of them have

## POPULAR AUTHORS

not much hope of durable renown; their day is past, the poor dogs—they begin swiftly to be forgotten; and HAYWARD is of the number. Yet he was a popular writer; and what is really odd, he had a vein of hare-brained merit. There never was a man of less pretension; the intoxicating presence of an ink-bottle, which was too much for the strong head of Napoleon, left him sober and light-hearted; he had no shade of literary vanity; he was never at the trouble to be dull. His works fell out of date in the days of printing. They were the unhatched eggs of Arab tales; made for word-of-mouth recitation, certain (if thus told) to captivate an audience of boys or any simple people—certain, on the lips of a generation or two of public story-tellers, to take on new merit and become cherished lore. Such tales as a man, such rather as a boy, tells himself at night, not without smiling, as he drops asleep; such, with the same exhilarating range of incident and the same trifling ingenuities, with no more truth to experience and scarcely more cohesion, HAYWARD told. If we so consider *The Diamond Necklace, or the Twenty Captains*, which is what I remember best of HAYWARD, you will find that staggering narrative grow quite conceivable.

A gentleman (his name forgotten—HAYWARD had no taste in names) puts an advertisement in the papers, inviting nineteen other gentlemen to join him in a likely enterprise. The nineteen

## RANDOM MEMORIES

appear promptly, nineteen, no more, no less: see the ease of the recumbent story-teller, half-asleep, hanging on the verge of that country of dreams, where candles come alight and journeys are accomplished at the wishing! These twenty, all total strangers, are to put their money together and form an association of strict equality: hence its name—*The Twenty Captains*. And it is no doubt very pleasant to be equal to anybody, even in name; and mighty desirable (at least in the eyes of young gentlemen hearing this tale in the school dormitory) to be called captain, even in private. But the deuce of it is, the founder has no enterprise in view, and here you would think, the least wary capitalist would leave his chair, and buy a broom and a crossing with his money, rather than place it in the hands of this total stranger, whose mind by his own confession was a blank, and whose real name was probably Macaire. No such matter in the book. With the ease of dreaming, the association is founded; and again with the ease of dreaming (HAYWARD being now three parts asleep) the enterprise, in the shape of a persecuted heiress and a truly damnable and idiotic artistocrat, appears upon the scene. For some time, our drowsy story-teller dodges along upon the frontiers of incoherence, hardly at the trouble to invent, never at the trouble to write literature; but suddenly his interest brightens up, he sees something in front of him, turns on the pillow, shakes off the

## POPULAR AUTHORS

tentacles of slumber, and puts his back into his tale. Injured innocence takes a special train to Dover; damnable idiot takes another and pursues; the twenty captains reach the station five minutes after, and demand a third. It is against the rules, they are told; not more than two specials (here is good news for the railway traveller) are allowed at the same time upon the line. Is injured innocence, with her diamond necklace, to lie at the mercy of an aristocrat? Forbid it, Heaven and the Cheap Press! The twenty captains slip unobserved into the engine-house, steal an engine, and forth upon the Dover line! As well as I can gather, there were no stations and no pointsmen on this route to Dover, which must in consequence be quick and safe. One thing it had in common with other and less simple railways, it had a line of telegraph wires; and these the twenty captains decided to destroy. One of them, you will not be surprised to learn, had a coil of rope—in his pocket, I suppose; another—again I shall not surprise you—was an Irishman and given to blundering. One end of the line was made fast to a telegraph post; one (by the Irishman) to the engine: all aboard—full steam ahead—a double crash, and there was the telegraph post upon the ground, and here—mark my HAYWARD! was something carried away upon the engine. All eyes turn to see what it is: an integral part of the machinery! There is now no means of reducing speed; on

## RANDOM MEMORIES

thunders the engine, full steam ahead, down this remarkable route to Dover; on speed the twenty captains, not very easy in their minds. Presently, the driver of the second special (the aristocrat's) looks behind him, sees an engine on his track, signals, signals in vain, finds himself being overhauled, pokes up his fire and—full steam ahead in flight. Presently after, the driver of the first special (injured innocence's) looks behind, sees a special on his track and an engine on the track of the special, signals, signals in vain, and he too—full steam ahead in flight. Such a day on the Dover line! But at last the second special smashes into the first, and the engine into both; and for my part, I think there was an end of that romance. But HAYWARD was by this time fast asleep: not a life was lost; not only that, but the various parties recovered consciousness and resumed their wild career (only now, of course, on foot and across country) in the precise original order: injured innocence leading by a length, damnable aristocrat with still more damnable valet (like one man) a good second, and the twenty captains (again like one man) a bad third; so that here was the story going on again just as before, and this appalling catastrophe on the Dover line reduced to the proportions of a morning call. The feelings of the company (it is true) are not dwelt upon.

Now, I do not mean that *Tom Holt* is quite such high-flying folly as *The Twenty Captains*;

## POPULAR AUTHORS

for it is no such thing, nor half so entertaining. Still it flowed from the same irresponsible brain; still it was the mere drowsy divagation of a man in bed, now tedious, now extravagant—always acutely untrue to life as it is, often pleasantly coincident with childish hopes of what life ought to be—as (for instance) in the matter of that little pleasure-boat, rigged, to every block and rope, as a full-rigged ship, in which Tom goes sailing—happy child! And this was the work that an actual tarry seaman recommended for a picture of his own existence!

### II

It was once my fortune to have an interview with Mr. HAYWARD'S publisher: a very affable gentleman in a very small office in a shady court off Fleet Street. We had some talk together of the works he issued and the authors who supplied them; and it was strange to hear him talk for all the world as one of our publishers might have talked of one of us, only with a more obliging frankness, so that the private life of these great men was more or less unveiled to me. So and so (he told me, among other things) had demanded an advance upon a novel, had laid out the sum (apparently on spirituous drinks) and refused to finish the work. "We had to put it in the hands of BRACEBRIDGE HEMMING," said the publisher with a chuckle: "he finished it." And then with conviction: "A most reliable

## RANDOM MEMORIES

author, BRACEBRIDGE HEMMING." I have no doubt the name is new to the reader; it was not so to me. Among these great men of the dust there is a touching ambition which punishes itself; not content with such glory as comes to them, they long for the glory of being bound—long to invade, between six boards, the homes of that aristocracy whose manners they so often find occasion to expose; and sometimes (once in a long lifetime) the gods give them this also, and they appear in the orthodox three volumes and are fleered at in the critical press, and lie quite unread in circulating libraries. One such work came in my mind: *The Bondage of Brandon*, by BRACEBRIDGE HEMMING. I had not found much pleasure in the volumes; but I was the more glad to think that Mr. Hemming's name was quite a household word, and himself quoted for "a reliable author," in his own literary circles.

On my way westward from this interview, I was aware of a first floor in Fleet Street rigged up with wire window-blinds, brass straps, and gilt lettering: Office for the sale of the works of PIERCE EGAN. "Ay, Mr. EGAN," thought I, "and have you an office all to yourself!" And then remembered that he too had once revelled in three volumes: *The Flower of the Flock* the book was called, not without pathos for the considerate mind; but even the flower of Egan's flock was not good enough for the critics or the circulating libraries, so that I purchased my own

## POPULAR AUTHORS

copy, quite unread, for three shillings at a railway bookstall. Poor dogs, I thought, what ails you, that you should have the desire of this fictitious upper popularity, made by hack journalists and countersigned by yawning girls? Yours is the more true. Your butcher, the landlady at your seaside lodgings—if you can afford that indulgence, the barmaid whom you doubtless court, even the Rates and Taxes that besiege your door, have actually read your tales and actually know your names. There was a waiter once (or so the story goes) who knew not the name of Tennyson: that of HEMMING perhaps had brought the light into his eyes, or VILES perhaps, or ERRYM, or the great J. F. SMITH, or the unutterable Reynolds, to whom even here I must deny his capitals.—Fancy, if you can (thought I), that I languish under the reverse of your complaint; and being an upper-class author, bound and criticised, long for the penny number and the weekly woodcut!

Well, I know that glory now. I have tried and on the whole I have failed: just as EGAN and HEMMING failed in the circulating libraries. It is my consolation that Charles Reade nearly wrecked that valuable property the *London Journal*, which must instantly fall back on Mr. Egan; and the king of us all, George Meredith, once staggered the circulation of a weekly newspaper. A servant-maid used to come and boast when she had read another chapter of *Treasure*

## RANDOM MEMORIES

*Island*: that any pleasure should attend the exercise never crossed her thoughts. The same tale, in a penny paper of a high class, was mightily coldly looked upon; by the delicate test of the correspondence column, I could see I was far to leeward; and there was one giant on the staff (a man with some talent, when he chose to use it) with whom I very early perceived it was in vain to rival. Yet I was thought well of on my penny paper for two reasons: one that the publisher was bent on raising the standard—a difficult enterprise in which he has to a great extent succeeded; the other, because (like Bracebridge Hemming) I was “a reliable author.” For our great men of the dust are apt to be behind with copy.

### III

How I came to be such a student of our penny press, demands perhaps some explanation. I was brought up on *Cassell's Family Paper*; but the lady who was kind enough to read the tales aloud to me was subject to sharp attacks of conscience. She took the *Family Paper* on confidence; the tales it contained being Family Tales, not novels. But every now and then, something would occur to alarm her finer senses; she would express a well-grounded fear that the current fiction was “going to turn out a Regular Novel”; and the family paper, with my pious approval, would be dropped. Yet neither she

## POPULAR AUTHORS

nor I were wholly stoical; and when Saturday came round, we would study the windows of the stationer and try to fish out of subsequent woodcuts and their legends the further adventures of our favourites. Many points are here suggested for the casuist; definitions of the Regular Novel and the Family Tale are to be desired; and quite a paper might be written on the relative merit of reading a fiction outright and lusting after it at the stationer's window. The experience at least had a great effect upon my childhood. This inexpensive pleasure mastered me. Each new Saturday I would go from one news-vender's window to another's, till I was master of the weekly gallery and had thoroughly digested "The Baronet Unmasked," "So and so approaching the Mysterious House," "The Discovery of the Dead Body in the Blue Marl Pit," "Dr. Vargas Removing the Senseless Body of Fair Liliias," and whatever other snatch of unknown story and glimpse of unknown characters that gallery afforded. I do not know that I ever enjoyed fiction more; those books that we have (in such a way) avoided reading, are all so excellently written! And in early years, we take a book for its material, and act as our own artists, keenly realising that which pleases us, leaving the rest aside. I never supposed that a book was to command me until, one disastrous day of storm, the heaven full of turbulent vapours, the streets full of the squalling of the gale, the

## RANDOM MEMORIES

windows resounding under bucketfuls of rain, my mother read aloud to me *Macbeth*. I cannot say I thought the experience agreeable; I far preferred the ditch-water stories that a child could dip and skip and doze over, stealing at times materials for play; it was something new and shocking to be thus ravished by a giant, and I shrank under the brutal grasp. But the spot in memory is still sensitive; nor do I ever read that tragedy but I hear the gale howling up the valley of the Leith.

All this while, I would never buy upon my own account; pence were scarce, conscience busy; and I would study the pictures and dip into the exposed columns, but not buy. My fall was brought about by a truly romantic incident. Perhaps the reader knows Neidpath Castle, where it stands, bosomed in hills, on a green promontory; Tweed at its base running through all the gamut of a busy river, from the pouring shallow to the brown pool. In the days when I was thereabout, and that part of the earth was made a heaven to me by many things now lost, by boats, and bathing, and the fascination of streams, and the delights of comradeship, and those (surely the prettiest and simplest) of a boy and a girl romance—in those days of Arcady there dwelt in the upper story of the castle one whom I believe to have been gamekeeper on the estate. The rest of the place stood open to incursive urchins; and there, in a deserted cham-

## POPULAR AUTHORS

ber, we found some half-a-dozen numbers of *Black Bess, or the Knight of the Road*, a work by EDWARD VILES. So far as we were aware, no one had visited that chamber (which was in a turret) since Lambert blew in the doors of the fortress with contumelious English cannon. Yet it could hardly have been Lambert (in whatever hurry of military operations) who had left these samples of romance; and the idea that the gamekeeper had anything to do with them was one that we discouraged. Well, the offence is now covered by prescription; we took them away; and in the shade of a contiguous fir-wood; lying on blaeberries, I made my first acquaintance with the art of Mr. Viles. From this author, I passed on to MALCOLM J. ERRYM (the name to my present scrutiny, suggesting an anagram on Merry), author of *Edith the Captive*, *The Treasures of St. Mark*, *A Mystery in Scarlet*, *George Barington*, *Sea-drift*, *Townsend the Runner*, and a variety of other well-named romances. Memory may play me false, but I believe there was a kind of merit about Errym. The *Mystery in Scarlet* runs in my mind to this day; and if any hunter after autographs (and I think the world is full of such) can lay his hands on a copy even imperfect, and will send it to me in the care of Messrs. Scribner, my gratitude (the muse consenting) will even drop into poetry. For I have a curiosity to know what the *Mystery in Scarlet* was, and to renew acquaintance with

## RANDOM MEMORIES

King George and his valet Norris, who were the chief figures in the work and may be said to have risen in every page superior to history and the ten commandments. Hence I passed on to Mr. EGAN, whom I trust the reader does not confuse with the author of *Tom and Jerry*; the two are quite distinct, though I have sometimes suspected they were father and son. I never enjoyed EGAN as I did ERRYM; but this was possibly a want of taste, and EGAN would do. Thence again I was suddenly brought face to face with Mr. Reynolds. A school-fellow, acquainted with my debasing tastes, supplied me with *The Mysteries of London*, and I fell back revolted. The same school-fellow (who seems to have been a devil of a fellow) supplied me about the same time with one of those contributions to literature (and even to art) from which the name of the publisher is modestly withheld. It was a far more respectable work than *The Mysteries of London*. J. F. SMITH when I was a child, ERRYM when I was a boy, HAYWARD when I had attained to man's estate, these I read for pleasure; the others, down to SYLVANUS COBB, I have made it my business to know (as far as my endurance would support me) from a sincere interest in human nature and the art of letters.

### IV

What kind of talent is required to please this mighty public? that was my first question, and

## POPULAR AUTHORS

was soon amended with the words, "if any." J. F. SMITH was a man of undeniable talent, ERRYM and HAYWARD have a certain spirit, and even in EGAN the very tender might recognise the rudiments of a sort of literary gift; but the cases on the other side are quite conclusive. Take Hemming, or the dull ruffian Reynolds, or Sylvanus Cobb, of whom perhaps I have only seen unfortunate examples—they seem not to have the talents of a rabbit, and why any one should read them is a thing that passes wonder. A plain-spoken and possibly high-thinking critic might here perhaps return upon me with my own expressions. And he would have missed the point. For I and my fellows have no such popularity to be accounted for. The reputation of an upper-class author is made for him at dinner-tables and nursed in newspaper paragraphs, and when all is done, amounts to no great matter. We call it popularity, surely in a pleasant error. A flippant writer in the *Saturday Review* expressed a doubt if I had ever cherished a "genteel" illusion; in truth I never had many, but this was one—and I have lost it. Once I took the literary author at his own esteem; I behold him now like one of those gentlemen who read their own MS. descriptive poetry aloud to wife and babes around the evening hearth; addressing a mere parlour coterie and quite unknown to the great world outside the villa windows. At such pigmy reputation, Reynolds

## RANDOM MEMORIES

or COBB, or Mrs. SOUTHWORTH can afford to smile. By spontaneous public vote, at a cry from the unorganic masses, these great ones of the dust were laured. And for what?

Ay, there is the question: For what? How is this great honour gained? Many things have been suggested. The people (it has been said) like rapid narrative. If so, the taste is recent, for both Smith and Egan were leisurely writers. It has been said they like incident, not character. I am not so sure. G. P. R. James was an upper-class author, J. F. Smith a penny pressman; the two are in some ways not unlike; but—here is the curiosity—James made far the better story, Smith was far the more successful with his characters. Each (to bring the parallel home) wrote a novel called *The Stepmother*; each introduced a pair of old maids; and let any one study the result! James's *Stepmother* is a capital tale, but Smith's old maids are like Trollope at his best. It is said again that the people like crime. Certainly they do. But the great ones of the dust have no monopoly of that, and their less fortunate rivals hammer away at murder and abduction unapplauded.

I return to linger about my seaman on the Atlantic liner. I shall be told he is exceptional. I am tempted to think, on the other hand, that he may be normal. The critical attitude, whether to books or life—how if that were the true exception? How if *Tom Holt's Log*, surrepti-

## POPULAR AUTHORS

tiously perused by a harbour-side, had been the means of sending my mariner to sea? How if he were still unconsciously expecting the Tom Holt part of the business to begin—perhaps tomorrow? How, even, if he had never yet awakened to the discrepancy between that singular picture and the facts? Let us take another instance. *The Young Ladies' Journal* is an elegant miscellany which I have frequently observed in the possession of the barmaid. In a lone house on a moorland, I was once supplied with quite a considerable file of this production and (the weather being violent) devoutly read it. The tales were not ill done; they were well abreast of the average tale in a circulating library; there was only one difference, only one thing to remind me I was in the land of penny numbers instead of the parish of three volumes: Disguise it as the authors pleased (and they showed ingenuity in doing so) it was always the same tale they must relate: the tale of a poor girl ultimately married to a peer of the realm or (at the worst) a baronet. The circumstance is not common in life; but how familiar to the musings of the barmaid! The tales were not true to what men see; they were true to what the readers dreamed.

Let us try to remember how fancy works in children; with what selective partiality it reads, leaving often the bulk of the book unrealised, but fixing on the rest and living it; and what a

## RANDOM MEMORIES

passionate impotence it shows—what power of adoption, what weakness to create. It seems to be not much otherwise with uneducated readers. They long, not to enter into the lives of others, but to behold themselves in changed situations, ardently but impotently preconceived. The imagination (save the mark!) of the popular author here comes to the rescue, supplies some body of circumstance to these phantom aspirations, and conducts the readers where they will. Where they will: that is the point; elsewhere they will not follow. When I was a child, if I came on a book in which the characters wore armour, it fell from my hand; I had no criterion of merit, simply that one decisive taste, that my fancy refused to linger in the middle ages. And the mind of the uneducated reader is mailed with similar restrictions. So it is that we must account for a thing otherwise unaccountable: the popularity of some of these great ones of the dust. In defect of any other gift, they have instinctive sympathy with the popular mind. They can thus supply to the shop-girl and the shoe-black vesture cut to the pattern of their naked fancies, and furnish them with welcome scenery and properties for autobiographical romancing.

Even in readers of an upper class, we may perceive the traces of a similar hesitation; even for them, a writer may be too exotic. The villain, even the heroine, may be a Feejee island-

## POPULAR AUTHORS

er, but only on condition the hero is one of ourselves. It is pretty to see the thing reversed in the Arabian tale (Torrens or Burton—the tale is omitted in popular editions) where the Moslem hero carries off the Christian amazon; and in the exogamous romance, there lies interred a good deal of human history and human nature. But the question of exogamy is foreign to the purpose. Enough that we are not readily pleased without a character of our own race and language; so that, when the scene of a romance is laid on any distant soil, we look with eagerness and confidence for the coming of the English traveller. With the readers of the penny-press, the thing goes further. Burning as they are to penetrate into the homes of the peerage, they must still be conducted there by some character of their own class, into whose person they cheerfully migrate for the time of reading. Hence the poor governesses supplied in the *Young Ladies' Journal*. Hence these dreary virtuous *ouvriers* and *ouvrières* of Xavier de Montépin. He can do nothing with them; and he is far too clever not to be aware of that. When he writes for the *Figaro*, he discards these venerable puppets and doubtless glories in their absence; but so soon as he must address the great audience of the half-penny journal, out come the puppets and are furbished up, and take to drink again, and are once more reclaimed, and once more falsely accused. See them for what they

## RANDOM MEMORIES

are—Montépin's decoys; without these he could not make his public feel at home in the houses of the fraudulent bankers and the wicked dukes.

The reader, it has been said, migrates into such characters for the time of reading: under their name escapes the narrow prison of the individual career, and sates his avidity for other lives. To what extent he ever emigrates again, and how far the fancied careers react upon the true one, it would fill another paper to debate. But the case of my sailor shows their grave importance. "Tom Holt does not apply to me," thinks our dully-imaginative boy by the harbour-side, "for I am not a sailor. But if I go to sea it will apply completely." And he does go to sea. He lives surrounded by the fact, and does not observe it. He cannot realise, he cannot make a tale of his own life; which crumbles in discrete impressions even as he lives it, and slips between the fingers of his memory like sand. It is not this that he considers in his rare hours of rumination, but that other life, which was all lit up for him by the humble talent of a Hayward—that other life which, God knows, perhaps he still believes that he is leading—the life of Tom Holt.

## VIII

### LETTER TO A YOUNG GENTLE- MAN WHO PROPOSES TO EM- BRACE THE CAREER OF ART

**W**ITH the agreeable frankness of youth, you address me on a point of some practical importance to yourself and (it is even conceivable) of some gravity to the world: Should you or should you not become an artist? It is one which you must decide entirely for yourself; all that I can do is to bring under your notice some of the materials of that decision; and I will begin, as I shall probably conclude also, by assuring you that all depends on the vocation.

To know what you like is the beginning of wisdom and of old age. Youth is wholly experimental. The essence and charm of that unquiet and delightful epoch is ignorance of self as well as ignorance of life. These two unknowns the young man brings together again and again, now in the airiest touch, now with a bitter hug; now with exquisite pleasure, now with cutting pain; but never with indifference, to which he is a total stranger, and never with

## RANDOM MEMORIES

that near kinsman of indifference, contentment. If he be a youth of dainty senses or a brain easily heated, the interest of this series of experiments grows upon him out of all proportion to the pleasure he receives. It is not beauty that he loves, nor pleasure that he seeks, though he may think so; his design and his sufficient reward is to verify his own existence and taste the variety of human fate. To him, before the razor-edge of curiosity is dulled, all that is not actual living and the hot chase of experience wears a face of a disgusting dryness difficult to recall in later days; or if there be any exception—and here destiny steps in—it is in those moments when, wearied or surfeited of the primary activity of the senses, he calls up before memory the image of transacted pains and pleasures. Thus it is that such an one shies from all cut-and-dry professions, and inclines insensibly toward that career of art which consists only in the tasting and recording of experience.

This, which is not so much a vocation for art as an impatience of all other honest trades, frequently exists alone; and so existing, it will pass gently away in the course of years. Emphatically, it is not to be regarded, it is not a vocation, but a temptation; and when your father the other day so fiercely and (in my view) so properly discouraged your ambition, he was recalling not improbably some similar passage in his own experience. For the temptation is per-

## LETTER TO YOUNG GENTLEMAN

haps nearly as common as the vocation is rare. But again we have vocations which are imperfect; we have men whose minds are bound up, not so much in any art, as in the general *ars artium* and common base of all creative work; who will now dip into painting, and now study counterpoint, and anon will be inditing a sonnet: all these with equal interest, all often with genuine knowledge. And of this temper, when it stands alone, I find it difficult to speak; but I should counsel such an one to take to letters, for in literature (which drags with so wide a net) all his information may be found some day useful, and if he should go on as he has begun, and turn at last into the critic, he will have learned to use the necessary tools. Lastly we come to those vocations which are at once decisive and precise; to the men who are born with the love of pigments, the passion of drawing, the gift of music, or the impulse to create with words, just as other and perhaps the same men are born with the love of hunting, or the sea, or horses, or the turning-lathe. These are predestined; if a man love the labour of any trade apart from any question of success or fame, the gods have called him. He may have the general vocation too: he may have a taste for all the arts, and I think he often has; but the mark of his calling is this laborious partiality for one, this inextinguishable zest in its technical successes, and (perhaps above all) a certain can-

## RANDOM MEMORIES

dour of mind, to take his very trifling enterprise with a gravity that would befit the cares of empire, and to think the smallest improvement worth accomplishing at any expense of time and industry. The book, the statue, the sonata, must be gone upon with the unreasoning good faith and the unflagging spirit of children at their play. *Is it worth doing?*—when it shall have occurred to any artist to ask himself that question, it is implicitly answered in the negative. It does not occur to the child as he plays at being a pirate on the dining-room sofa, nor to the hunter as he pursues his quarry; and the candour of the one and the ardour of the other should be united in the bosom of the artist.

If you recognise in yourself some such decisive taste, there is no room for hesitation: follow your bent. And observe (lest I should too much discourage you) that the disposition does not usually burn so brightly at the first, or rather not so constantly. Habit and practice sharpen gifts; the necessity of toil grows less disgusting, grows even welcome in the course of years; a small taste (if it be only genuine) waxes with indulgence into an exclusive passion. Enough, just now, if you can look back over a fair interval, and see that your chosen art has a little more than held its own among the thronging interests of youth. Time will do the rest, if devotion help it; and soon your every thought will be engrossed in that beloved occupation.

## LETTER TO YOUNG GENTLEMAN

But even with devotion, you may remind me, even with unfaltering and delighted industry, many thousand artists spend their lives, if the result be regarded, utterly in vain: a thousand artists, and never one work of art. But the vast mass of mankind are incapable of doing anything reasonably well, art among the rest. The worthless artist would not improbably have been a quite incompetent baker. And the artist, even if he does not amuse the public, amuses himself; so that there will always be one man the happier for his vigils. This is the practical side of art: its inexpugnable fortress for the true practitioner. The direct returns—the wages of the trade—are small, but the indirect—the wages of the life—are incalculably great. No other business offers a man his daily bread upon such joyful terms. The soldier and the explorer have moments of a worthier excitement, but they are purchased by cruel hardships and periods of tedium that beggar language. In the life of the artist there need be no hour without its pleasure. I take the author, with whose career I am best acquainted; and it is true he works in a rebellious material, and that the act of writing is cramped and trying both to the eyes and the temper; but remark him in his study, when matter crowds upon him and words are not wanting—in what a continual series of small successes time flows by; with what a sense of power as of one moving mountains, he mar-

## RANDOM MEMORIES

shals his petty characters; with what pleasures, both of the ear and eye, he sees his airy structure growing on the page; and how he labours in a craft to which the whole material of his life is tributary, and which opens a door to all his tastes, his loves, his hatreds, and his convictions, so that what he writes is only what he longed to utter. He may have enjoyed many things in this big, tragic playground of the world; but what shall he have enjoyed more fully than a morning of successful work? Suppose it ill paid: the wonder is it should be paid at all. Other men pay, and pay dearly, for pleasures less desirable.

Nor will the practice of art afford you pleasure only; it affords besides an admirable training. For the artist works entirely upon honour. The public knows little or nothing of those merits in the quest of which you are condemned to spend the bulk of your endeavours. Merits of design, the merit of first-hand energy, the merit of a certain cheap accomplishment which a man of the artistic temper easily acquires—these they can recognise, and these they value. But to those more exquisite refinements of proficiency and finish, which the artist so ardently desires and so keenly feels, for which (in the vigorous words of Balzac) he must toil “like a miner buried in a landslip,” for which, day after day, he recasts and revises and rejects—the gross mass of the public must be ever blind. To

## LETTER TO YOUNG GENTLEMAN

those lost pains, suppose you attain the highest pitch of merit, posterity may possibly do justice; suppose, as is so probable, you fail by even a hair's breadth of the highest, rest certain they shall never be observed. Under the shadow of this cold thought, alone in his studio, the artist must preserve from day to day his constancy to the ideal. It is this which makes his life noble; it is by this that the practice of his craft strengthens and matures his character; it is for this that even the serious countenance of the great emperor was turned approvingly (if only for a moment) on the followers of Apollo, and that sternly gentle voice bade the artist cherish his art.

And here there fall two warnings to be made. First, if you are to continue to be a law to yourself, you must beware of the first signs of laziness. This idealism in honesty can only be supported by perpetual effort; the standard is easily lowered, the artist who says "*It will do,*" is on the downward path; three or four pot-boilers are enough at times (above all at wrong times) to falsify a talent, and by the practice of journalism a man runs the risk of becoming wedded to cheap finish. This is the danger on the one side; there is not less upon the other. The consciousness of how much the artist is (and must be) a law to himself, debauches the small heads. Perceiving recondite merits very hard to attain, making or swallowing artistic

## RANDOM MEMORIES

formulæ, or perhaps falling in love with some particular proficiency of his own, many artists forget the end of all art: to please. It is doubtless tempting to exclaim against the ignorant bourgeois; yet it should not be forgotten, it is he who is to pay us, and that (surely on the face of it) for services that he shall desire to have performed. Here also, if properly considered, there is a question of transcendental honesty. To give the public what they do not want, and yet expect to be supported: we have there a strange pretension, and yet not uncommon, above all with painters. The first duty in this world is for a man to pay his way; when that is quite accomplished, he may plunge into what eccentricity he likes; but emphatically not till then. Till then, he must pay assiduous court to the bourgeois who carries the purse. And if in the course of these capitulations he shall falsify his talent, it can never have been a strong one, and he will have preserved a better thing than talent—character. Or if he be of a mind so independent that he cannot stoop to this necessity, one course is yet open: he can desist from art, and follow some more manly way of life.

I speak of a more manly way of life, it is a point on which I must be frank. To live by a pleasure is not a high calling; it involves patronage, however veiled; it numbers the artist, however ambitious, along with dancing-girls and

## LETTER TO YOUNG GENTLEMAN

billiard-markers. The French have a romantic evasion for one employment, and call its practitioners the Daughters of Joy. The artist is of the same family, he is of the Sons of Joy, chose his trade to please himself, gains his livelihood by pleasing others, and has parted with something of the sterner dignity of man. Journals but a little while ago declaimed against the Tennyson peerage; and this Son of Joy was blamed for condescension when he followed the example of Lord Lawrence and Lord Cairns and Lord Clyde. The poet was more happily inspired; with a better modesty he accepted the honour; and anonymous journalists have not yet (if I am to believe them) recovered the vicarious disgrace to their profession. When it comes to their turn, these gentlemen can do themselves more justice; and I shall be glad to think of it; for to my barbarian eyesight, even Lord Tennyson looks somewhat out of place in that assembly. There should be no honours for the artist; he has already, in the practice of his art, more than his share of the rewards of life; the honours are pre-empted for other trades, less agreeable and perhaps more useful.

But the devil in these trades of pleasing is to fail to please. In ordinary occupations, a man offers to do a certain thing or to produce a certain article with a merely conventional accomplishment, a design in which (we may almost say) it is difficult to fail. But the artist steps

## RANDOM MEMORIES

forth out of the crowd and proposes to delight: an impudent design, in which it is impossible to fail without odious circumstances. The poor Daughter of Joy, carrying her smiles and finery quite unregarded through the crowd, makes a figure which it is impossible to recall without a wounding pity. She is the type of the unsuccessful artist. The actor, the dancer, and the singer must appear like her in person, and drain publicly the cup of failure. But though the rest of us escape this crowning bitterness of the pillory, we all court in essence the same humiliation. We all profess to be able to delight. And how few of us are! We all pledge ourselves to be able to continue to delight. And the day will come to each, and even to the most admired, when the ardour shall have declined and the cunning shall be lost, and he shall sit by his deserted booth ashamed. Then shall he see himself condemned to do work for which he blushes to take payment. Then (as if his lot were not already cruel) he must lie exposed to the gibes of the wreckers of the press, who earn a little bitter bread by the condemnation of trash which they have not read, and the praise of excellence which they cannot understand.

And observe that this seems almost the necessary end at least of writers. *Les Blancs et les Bleus* (for instance) is of an order of merit very different from *Le Vicomte de Bragelonne*; and if any gentleman can bear to spy upon the naked-

## LETTER TO YOUNG GENTLEMAN

ness of *Castle Dangerous*, his name I think is Ham: let it be enough for the rest of us to read of it (not without tears) in the pages of Lockhart. Thus in old age, when occupation and comfort are most needful, the writer must lay aside at once his pastime and his breadwinner. The painter indeed, if he succeed at all in engaging the attention of the public, gains great sums and can stand to his easel until a great age without dishonourable failure. The writer has the double misfortune to be ill-paid while he can work, and to be incapable of working when he is old. It is thus a way of life which conducts directly to a false position.

For the writer (in spite of notorious examples to the contrary) must look to be ill-paid. Tennyson and Montépin make handsome livelihoods; but we cannot all hope to be Tennyson, and we do not all perhaps desire to be Montépin. If you adopt an art to be your trade, weed your mind at the outset of all desire of money. What you may decently expect, if you have some talent and much industry, is such an income as a clerk will earn with a tenth or perhaps a twentieth of your nervous output. Nor have you the right to look for more; in the wages of the life, not in the wages of the trade, lies your reward; the work is here the wages. It will be seen I have little sympathy with the common lamentations of the artist class. Perhaps they do not remember the hire of the field

## RANDOM MEMORIES

labourer; or do they think no parallel will lie? Perhaps they have never observed what is the retiring allowance of a field officer; or do they suppose their contributions to the arts of pleasing more important than the services of a colonel? Perhaps they forget on how little Millet was content to live; or do they think, because they have less genius, they stand excused from the display of equal virtues? But upon one point there should be no dubiety: if a man be not frugal, he has no business in the arts. If he be not frugal, he steers directly for that last tragic scene of *le vieux saltimbanque*; if he be not frugal, he will find it hard to continue to be honest. Some day, when the butcher is knocking at the door, he may be tempted, he may be obliged, to turn out and sell a slovenly piece of work. If the obligation shall have arisen through no wantonness of his own, he is even to be commended; for words cannot describe how far more necessary it is that a man should support his family, than that he should attain to—or preserve—distinction in the arts. But if the pressure comes through his own fault, he has stolen, and stolen under trust, and stolen (which is the worst of all) in such a way that no law can reach him.

And now you may perhaps ask me, if the *débutant* artist is to have no thought of money, and if (as is implied) he is to expect no honours from the State, he may not at least look forward

## LETTER TO YOUNG GENTLEMAN

to the delights of popularity? Praise, you will tell me, is a savoury dish. And in so far as you may mean the countenance of other artists, you would put your finger on one of the most essential and enduring pleasures of the career of art. But in so far as you should have an eye to the commendations of the public or the notice of the newspapers, be sure you would but be cherishing a dream. It is true that in certain esoteric journals the author (for instance) is duly criticised, and that he is often praised a great deal more than he deserves, sometimes for qualities which he prided himself on eschewing, and sometimes by ladies and gentlemen who have denied themselves the privilege of reading his work. But if a man be sensitive to this wild praise, we must suppose him equally alive to that which often accompanies and always follows it—wild ridicule. A man may have done well for years, and then he may fail; he will hear of his failure. Or he may have done well for years, and still do well, but the critics may have tired of praising him, or there may have sprung up some new idol of the instant, some “dust a little gilt,” to whom they now prefer to offer sacrifice. Here is the obverse and the reverse of that empty and ugly thing called popularity. Will any man suppose it worth the gaining?

## IX

### THE COAST OF FIFE

**M**ANY writers have vigorously described the pains of the first day or the first night at school; to a boy of any enterprise, I believe, they are more often agreeably exciting. Misery—or at least misery unrelieved—is confined to another period, to the days of suspense and the “dreadful looking-for” of departure; when the old life is running to an end, and the new life, with its new interests, not yet begun; and to the pain of an imminent parting, there is added the unrest of a state of conscious pre-existence. The area-railings, the beloved shop-window, the smell of semi-suburban tanpits, the song of the church-bells upon a Sunday, the thin, high voices of compatriot children in a playing-field—what a sudden, what an overpowering pathos breathes to him from each familiar circumstance! The assaults of sorrow come not from within, as it seems to him, but from without. I was proud and glad to go to school; had I been let alone, I could have borne up like any hero; but there was around me, in all my native town, a con-

## THE COAST OF FIFE

spiracy of lamentation: "Poor little boy, he is going away—unkind little boy, he is going to leave us"; so the unspoken burthen followed me as I went, with yearning and reproach. And at length, one melancholy afternoon in the early autumn, and at a place where it seems to me, looking back, it must be always autumn and generally Sunday, there came suddenly upon the face of all I saw—the long empty road, the lines of the tall houses, the church upon the hill, the woody hillside garden—a look of such a piercing sadness that my heart died; and seating myself on a door-step, I shed tears of miserable sympathy. A benevolent cat cumbered me the while with consolations—we two were alone in all that was visible of the London Road: two poor waifs who had each tasted sorrow—and she fawned upon the weeper, and gambolled for his entertainment, watching the effect, it seemed, with motherly eyes.

For the sake of the cat, God bless her! I confessed at home the story of my weakness; and so it comes about that I owed a certain journey, and the reader owes the present paper, to a cat in the London Road. It was judged, if I had thus brimmed over on the public highway, some change of scene was (in the medical sense) indicated; my father at the time was visiting the harbour lights of Scotland; and it was decided he should take me along with him around a portion of the shores of Fife; my first

## RANDOM MEMORIES

professional tour, my first journey in the complete character of man, without the help of petticoats.

The Kingdom of Fife (that royal province) may be observed by the curious on the map, occupying a tongue of land between the firths of Forth and Tay. It may be continually seen from many parts of Edinburgh (among the rest, from the windows of my father's house) dying away into the distance and the easterly *haar* with one smoky sea-side town beyond another, or in winter printing on the grey heaven some glittering hill-tops. It has no beauty to recommend it, being a low, sea-salted, wind-vexed promontory; trees very rare, except (as common on the east coast) along the dens of rivers; the fields well cultivated, I understand, but not lovely to the eye. It is of the coast I speak: the interior may be the garden of Eden. History broods over that part of the world like the easterly *haar*. Even on the map, its long row of Gaelic place-names bear testimony to an old and settled race. Of these little towns, posted along the shore as close as sedges, each with its bit of harbour, its old weather-beaten church or public building, its flavour of decayed prosperity and decaying fish, not one but has its legend, quaint or tragic: Dunfermline, in whose royal towers the king may be still observed (in the ballad) drinking the blood-red wine; somnolent Inverkeithing, once the quarantine of

## THE COAST OF FIFE

Leith; Aberdour, hard by the monastic islet of Inchcolm, hard by Donibristle where the "bonny face was spoiled"; Burntisland, where, when Paul Jones was off the coast, the Reverend Mr. Shirra had a table carried between tide-marks, and publicly prayed against the rover at the pitch of his voice and his broad lowland dialect; Kinghorn, where Alexander "brak's neckbane" and left Scotland to the English wars; Kirkcaldy, where the witches once prevailed extremely and sank tall ships and honest mariners in the North Sea; Dysart, famous—well famous at least to me for the Dutch ships that lay in its harbour, painted like toys and with pots of flowers and cages of song-birds in the cabin windows, and for one particular Dutch skipper who would sit all day in slippers on the break of the poop, smoking a long German pipe; Wemyss (pronounce Weems) with its bat-haunted caves, where the Chevalier Johnstone, on his flight from Culloden, passed a night of superstitious terrors; Leven, a bald, quite modern place, sacred to summer visitors, whence there has gone but yesterday the tall figure and the white locks of the last Englishman in Delhi, my uncle Dr. Balfour, who was still walking his hospital rounds, while the troopers from Meerut clattered and cried "Deen, Deen" along the streets of the imperial city, and Willoughby mustered his handful of heroes at the magazine, and the nameless brave one in the telegraph office was

## RANDOM MEMORIES

perhaps already fingering his last despatch; and just a little beyond Leven, Largo Law and the smoke of Largo town mounting about its feet, the town of Alexander Selkirk, better known under the name of Robinson Crusoe. So on, the list might be pursued (only for private reasons, which the reader will shortly have an opportunity to guess) by St. Monans, and Pittenweem, and the two Anstruthers, and Cellardyke, and Crail, where Primate Sharpe was once a humble and innocent country minister: on to the heel of the land, to Fife Ness, overlooked by a seawood of matted elders and the quaint old mansion of Balcomie, itself overlooking but the breach or the quiescence of the deep—the Carr Rock beacon rising close in front, and as night draws in, the star of the Inchcape reef springing up on the one hand, and the star of the May Island on the other, and farther off yet a third and a greater on the craggy foreland of St. Abb's. And but a little way round the corner of the land, imminent itself above the sea, stands the gem of the province and the light of mediæval Scotland, St. Andrews, where the great Cardinal Beaton held garrison against the world, and the second of the name and title perished (as you may read in Knox's jeering narrative) under the knives of true-blue Protestants, and to this day (after so many centuries) the current voice of the professor is not hushed.

## THE COAST OF FIFE

Here it was that my first tour of inspection began, early on a bleak easterly morning. There was a crashing run of sea upon the shore, I recollect, and my father and the man of the harbour light must sometimes raise their voices to be audible. Perhaps it is from this circumstance, that I always imagine St. Andrews to be an ineffectual seat of learning, and the sound of the east wind and the bursting surf to linger in its drowsy class-rooms and confound the utterance of the professor, until teacher and taught are alike drowned in oblivion, and only the seagull beats on the windows and the draught of the sea-air rustles in the pages of the open lecture. But upon all this, and the romance of St. Andrews in general, the reader must consult the works of Mr. Andrew Lang; who has written of it but the other day in his dainty prose and with his incommunicable humour, and long ago in one of his best poems, with grace, and local truth and a note of unaffected pathos. Mr. Lang knows all about the romance, I say, and the educational advantages, but I doubt if he had turned his attention to the harbour lights; and it may be news even to him, that in the year 1863 their case was pitiable. Hanging about with the east wind humming in my teeth, and my hands (I make no doubt) in my pockets, I looked for the first time upon that tragic-comedy of the visiting engineer which I have seen so often re-enacted on a more important

## RANDOM MEMORIES

stage. Eighty years ago, I find my grandfather writing: "It is the most painful thing that can occur to me to have a correspondence of this kind with any of the keepers, and when I come to the Light House, instead of having the satisfaction to meet them with approbation and welcome their Family, it is distressing when one is obliged to put on a most angry countenance and demeanour." This painful obligation has been hereditary in my race. I have myself, on a perfectly amateur and unauthorised inspection of Turnberry Point, bent my brows upon the keeper on the question of storm-panes; and felt a keen pang of self-reproach, when we went down-stairs again and I found he was making a coffin for his infant child; and then regained my equanimity with the thought that I had done the man a service, and when the proper inspector came he would be readier with his panes. The human race is perhaps credited with more duplicity than it deserves. The visitation of a lighthouse at least is a business of the most transparent nature. As soon as the boat grates on the shore, and the keepers step forward in their uniformed coats, the very slouch of the fellows' shoulders tells their story, and the engineer may begin at once to assume his "angry countenance." Certainly the brass of the hand-rail will be clouded; and if the brass be not immaculate, certainly all will be to match—the reflectors scratched, the spare lamp unready, the

## THE COAST OF FIFE

storm-panes in the store-house. If a light is not rather more than middling good, it will be radically bad. Mediocrity (except in literature) appears to be unattainable by man. But of course the unfortunate of St. Andrews was only an amateur, he was not in the Service, he had no uniform coat, he was (I believe) a plumber by his trade and stood (in the mediæval phrase) quite out of the danger of my father; but he had a painful interview for all that, and perspired extremely.

From St. Andrews, we drove over Magus Muir. My father had announced we were "to post," and the phrase called up in my hopeful mind visions of top-boots and the pictures in Rowlandson's *Dance of Death*; but it was only a jingling cab that came to the inn door, such as I had driven in a thousand times at the low price of one shilling on the streets of Edinburgh. Beyond this disappointment, I remember nothing of that drive. It is a road I have often travelled, and of not one of these journeys do I remember any single trait. The fact has not been suffered to encroach on the truth of the imagination. I still see Magus Muir two hundred years ago; a desert place, quite unenclosed; in the midst, the primate's carriage fleeing at the gallop; the assassins loose-reined in pursuit, Burley Balfour, pistol in hand, among the first. No scene of history has ever written itself so deeply on my mind; not because Balfour, that

## RANDOM MEMORIES

questionable zealot, was an ancestral cousin of my own; not because of the pleadings of the victim and his daughter; not even because of the live bum-bee that flew out of Sharpe's 'bacco-box, thus clearly indicating his complicity with Satan; nor merely because, as it was after all a crime of a fine religious flavour, it figured in Sunday books and afforded a grateful relief from *Ministering Children* or the *Memoirs of Mrs. Katherine Winslowe*. The figure that always fixed my attention is that of Hackston of Rathillet, sitting in the saddle with his cloak about his mouth, and through all that long, bungling, vociferous hurly-burly, revolving privately a case of conscience. He would take no hand in the deed, because he had a private spite against the victim, and "that action" must be sullied with no suggestion of a worldly motive; on the other hand, "that action" in itself was highly justified, he had cast in his lot with "the actors," and he must stay there, inactive but publicly sharing the responsibility. "You are a gentleman—you will protect me!" cried the wounded old man, crawling towards him. "I will never lay a hand on you," said Hackston, and put his cloak about his mouth. It is an old temptation with me, to pluck away that cloak and see the face—to open that bosom and to read the heart. With incomplete romances about Hackston, the drawers of my youth were lumbered. I read him up in every printed book

## THE COAST OF FIFE

that I could lay my hands on. I even dug among the Wodrow manuscripts, sitting shame-faced in the very room where my hero had been tortured two centuries before, and keenly conscious of my youth in the midst of other and (as I fondly thought) more gifted students. All was vain: that he had passed a riotous non-age, that he was a zealot, that he twice displayed (compared with his grotesque companions) some tincture of soldierly resolution and even of military common-sense, and that he figured memorably in the scene on Magus Muir, so much and no more could I make out. But whenever I cast my eyes backward, it is to see him like a landmark on the plains of history, sitting with his cloak about his mouth, inscrutable. How small a thing creates an immortality! I do not think he can have been a man entirely commonplace; but had he not thrown his cloak about his mouth, or had the witnesses forgot to chronicle the action, he would not thus have haunted the imagination of my boyhood, and to-day he would scarce delay me for a paragraph. An incident, at once romantic and dramatic, which at once awakes the judgment and makes a picture for the eye, how little do we realise its perdurable power! Perhaps no one does so but the author, just as none but he appreciates the influence of jingling words; so that he looks on upon life, with something of a covert smile, seeing people led by

## RANDOM MEMORIES

what they fancy to be thoughts and what are really the accustomed artifices of his own trade, or roused by what they take to be principles and are really picturesque effects. In a pleasant book about a school-class club, Colonel Fergusson has recently told a little anecdote. A "Philosophical Society" was formed by some Academy boys—among them, Colonel Fergusson himself, Fleeming Jenkin, and Andrew Wilson, the Christian Buddhist and author of *The Abode of Snow*. Before these learned pundits, one member laid the following ingenious problem: "What would be the result of putting a pound of potassium in a pot of porter?" "I should think there would be a number of interesting bi-products," said a smatterer at my elbow; but for me the tale itself has a bi-product, and stands as a type of much that is most human. For this inquirer who conceived himself to burn with a zeal entirely chemical, was really immersed in a design of a quite different nature; unconsciously to his own recently breeched intelligence, he was engaged in literature. Putting, pound, potassium, pot, porter; initial p, mediant t—that was his idea, poor little boy! So with politics and that which excites men in the present, so with history and that which rouses them in the past: there lie at the root of what appears most serious unsuspected elements. The triple town of Anstruther Wester, Anstruther Easter, and Cellardyke, all three

## THE COAST OF FIFE

Royal Burghs—or two Royal Burghs and a less distinguished suburb, I forget which—lies continuously along the sea-side, and boasts of either two or three separate parish churches, and either two or three separate harbours. These ambiguities are painful; but the fact is (although it argue me uncultured), I am but poorly posted upon Cellardyke. My business lay in the two Anstruthers. A tricklet of a stream divides them, spanned by a bridge; and over the bridge at the time of my knowledge, the celebrated Shell House stood outpost on the west. This had been the residence of an agreeable eccentric; during his fond tenancy, he had illustrated the outer walls, as high (if I remember rightly) as the roof, with elaborate patterns and pictures, and snatches of verse in the vein of *exegi monumentum*; shells and pebbles, artfully contrasted and conjoined, had been his medium; and I like to think of him standing back upon the bridge, when all was finished, drinking in the general effect and (like Gibbon) already lamenting his employment.

The same bridge saw another sight in the seventeenth century. = Mr. Thomson, the “curat” of Anstruther Easter, was a man highly obnoxious to the devout: in the first place, because he was a “curat”; in the second place, because he was a person of irregular and scandalous life; and in the third place, because he was generally suspected of dealings with the En-

## RANDOM MEMORIES

emy of Man. These three disqualifications, in the popular literature of the time, go hand in hand; but the end of Mr. Thomson was a thing quite by itself, and in the proper phrase, a manifest judgment. He had been at a friend's house in Anstruther Wester, where (and elsewhere, I suspect,) he had partaken of the bottle; indeed, to put the thing in our cold modern way, the reverend gentleman was on the brink of *delirium tremens*. It was a dark night, it seems; a little lassie came carrying a lantern to fetch the curate home; and away they went down the street of Anstruther Wester, the lantern swinging a bit in the child's hand, the barred lustre tossing up and down along the front of slumbering houses, and Mr. Thomson not altogether steady on his legs nor (to all appearance) easy in mind. The pair had reached the middle of the bridge when (as I conceive the scene) the poor tippler started in some baseless fear and looked behind him; the child, already shaken by the minister's strange behaviour, started also; in so doing, she would jerk the lantern; and for the space of a moment the lights and the shadows would be all confounded. Then it was that to the unhinged toper and the twittering child, a huge bulk of blackness seemed to sweep down, to pass them close by as they stood upon the bridge, and to vanish on the farther side in the general darkness of the night. "Plainly the devil came for Mr. Thom-

## THE COAST OF FIFE

son!" thought the child. What Mr. Thomson thought himself, we have no ground of knowledge; but he fell upon his knees in the midst of the bridge like a man praying. On the rest of the journey to the manse, history is silent; but when they came to the door, the poor caitiff, taking the lantern from the child, looked upon her with so lost a countenance that her little courage died within her, and she fled home screaming to her parents. Not a soul would venture out; all that night, the minister dwelt alone with his terrors in the manse; and when the day dawned, and men made bold to go about the streets, they found the devil had come indeed for Mr. Thomson.

This manse of Anstruther Easter has another and a more cheerful association. It was early in the morning, about a century before the days of Mr. Thomson, that his predecessor was called out of bed to welcome a Grandee of Spain, the Duke of Medina Sidonia, just landed in the harbour underneath. But sure there was never seen a more decayed grandee; sure there was never a duke welcomed from a stranger place of exile. Half-way between Orkney and Shetland, there lies a certain isle; on the one hand the Atlantic, on the other the North Sea, bombard its pillared cliffs; sore-eyed, short-living, inbred fishers and their families herd in its few huts; in the graveyard pieces of wreck-wood stand for monuments; there is nowhere a more

## RANDOM MEMORIES

inhospitable spot. *Belle-Isle-en-Mer*—Fair-Isle-at-Sea—that is a name that has always rung in my mind's ear like music; but the only "Fair Isle" on which I ever set my foot, was this un-homely, rugged turret-top of submarine sierras. Here, when his ship was broken, my lord Duke joyfully got ashore; here for long months he and certain of his men were harboured; and it was from this durance that he landed at last to be welcomed (as well as such a papist deserved, no doubt) by the godly incumbent of Anstruther Easter; and after the Fair Isle, what a fine city must that have appeared! and after the island diet, what a hospitable spot the minister's table! And yet he must have lived on friendly terms with his outlandish hosts. For to this day there still survives a relic of the long winter evenings when the sailors of the great Armada crouched about the hearths of the Fair-Islanders, the planks of their own lost galleon perhaps lighting up the scene, and the gale and the surf that beat about the coast contributing their melancholy voices. All the folk of the north isles are great artificers of knitting: the Fair-Islanders alone dye their fabrics in the Spanish manner. To this day, gloves and nightcaps, innocently decorated, may be seen for sale in the Shetland warehouse at Edinburgh, or on the Fair Isle itself in the catechist's house; and to this day, they tell the story of the Duke of Medina Sidonia's adventure.

## THE COAST OF FIFE

It would seem as if the Fair Isle had some attraction for "persons of quality." When I landed there myself, an elderly gentleman, unshaved, poorly attired, his shoulders wrapped in a plaid, was seen walking to and fro, with a book in his hand, upon the beach. He paid no heed to our arrival, which we thought a strange thing in itself; but when one of the officers of the *Pharos*, passing narrowly by him, observed his book to be a Greek Testament, our wonder and interest took a higher flight. The catechist was cross-examined; he said the gentleman had been put across some time before in Mr. Bruce of Sumburgh's schooner, the only link between the Fair Isle and the rest of the world; and that he held services and was doing "good." So much came glibly enough; but when pressed a little further, the catechist displayed embarrassment. A singular diffidence appeared upon his face: "They tell me," said he, in low tones, "that he's a lord." And a lord he was, a peer of the realm pacing that inhospitable beach with his Greek Testament, and his plaid about his shoulders, set upon doing good, as he understood it, worthy man! And his grandson, a good-looking little boy, much better dressed than the lordly evangelist, and speaking with a silken English accent very foreign to the scene, accompanied me for a while in my exploration of the island. I suppose this little fellow is now my lord, and wonder how much he re-

## RANDOM MEMORIES

members of the Fair Isle. Perhaps not much; for he seemed to accept very quietly his savage situation; and under such guidance, it is like that this was not his first nor yet his last adventure.

## X

### THE EDUCATION OF AN ENGINEER

**A**NSTRUTHER is a place sacred to the Muse; she inspired (really to a considerable extent) Tennant's vernacular poem *Anster Fair*; and I have there waited upon her myself with much devotion. This was when I came as a young man to glean engineering experience from the building of the breakwater. What I gleaned, I am sure I do not know; but in deed I had already my own private determination to be an author; I loved the art of words and the appearances of life; and *travellers*, and *headers*, and *rubble*, and *polished ashlar*, and *pierres perdues*, and even the thrilling question of the *string-course*, interested me only (if they interested me at all) as properties for some possible romance or as words to add to my vocabulary. To grow a little catholic is the compensation of years; youth is one-eyed; and in those days, though I haunted the breakwater by day, and even loved the place for the sake of the sunshine, the thrilling sea-side air, the wash of

## RANDOM MEMORIES

waves on the sea-face, the green glimmer of the divers' helmets far below, and the musical chinking of the masons, my one genuine pre-occupation lay elsewhere, and my only industry was in the hours when I was not on duty. I lodged with a certain Bailie Brown, a carpenter by trade; and there, as soon as dinner was despatched, in a chamber scented with dry rose-leaves, drew in my chair to the table and proceeded to pour forth literature, at such a speed, and with such intimations of early death and immortality, as I now look back upon with wonder. Then it was that I wrote *Voces Fidelium*, a series of dramatic monologues in verse; then that I indited the bulk of a covenanting novel—like so many others, never finished. Late I sat into the night, toiling (as I thought) under the very dart of death, toiling to leave a memory behind me. I feel moved to thrust aside the curtain of the years, to hail that poor feverish idiot, to bid him go to bed and clap *Voces Fidelium* on the fire before he goes; so clear does he appear before me, sitting there between his candles in the rose-scented room and the late night; so ridiculous a picture (to my elderly wisdom) does the fool present! But he was driven to his bed at last without miraculous intervention; and the manner of his driving sets the last touch upon this eminently youthful business. The weather was then so warm that I must keep the windows open; the night without was populous with

## EDUCATION OF AN ENGINEER

moths. As the late darkness deepened, my literary tapers beacons forth more brightly; thicker and thicker came the dusty night-fliers, to gyrate for one brilliant instant round the flame and fall in agonies upon my paper. Flesh and blood could not endure the spectacle; to capture immortality was doubtless a noble enterprise, but not to capture it at such a cost of suffering; and out would go the candles, and off would I go to bed in the darkness, raging to think that the blow might fall on the morrow, and there was *Voces Fidelium* still incomplete. Well, the moths are all gone, and *Voces Fidelium* along with them; only the fool is still on hand and practises new follies.

Only one thing in connection with the harbour tempted me, and that was the diving, an experience I burned to taste of. But this was not to be, at least in Anstruther; and the subject involves a change of scene to the subarctic town of Wick. You can never have dwelt in a country more unsightly than that part of Caithness, the land faintly swelling, faintly falling, not a tree, not a hedgerow, the fields divided by single slate stones set upon their edge, the wind always singing in your ears and (down the long road that led nowhere) thrumming in the telegraph wires. Only as you approached the coast was there anything to stir the heart. The plateau broke down to the North Sea in formidable cliffs, the tall out-stacks rose like pillars ringed

## RANDOM MEMORIES

about with surf, the coves were over-brimmed with clamorous froth, the sea-birds screamed, the wind sang in the thyme on the cliff's edge; here and there, small ancient castles toppled on the brim; here and there, it was possible to dip into a dell of shelter, where you might lie and tell yourself you were a little warm, and hear (near at hand) the whin-pods bursting in the afternoon sun, and (farther off) the rumour of the turbulent sea. As for Wick itself, it is one of the meanest of man's towns, and situate certainly on the baldest of God's bays. It lives for herring, and a strange sight it is to see (of an afternoon) the heights of Pulteney blackened by seaward-looking fishers, as when a city crowds to a review—or, as when bees have swarmed, the ground is horrible with lumps and clusters; and a strange sight, and a beautiful, to see the fleet put silently out against a rising moon, the sea-line rough as a wood with sails, and ever and again and one after another, a boat flitting swiftly by the silver disk. This mass of fishers, this great fleet of boats, is out of all proportion to the town itself; and the oars are manned and the nets hauled by immigrants from the Long Island (as we call the outer Hebrides), who come for that season only, and depart again, if "the take" be poor, leaving debts behind them. In a bad year, the end of the herring fishery is therefore an exciting time; fights are common, riots often possible; an apple

## EDUCATION OF AN ENGINEER

knocked from a child's hand was once the signal for something like a war; and even when I was there, a gunboat lay in the bay to assist the authorities. To contrary interests, it should be observed, the curse of Babel is here added: the Lews men are Gaelic speakers, those of Caithness have adopted English; an odd circumstance, if you reflect that both must be largely Norsemen by descent. I remember seeing one of the strongest instances of this division: a thing like a Punch-and-Judy box erected on the flat grave-stones of the churchyard; from the hutch or proscenium—I know not what to call it—an eldritch-looking preacher laying down the law in Gaelic about some one of the name of *Powl*, whom I at last divined to be the apostle to the Gentiles; a large congregation of the Lews men very devoutly listening; and on the outskirts of the crowd, some of the town's children (to whom the whole affair was Greek and Hebrew) profanely playing tigg. The same descent, the same country, the same narrow sect of the same religion, and all these bonds made very largely nugatory by an accidental difference of dialect!

Into the bay of Wick stretched the dark length of the unfinished breakwater, in its cage of open staging; the travellers (like frames of churches) over-plumbing all; and away at the extreme end, the divers toiling unseen on the foundation. On a platform of loose planks, the assistants turned their air-mills; a stone might be swinging be-

## RANDOM MEMORIES

tween wind and water; underneath the swell ran gaily; and from time to time, a mailed dragon with a window-glass snout came dripping up the ladder. Youth is a blessed season after all; my stay at Wick was in the year of *Voces Fidelium* and the rose-leaf room at Bailie Brown's; and already I did not care two straws for literary glory. Posthumous ambition perhaps requires an atmosphere of roses; and the more rugged excitant of Wick east winds had made another boy of me. To go down in the diving-dress, that was my absorbing fancy; and with the countenance of a certain handsome scamp of a diver, Bob Bain by name, I gratified the whim.

It was grey, harsh, easterly weather, the swell ran pretty high, and out in the open there were "skipper's daughters," when I found myself at last on the diver's platform, twenty pounds of lead upon each foot and my whole person swollen with ply and ply of woollen underclothing. One moment, the salt wind was whistling round my night-capped head; the next, I was crushed almost double under the weight of the helmet. As that intolerable burthen was laid upon me, I could have found it in my heart (only for shame's sake) to cry off from the whole enterprise. But it was too late. The attendants began to turn the hurdy-gurdy, and the air to whistle through the tube; some one screwed in the barred window of the vizor; and I was cut

## EDUCATION OF AN ENGINEER

off in a moment from my fellow-men; standing there in their midst, but quite divorced from intercourse: a creature deaf and dumb, pathetically looking forth upon them from a climate of his own. Except that I could move and feel, I was like a man fallen in a catalepsy. But time was scarce given me to realise my isolation; the weights were hung upon my back and breast, the signal-rope was thrust into my unresisting hand; and setting a twenty-pound foot upon the ladder, I began ponderously to descend.

Some twenty rounds below the platform, twilight fell. Looking up, I saw a low green heaven mottled with vanishing bells of white; looking around, except for the weedy spokes and shafts of the ladder, nothing but a green gloaming, somewhat opaque but very restful and delicious. Thirty rounds lower, I stepped off on the *pierres perdues* of the foundation; a dumb helmeted figure took me by the hand, and made a gesture (as I read it) of encouragement; and looking in at the creature's window, I beheld the face of Bain. There we were, hand to hand and (when it pleased us) eye to eye; and either might have burst himself with shouting, and not a whisper come to his companion's hearing. Each, in his own little world of air, stood incommunicably separate.

Bob had told me ere this a little tale, a five minutes' drama at the bottom of the sea, which at that moment possibly shot across my mind.

## RANDOM MEMORIES

He was down with another, settling a stone of the sea-wall. They had it well adjusted, Bob gave the signal, the scissors were slipped, the stone set home; and it was time to turn to something else. But still his companion remained bowed over the block like a mourner on a tomb, or only raised himself to make absurd contortions and mysterious signs unknown to the vocabulary of the diver. There, then, these two stood for a while, like the dead and the living; till there flashed a fortunate thought into Bob's mind, and he stooped, peered through the window of that other world, and beheld the face of its inhabitant wet with streaming tears. Ah! the man was in pain! And Bob, glancing downward, saw what was the trouble: the block had been lowered on the foot of that unfortunate—he was caught alive at the bottom of the sea under fifteen tons of rock.

That two men should handle a stone so heavy, even swinging in the scissors, may appear strange to the inexpert. These must bear in mind the great density of the water of the sea, and the surprising results of transplantation to that medium. To understand a little what these are, and how a man's weight, so far from being an encumbrance, is the very ground of his agility, was the chief lesson of my submarine experience. The knowledge came upon me by degrees. As I began to go forward with the hand of my estranged companion, a world of tumbled stones

## EDUCATION OF AN ENGINEER

was visible, pillared with the weedy uprights of the staging: overhead, a flat roof of green: a little in front, the sea-wall, like an unfinished rampart. And presently in our upward progress, Bob motioned me to leap upon a stone. I looked to see if he were possibly in earnest, and he only signed to me the more imperiously. Now the block stood six feet high; it would have been quite a leap to me unencumbered; with the breast and back weights, and the twenty pounds upon each foot, and the staggering load of the helmet, the thing was out of reason. I laughed aloud in my tomb; and to prove to Bob how far he was astray, I gave a little impulse from my toes. Up I soared like a bird, my companion soaring at my side. As high as to the stone, and then higher, I pursued my impotent and empty flight. Even when the strong arm of Bob had checked my shoulders, my heels continued their ascent; so that I blew out sideways like an autumn leaf, and must be hauled in, hand over hand, as sailors haul in the slack of a sail, and propped upon my feet again like an intoxicated sparrow. Yet a little higher on the foundation, and we began to be affected by the bottom of the swell, running there like a strong breeze of wind. Or so I must suppose; for, safe in my cushion of air, I was conscious of no impact; only swayed idly like a weed, and was now borne helplessly abroad, and now swiftly—and yet with dream-like gentleness—impelled against

## RANDOM MEMORIES

my guide. So does a child's balloon divagate upon the currents of the air, and touch and slide off again from every obstacle. So must have ineffectually swung, so resented their inefficiency, those light crowds that followed the Star of Hades, and uttered exiguous voices in the land beyond Cocytus.

There was something strangely exasperating, as well as strangely wearying, in these uncommanded evolutions. It is bitter to return to infancy, to be supported, and directed, and perpetually set upon your feet, by the hand of some one else. The air besides, as it is supplied to you by the busy millers on the platform, closes the eustachian tubes and keeps the neophyte perpetually swallowing, till his throat is grown so dry that he can swallow no longer. And for all these reasons—although I had a fine, dizzy, muddle-headed joy in my surroundings, and longed, and tried, and always failed, to lay hands on the fish that darted here and there about me, swift as humming-birds—yet I fancy I was rather relieved than otherwise when Bain brought me back to the ladder and signed to me to mount. And there was one more experience before me even then. Of a sudden, my ascending head passed into the trough of a swell. Out of the green, I shot at once into a glory of rosy, almost of sanguine light—the multitudinous seas incarnadined, the heaven above a vault of crimson. And then the glory faded into the hard,

## EDUCATION OF AN ENGINEER

ugly daylight of a Caithness autumn, with a low sky, a grey sea, and a whistling wind.

Bob Bain had five shillings for his trouble, and I had done what I desired. It was one of the best things I got from my education as an engineer: of which however, as a way of life, I wish to speak with sympathy. It takes a man into the open air; it keeps him hanging about harbour-sides, which is the richest form of idling; it carries him to wild islands; it gives him a taste of the genial dangers of the sea; it supplies him with dexterities to exercise; it makes demands upon his ingenuity; it will go far to cure him of any taste (if ever he had one) for the miserable life of cities. And when it has done so it carries him back and shuts him in an office! From the roaring skerry and the wet thwart of the tossing boat, he passes to the stool and desk; and with a memory full of ships, and seas, and perilous headlands, and the shining pharos, he must apply his long-sighted eyes to the petty niceties of drawing, or measure his inaccurate mind with several pages of consecutive figures. He is a wise youth, to be sure, who can balance one part of genuine life against two parts of drudgery between four walls, and for the sake of the one, manfully accept the other.

Wick was scarce an eligible place of stay. But how much better it was to hang in the cold wind upon the pier, to go down with Bob Bain among the roots of the staging, to be all day in

## RANDOM MEMORIES

a boat coiling a wet rope and shouting orders—not always very wise—than to be warm and dry, and dull, and dead-alive, in the most comfortable office. And Wick itself had in those days a note of originality. It may have still, but I misdoubt it much. The old minister of Keiss would not preach, in these degenerate times, for an hour and a half upon the clock. The gipsies must be gone from their caverns; where you might see, from the mouth, the women tending their fire, like Meg Merrilies, and the men sleeping off their coarse potations; and where in winter gales, the surf would beleaguer them closely, bursting in their very door. A traveller to-day upon the Thurso coach would scarce observe a little cloud of smoke among the moorlands, and be told, quite openly, it marked a private still. He would not indeed make that journey, for there is now no Thurso coach. And even if he could, one little thing that happened to me could never happen to him, or not with the same trenchancy of contrast.

We had been upon the road all evening; the coach-top was crowded with Lews fishers going home, scarce anything but Gaelic had sounded in my ears; and our way had lain throughout over a moorish country very modern to behold. Latish at night, though it was still broad day in our subarctic latitude, we came down upon the shores of the roaring Pentland Firth, that grave

## EDUCATION OF AN ENGINEER

of mariners; on one hand, the cliffs of Dunnet Head ran seaward; in front was the little bare, white town of Castleton, its streets full of blowing sand; nothing beyond, but the North Islands, the great deep, and the perennial ice-fields of the Pole. And here, in the last imaginable place, there sprang up young outlandish voices and a chatter of some foreign speech; and I saw, pursuing the coach with its load of Hebridean fishers—as they had pursued *vetturini* up the passes of the Apennines or perhaps along the grotto under Virgil's tomb—two little dark-eyed, white-toothed Italian vagabonds, of twelve to fourteen years of age, one with a hurdy-gurdy, the other with a cage of white mice. The coach passed on, and their small Italian chatter died in the distance; and I was left to marvel how they had wandered into that country, and how they fared in it, and what they thought of it, and when (if ever) they should see again the silver wind-breaks run among the olives, and the stone-pine stand guard upon Etruscan sepulchres.

Upon any American, the strangeness of this incident is somewhat lost. For as far back as he goes in his own land, he will find some alien camping there; the Cornish miner, the French or Mexican half-blood, the negro in the South, these are deep in the woods and far among the mountains. But in an old, cold, and rugged country such as mine, the days of immigration are long at an end; and away up there, which was at that

## RANDOM MEMORIES

time far beyond the northernmost extreme of railways, hard upon the shore of that ill-omened strait of whirlpools, in a land of moors where no stranger came, unless it should be a sportsman to shoot grouse or an antiquary to decipher runes, the presence of these small pedestrians struck the mind as though a bird-of-paradise had risen from the heather or an albatross come fishing in the bay of Wick. They were as strange to their surroundings as my lordly evangelist or the old Spanish grandee on the Fair Isle.

## XI

### A CHRISTMAS SERMON

**B**Y the time this paper appears, I shall have been talking for twelve months; and it is thought I should take my leave in a formal and seasonable manner. Valedictory eloquence is rare, and death-bed sayings have not often hit the mark of the occasion. Charles Second, wit and sceptic, a man whose life had been one long lesson in human incredulity, an easy-going comrade, a manœuvring king—remembered and embodied all his wit and scepticism along with more than his usual good-humour in the famous “I am afraid, gentlemen, I am an unconscionable time a-dying.”

#### I

An unconscionable time a-dying—there is the picture (“I am afraid, gentlemen,”) of your life and of mine. The sands run out, and the hours are “numbered and imputed,” and the days go by; and when the last of these finds us, we have been a long time dying, and what else? The

## RANDOM MEMORIES

very length is something, if we reach that hour of separation undishonoured; and to have lived at all is doubtless (in the soldierly expression) to have served. There is a tale in Tacitus of how the veterans mutinied in the German wilderness; of how they mobbed Germanicus, clamouring to go home; and of how, seizing their general's hand, these old war-worn exiles passed his finger along their toothless gums. *Sunt lacrymæ rerum*: this was the most eloquent of the songs of Simeon. And when a man has lived to a fair age, he bears his marks of service. He may have never been remarked upon the breach at the head of the army; at least he shall have lost his teeth on the camp bread.

The idealism of serious people in this age of ours is of a noble character. It never seems to them that they have served enough; they have a fine impatience of their virtues. It were perhaps more modest to be singly thankful that we are no worse. It is not only our enemies, those desperate characters—it is we ourselves who know not what we do;—thence springs the glimmering hope that perhaps we do better than we think: that to scramble through this random business with hands reasonably clean, to have played the part of a man or woman with some reasonable fulness, to have often resisted the diabolic, and at the end to be still resisting it, is for the poor human soldier to have done right well. To ask to see some fruit of our endeavour

## A CHRISTMAS SERMON

is but a transcendental way of serving for reward; and what we take to be contempt of self is only greed of hire.

And again if we require so much of ourselves, shall we not require much of others? If we do not genially judge our own deficiencies, is it not to be feared we shall be even stern to the trespasses of others? And he who (looking back upon his own life) can see no more than that he has been unconscionably long a-dying, will he not be tempted to think his neighbour unconscionably long of getting hanged? It is probable that nearly all who think of conduct at all, think of it too much; it is certain we all think too much of sin. We are not damned for doing wrong, but for not doing right; Christ would never hear of negative morality; *thou shalt* was ever his word, with which he superseded *thou shalt not*. To make our idea of morality centre on forbidden acts is to defile the imagination and to introduce into our judgments of our fellow-men a secret element of gusto. If a thing is wrong for us, we should not dwell upon the thought of it; or we shall soon dwell upon it with inverted pleasure. If we cannot drive it from our minds—one thing of two: either our creed is in the wrong and we must more indulgently remodel it; or else, if our morality be in the right, we are criminal lunatics and should place our persons in restraint. A mark of such unwholesomely divided minds is the passion for

## RANDOM MEMORIES

interference with others: the Fox without the Tail was of this breed, but had (if his biographer is to be trusted) a certain antique civility now out of date. A man may have a flaw, a weakness, that unfits him for the duties of life, that spoils his temper, that threatens his integrity, or that betrays him into cruelty. It has to be conquered; but it must never be suffered to engross his thoughts. The true duties lie all upon the farther side, and must be attended to with a whole mind so soon as this preliminary clearing of the decks has been effected. In order that he may be kind and honest, it may be needful he should become a total abstainer; let him become so then, and the next day let him forget the circumstance. Trying to be kind and honest will require all his thoughts; a mortified appetite is never a wise companion; in so far as he has had to mortify an appetite, he will still be the worse man; and of such an one a great deal of cheerfulness will be required in judging life, and a great deal of humility in judging others.

It may be argued again that dissatisfaction with our life's endeavour springs in some degree from dulness. We require higher tasks, because we do not recognise the height of those we have. Trying to be kind and honest seems an affair too simple and too inconsequential for gentlemen of our heroic mould; we had rather set ourselves to something bold, arduous, and conclusive; we had rather found a schism or suppress a heresy,

## A CHRISTMAS SERMON

cut off a hand or mortify an appetite. But the task before us, which is to co-endure with our existence, is rather one of microscopic fineness, and the heroism required is that of patience. There is no cutting of the Gordian knots of life; each must be smilingly unravelled.

To be honest, to be kind—to earn a little and to spend a little less, to make upon the whole a family happier for his presence, to renounce when that shall be necessary and not be embittered, to keep a few friends but these without capitulation—above all, on the same grim condition, to keep friends with himself—here is a task for all that a man has of fortitude and delicacy. He has an ambitious soul who would ask more; he has a hopeful spirit who should look in such an enterprise to be successful. There is indeed one element in human destiny that not blindness itself can controvert: whatever else we are intended to do, we are not intended to succeed; failure is the fate allotted. It is so in every art and study; it is so above all in the continent art of living well. Here is a pleasant thought for the year's end or for the end of life: Only self-deception will be satisfied, and there need be no despair for the despairer.

### II

But Christmas is not only the mile-mark of another year, moving us to thoughts of self-examination: it is a season, from all its associa-

## RANDOM MEMORIES

tions, whether domestic or religious, suggesting thoughts of joy. A man dissatisfied with his endeavours is a man tempted to sadness. And in the midst of the winter, when his life runs lowest and he is reminded of the empty chairs of his beloved, it is well he should be condemned to this fashion of the smiling face. Noble disappointment, noble self-denial are not to be admired, not even to be pardoned, if they bring bitterness. It is one thing to enter the kingdom of heaven maim; another to maim yourself and stay without. And the kingdom of heaven is of the childlike, of those who are easy to please, who love and who give pleasure. Mighty men of their hands, the smiters and the builders and the judges, have lived long and done sternly and yet preserved this lovely character; and among our carpet interests and twopenny concerns, the shame were indelible if *we* should lose it. Gentleness and cheerfulness, these come before all morality; they are the perfect duties. And it is the trouble with moral men that they have neither one nor other. It was the moral man, the Pharisee, whom Christ could not away with. If your morals make you dreary, depend upon it they are wrong. I do not say "give them up," for they may be all you have; but conceal them like a vice, lest they should spoil the lives of better and simpler people.

A strange temptation attends upon man: to keep his eye on pleasures, even when he will not

## A CHRISTMAS SERMON

share in them; to aim all his morals against them. This very year a lady (singular iconoclast!) proclaimed a crusade against dolls; and the racy sermon against lust is a feature of the age. I venture to call such moralists insincere. At any excess or perversion of a natural appetite, their lyre sounds of itself with relishing denunciations; but for all displays of the truly diabolic—envy, malice, the mean lie, the mean silence, the calumnious truth, the backbiter, the petty tyrant, the peevish poisoner of family life—their standard is quite different. These are wrong, they will admit, yet somehow not so wrong; there is no zeal in their assault on them, no secret element of gusto warms up the sermon; it is for things not wrong in themselves that they reserve the choicest of their indignation. A man may naturally disclaim all moral kinship with the Reverend Mr. Zola or the hobgoblin old lady of the dolls; for these are gross and naked instances. And yet in each of us some similar element resides. The sight of a pleasure in which we cannot or else will not share moves us to a particular impatience. It may be because we are envious, or because we are sad, or because we dislike noise and romping—being so refined, or because—being so philosophic—we have an overweighing sense of life's gravity: at least, as we go on in years, we are all tempted to frown upon our neighbour's pleasures. People are nowadays so fond of resisting

## RANDOM MEMORIES

temptations; here is one to be resisted. They are fond of self-denial; here is a propensity that cannot be too peremptorily denied. There is an idea abroad among moral people that they should make their neighbours good. One person I have to make good: myself. But my duty to my neighbour is much more nearly expressed by saying that I have to make him happy—if I may.

### III

Happiness and goodness, according to canting moralists, stand in the relation of effect and cause. There was never anything less proved or less probable: our happiness is never in our own hands; we inherit our constitution; we stand buffet among friends and enemies; we may be so built as to feel a sneer or an aspersion with unusual keenness, and so circumstanced as to be unusually exposed to them; we may have nerves very sensitive to pain, and be afflicted with a disease very painful. Virtue will not help us, and it is not meant to help us. It is not even its own reward, except for the self-centred and—I had almost said—the unamiable. No man can pacify his conscience; if quiet be what he want, he shall do better to let that organ perish from disuse. And to avoid the penalties of the law, and the minor *capitis diminutio* of social ostracism, is an affair of wisdom—of cunning, if you will—and not of virtue.

In his own life, then, a man is not to expect

## A CHRISTMAS SERMON

happiness, only to profit by it gladly when it shall arise; he is on duty here; he knows not how or why, and does not need to know; he knows not for what hire, and must not ask. Somehow or other, though he does not know what goodness is, he must try to be good; somehow or other, though he cannot tell what will do it, he must try to give happiness to others. And no doubt there comes in here a frequent clash of duties. How far is he to make his neighbour happy? How far must he respect that smiling face, so easy to cloud, so hard to brighten again? And how far, on the other side, is he bound to be his brother's keeper and the prophet of his own morality? How far must he resent evil?

The difficulty is that we have little guidance; Christ's sayings on the point being hard to reconcile with each other, and (the most of them) hard to accept. But the truth of his teaching would seem to be this: in our own person and fortune, we should be ready to accept and to pardon all; it is *our* cheek we are to turn, *our* coat that we are to give away to the man who has taken *our* cloak. But when another's face is buffeted, perhaps a little of the lion will become us best. That we are to suffer others to be injured, and stand by, is not conceivable and surely not desirable. Revenge, says Bacon, is a kind of wild justice; its judgments at least are delivered by an insane judge; and in our own quarrel we can see nothing truly and do nothing

## RANDOM MEMORIES

wisely. But in the quarrel of our neighbour, let us be more bold. One person's happiness is as sacred as another's; when we cannot defend both, let us defend one with a stout heart. It is only in so far as we are doing this, that we have any right to interfere: the defence of B is our only ground of action against A. A has as good a right to go to the devil, as we to go to glory; and neither knows what he does.

The truth is that all these interventions and denunciations and militant mongerings of moral half-truths, though they be sometimes needful, though they are often enjoyable, do yet belong to an inferior grade of duties. Ill-temper and envy and revenge find here an arsenal of pious disguises; this is the playground of inverted lusts. With a little more patience and a little less temper, a gentler and wiser method might be found in almost every case; and the knot that we cut by some fine heady quarrel-scene in private life, or, in public affairs, by some denunciatory act against what we are pleased to call our neighbour's vices, might yet have been unwoven by the hand of sympathy.

### IV

To look back upon the past year, and see how little we have striven and to what small purpose; and how often we have been cowardly and hung back, or temerarious and rushed unwisely in; and how every day and all day long we have

## A CHRISTMAS SERMON

transgressed the law of kindness;—it may seem a paradox, but in the bitterness of these discoveries, a certain consolation resides. Life is not designed to minister to a man's vanity. He goes upon his long business most of the time with a hanging head, and all the time like a blind child. Full of rewards and pleasures as it is—so that to see the day break or the moon rise, or to meet a friend, or to hear the dinner-call when he is hungry, fills him with surprising joys—this world is yet for him no abiding city. Friendships fall through, health fails, weariness assails him; year after year, he must thumb the hardly varying record of his own weakness and folly. It is a friendly process of detachment. When the time comes that he should go, there need be few illusions left about himself. *Here lies one who meant well, tried a little, failed much:*—surely that may be his epitaph, of which he need not be ashamed. Nor will he complain at the summons which calls a defeated soldier from the field: defeated, ay, if he were Paul or Marcus Aurelius!—but if there is still one inch of fight in his old spirit, undishonoured. The faith which sustained him in his life-long blindness and life-long disappointment will scarce even be required in this last formality of laying down his arms. Give him a march with his old bones; there, out of the glorious sun-coloured earth, out of the day and the dust and the ecstasy—there goes another Faithful Failure!

## RANDOM MEMORIES

From a recent book of verse, where there is more than one such beautiful and manly poem, I take this memorial piece: it says better than I can, what I love to think; let it be our parting word:—

“A late lark twitters from the quiet skies;  
And from the west,  
Where the sun, his day’s work ended,  
Lingers as in content,  
There falls on the old, grey city  
An influence luminous and serene,  
A shining peace.

“The smoke ascends  
In a rosy-and-golden haze. The spires  
Shine, and are changed. In the valley  
Shadows rise. The lark sings on. The sun,  
Closing his benediction,  
Sinks, and the darkening air  
Thrills with a sense of the triumphing night—  
Night, with her train of stars  
And her great gift of sleep.

“So be my passing!  
My task accomplished and the long day done,  
My wages taken, and in my heart  
Some late lark singing,  
Let me be gathered to the quiet west,  
The sundown splendid and serene,  
Death.”<sup>1</sup>

<sup>1</sup>From *A Book of Verses*, by William Ernest Henley. D. Nutt, 1888.

RECORDS OF A FAMILY OF  
ENGINEERS

This fragment of family biography was published for the first time in *The Edinburgh Edition*. To it Stevenson had devoted part of several years of his life in Samoa, especially during the summer of 1893. Although he afterwards received information which caused him to modify his views in several particulars, so far as is known, he did not revise his original manuscript to embody such corrections.

In the text here presented, all footnotes not followed by the author's initials are Sidney Colvin's.

## INTRODUCTION

### THE SURNAME OF STEVENSON

FROM the thirteenth century onwards, the name, under the various disguises of Stevinstoun, Stevensoun, Stevensonne, Stene-sone, and Stewinsoune, spread across Scotland from the mouth of the Firth of Forth to the mouth of the Firth of Clyde. Four times at least it occurs as a place-name. There is a parish of Stevenston in Cunningham; a second place of the name in the Barony of Bothwell in Lanark; a third on Lyne, above Drochil Castle; the fourth on the Tyne, near Traprain Law. Stevenson of Stevenson (co. Lanark) swore fealty to Edward I. in 1296, and the last of that family died after the Restoration. Stevensons of Hirdmanshiels, in Midlothian, rode in the Bishops' Raid of Aberlady, served as jurors, stood bail for neighbours—Hunter of Polwood, for instance—and became extinct about the same period, or possibly earlier. A Stevenson of Luthrie and another of Pitroddie make their bows, give their names, and vanish.

## A FAMILY OF ENGINEERS

And by the year 1700 it does not appear that any acre of Scots land was vested in any Stevenson.

Here is, so far, a melancholy picture of backward progress, and a family posting towards extinction. But the law (however administered, and I am bound to aver that, in Scotland, "it couldna weel be waur") acts as a kind of dredge, and with dispassionate impartiality brings up into the light of day, and shows us for a moment, in the jury-box or on the gallows, the creeping things of the past. By these broken glimpses we are able to trace the existence of many other and more inglorious Stevensons, picking a private way through the brawl that makes Scots history. They were members of Parliament for Peebles, Stirling, Pittenweem, Kilrenny, and Inverurie. We find them burgesses of Edinburgh; indwellers in Biggar, Perth, and Dalkeith. Thomas was the forester of Newbattle Park, Gavin was a baker, John a maltman, Francis a surgeon, and "Schir William" a priest. In the feuds of Humes and Heatleys, Cunninghams, Montgomeries, Mures, Ogilvies, and Turnbells, we find them inconspicuously involved, and apparently getting rather better than they gave. Schir William (reverend gentleman) was cruellie slaughtered on the Links of Kincaig in 1532; James ("in the mill-town of Robertson"), murdered in 1590; Archibald ("in Gallowfarren"), killed with shots of pistols and hagbuts in 1608. Three violent deaths in about seventy years,

## THE SURNAME OF STEVENSON

against which we can only put the case of Thomas, servant to Hume of Cowden Knowes, who was arraigned with his two young masters for the death of the Bastard of Mellerstanes in 1569. John ("in Dalkeith") stood sentry without Holyrood while the banded lords were despatching Rizzio within. William, at the ringing of Perth bell, ran before Gowrie House "with ane sword, and, entering to the yearde, saw George Craiggilt with ane twa-handit sword and utheris nychtbouris; at quilk time James Boig cryit ower ane wynds, 'Awa hame! ye will all be hangit'"—a piece of advice which William took, and immediately "depairtit." John got a maid with child to him in Biggar, and seemingly deserted her; she was hanged on the Castle Hill for infanticide, June 1614; and Martin, elder in Dalkeith, eternally disgraced the name by signing witness in a witch trial, 1661. These are two of our black sheep.<sup>1</sup> Under the Restoration, one Stevenson was a bailie in Edinburgh, and another the lessee of the Canonmills. There were at the same period two physicians of the name in Edinburgh, one of whom, Dr. Archibald, appears to have been a famous man in his day and generation. The Court had continual need of him; it was he who reported, for instance, on the state of Rumbold; and he was for some time in the enjoyment of a pension of a thousand pounds Scots (about eighty pounds sterling) at

<sup>1</sup>Pitcairn's *Criminal Trials*, at large.—[R. L. S.]

## A FAMILY OF ENGINEERS

a time when five hundred pounds is described as "an opulent future." I do not know if I should be glad or sorry that he failed to keep favour; but on 6th January, 1682 (rather a cheerless New Year's present) his pension was expunged.<sup>1</sup> There need be no doubt, at least, of my exultation at the fact that he was knighted and recorded arms. Not quite so genteel, but still in public life, Hugh was Under-Clerk to the Privy Council, and liked being so extremely. I gather this from his conduct in September 1681, when, with all the lords and their servants, he took the woful and soul-destroying Test, swearing it "word by word upon his knees." And, behold! it was in vain, for Hugh was turned out of his small post in 1684.<sup>2</sup> Sir Archibald and Hugh were both plainly inclined to be trimmers; but there was one witness of the name of Stevenson who held high the banner of the Covenant—John, "Land-Labourer,<sup>3</sup> in the Parish of Daily, in Carrick," that "eminently pious man." He seems to have been a poor sickly soul, and shows himself disabled with scrofula, and prostrate and groaning aloud with fever; but the enthusiasm of the martyr burned high within him.

"I was made to take joyfully the spoiling of my goods, and with pleasure for His name's sake

<sup>2</sup>*Ibid.*, pp. 158, 299.—[R. L. S.]

<sup>3</sup>Working farmer: Fr., *laboureur*.

## THE SURNAME OF STEVENSON

wandered in deserts and in mountains, in dens and caves of the earth. I lay four months in the coldest season of the year in a haystack in my father's garden, and a whole February in the open fields not far from Camragen, and this I did without the least prejudice from the night air; one night, when lying in the fields near to the Carrick-Miln, I was all covered with snow in the morning. Many nights have I lain with pleasure in the churchyard of Old Daily, and made a grave my pillow; frequently have I resorted to the old walls about the glen, near to Camragen, and there sweetly rested." The visible hand of God protected and directed him. Dragoons were turned aside from the bramble-bush where he lay hidden. Miracles were performed for his behoof. "I got a horse and a woman to carry the child, and came to the same mountain, where I wandered by the mist before; it is commonly known by the name of Kellsrhins: when we came to go up the mountain, there came on a great rain, which we thought was the occasion of the child's weeping, and she wept so bitterly, that all we could do could not divert her from it, so that she was ready to burst. When we got to the top of the mountain, where the Lord had been formerly kind to my soul in prayer, I looked round me for a stone, and espying one, I went and brought it. When the woman with me saw me set down the stone, she smiled, and asked what I was going to do with

## A FAMILY OF ENGINEERS

it. I told her I was going to set it up as my Ebenezer, because hitherto, and in that place, the Lord had formerly helped, and I hoped would yet help. The rain still continuing, the child weeping bitterly, I went to prayer, and no sooner did I cry to God, but the child gave over weeping, and when we got up from prayer, the rain was pouring down on every side, but in the way where we were to go there fell not one drop; the place not rained on was as big as an ordinary avenue." And so great a saint was the natural butt of Satan's persecutions. "I retired to the fields for secret prayer about midnight. When I went to pray I was much straitened, and could not get one request, but 'Lord pity,' 'Lord help'; this I came over frequently; at length the terror of Satan fell on me in a high degree, and all I could say even then was—'Lord help.' I continued in the duty for some time, notwithstanding of this terror. At length I got up to my feet, and the terror still increased; then the enemy took me by the arm-pits, and seemed to lift me up by my arms. I saw a loch just before me, and I concluded he designed to throw me there by force; and had he got leave to do so, it might have brought a great reproach upon religion."<sup>1</sup> But it was otherwise

<sup>1</sup>This John Stevenson was not the only "witness" of the name; other Stevensons were actually killed during the persecutions, in the Glen of Trool, on Pentland, etc.; and it is very possible that the author's own ancestor was one of the mounted party embodied by Muir of Caldwell, only a day too late for Pentland. [S. C.]

## THE SURNAME OF STEVENSON

ordered, and the cause of piety escaped that danger.<sup>1</sup>

On the whole, the Stevensons may be described as decent, reputable folk, following honest trades—millers, maltsters, and doctors, playing the character parts in the Waverley Novels with propriety, if without distinction; and to an orphan looking about him in the world for a potential ancestry, offering a plain and quite unadorned refuge, equally free from shame and glory. John, the land-labourer, is the one living and memorable figure, and he, alas! cannot possibly be more near than a collateral. It was on August 12, 1678, that he heard Mr. John Welsh on the Craigdowhill, and “took the heavens, earth, and sun in the firmament that was shining on us, as also the ambassador who made the offer, and *the clerk who raised the psalms*, to witness that I did give myself away to the Lord in a personal and perpetual covenant never to be forgotten”; and already, in 1675, the birth of my direct ascendant was registered in Glasgow. So that I have been pursuing ancestors too far down; and John the land-labourer is debarred me, and I must relinquish from the trophies of my house his *rare soul-strengthening and comforting cordial*. It is the same case with the Edinburgh bailie and the miller of the Canonmills, worthy man! and with that public character, Hugh the Under-Clerk, and more than all, with

<sup>1</sup>Wodrow Society's *Select Biographies*, vol. ii.—[R. L. S.]

## A FAMILY OF ENGINEERS

Sir Archibald, the physician, who recorded arms. And I am reduced to a family of inconspicuous maltsters, in what was then the clean and handsome little city on the Clyde.

The name has a certain air of being Norse. But the story of Scottish nomenclature is confounded by a continual process of translation and half-translation from the Gaelic which in olden days may have been sometimes reversed. Roy becomes Reid; Gow, Smith. A great Highland clan uses the name of Robertson; a sept in Appin that of Livingstone; Maclean in Glencoe answers to Johnstone at Lockerby. And we find such hybrids as Macalexander for Macallister. There is but one rule to be deduced: that however uncompromisingly Saxon a name may appear, you can never be sure it does not designate a Celt. My great-grandfather wrote the name *Stevenson* but pronounced it *Steenson*, after the fashion of the immortal minstrel in *Redgauntlet*; and this elision of a medial consonant appears a Gaelic process; and, curiously enough, I have come across no less than two Gaelic forms: *John Macstophane cordinerius in Crossraguel*, 1573, and *William M'Steen in Dunskeith* (co. Ross), 1605. Stevenson, Steenson, Macstophane, M'Steen: which is the original? which the translation? Or were these separate creations of the patronymic, some English, some Gaelic? The curiously compact territory in which we find them seated—Ayr, Lanark,

## THE SURNAME OF STEVENSON

Peebles, Stirling, Perth, Fife, and the Lothians, would seem to forbid the supposition.<sup>1</sup>

“STEVENSON—or according to tradition of one of the proscribed of the clan MacGregor, who was born among the willows or in a hill-side sheep-pen—‘Son of my love,’ a heraldic bar sinister, but history reveals a reason for the birth among the willows far other than the sinister aspect of the name”: these are the dark words of Mr. Cosmo Innes; but history or tradition, being interrogated, tells a somewhat tangled tale. The heir of Macgregor of Glenorchy, murdered about 1353 by the Argyll Campbells, appears to have been the original “Son of my love”; and his more loyal clansmen took the name to fight under. It may be supposed the story of their resistance became popular, and the name in some sort identified with the idea of opposition to the Campbells. Twice afterwards, on some renewed aggression, in 1502 and 1552, we find the Macgregors again banding themselves into a sept of “Sons of my love”; and when the great disaster fell on them in 1603, the whole original legend re-appears, and we have the heir of Alaster of Glenstrae born “among the willows” of a fugitive mother, and the more loyal clansmen again rallying under the name of Stevenson. A story would not be told so often

<sup>1</sup>Though the districts here named are those in which the name of Stevenson is most common, it is in point of fact far more wide-spread than the text indicates, and occurs from Dumfries and Berwickshire to Aberdeen and Orkney. [S. C.]

## A FAMILY OF ENGINEERS

unless it had some base in fact; nor (if there were no bond at all between the Red Macgregors and the Stevensons) would that extraneous and somewhat uncouth name be so much repeated in the legends of the Children of the Mist.

But I am enabled, by my very lively and obliging correspondent, Mr. George A. Macgregor Stevenson of New York, to give an actual instance. His grandfather, great-grandfather, great-great-grandfather, and great-great-great-grandfather, all used the names of Macgregor and Stevenson as occasion served; being perhaps Macgregor by night and Stevenson by day. The great-great-great-grandfather was a mighty man of his hands, marched with the clan in the Forty-five, and returned with *spolia opima* in the shape of a sword, which he had wrested from an officer in the retreat, and which is in the possession of my correspondent to this day. His great-grandson (the grandfather of my correspondent), being converted to Methodism by some wayside preacher, discarded in a moment his name, his old nature, and his political principles, and with the zeal of a proselyte sealed his adherence to the Protestant Succession by baptising his next son George. This George became the publisher and editor of the *Wesleyan Times*. His children were brought up in ignorance of their Highland pedigree; and my correspondent was puzzled to overhear his father speak of him as a true Macgregor, and amazed to find, in

## THE SURNAME OF STEVENSON

rummaging about that peaceful and pious house, the sword of the Hanoverian officer. After he was grown up and was better informed of his descent, "I frequently asked my father," he writes, "why he did not use the name of Macgregor; his replies were significant, and give a picture of the man: 'It isn't a good *Methodist* name. *You* can use it, but it will do you no *good*.' Yet the old gentleman, by way of pleasantry, used to announce himself to friends as 'Colonel Macgregor.'"

Here, then, are certain Macgregors habitually using the name of Stevenson, and at last, under the influence of Methodism, adopting it entirely. Doubtless a proscribed clan could not be particular; they took a name as a man takes an umbrella against a shower; as Rob Roy took Campbell, and his son took Drummond. But this case is different; Stevenson was not taken and left—it was consistently adhered to. It does not in the least follow that all Stevensons are of the clan Alpin; but it does follow that some may be. And I cannot conceal from myself the possibility that James Stevenson in Glasgow, my first authentic ancestor, may have had a Highland *alias* upon his conscience and a claymore in his back parlour.

To one more tradition I may allude, that we are somehow descended from a French barber-surgeon who came to St. Andrews in the service of one of the Cardinal Beaton. No details

## A FAMILY OF ENGINEERS

were added. But the very name of France was so detested in my family for three generations, that I am tempted to suppose there may be something in it.<sup>1</sup>

<sup>1</sup>Mr. J. H. Stevenson is satisfied that these speculations as to a possible Norse, Highland, or French origin are vain. All we know about the engineer family is that it was sprung from a stock of Westland Whigs settled in the latter part of the seventeenth century in the parish of Neilston, as mentioned at the beginning of the next chapter. It may be noted that the Ayrshire parish of Stevenston, the lands of which are said to have received the name in the twelfth century, lies within thirteen miles south-west of this place. The lands of Stevenston in Lanarkshire, first mentioned in the next century, in the Ragman Roll, lie within twenty miles east. [S. C.]

## CHAPTER I

### DOMESTIC ANNALS

**I**T is believed that in 1665, James Stevenson in Nether Carsewell, parish of Neilston, county of Renfrew, and presumably a tenant farmer, married one Jean Keir; and in 1675, without doubt, there was born to these two a son Robert, possibly a maltster in Glasgow. In 1710, Robert married, for a second time, Elizabeth Cumming, and there was born to them, in 1720, another Robert, certainly a maltster in Glasgow. In 1742, Robert the second married Margaret Fulton (Margret, she called herself), by whom he had ten children, among whom were Hugh, born February 1749, and Alan, born June 1752.

With these two brothers my story begins. Their deaths were simultaneous; their lives unusually brief and full. Tradition whispered me in childhood they were the owners of an islet near St. Kitts; and it is certain they had risen to be at the head of considerable interests in the West Indies, which Hugh managed abroad and Alan at home, at an age when others are still cur-

## A FAMILY OF ENGINEERS

veting a clerk's stool. My kinsman, Mr. Stevenson of Stirling, has heard his father mention that there had been "something romantic" about Alan's marriage: and, alas! he has forgotten what. It was early at least. His wife was Jean, daughter of David Lillie, a builder in Glasgow, and several times "Deacon of the Wrights": the date of the marriage has not reached me: but on 8th June 1772, when Robert, the only child of the union, was born, the husband and father had scarce passed, or had not yet attained, his twentieth year. Here was a youth making haste to give hostages to fortune. But this early scene of prosperity in love and business was on the point of closing.

There hung in the house of this young family, and successively in those of my grandfather and father, an oil painting of a ship of many tons burthen. Doubtless the brothers had an interest in the vessel; I was told she had belonged to them outright; and the picture was preserved through years of hardship, and remains to this day in the possession of the family, the only memorial of my great-grandsire Alan. It was on this ship that he sailed on his last adventure, summoned to the West Indies by Hugh. An agent had proved unfaithful on a serious scale; and it used to be told me in my childhood how the brothers pursued him from one island to another in an open boat, were exposed to the pernicious dews of the tropics, and simultaneously

## DOMESTIC ANNALS

struck down. The dates and places of their deaths (now before me) would seem to indicate a more scattered and prolonged pursuit: Hugh, on the 16th April 1774, in Tobago, within sight of Trinidad; Alan, so late as May 26th, and so far away as "Santt Kittes," in the Leeward Islands—both, says the family Bible, "of a fiver" (!). The death of Hugh was probably announced by Alan in a letter, to which we may refer the details of the open boat and the dew. Thus, at least, in something like the course of post, both were called away, the one twenty-five, the other twenty-two; their brief generation became extinct, their short-lived house fell with them; and "in these lawless parts and lawless times"—the words are my grandfather's—their property was stolen or became involved. Many years later, I understand some small recovery to have been made; but at the moment almost the whole means of the family seem to have perished with the young merchants. On the 27th April, eleven days after Hugh Stevenson, twenty-nine before Alan, died David Lillie, the deacon of the wrights; so that mother and son were orphaned in one month. Thus, from a few scraps of paper bearing little beyond dates, we construct the outlines of the tragedy that shadowed the cradle of Robert Stevenson.

Jean Lillie was a young woman of strong sense, well fitted to contend with poverty, and of a pious disposition, which it is like that these mis-

## A FAMILY OF ENGINEERS

fortunes heated. Like so many other widowed Scotswomen, she vowed her son should wag his head in a pulpit; but her means were inadequate to her ambition. A charity school, and some time under a Mr. M'Intyre, "a famous linguist," were all she could afford in the way of education to the would-be minister. He learned no Greek; in one place he mentions that the Orations of Cicero were his highest book in Latin; in another that he had "delighted" in Virgil and Horace; but his delight could never have been scholarly. This appears to have been the whole of his training previous to an event which changed his own destiny and moulded that of his descendants—the second marriage of his mother.

There was a Merchant-Burgess of Edinburgh of the name of Thomas Smith. The Smith pedigree has been traced a little more particularly than the Stevensons', with a similar dearth of illustrious names. One character seems to have appeared, indeed, for a moment at the wings of history: a skipper of Dundee who smuggled over some Jacobite big-wig at the time of the Fifteen, and was afterwards drowned in Dundee harbour while going on board his ship. With this exception, the generations of the Smiths present no conceivable interest even to a descendant; and Thomas, of Edinburgh, was the first to issue from respectable obscurity. His father, a skipper out of Broughty Ferry, was drowned at sea while Thomas was still

## DOMESTIC ANNALS

young. He seems to have owned a ship or two—whalers, I suppose, or coasters—and to have been a member of the Dundee Trinity House, whatever that implies. On his death the widow remained in Broughty, and the son came to push his future in Edinburgh. There is a story told of him in the family which I repeat here because I shall have to tell later on a similar, but more perfectly authenticated, experience of his stepson, Robert Stevenson. Word reached Thomas that his mother was unwell, and he prepared to leave for Broughty on the morrow. It was between two and three in the morning, and the early northern daylight was already clear, when he awoke and beheld the curtains at the bed-foot drawn aside and his mother appear in the interval, smile upon him for a moment, and then vanish. The sequel is stereotype; he took the time by his watch, and arrived at Broughty to learn it was the very moment of her death. The incident is at least curious in having happened to such a person—as the tale is being told of him. In all else he appears as a man, ardent, passionate, practical, designed for affairs and prospering in them far beyond the average. He founded a solid business in lamps and oils, and was the sole proprietor of a concern called the Greenside Company's Works—"a multifarious concern it was," writes my cousin, Professor Swan, "of tinsmiths, coppersmiths, brassfounders, blacksmiths, and japanners." He was al-

## A FAMILY OF ENGINEERS

so, it seems, a ship owner and underwriter. He built himself "a land"—Nos. 1 and 2 Baxter's Place, then no such unfashionable neighbourhood—and died, leaving his only son in easy circumstances, and giving to his three surviving daughters portions of five thousand pounds and upwards. There is no standard of success in life; but in one of its meanings, this is to succeed.

In what we know of his opinions, he makes a figure highly characteristic of the time. A high tory and patriot, a captain—so I find it in my notes—of Edinburgh Spearmen, and on duty in the Castle during the Muir and Palmer troubles, he bequeathed to his descendants a bloodless sword and a somewhat violent tradition, both long preserved. The judge who sat on Muir and Palmer, the famous Braxfield, let fall from the bench the *obiter dictum*—"I never liked the French all my days, but now I hate them." If Thomas Smith, the Edinburgh Spearman, were in court, he must have been tempted to applaud. The people of that land were his abhorrence; he loathed Buonaparte like Antichrist. Towards the end he fell into a kind of dotage; his family must entertain him with games of tin soldiers, which he took a childish pleasure to array and overset; but those who played with him must be upon their guard, for if his side, which was always that of the English against the French, should chance to be defeated, there would be trouble in Baxter's Place. For these

## DOMESTIC ANNALS

opinions he may almost be said to have suffered. Baptized and brought up in the Church of Scotland, he had, upon some conscientious scruple joined the communion of the Baptists. Like other Nonconformists, these were inclined to the liberal side in politics, and, at least in the beginning, regarded Buonaparte as a deliverer. From the time of his joining the Spearmen, Thomas Smith became in consequence a bugbear to his brethren in the faith. "They that take the sword shall perish with the sword," they told him; they gave him "no rest"; "his position became intolerable"; it was plain he must choose between his political and his religious tenets; and in the last years of his life, about 1812, he returned to the Church of his fathers.

August, 1786, was the date of his chief advancement, when, having designed a system of oil lights to take the place of the primitive coal fires before in use, he was dubbed engineer to the newly-formed Board of Northern Lighthouses. Not only were his fortunes bettered by the appointment, but he was introduced to a new and wider field for the exercise of his abilities, and a new way of life highly agreeable to his active constitution. He seems to have rejoiced in the long journeys, and to have combined them with the practice of field sports. "A tall, stout man coming ashore with his gun over his arm"—so he was described to my father—the only description that has come down to

## A FAMILY OF ENGINEERS

me—by a lightkeeper old in the service. Nor did this change come alone. On the 9th July of the same year, Thomas Smith had been left for the second time a widower. As he was still but thirty-three years old, prospering in his affairs, newly advanced in the world, and encumbered at the time with a family of children, five in number, it was natural that he should entertain the notion of another wife. Expeditious in business he was no less so in his choice; and it was not later than June, 1787—for my grandfather is described as still in his fifteenth year—that he married the widow of Alan Stevenson.

The perilous experiment of bringing together two families for once succeeded. Mr. Smith's two eldest daughters, Jean and Janet, fervent in piety, unwearied in kind deeds, were well qualified both to appreciate and to attract the step-mother; and her son, on the other hand, seems to have found immediate favour in the eyes of Mr. Smith. It is, perhaps, easy to exaggerate the ready-made resemblances; the tired woman must have done much to fashion girls who were under ten; the man, lusty and opinionated, must have stamped a strong impression on the boy of fifteen. But the cleavage of the family was too marked, the identity of character and interest produced between the two men on the one hand, and the three women on the other, was too complete to have been the result of influence alone. Particular bonds of union must

## DOMESTIC ANNALS

have pre-existed on each side. And there is no doubt that the man and the boy met with common ambitions, and a common bent, to the practice of that which had not so long before acquired the name of civil engineering.

For the profession which is now so thronged, famous, and influential, was then a thing of yesterday. My grandfather had an anecdote of Smeaton, probably learned from John Clerk of Eldin, their common friend. Smeaton was asked by the Duke of Argyll to visit the West Highland coast for a professional purpose. He refused, appalled, it seems, by the rough travelling. "You can recommend some other fit person?" asked the Duke. "No," said Smeaton, "I am sorry I can't." "What!" cried the Duke, "a profession with only one man in it! Pray, who taught you?" "Why," said Smeaton, "I believe I may say I was self-taught, an 't please your grace." Smeaton, at the date of Thomas Smith's third marriage, was yet living; and as the one had grown to the new profession from his place at the Instrument-maker's, the other was beginning to enter it by the way of his trade. The engineer of to-day is confronted with a library of acquired results; tables, and formulæ to the value of folios full have been calculated and recorded; and the student finds everywhere in front of him the footprints of the pioneers. In the eighteenth century the field was largely unexplored; the engineer must read with his

## A FAMILY OF ENGINEERS

own eyes the face of nature; he arose a volunteer, from the workshop or the mill, to undertake works which were at once inventions and adventures. It was not a science then—it was a living art; and it visibly grew under the eyes and between the hands of its practitioners.

The charm of such an occupation was strongly felt by stepfather and stepson. It chanced that Thomas Smith was a reformer; the superiority of his proposed lamp and reflectors over open fires of coal secured his appointment; and no sooner had he set his hand to the task than the interest of that employment mastered him. The vacant stage on which he was to act, and where all had yet to be created—the greatness of the difficulties, the smallness of the means intrusted him—would rouse a man of his disposition like a call to battle. The lad introduced by marriage under his roof was of a character to sympathise; the public usefulness of the service would appeal to his judgment, the perpetual need for fresh expedients stimulate his ingenuity. And there was another attraction which, in the younger man at least, appealed to, and perhaps first aroused a profound and enduring sentiment of romance: I mean the attraction of the life. The seas into which his labours carried the new engineer were still scarce charted, the coasts still dark; his way on shore was often far beyond the convenience of any road; the isles in which he must sojourn were still partly sav-

## DOMESTIC ANNALS

age. He must toss much in boats; he must often adventure on horseback by the dubious bridle-track through unfrequented wildernesses; he must sometimes plant his lighthouse in the very camp of wreckers; and he was continually enforced to the vicissitudes of out-door life. The joy of my grandfather in this career was strong as the love of woman. It lasted him through youth and manhood, it burned strong in age, and at the approach of death his last yearning was to renew these loved experiences. What he felt himself he continued to attribute to all around him. And to this supposed sentiment in others I find him continually, almost pathetically, appealing: often in vain.

Snared by these interests, the boy seems to have become almost at once the eager confidant and adviser of his new connection; the Church, if he had ever entertained the prospect very warmly, faded from his view; and at the age of nineteen I find him already in a post of some authority, superintending the construction of the lighthouse on the isle of Little Cumbrae, in the Firth of Clyde. The change of aim seems to have caused or been accompanied by a change of character. It sounds absurd to couple the name of my grandfather with the word indolence; but the lad who had been destined from the cradle to the Church, and who had attained the age of fifteen without acquiring more than a moderate knowledge of Latin, was at least no

## A FAMILY OF ENGINEERS

unusual student. And from the day of his charge at Little Cumbrae he steps before us what he remained until the end, a man of the most zealous industry, greedy of occupation, greedy of knowledge, a stern husband of time, a reader, a writer, unflagging in his task of self-improvement. Thenceforward his summers were spent directing works and ruling workmen, now in uninhabited, now in half-savage islands; his winters were set apart, first at the Andersonian Institution, then at the University of Edinburgh to improve himself in mathematics, chemistry, natural history, agriculture, moral philosophy, and logic; a bearded student—although no doubt scrupulously shaved. I find one reference to his years in class which will have a meaning for all who have studied in Scottish Universities. He mentions a recommendation made by the professor of logic. “The high-school men,” he writes, “and *bearded men like myself*, were all attention.” If my grandfather were throughout life a thought too studious of the art of getting on, much must be forgiven to the bearded and belated student who looked across, with a sense of difference, at “the high-school men.” Here was a gulf to be crossed; but already he could feel that he had made a beginning, and that must have been a proud hour when he devoted his earliest earnings to the repayment of the charitable foundation in which he had received the rudiments of knowledge.

## DOMESTIC ANNALS

In yet another way he followed the example of his father-in-law, and from 1794 till 1807, when the affairs of the Bell Rock made it necessary for him to resign, he served in different corps of volunteers. In the last of these he rose to a position of distinction, no less than captain of the Grenadier Company, and his colonel, in accepting his resignation, entreated he would do them "the favour of continuing as an honorary member of a corps which has been so much indebted for your zeal and exertions."

To very pious women the men of the house are apt to appear worldly. The wife, as she puts on her new bonnet before church, is apt to sigh over that assiduity which enabled her husband to pay the milliner's bill. And in the household of the Smiths and Stevensons the women were not only extremely pious, but the men were in reality a trifle worldly. Religious they both were; conscious, like all Scots, of the fragility and unreality of that scene in which we play our uncomprehended parts; like all Scots, realising daily and hourly the sense of another will than ours and a perpetual direction in the affairs of life. But the current of their endeavours flowed in a more obvious channel. They had got on so far; to get on further was their next ambition—to gather wealth, to rise in society, to leave their descendants higher than themselves, to be (in some sense) among the founders of families. Scott was in the same town nourishing similar

## A FAMILY OF ENGINEERS

dreams. But in the eyes of the women these dreams would be foolish and idolatrous.

I have before me some volumes of old letters addressed to Mrs. Smith and the two girls, her favourites, which depict in a strong light their characters and the society in which they moved.

“My very dear and much esteemed Friend,” writes one correspondent, “this day being the anniversary of our acquaintance, I feel inclined to address you; but where shall I find words to express the feelings of a grateful *Heart*, first to the Lord who graciously inclined you on this day last year to notice an afflicted Stranger providentially cast in your way far from any Earthly friend? . . . Methinks I shall hear him say unto you, ‘Inasmuch as ye shewed kindness to my afflicted handmaiden, ye did it unto me.’”

This is to Jean; but the same afflicted lady wrote indifferently to Jean, to Janet, and to Mrs. Smith, whom she calls “my Edinburgh mother.” It is plain the three were as one person, moving to acts of kindness, like the Graces, inarmed. Too much stress must not be laid on the style of this correspondence; Clarinda survived, not far away, and may have met the ladies on the Calton Hill; and many of the writers appear, underneath the conventions of the period, to be genuinely moved. But what unpleasantly strikes a reader is that these devout unfortunates found a revenue in their devotion. It is everywhere the same tale: on the side of the soft-hearted ladies, substantial acts of help; on the side of the correspondents, affection, italics,

## DOMESTIC ANNALS

texts, ecstasies, and imperfect spelling. When a midwife is recommended, not at all for proficiency in her important art, but because she has "a sister whom I [the correspondent] esteem and respect, and [who] is a spiritual daughter of my Hon<sup>d</sup> Father in the Gosple," the mask seems to be torn off, and the wages of godliness appear too openly. Capacity is a secondary matter in a midwife, temper in a servant, affection in a daughter, and the repetition of a shibboleth fulfils the law. Common decency is at times forgot in the same page with the most sanctified advice and aspiration. Thus I am introduced to a correspondent who appears to have been at the time the housekeeper at Invermay, and who writes to condole with my grandmother in a season of distress. For nearly half a sheet she keeps to the point with an excellent discretion in language; then suddenly breaks out:

"It was fully my intention to have left this at Martinmass, but the Lord fixes the bounds of our habitation. I have had more need of patience in my situation here than in any other, partly from the very violent, unsteady, deceitful temper of the Mistress of the Family and also from the state of the house. It was in a train of repair when I came here two years ago, and is still in Confusion. There is above six Thousand Pounds' worth of Furniture come from London to be put up when the rooms are completely finished; and then, woe be to the Person who is Housekeeper at Invermay!"

And by the tail of the document, which is torn, I see she goes on to ask the bereaved family to seek her a new place. It is extraordinary

## A FAMILY OF ENGINEERS

that people should have been so deceived in so careless an impostor; that a few sprinkled "God willings" should have blinded them to the essence of this venomous letter; and that they should have been at the pains to bind it in with others (many of them highly touching) in their memorial of harrowing days. But the good ladies were without guile and without suspicion; they were victims marked for the axe, and the religious impostors snuffed up the wind as they drew near.

I have referred above to my grandmother; it was no slip of the pen: for by an extraordinary arrangement, in which it is hard not to suspect the managing hand of a mother, Jean Smith became the wife of Robert Stevenson. Mrs. Smith had failed in her design to make her son a minister, and she saw him daily more immersed in business and worldly ambition. One thing remained that she might do: she might secure for him a godly wife, that great means of sanctification; and she had two under her hand, trained by herself, her dear friends and daughters both in law and love—Jean and Janet. Jean's complexion was extremely pale, Janet's was florid; my grandmother's nose was straight, my great-aunt's aquiline; but by the sound of the voice, not even a son was able to distinguish one from other. The marriage of a man of twenty-seven and a girl of twenty who have lived for twelve years as brother and sister,

## DOMESTIC ANNALS

is difficult to conceive. It took place, however, and thus in 1799 the family was still further cemented by the union of a representative of the male or worldly element with one of the female and devout.

This essential difference remained unbridged, yet never diminished the strength of their relation. My grandfather pursued his design of advancing in the world with some measure of success; rose to distinction in his calling, grew to be the familiar of members of Parliament, judges of the Court of Session, and "landed gentlemen"; learned a ready address, had a flow of interesting conversation, and when he was referred to as "a highly respectable *bourgeois*," resented the description. My grandmother remained to the end devout and unambitious, occupied with her Bible, her children, and her house; easily shocked, and associating largely with a clique of godly parasites. I do not know if she called in the midwife already referred to; but the principle on which that lady was recommended, she accepted fully. The cook was a godly woman, the butcher a Christian man, and the table suffered. The scene has been often described to me of my grandfather sawing with darkened countenance at some indissoluble joint—"Preserve me, my dear, what kind of a reedy, stringy beast is this?"—of the joint removed, the pudding substituted and uncovered; and of my grandmother's anxious glance and hasty,

## A FAMILY OF ENGINEERS

deprecatory comment, "Just mismanaged!" Yet with the invincible obstinacy of soft natures, she would adhere to the godly woman and the Christian man, or find others of the same kidney to replace them. One of her confidants had once a narrow escape; an unwieldy old woman, she had fallen from an outside stair in a close of the Old Town; and my grandmother rejoiced to communicate the providential circumstance that a baker had been passing underneath with his bread upon his head. "I would like to know what kind of providence the baker thought it!" cried my grandfather.

But the sally must have been unique. In all else that I have heard or read of him, so far from criticising, he was doing his utmost to honour and even to emulate his wife's pronounced opinions. In the only letter which has come to my hand of Thomas Smith's, I find him informing his wife that he was "in time for afternoon church"; similar assurances or cognate excuses abound in the correspondence of Robert Stevenson; and it is comical and pretty to see the two generations paying the same court to a female piety more highly strung: Thomas Smith to the mother of Robert Stevenson—Robert Stevenson to the daughter of Thomas Smith. And if for once my grandfather suffered himself to be hurried, by his sense of humour and justice, into that remark about the case of Providence and the Baker, I should be sorry for any of his children

## DOMESTIC ANNALS

who should have stumbled into the same attitude of criticism. In the apocalyptic style of the housekeeper of Invermay, woe be to that person! But there was no fear; husband and sons all entertained for the pious, tender soul the same chivalrous and moved affection. I have spoken with one who remembered her, and who had been the intimate and equal of her sons, and I found this witness had been struck, as I had been, with a sense of disproportion between the warmth of the adoration felt and the nature of the woman, whether as described or observed. She diligently read and marked her Bible; she was a tender nurse; she had a sense of humour under strong control; she talked and found some amusement at her (or rather at her husband's) dinner-parties. It is conceivable that even my grandmother was amenable to the seductions of dress; at least I find her husband inquiring anxiously about "the gowns from Glasgow," and very careful to describe the toilet of the Princess Charlotte, whom he had seen in church "in a Pelisse and Bonnet of the same colour of cloth as the Boys' Dress jackets, trimmed with blue satin ribbons; the hat or Bonnet, Mr. Spittal said, was a Parisian slouch, and had a plume of three white feathers." But all this leaves a blank impression, and it is rather by reading backward in these old musty letters, which have moved me now to laughter and now to impatience, that I glean occasional glimpses of how

## A FAMILY OF ENGINEERS

she seemed to her contemporaries, and trace (at work in her queer world of godly and grateful parasites) a mobile and responsive nature. Fashion moulds us, and particularly women, deeper than we sometimes think; but a little while ago, and, in some circles, women stood or fell by the degree of their appreciation of old pictures; in the early years of the century (and surely with more reason) a character like that of my grandmother warmed, charmed, and subdued, like a strain of music, the hearts of the men of her own household. And there is little doubt that Mrs. Smith, as she looked on at the domestic life of her son and her step-daughter, and numbered the heads in their increasing nursery, must have breathed fervent thanks to her Creator.

Yet this was to be a family unusually tried; it was not for nothing that one of the godly women saluted Miss Janet Smith as "a veteran in affliction"; and they were all before middle life experienced in that form of service. By the 1st of January, 1808, besides a pair of still-born twins, five children had been born and still survived to the young couple. By the 11th two were gone; by the 28th a third had followed, and the two others were still in danger. In the letters of a former nurserymaid—I give her name, Jean Mitchell, *honoris causa*—we are enabled to feel, even at this distance of time, some of the bitterness of that month of bereavement.

## DOMESTIC ANNALS

"I have this day received," she writes to Miss Janet, "the melancholy news of my dear babys' deaths. My heart is like to break for my dear Mrs. Stevenson. O may she be supported on this trying occasion! I hope her other three babys will be spared to her. O, Miss Smith, did I think when I parted from my sweet babys that I never was to see them more?" "I received," she begins her next, "the mournful news of my dear Jessie's death. I also received the hair of my three sweet babys, which I will preserve as dear to their memories and as a token of Mr. and Mrs. Stevenson's friendship and esteem. At my leisure hours, when the children are in bed, they occupy all my thoughts. I dream of them. About two weeks ago, I dreamed that my sweet little Jessie came running to me in her usual way, and I took her in my arms. O my dear babys, were mortal eyes permitted to see them in heaven, we would not repine nor grieve for their loss."

By the 29th of February, the Reverend John Campbell, a man of obvious sense and human value, but hateful to the present biographer, because he wrote so many letters and conveyed so little information, summed up this first period of affliction in a letter to Miss Smith: "Your dear sister but a little while ago had a full nursery, and the dear blooming creatures sitting around her table filled her breast with hope that one day they should fill active stations in society and become an ornament in the Church below. But ah!"

Near a hundred years ago these little creatures ceased to be, and for not much less a period the tears have been dried. And to this day, looking in these stitched sheaves of letters, we hear the sound of many soft-hearted women sobbing for the lost. Never was such a massacre of the in-

## A FAMILY OF ENGINEERS

nocents; teething and chincough and scarlet fever and small-pox ran the round; and little Lillies, and Smiths, and Stevensons fell like moths about a candle; and nearly all the sympathetic correspondents deplore and recall the little losses of their own. "It is impossible to describe the Heavenly looks of the Dear Babe the three last days of his life," writes Mrs. Laurie to Mrs. Smith. "Never—never, my dear aunt, could I wish to eface the remembrance of this Dear Child. Never, never, my dear aunt!" And so soon the memory of the dead and the dust of the survivors are buried in one grave.

There was another death in 1812; it passes almost unremarked; a single funeral seemed but a small event to these "veterans in affliction"; and by 1816 the nursery was full again. Seven little hopefuls enlivened the house; some were growing up; to the elder girl my grandfather already wrote notes in current hand at the tail of his letters to his wife; and to the elder boys he had begun to print, with laborious care, sheets of childish gossip and pedantic applications. Here, for instance, under date of May 26th, 1816, is part of a mythological account of London, with a moral for the three gentlemen, "Messieurs Alan, Robert, and James Stevenson," to whom the document is addressed:

"There are many prisons here like Bridewell, for, like other large towns, there are many bad men here as well as many good men. The natives of London are in general not so tall and strong

## DOMESTIC ANNALS

as the people of Edinburgh because they have not so much pure air, and instead of taking porridge they eat cakes made with sugar and plums. Here you have thousands of carts to draw timber, thousands of coaches to take you to all parts of the town, and thousands of boats to sail on the river Thames. But you must have money to pay, otherwise you can get nothing. Now the way to get money is, become clever men and men of education by being good scholars."

From the same absence, he writes to his wife on a Sunday:

"It is now about eight o'clock with me, and I imagine you to be busy with the young folks, hearing the questions [*Anglicé*, catechism], and indulging the boys with a chapter from the large Bible, with their interrogations and your answers in the soundest doctrine. I hope James is getting his verse as usual, and that Mary is not forgetting her little *hymn*. While Jeannie will be reading *Wotherspoon*, or some other suitable and instructive book, I presume our friend, Aunt Mary, will have just arrived with the news of a *throng kirk* [a crowded church] and a great sermon. You may mention, with my compliments to my mother, that I was at St. Paul's to-day, and attended a very excellent service with Mr. James Lawrie. The text was 'Examine and see that ye be in the faith.'"

A twinkle of humour lights up this evocation of the distant scene—the humour of happy men and happy homes. Yet it is penned upon the threshold of fresh sorrow. James and Mary—he of the verse and she of the hymn—did not much more than survive to welcome their returning father. On the 25th, one of the godly women writes to Janet:

"My dearest beloved madam, when I last parted from you you was so affected with your affliction [you? or I?] could think

## A FAMILY OF ENGINEERS

of nothing else. But on Saturday, when I went to inquire after your health, how was I startled to hear that dear James was gone! Ah, what is this? My dear benefactors, doing so much good to many, to the Lord, suddenly to be deprived of their most valued comforts! I was thrown into great perplexity, could do nothing but murmur, why these things were done to such a family. I could not rest, but at midnight, whether spoken [or not] it was presented to my mind—‘Those whom ye deplore are walking with me in white.’ I conclude from this the Lord saying to sweet Mrs. Stevenson: ‘I gave them to be brought up for me: well done, good and faithful! they are fully prepared, and now I must present them to my father and your father, to my God and your God.’”

It would be hard to lay on flattery with a more sure and daring hand. I quote it as a model of a letter of condolence; be sure it would console. Very different, perhaps quite as welcome, is this from a lighthouse inspector to my grandfather:

“In reading your letter the trickling tear ran down my cheeks in silent sorrow for your departed dear ones, my sweet little friends. Well do I remember, and you will call to mind, their little innocent and interesting stories. Often have they come round me and taken my by the hand, but alas! I am no more destined to behold them.”

The child who is taken becomes canonised, and the looks of the homeliest babe seem in the retrospect “heavenly the three last days of his life.” But it appears that James and Mary had indeed been children more than usually engaging; a record was preserved a long while in the family of their remarks and “little innocent

## DOMESTIC ANNALS

and interesting stories," and the blow and the blank were the more sensible.

Early the next month Robert Stevenson must proceed upon his voyage of inspection, part by land, part by sea. He left his wife plunged in low spirits; the thought of his loss, and still more of her concern, was continually present in his mind, and he draws in his letters home an interesting picture of his family relations:—

*"Windygates Inn, Monday (Postmark July 16th).*

"MY DEAREST JEANNIE,—While the people of the inn are getting me a little bit of something to eat, I sit down to tell you that I had a most excellent passage across the water, and got to Wemyss at mid-day. I hope the children will be very good, and that Robert will take a course with you to learn his Latin lessons daily; he may, however, read English in company. Let them have strawberries on Saturdays."

*"Westhaven, 17th July.*

"I have been occupied to-day at the harbour of Newport, opposite Dundee, and am this far on my way to Arbroath. You may tell the boys that I slept last night in Mr. Steadman's tent. I found my bed rather hard, but the lodgings were otherwise extremely comfortable. The encampment is on the Fife side of the Tay, immediately opposite to Dundee. From the door of the tent you command the most beautiful view of the Firth, both up and down, to a great extent. At night all was serene and still, the sky presented the most beautiful appearance of bright stars, and the morning was ushered in with the song of many little birds."

*"Aberdeen, July 19th.*

"I hope, my dear, that you are going out of doors regularly and taking much exercise. I would have you to *make the markets daily*—and by all means to take a seat in the coach once or twice in the week and see what is going on in town. [The family

## A FAMILY OF ENGINEERS

were at the sea-side.] It will be good not to be too great a stranger to the house. It will be rather painful at first, but as it is to be done, I would have you not to be too strange to the house in town.

“Tell the boys that I fell in with a soldier—his name is Henderson—who was twelve years with Lord Wellington and other commanders. He returned very lately with only eight-pence-half-penny in his pocket, and found his father and mother both in life, though they had never heard from him, nor he from them. He carried my great-coat and umbrella a few miles.”

“*Fraserburgh, July 20th.*”

“Fraserburgh is the same dull place which [Auntie] Mary and Jeannie found it. As I am travelling along the coast which they are acquainted with, you had better cause Robert to bring down the map from Edinburgh; and it will be a good exercise in geography for the young folks to trace my course. I hope they have entered upon the writing. The library will afford abundance of excellent books, which I wish you would employ a little. I hope you are doing me the favour to go much out with the boys, which will do you much good and prevent them from getting so very much overheated.”

### [*To the Boys—Printed.*]

“When I had last the pleasure of writing to you, your dear little brother James and your sweet little sister Mary were still with us. But it has pleased God to remove them to another and a better world, and we must submit to the will of Providence. I must, however, request of you to think sometimes upon them and to be very careful not to do anything that will displease or vex your mother. It is therefore proper that you do not roamp [Scottish indeed] too much about, and that you learn your lessons.

“ . . . I went to Fraserburgh and visited Kinnaird Head Lighthouse, which I found in good order. All this time I travelled upon good roads, and paid many a toll-man by the way; but from Fraserburgh to Banff there is no toll-bars, and the road is so bad that I had to walk up and down many a hill, and for want of bridges the horses had to drag the chaise up to the middle of

## DOMESTIC ANNALS

the wheels in water. At Banff I saw a large ship of 300 tons lying on the sands upon her beam-ends, and a wreck for want of a good harbour. Captain Wilson—to whom I beg my compliments—will show you a ship of 300 tons. At the towns of Macduff, Banff, and Portsoy, many of the houses are built of marble, and the rocks on this part of the coast or sea-side are marble. But, my dear Boys, unless marble be polished and dressed, it is a very coarse-looking stone, and has no more beauty than common rock. As a proof of this, ask the favour of your mother to take you to Thomson's Marble Works in South Leith, and you will see marble in all its stages, and perhaps you may there find Portsoy marble! The use I wish to make of this is to tell you that, without education, a man is just like a block of rough, unpolished marble. Notice, in proof of this, how much Mr. Neill and Mr. M'Gregor [the tutor] know, and observe how little a man knows who is not a good scholar. On my way to Fochabers I passed through many thousand acres of Fir timber, and saw many deer running in these woods."

[*To Mrs. Stevenson.*]

*"Inverness, July 21st.*

"I propose going to church in the afternoon, and as I have breakfasted late, I shall afterwards take a walk, and dine about six o'clock. I do not know who is the clergyman here, but I shall think of you all. I travelled in the mail-coach [from Banff] almost alone. While it was daylight I kept the top, and the passing along a country I had never before seen was a considerable amusement. But, my dear, you are all much in my thoughts, and many are the objects which recall the recollection of our tender and engaging children we have so recently lost. We must not, however, repine. I could not for a moment wish any change of circumstances in their case; and in every comparative view of their state, I see the Lord's goodness in removing them from an evil world to an abode of bliss; and I must earnestly hope that you may be enabled to take such a view of this affliction as to live in the happy prospect of our all meeting again to part no more—and that under such considerations you are getting up your spirits. I wish you would walk about, and by all means go to town, and do not sit much at home."

## A FAMILY OF ENGINEERS

*“Inverness, July 23rd.*

“I am duly favoured with your much-valued letter, and I am happy to find that you are so much with my mother, because that sort of variety has a tendency to occupy the mind, and to keep it from brooding too much upon one subject. Sensibility and tenderness are certainly two of the most interesting and pleasing qualities of the mind. These qualities are also none of the least of the many endearments of the female character. But if that kind of sympathy and pleasing melancholy, which is familiar to us under distress, be much indulged, it becomes habitual, and takes such a hold of the mind as to absorb all the other affections, and unfit us for the duties and proper enjoyments of life. Resignation sinks into a kind of peevish discontent. I am far, however, from thinking there is the least danger of this in your case, my dear; for you have been on all occasions enabled to look upon the fortunes of this life as under the direction of a higher power, and have always preserved that propriety and consistency of conduct in all circumstances which endears your example to your family in particular, and to your friends. I am therefore, my dear, for you to go out much, and go to the house up-stairs [he means to go up-stairs in the house, to visit the place of the dead children], and to put yourself in the way of the visits of your friends. I wish you would call on the Miss Grays, and it would be a good thing upon a Saturday to dine with my mother, and take Meggy and all the family with you, and let them have their strawberries in town. The tickets of one of the *old-fashioned coaches* would take you all up, and if the evening were good, they could all walk down, excepting Meggy and little David.”

*“Inverness, July 25th, 11 p. m.*

“Captain Wemyss, of Wemyss, has come to Inverness to go the voyage with me, and as we are sleeping in a double-bedded room, I must no longer transgress. You must remember me the best way you can to the children.”

*“On board of the Lighthouse Yacht, July 29th.*

“I got to Cromarty yesterday about mid-day and went to church. It happened to be the sacrament there, and I heard a

## DOMESTIC ANNALS

Mr. Smith at that place conclude the service with a very suitable exhortation. There seemed a great concourse of people, but they had rather an unfortunate day for them at the tent, as it rained a good deal. After drinking tea at the inn, Captain Wemyss accompanied me on board, and we sailed about eight last night. The wind at present being rather a beating one, I think I shall have an opportunity of standing into the bay of Wick, and leaving this letter to let you know my progress and that I am well."

*"Lighthouse Yacht, Stornoway, August 4th.*

"To-day we had prayers on deck as usual when at sea. I read the 14th chapter, I think, of Job. Captain Wemyss has been in the habit of doing this on board his own ship, agreeably to the Articles of War. Our passage round the cape [Cape Wrath] was rather a cross one, and as the wind was northerly, we had a pretty heavy sea, but upon the whole have made a good passage, leaving many vessels behind us in Orkney. I am quite well, my dear; and Captain Wemyss, who has much spirit, and who is much given to observation and a perfect enthusiast in his profession, enlivens the voyage greatly. Let me entreat you to move about much, and take a walk with the boys to Leith. I think they have still many places to see there, and I wish you would indulge them in this respect. Mr. Scales is the best person I know for showing them the sailcloth-weaving, etc., and he would have great pleasure in undertaking this. My dear, I trust soon to be with you, and that through the goodness of God we shall meet all well.

"There are two vessels lying here with emigrants for America, each with eighty people on board, at all ages, from a few days to upwards of sixty! Their prospects must be very forlorn to go with a slender purse for distant and unknown countries."

*"Lighthouse Yacht, off Greenock, Aug. 18th.*

"It was after *church-time* before we got here, but we had prayers upon deck on the way up the Clyde. This has, upon the whole, been a very good voyage, and Captain Wemyss, who enjoys it much, has been an excellent companion; we met with pleasure, and shall part with regret."

## A FAMILY OF ENGINEERS

Strange that, after his long experience, my grandfather should have learned so little of the attitude and even the dialect of the spiritually-minded; that after forty-four years in a most religious circle, he could drop without sense of incongruity from a period of accepted phrases to "trust his wife was *getting up her spirits*," or think to reassure her as to the character of Captain Wemyss by mentioning that he had read prayers on the deck of his frigate "*agreeably to the Articles of War*"! Yet there is no doubt—and it is one of the most agreeable features of the kindly series—that he was doing his best to please, and there is little doubt that he succeeded. Almost all my grandfather's private letters have been destroyed. This correspondence has not only been preserved entire, but stitched up in the same covers with the works of the godly women, the Reverend John Campbell, and the painful Mrs. Ogle. I did not think to mention the good dame, but she comes in usefully as an example. Amongst the treasures of the ladies of my family, her letters have been honoured with a volume to themselves. I read about a half of them myself; then handed over the task to one of stancher resolution, with orders to communicate any fact that should be found to illuminate these pages. Not one was found; it was her only art to communicate by post second-rate sermons at second-hand; and such, I take it, was the correspondence in which

## DOMESTIC ANNALS

my grandmother delighted. If I am right, that of Robert Stevenson, with his quaint smack of the contemporary *Sandford and Merton*, his interest in the whole page of experience, his perpetual quest and fine scent of all that seems romantic to a boy, his needless pomp of language, his excellent good sense, his unfeigned, unstained, unwearied human kindness, would seem to her, in a comparison, dry and trivial and worldly. And if these letters were by an exception cherished and preserved, it would be for one or both of two reasons—because they dealt with and were bitter-sweet reminders of a time of sorrow; or because she was pleased, perhaps touched, by the writer's guileless efforts to seem spiritually-minded.

After this date there were two more births and two more deaths, so that the number of the family remained unchanged; in all five children survived to reach maturity and to outlive their parents.

## CHAPTER II

### THE SERVICE OF THE NORTHERN LIGHTS

#### I

IT were hard to imagine a contrast more sharply defined than that between the lives of the men and women of this family: the one so chambered, so centred in the affections and the sensibilities; the other so active, healthy, and expeditious. From May to November, Thomas Smith and Robert Stevenson were on the mail, in the saddle, or at sea; and my grandfather, in particular, seems to have been possessed with a demon of activity in travel. In 1802, by direction of the Northern Lighthouse Board, he had visited the coast of England from St. Bees, in Cumberland, and round by the Scilly Islands to some place undecipherable by me; in all a distance of 2,500 miles. In 1806 I find him starting "on a tour round the South Coast of England, from the Humber to the Severn." Peace was not long declared ere he found means to visit Holland, where he was in time to see, in the navy-yard at Helvoetsluys, "about twenty

## THE NORTHERN LIGHTS

of Bonaparte's *English flotilla* lying in a state of decay, the object of curiosity to Englishmen." By 1834 he seems to have been acquainted with the coast of France from Dieppe to Bordeaux; and a main part of his duty as Engineer to the Board of Northern Lights was one round of dangerous and laborious travel.

In 1786, when Thomas Smith first received the appointment, the extended and formidable coast of Scotland was lighted at a single point—the Isle of May, in the jaws of the Firth of Forth, where, on a tower already a hundred and fifty years old, an open coal-fire blazed in an iron chauffer. The whole archipelago, thus nightly plunged in darkness, was shunned by sea-going vessels, and the favourite courses were north about Shetland and west about St. Kilda. When the Board met, four new lights formed the extent of their intentions—Kinnaird Head in Aberdeenshire, at the eastern elbow of the coast; North Ronaldsay, in Orkney, to keep the north and guide ships passing to the south'ard of Shetland; Island Glass, on Harris, to mark the inner shore of the Hebrides and illuminate the navigation of the Minch; and the Mull of Kintyre. These works were to be attempted against obstacles, material and financial, that might have staggered the most bold. Smith had no ship at his command till 1791; the roads in those outlandish quarters where his business lay were scarce passable when they existed, and the tower

## A FAMILY OF ENGINEERS

on the Mull of Kintyre stood eleven months unlighted while the apparatus toiled and foundered by the way among rocks and mosses. Not only had towers to be built and apparatus transplanted, the supply of oil must be maintained, and the men fed, in the same inaccessible and distant scenes; a whole service, with its routine and hierarchy, had to be called out of nothing; and a new trade (that of lightkeeper) to be taught, recruited, and organised. The funds of the Board were at the first laughably inadequate. They embarked on their career on a loan of twelve hundred pounds, and their income in 1789, after relief by a fresh Act of Parliament, amounted to less than three hundred. It must be supposed that the thoughts of Thomas Smith, in these early years, were sometimes coloured with despair; and since he built and lighted one tower after another, and created and bequeathed to his successors the elements of an excellent administration, it may be conceded that he was not after all an unfortunate choice for a first engineer.

War added fresh complications. In 1794 Smith came "very near to be taken" by a French squadron. In 1813 Robert Stevenson was cruising about the neighbourhood of Cape Wrath in the immediate fear of Commodore Rogers. The men, and especially the sailors, of the Lighthouse service must be protected by a medal and ticket from the brutal activity of the press-gang.

## THE NORTHERN LIGHTS

And the zeal of volunteer patriots was at times embarrassing.

"I set off on foot," writes my grandfather, "for Marazion, a town at the head of Mount's Bay, where I was in hopes of getting a boat to freight. I had just got that length, and was making the necessary inquiry, when a young man, accompanied by several idle-looking fellows, came up to me, and in a hasty tone said, 'Sir, in the king's name I seize your person and papers.' To which I replied that I should be glad to see his authority, and know the reason of an address so abrupt. He told me the want of time prevented his taking regular steps, but that it would be necessary for me to return to Penzance, as I was suspected of being a French spy. I proposed to submit my papers to the nearest Justice of Peace, who was immediately applied to, and came to the inn where I was. He seemed to be greatly agitated, and quite at a loss how to proceed. The complaint preferred against me was 'that I had examined the Longships Lighthouse with the most minute attention and was no less particular in my inquiries at the keepers of the lighthouse regarding the sunk rocks lying off the Land's End, with the sets of the currents and tides along the coast: that I seemed particularly to regret the situation of the rocks called the Seven Stones, and the loss of a beacon which the Trinity Board had caused to be fixed on the Wolf Rock; that I had taken notes of the bearings of several sunk rocks, and a drawing of the lighthouse, and of Cape Cornwall. Further, that I had refused the honour of Lord Edgecombe's invitation to dinner, offering as an apology that I had some particular business on hand.'"

My grandfather produced in answer his credentials and letter of credit; but the justice, after perusing them, "very gravely observed that they were 'musty bits of paper,'" and proposed to maintain the arrest. Some more enlightened magistrates at Penzance relieved him of suspicion and left him at liberty to pursue his journey,

## A FAMILY OF ENGINEERS

—“which I did with so much eagerness,” he adds, “that I gave the two coal lights on the Lizard only a very transient look.”

Lighthouse operations in Scotland differed essentially in character from those in England. The English coast is in comparison a habitable, homely place, well supplied with towns; the Scottish presents hundreds of miles of savage islands and desolate moors. The Parliamentary committee of 1834, profoundly ignorant of this distinction, insisted with my grandfather that the work at the various stations should be let out on contract “in the neighbourhood,” where sheep and deer, and gulls and cormorants, and a few ragged gillies, perhaps crouching in a beehive house, made up the only neighbours. In such situations repairs and improvements could only be overtaken by collecting (as my grandfather expressed it) a few “lads,” placing them under charge of a foreman, and despatching them about the coast as occasion served. The particular danger of these seas increased the difficulty. The course of the lighthouse tender lies amid iron-bound coasts, among tide-races, the whirlpools of the Pentland Firth, flocks of islands, flocks of reefs, many of them uncharted. The aid of steam was not yet. At first in random coasting sloop, and afterwards in the cutter belonging to the service, the engineer must ply and run amongst these multiplied dangers, and sometimes late into the stormy autumn. For

## THE NORTHERN LIGHTS

pages together my grandfather's diary preserves a record of these rude experiences; of hard winds and rough seas; and of "the try-sail and storm-jib, those old friends which I never like to see." They do not tempt to quotation, but it was the man's element, in which he lived, and delighted to live, and some specimen must be presented. On Friday, Sept. 10th, 1830, the *Regent* lying in Lerwick Bay, we have this entry: "The gale increases, with continued rain." On the morrow, Saturday, 11th, the weather appeared to moderate, and they put to sea, only to be driven by evening into Levenswick. There they lay, "rolling much," with both anchors ahead and the square yard on deck, till the morning of Saturday, 18th. Saturday and Sunday they were plying to the southward with a "strong breeze and a heavy sea," and on Sunday evening anchored in Otterswick. "Monday, 20th, it blows so fresh that we have no communication with the shore. We see Mr. Rome on the beach, but we cannot communicate with him. It blows 'mere fire,' as the sailors express it." And for three days more the diary goes on with tales of davits unshipped, high seas, strong gales from the southward, and the ship driven to refuge in Kirkwall or Deer Sound. I have many a passage before me to transcribe, in which my grandfather draws himself as a man of exactitude about minute and anxious details. It must not be forgotten that these voyages in the ten-

## A FAMILY OF ENGINEERS

der were the particular pleasure and reward of his existence; that he had in him a reserve of romance which carried him delightedly over these hardships and perils; that to him it was "great gain" to be eight nights and seven days in the savage bay of Levenswick—to read a book in the much agitated cabin—to go on deck and hear the gale scream in his ears, and see the landscape dark with rain, and the ship plunge at her two anchors—and to turn in at night and wake again at morning, in his narrow berth, to the clamorous and continued voices of the gale.

His perils and escapes were beyond counting. I shall only refer to two: the first, because of the impression made upon himself; the second, from the incidental picture it presents of the north islanders. On the 9th October, 1794, he took passage from Orkney in the sloop *Elizabeth* of Stromness. She made a fair passage till within view of Kinnaird Head, where, as she was becalmed some three miles in the offing, and wind seemed to threaten from the south-east, the captain landed him, to continue his journey more expeditiously ashore. A gale immediately followed, and the *Elizabeth* was driven back to Orkney and lost with all hands. The second escape I have been in the habit of hearing related by an eye-witness, my own father, from the earliest days of childhood. On a September night, the *Regent* lay in the Pentland Firth in a fog and a violent and windless swell. It

## THE NORTHERN LIGHTS

was still dark, when they were alarmed by the sound of breakers, and an anchor was immediately let go. The peep of dawn discovered them swinging in desperate proximity to the isle of Swona<sup>1</sup> and the surf bursting close under their stern. There was in this place a hamlet of the inhabitants, fisher-folk and wreckers; their huts stood close about the head of the beach. All slept; the doors were closed, and there was no smoke, and the anxious watchers on board ship seemed to contemplate a village of the dead. It was thought possible to launch a boat and tow the *Regent* from her place of danger; and with this view a signal of distress was made and a gun fired with a redhot poker from the galley. Its detonation awoke the sleepers. Door after door was opened, and in the grey light of the morning fisher after fisher was seen to come forth, yawning and stretching himself, nightcap on head. Fisher after fisher, I wrote, and my pen tripped; for it should rather stand wrecker after wrecker. There was no emotion, no animation, it scarce seemed any interest; not a hand was raised; but all callously awaited the harvest of the sea, and their children stood by their side and waited also. To the end of his life, my father remembered that amphitheatre of placid spectators on the beach, and with a

<sup>1</sup>This is only a probable hypothesis; I have tried to identify my father's anecdote in my grandfather's diary, and may very well have been deceived.—[R. L. S.]

## A FAMILY OF ENGINEERS

special and natural animosity, the boys of his own age. But presently a light air sprang up, and filled the sails, and fainted, and filled them again; and little by little the *Regent* fetched way against the swell, and clawed off shore into the turbulent firth.

The purpose of these voyages was to effect a landing on open beaches or among shelving rocks, not for persons only, but for coals and food, and the fragile furniture of light-rooms. It was often impossible. In 1831 I find my grandfather "hovering for a week" about the Pentland Skerries for a chance to land; and it was almost always difficult. Much knack and enterprise were early developed among the seamen of the service; their management of boats is to this day a matter of admiration; and I find my grandfather in his diary depicting the nature of their excellence in one happily descriptive phrase, when he remarks that Captain Soutar had landed "the small stores and nine casks of oil *with all the activity of a smuggler.*" And it was one thing to land, another to get on board again. I have here a passage from the diary, where it seems to have been touch-and-go. "I landed at Tarbetness, on the eastern side of the point, in *a mere gale or blast of wind* from west-south-west, at 2 P.M. It blew so fresh that the captain, in a kind of despair, went off to the ship, leaving myself and the steward ashore. While I was in the light-room, I felt

## THE NORTHERN LIGHTS

it shaking and waving, not with the tremor of the Bell Rock, but with the *waving of a tree!* This the lightkeepers seemed to be quite familiar to, the principal keeper remarking that 'it was very pleasant,' perhaps meaning interesting or curious. The captain worked the vessel into smooth water with admirable dexterity, and I got on board again about 6 P.M. from the other side of the point." But not even the dexterity of Soutar could prevail always; and my grandfather must at times have been left in strange berths and with but rude provision. I may instance the case of my father, who was storm-bound three days upon an islet, sleeping in the uncemented and unchimneyed houses of the islanders, and subsisting on a diet of nettle-soup and lobsters.

The name of Soutar has twice escaped my pen, and I feel I owe him a vignette. Soutar first attracted notice as mate of a praam at the Bell Rock, and rose gradually to be captain of the *Regent*. He was active, admirably skilled in his trade, and a man incapable of fear. Once, in London, he fell among a gang of confidence-men, naturally deceived by his rusticity and his prodigious accent. They plied him with drink,—a hopeless enterprise, for Soutar could not be made drunk; they proposed cards, and Soutar would not play. At last, one of them, regarding him with a formidable countenance, inquired if he were not frightened? "I'm no' very easy fleyed," replied the captain. And the rooks

## A FAMILY OF ENGINEERS

withdrew after some easier pigeon. So many perils shared, and the partial familiarity of so many voyages, had given this man a stronghold in my grandfather's estimation; and there is no doubt but he had the art to court and please him with much hypocritical skill. He usually dined on Sundays in the cabin. He used to come down daily after dinner for a glass of port or whisky, often in his full rig of sou'-wester, oilskins, and long boots; and I have often heard it described how insinuatingly he carried himself on these appearances, artfully combining the extreme of deference with a blunt and seamanlike demeanour. My father and uncles, with the devilish penetration of the boy, were far from being deceived; and my father, indeed, was favoured with an object-lesson not to be mistaken. He had crept one rainy night into an apple-barrel on deck, and from this place of ambush overheard Soutar and a comrade conversing in their oilskins. The smooth sycophant of the cabin had wholly disappeared, and the boy listened with wonder to a vulgar and truculent ruffian. Of Soutar, I may say *tantum vidi*, having met him in the Leith docks now more than thirty years ago, when he abounded in the praises of my grandfather, encouraged me (in the most admirable manner) to pursue his footprints, and left impressed for ever on my memory the image of his own Bardolphian nose. He died not long after.

## THE NORTHERN LIGHTS

The engineer was not only exposed to the hazards of the sea; he must often ford his way by land to remote and scarce accessible places, beyond reach of the mail or the post-chaise, beyond even the tracery of the bridle-path, and guided by natives across bog and heather. Up to 1807 my grandfather seems to have travelled much on horseback; but he then gave up the idea—"such," he writes with characteristic emphasis and capital letters, "is the Plague of Baiting." He was a good pedestrian; at the age of fifty-eight I find him covering seventeen miles over the moors of the Mackay country in less than seven hours, and that is not bad travelling for a scramble. The piece of country traversed was already a familiar track, being that between Loch Eriboll and Cape Wrath; and I think I can scarce do better than reproduce from the diary some traits of his first visit. The tender lay in Loch Eriboll; by five in the morning they sat down to breakfast on board; by six they were ashore—my grandfather, Mr. Slight, an assistant, and Soutar of the jolly nose—and had been taken in charge by two young gentlemen of the neighbourhood and a pair of gillies. About noon they reached the Kyle of Durness and passed the ferry. By half-past three they were at Cape Wrath—not yet known by the emphatic abbreviation of "The Cape,"—and beheld upon all sides of them unfrequented shores, an expanse of desert moor, and the high-

## A FAMILY OF ENGINEERS

piled Western Ocean. The site of the tower was chosen. Perhaps it is by inheritance of blood, but I know few things more inspiriting than this location of a lighthouse in a designated space of heather and air, through which the sea-birds are still flying. By 9 P.M. the return journey had brought them again to the shores of the Kyle. The night was dirty, and as the sea was high and the ferry-boat small, Soutar and Mr. Stevenson were left on the far side, while the rest of the party embarked and were received into the darkness. They made, in fact, a safe though an alarming passage; but the ferryman refused to repeat the adventure; and my grandfather and the captain long paced the beach, impatient for their turn to pass, and tormented with rising anxiety as to the fate of their companions. At length they sought the shelter of a shepherd's house. "We had miserable up-putting," the diary continues, "and on both sides of the ferry much anxiety of mind. Our beds were clean straw, and but for the circumstance of the boat, I should have slept as soundly as ever I did after a walk through moss and mire of sixteen hours."

To go round the lights, even to-day, is to visit past centuries. The tide of tourists that flows yearly in Scotland, vulgarising all where it approaches, is still defined by certain barriers. It will be long ere there is a hotel at Sumburgh or a hydropathic at Cape Wrath; it will be long ere

## THE NORTHERN LIGHTS

any *char-à-banc*, laden with tourists, shall drive up to Barra Head or Monach, the Island of the Monks. They are farther from London than St. Petersburg, and except for the towers, sounding and shining all night with fog-bells and the radiance of the light-room, glittering by day with the trivial brightness of white paint, these island and moorland stations seem inaccessible to the civilisation of to-day, and even to the end of my grandfather's career the isolation was far greater. There ran no post at all in the Long Island; from the lighthouse on Barra Head a boat must be sent for letters as far as Tobermory, between sixty and seventy miles of open sea; and the posts of Shetland, which had surprised Sir Walter Scott in 1814, were still unimproved in 1833, when my grandfather reported on the subject. The group contained at the time a population of 30,000 souls, and enjoyed a trade which had increased in twenty years seven-fold, to between three and four thousand tons. Yet the mails were despatched and received by chance coasting vessels at the rate of a penny a letter; six and eight weeks often elapsed between opportunities, and when a mail was to be made up, sometimes at a moment's notice, the bellman was sent hastily through the streets of Lerwick. Between Shetland and Orkney, only seventy miles apart, there was "no trade communication whatever."

Such was the state of affairs, only sixty years

## A FAMILY OF ENGINEERS

ago, with the three largest clusters of the Scottish Archipelago; and forty-seven years earlier, when Thomas Smith began his rounds, or forty-two, when Robert Stevenson became conjoined with him in these excursions, the barbarism was deep, the people sunk in superstition, the circumstances of their life perhaps unique in history. Lerwick and Kirkwall, like Guam or the Bay of Islands, were but barbarous ports where whalers called to take up and to return experienced seamen. On the outlying islands the clergy lived isolated, thinking other thoughts, dwelling in a different country from their parishioners, like missionaries in the South Seas. My grandfather's unrivalled treasury of anecdote was never written down; it embellished his talk while he yet was, and died with him when he died; and such as have been preserved relate principally to the islands of Ronaldsay and Sanday, two of the Orkney group. These bordered on one of the water-highways of civilisation; a great fleet passed annually in their view, and of the shipwrecks of the world they were the scene and cause of a proportion wholly incommensurable to their size. In one year, 1798, my grandfather found the remains of no fewer than five vessels on the isle of Sanday, which is scarcely twelve miles long.

“Hardly a year passed,” he writes, “without instances of this kind; for, owing to the projecting points of this strangely formed island, the lowness and whiteness of its eastern shores, and the

## THE NORTHERN LIGHTS

wonderful manner in which the scanty patches of land are intersected with lakes and pools of water, it becomes, even in daylight, a deception, and has often been fatally mistaken for an open sea. It had even become proverbial with some of the inhabitants to observe that 'if wrecks were to happen, they might as well be sent to the poor isle of Sanday as anywhere else.' On this and the neighbouring islands the inhabitants have certainly had their share of wrecked goods, for the eye is presented with these melancholy remains in almost every form. For example, although quarries are to be met with generally in these islands and the stones are very suitable for building dykes (*Anglicé*, walls), yet instances occur of the land being enclosed, even to a considerable extent, with ship-timbers. The author has actually seen a park (*Anglicé*, meadow) paled round chiefly with cedar-wood and mahogany from the wreck of a Honduras-built ship; and in one island, after the wreck of a ship laden with wine, the inhabitants have been known to take claret to their barley-meal porridge. On complaining to one of the pilots of the badness of his boat's sails, he replied to the author with some degree of pleasantry, 'Had it been His will that you camena' here wi' your lights, we might 'a' had better sails to our boats, and more o' other things.' It may further be mentioned that when some of Lord Dundas's farms are to be let in these islands a competition takes place for the lease, and it is *bona fide* understood that a much higher rent is paid than the lands would otherwise give were it not for the chance of making considerably by the agency and advantages attending shipwrecks on the shores of the respective farms."

The people of North Ronaldsay still spoke Norse, or, rather, mixed it with their English. The walls of their huts were built to a great thickness of rounded stones from the sea-beach; the roof flagged, loaded with earth, and perforated by a single hole for the escape of smoke. The grass grew beautifully green on the flat house-top, where the family would assemble with

## A FAMILY OF ENGINEERS

their dogs and cats, as on a pastoral lawn; there were no windows, and, in my grandfather's expression, "there was really no demonstration of a house unless it were the diminutive door." He once landed on Ronaldsay with two friends. "The inhabitants crowded and pressed so much upon the strangers that the bailiff, or resident factor of the island, blew with his ox-horn, calling out to the natives to stand off and let the gentlemen come forward to the laird; upon which one of the islanders, as spokesman, called out, 'God ha'e us, man! thou needsna mak' sic a noise. It's no' every day we ha'e *three hatted men* on our isle.' " When the Surveyor of Taxes came (for the first time, perhaps) to Sanday, and began in the King's name to complain of the unconscionable swarms of dogs, and to menace the inhabitants with taxation, it chanced that my grandfather and his friend, Dr. Patrick Neill, were received by an old lady in a Ronaldsay hut. Her hut, which was similar to the model described, stood on a Ness, or point of land jutting into the sea. They were made welcome in the firelit cellar, placed "in *casey* or straw-worked chairs, after the Norwegian fashion, with arms, and a canopy overhead," and given milk in a wooden dish. These hospitalities attended to, the old lady turned at once to Dr. Neill, whom she took for the Surveyor of Taxes. "Sir," said she, "gin ye'll tell the King that I canna keep the Ness free o' the Bangers (sheep) without twa

## THE NORTHERN LIGHTS

hun's, and twa guid hun's too, he'll pass me threa the tax on dug's."

This familiar confidence, these traits of engaging simplicity, are characters of a secluded people. Mankind—and, above all, islanders—come very swiftly to a bearing, and find very readily, upon one convention or another, a tolerable corporate life. The danger is to those from without, who have not grown up from childhood in the islands, but appear suddenly in that narrow horizon, life-sized apparitions. For these no bond of humanity exists, no feeling of kinship is awakened by their peril; they will assist at a shipwreck, like the fisher-folk of Lunga, as spectators, and when the fatal scene is over, and the beach strewn with dead bodies, they will fence their fields with mahogany, and, after a decent grace, sup claret to their porridge. It is not wickedness: it is scarce evil; it is only, in its highest power, the sense of isolation and the wise disinterestedness of feeble and poor races. Think how many viking ships had sailed by these islands in the past, how many vikings had landed, and raised turmoil, and broken up the barrows of the dead, and carried off the wines of the living; and blame them, if you are able, for that belief (which may be called one of the parables of the devil's gospel) that a man rescued from the sea will prove the bane of his deliverer. It might be thought that my grandfather, coming there unknown and upon an employment so

## A FAMILY OF ENGINEERS

hateful to the inhabitants, must have run the hazard of his life. But this were to misunderstand. He came franked by the laird and the clergyman; he was the King's officer; the work was "opened with prayer by the Rev. Walter Trail, minister of the parish"; God and the King had decided it, and the people of these pious islands bowed their heads. There landed, indeed, in North Ronaldsay, during the last decade of the eighteenth century, a traveller whose life seems really to have been imperilled. A very little man of a swarthy complexion, he came ashore, exhausted and unshaved, from a long boat passage, and lay down to sleep in the home of the parish schoolmaster. But he had been seen landing. The inhabitants had identified him for a Pict, as, by some singular confusion of name, they call the dark and dwarfish aboriginal people of the land. Immediately the obscure ferment of a race-hatred, grown into a superstition, began to work in their bosoms, and they crowded about the house and the room-door with fearful whisperings. For some time the schoolmaster held them at bay, and at last despatched a messenger to call my grandfather. He came: he found the islanders beside themselves at this unwelcome resurrection of the dead and the detested; he was shown, as adminicular of testimony, the traveller's uncouth and thick-soled boots; he argued, and finding argument unavailing, consented to enter the room and ex-

## THE NORTHERN LIGHTS

amine with his own eyes the sleeping Pict. One glance was sufficient: the man was now a missionary, but he had been before that an Edinburgh shopkeeper with whom my grandfather had dealt. He came forth again with this report, and the folk of the island, wholly relieved, dispersed to their own houses. They were timid as sheep and ignorant as limpets; that was all. But the Lord deliver us from the tender mercies of a frightened flock!

I will give two more instances of their superstition. When Sir Walter Scott visited the Stones of Stennis, my grandfather put in his pocket a hundred-foot line, which he unfortunately lost.

“Some years afterwards,” he writes, “one of my assistants on a visit to the Stones of Stennis took shelter from a storm in a cottage close by the lake; and seeing a box-measuring-line in the bole or sole of the cottage window, he asked the woman where she got this well-known professional appendage. She said: ‘O sir, ane of the bairns fand it lang syne at the Stanes; and when drawing it out we took fright, and thinking it had belanged to the fairies, we threw it into the bole, and it has layen there ever since.’”

This is for the one; the last shall be a sketch by the master hand of Scott himself:—

“At the village of Stromness, on the Orkney main island, called Pomona, lived, in 1814, an aged dame called Bessie Millie, who helped out her subsistence by selling favourable winds to mariners. He was a venturesome master of a vessel who left the roadstead of Stromness without paying his offering to propitiate Bessie Millie! Her fee was extremely moderate, being exactly

## A FAMILY OF ENGINEERS

sixpence for which she boiled her kettle and gave the bark the advantage of her prayers, for she disclaimed all unlawful acts. The wind thus petitioned for was sure, she said, to arrive, though occasionally the marines had to wait some time for it. The woman's dwelling and appearance were not unbecoming her pretensions. Her house, which was on the brow of the steep hill on which Stromness is founded, was only accessible by a series of dirty and precipitous lanes, and for exposure might have been the abode of Eolus himself, in whose commodities the inhabitant dealt. She herself was, as she told us, nearly one hundred years old, withered and dried up like a mummy. A clay-coloured kerchief, folded round her neck, corresponded in colour to her corpse-like complexion. Two light blue eyes that gleamed with a lustre like that of insanity, an utterance of astonishing rapidity, a nose and chin that almost met together, and a ghastly expression of cunning, gave her the effect of Hecate. Such was Bessie Millie, to whom the mariners paid a sort of tribute with a feeling between jest and earnest."

### II

From about the beginning of the century up to 1807 Robert Stevenson was in partnership with Thomas Smith. In the last-named year the partnership was dissolved; Thomas Smith returning to his business, and my grandfather becoming sole engineer to the Board of Northern Lights.

I must try, by excerpts from his diary and correspondence, to convey to the reader some idea of the ardency and thoroughness with which he threw himself into the largest and least of his multifarious engagements in this service. But first I must say a word or two upon the life of lightkeepers, and the temptations to which they are more particularly exposed. The lightkeeper

## THE NORTHERN LIGHTS

occupies a position apart among men. In sea-towers the complement has always been three since the deplorable business in the Eddystone, when one keeper died, and the survivor, signaling in vain for relief, was compelled to live for days with the dead body. These usually pass their time by the pleasant human expedient of quarrelling; and sometimes, I am assured, not one of the three is on speaking terms with any other. On shore stations, which on the Scottish coast are sometimes hardly less isolated, the usual number is two, a principal and an assistant. The principal is dissatisfied with the assistant, or perhaps the assistant keeps pigeons, and the principal wants the water from the roof. Their wives and families are with them, living cheek by jowl. The children quarrel; Jockie hits Jimsie in the eye, and the mothers make haste to mingle in the dissension. Perhaps there is trouble about a broken dish; perhaps Mrs. Assistant is more highly born than Mrs. Principal and gives herself airs; and the men are drawn in and the servants presently follow. "Church privileges have been denied the keeper's and the assistant's servants," I read in one case, and the eminently Scots periphrasis means neither more nor less than excommunication, "on account of the discordant and quarrelsome state of the families. The cause, when inquired into, proves to be *tittle-tattle* on both sides." The tender comes round; the foremen and artificers go from

## A FAMILY OF ENGINEERS

station to station; the gossip flies through the whole system of the service, and the stories, disfigured and exaggerated, return to their own birthplace with the returning tender. The English Board was apparently shocked by the picture of these dissensions. "When the Trinity House can," I find my grandfather writing at Beechy Head, in 1834, "they do not appoint two keepers, they disagree so ill. A man who has a family is assisted by his family; and in this way, to my experience and present observation, the business is very much neglected. One keeper is, in my view, a bad system. This day's visit to an English lighthouse convinces me of this, as the lightkeeper was walking on a staff with the gout, and the business performed by one of his daughters, a girl of thirteen or fourteen years of age." This man received a hundred a year! It shows a different reading of human nature, perhaps typical of Scotland and England, that I find in my grandfather's diary the following pregnant entry: "*The lightkeepers, agreeing ill, keep one another to their duty.*" But the Scottish system was not alone founded on this cynical opinion. The dignity and the comfort of the northern lightkeeper were both attended to. He had a uniform to "raise him in his own estimation, and in that of his neighbour, which is of consequence to a person of trust. The keepers," my grandfather goes on, in another place, "are attended to in all the detail of

## THE NORTHERN LIGHTS

accommodation in the best style as shipmasters; and this is believed to have a sensible effect upon their conduct, and to regulate their general habits as members of society." He notes, with the same dip of ink, that "the brasses were not clean, and the persons of the keepers not *trig*"; and thus we find him writing to a culprit: "I have to complain that you are not cleanly in your person, and that your manner of speech is ungentle, and rather inclines to rudeness. You must therefore take a different view of your duties as a lightkeeper." A high ideal for the service appears in these expressions, and will be more amply illustrated further on. But even the Scottish lightkeeper was frail. During the unbroken solitude of the winter months, when inspection is scarce possible, it must seem a vain toil to polish the brass hand-rail of the stair, or to keep an unrewarded vigil in the lightroom; and the keepers are habitually tempted to the beginnings of sloth, and must unremittingly resist. He who temporises with his conscience is already lost. I must tell here an anecdote that illustrates the difficulties of inspection. In the days of my uncle David and my father there was a station which they regarded with jealousy. The two engineers compared notes and were agreed. The tower was always clean, but seemed always to bear traces of a hasty cleansing, as though the keepers had been suddenly forewarned. On inquiry, it proved that such was

## A FAMILY OF ENGINEERS

the case, and that a wandering fiddler was the unfailing harbinger of the engineer. At last my father was storm-stayed one Sunday in a port at the other side of the island. The visit was quite overdue, and as he walked across upon the Monday morning he promised himself that he should at last take the keepers unprepared. They were both waiting for him in uniform at the gate; the fiddler had been there on Saturday!

My grandfather, as will appear from the following extracts, was much a martinet, and had a habit of expressing himself on paper with an almost startling emphasis. Personally, with his powerful voice, sanguine countenance, and eccentric and original locutions, he was well qualified to inspire a salutary terror in the service.

“I find that the keepers have, by some means or another, got into the way of cleaning too much with rotten-stone and oil. I take the principal keeper to *task* on this subject, and make him bring a clean towel and clean one of the brazen frames, which leaves the towel in an odious state. This towel I put up in a sheet of paper, seal, and take with me to confront Mr. Murdoch, who has just left the station.” “This letter”—a stern enumeration of complaints—“to lie a week on the light-room book-place, and to be put in the Inspector’s hands when he comes round.” “It is the most painful thing that can occur for me to have a correspondence of this kind with any of the keepers; and when I come to the Lighthouse, instead of having the satisfaction to meet them with approbation, it is distressing when one is obliged to put on a most angry countenance and demeanour; but from such culpable negligence as you have shown there is no avoiding it. I hold it as a fixed maxim that, when a man or a family put on a slovenly appearance in their houses, stairs, and lanterns,

## THE NORTHERN LIGHTS

I always find their reflectors, burners, windows, and light in general, ill attended to; and, therefore, I must insist on cleanliness throughout." "I find you very deficient in the duty of the high tower. You thus place your appointment as Principal Keeper in jeopardy; and I think it necessary, as an old servant of the Board, to put you upon your guard once for all at this time. I call upon you to recollect what was formerly and is now said to you. The state of the backs of the reflectors at the high tower was disgraceful, as I pointed out to you on the spot. They were as if spitten upon, and greasy finger-marks upon the back straps. I demand an explanation of this state of things." "The cause of the Commissioners dismissing you is expressed in the minute; and it must be a matter of regret to you that you have been so much engaged in smuggling, and also that the Reports relative to the cleanliness of the Lighthouse, upon being referred to, rather added to their unfavourable opinion." "I do not go into the dwelling-house, but severely chide the lightkeepers for the disagreement that seems to subsist among them." "The families of the two lightkeepers here agree very ill. I have effected a reconciliation for the present." "Things are in a very *humdrum* state here. There is no painting, and in and out of doors no taste of tidiness displayed. Robert's wife *greets* and M'Gregor's scolds; and Robert is so down-hearted that he says he is unfit for duty. I told him that if he was to mind wives' quarrels, and to take them up, the only way was for him and M'Gregor to go down to the point like Sir G. Grant and Lord Somerset." "I cannot say that I have experienced a more unpleasant meeting than that of the lighthouse folks this morning, or ever saw a stronger example of unfeeling barbarity than the conduct which the —s exhibited. These two cold-hearted persons, not contented with having driven the daughter of the poor nervous woman from her father's house, *both* kept *pouncing* at her, lest she should forget her great misfortune. Write me of their conduct. Do not make any communication of the state of these families at Kinnaird Head, as this would be like *Tale-bearing*."

There is the great word out. Tales and Tale-bearing, always with the emphatic capitals, run

## A FAMILY OF ENGINEERS

continually in his correspondence. I will give but two instances:—

“Write to David [one of the lightkeepers] and caution him to be more prudent how he expresses himself. Let him attend his duty to the Lighthouse and his family concerns, and give less heed to Tale-bearers.” “I have not your last letter at hand to quote its date; but, if I recollect, it contains some kind of tales, which nonsense I wish you would lay aside and notice only the concerns of your family and the important charge committed to you.”

Apparently, however, my grandfather was not himself inaccessible to the Tale-bearer, as the following indicates:—

“In walking along with Mr. —, I explain to him that I should be under the necessity of looking more closely into the business here from his conduct at Buddonness, which had given an instance of weakness in the Moral principle which had staggered my opinion of him. His answer was, ‘That will be with regard to the lass?’ I told him I was to enter no farther with him upon the subject.” “Mr. Miller appears to be master and man. I am sorry about this foolish fellow. Had I known his train, I should not, as I did, have rather forced him into the service. Upon finding the windows in the state they were, I turned upon Mr. Watt, and especially upon Mr. Stewart. The latter did not appear for a length of time to have visited the light-room. On asking the cause—did Mr. Watt and him (*sic*) disagree; he said no; but he had got very bad usage from the assistant, ‘who was a very obstreperous man.’ I could not bring Mr. Watt to put in language his objections to Miller; all I could get was that, he being your friend, and saying he was unwell, he did not like to complain or to push the man; that the man seemed to have no liking to anything like work; that he was unruly; that, being an educated man, he despised them. I was, however, determined to have out of these *unwilling* witnesses the language alluded to. I fixed upon Mr. Stewart as chief; he hedged. My curiosity in-

## THE NORTHERN LIGHTS

creased, and I urged. Then he said, 'What would I think, just exactly, of Mr. Watt being called an Old B——?' You may judge of my surprise. There was not another word uttered. This was quite enough, as coming from a person I should have calculated upon quite different behaviour from. It spoke a volume of the man's mind and want of principle." "Object to the keeper keeping a Bull-Terrier dog of ferocious appearance. It is dangerous, as we land at all times of the night." "Have only to complain of the storehouse floor being spotted with oil. Give orders for this being instantly rectified, so that on my return to-morrow I may see things in good order." "The furniture of both houses wants much rubbing. Mrs. ——'s carpets are absurd beyond anything I have seen. I want her to turn the fenders up with the bottom to the fireplace: the carpets, when not likely to be in use folded up and laid as a hearthrug partly under the fender."

My grandfather was king in the service to his finger tips. All should go in his way, from the principal lightkeeper's coat to the assistant's fender, from the gravel in the garden-walks to the bad smell in the kitchen, or the oil-spots on the store-room floor. It might be thought there was nothing more calculated to awake men's resentment, and yet his rule was not more thorough than it was beneficent. His thought for the keepers was continual, and it did not end with their lives. He tried to manage their successions; he thought no pains too great to arrange between a widow and a son who had succeeded his father; he was often harassed and perplexed by tales of hardship; and I find him writing, almost in despair, of their improvident habits and the destitution that awaited their families upon a death. "The house being com-

## A FAMILY OF ENGINEERS

pletely furnished, they come into possession without necessaries, and they go out NAKED. The insurance seems to have failed, and what next is to be tried?" While they lived he wrote behind their backs to arrange for the education of their children, or to get them other situations if they seemed unsuitable for the Northern Lights. When he was at a lighthouse on a Sunday he held prayers and heard the children read. When a keeper was sick, he lent him his horse and sent him mutton and brandy from the ship. "The assistant's wife having been this morning confined, there was sent ashore a bottle of sherry and a few rusks—a practice which I have always observed in this service," he writes. They dwelt, many of them, in uninhabited isles or desert forelands, totally cut off from shops. Many of them were, besides, fallen into a rustic dishabitude of life, so that even when they visited a city they could scarce be trusted with their own affairs, as (for example) he who carried home to his children, thinking they were oranges, a bag of lemons. And my grandfather seems to have acted, at least in his early years, as a kind of gratuitous agent for the service. Thus I find him writing to a keeper in 1806, when his mind was already pre-occupied with arrangements for the Bell Rock: "I am much afraid I stand very unfavourably with you as a man of promise, as I was to send several things of which I believe I have more than once got the

## THE NORTHERN LIGHTS

memorandum. All I can say is that in this respect you are not singular. This makes me no better; but really I have been driven about beyond all example in my past experience, and have been essentially obliged to neglect my own urgent affairs." No servant of the Northern Lights came to Edinburgh but he was entertained at Baxter's Place to breakfast. There, at his own table, my grandfather sat down delightedly with his broad-spoken, homespun officers. His whole relation to the service was, in fact, patriarchal; and I believe I may say that throughout its ranks he was adored. I have spoken with many who knew him; I was his grandson, and their words may have very well been words of flattery; but there was one thing that could not be affected, and that was the look and light that came into their faces at the name of Robert Stevenson.

In the early part of the century the foreman builder was a young man of the name of George Peebles, a native of Anstruther. My grandfather had placed in him a very high degree of confidence, and he was already designated to be foreman at the Bell Rock, when, on Christmas-day 1806, on his way home from Orkney, he was lost in the schooner *Traveller*. The tale of the loss of the *Traveller* is almost a replica of that of the *Elizabeth* of Stromness; like the *Elizabeth* she came as far as Kinnaird Head, was then surprised by a storm, driven back to Orkney, and

## A FAMILY OF ENGINEERS

bilged and sank on the island of Flotta. It seems it was about the dusk of the day when the ship struck, and many of the crew and passengers were drowned. About the same hour, my grandfather was in his office at the writing-table; and the room beginning to darken, he laid down his pen and fell asleep. In a dream he saw the door open and George Peebles come in, "reeling to and fro, and staggering like a drunken man," with water streaming from his head and body to the floor. There it gathered into a wave which, sweeping forward, submerged my grandfather. Well, no matter how deep; versions vary; and at last he awoke, and behold it was a dream! But it may be conceived how profoundly the impression was written even on the mind of a man averse from such ideas, when the news came of the wreck on Flotta and the death of George.

George's vouchers and accounts had perished with himself; and it appeared he was in debt to the Commissioners. But my grandfather wrote to Orkney twice, collected evidence of his disbursements, and proved him to be seventy pounds ahead. With this sum, he applied to George's brothers, and had it apportioned between their mother and themselves. He approached the Board and got an annuity of £5 bestowed on the widow Peebles; and we find him writing her a long letter of explanation and advice, and pressing on her the duty of making a

## THE NORTHERN LIGHTS

will. That he should thus act executor was no singular instance. But besides this we are able to assist at some of the stages of a rather touching experiment: no less than an attempt to secure Charles Peebles heir to George's favour. He is despatched, under the character of "a fine young man"; recommended to gentlemen for "advice, as he's a stranger in your place, and indeed to this kind of charge, this being his first outset as Foreman"; and for a long while after, the letter-book, in the midst of that thrilling first year of the Bell Rock, is encumbered with pages of instruction and encouragement. The nature of a bill, and the precautions that are to be observed about discounting it, are expounded at length and with clearness. "You are not, I hope, neglecting, Charles, to work the harbour at spring-tides; and see that you pay the greatest attention to get the well so as to supply the keeper with water, for he is a very helpless fellow, and so unfond of hard work that I fear he could do ill to keep himself in water by going to the other side for it."—"With regard to spirits, Charles, I see very little occasion for it." These abrupt apostrophes sound to me like the voice of an awakened conscience; but they would seem to have reverberated in vain in the ears of Charles. There was trouble in Pladda, his scene of operations; his men ran away from him, there was at least a talk of calling in the Sheriff. "I fear," writes my grandfather, "you have been

## A FAMILY OF ENGINEERS

too indulgent, and I am sorry to add that men do not answer to be too well treated, a circumstance which I have experienced, and which you will learn as you go on in business." I wonder, was not Charles Peebles himself a case in point? Either death, at least, or disappointment and discharge, must have ended his service in the Northern Lights; and in later correspondence I look in vain for any mention of his name—Charles, I mean, not Peebles: for as late as 1839 my grandfather is patiently writing to another of the family: "I am sorry you took the trouble of applying to me about your son, as it lies quite out of my way to forward his views in the line of his profession as a Draper."

### III

A professional life of Robert Stevenson has been already given to the world by his son David, and to that I would refer those interested in such matters. But my own design, which is to represent the man, would be very ill carried out if I suffered myself or my reader to forget that he was, first of all and last of all, an engineer. His chief claim to the style of a mechanical inventor is on account of the Jib or Balance Crane of the Bell Rock, which are beautiful contrivances. But the great merit of this engineer was not in the field of engines. He was above all things a projector of works in the face of nature, and a modifier of nature itself. A

## THE NORTHERN LIGHTS

road to be made, a tower to be built, a harbour to be constructed, a river to be trained and guided in its channel—these were the problems with which his mind was continually occupied; and for these and similar ends he travelled the world for more than half a century, like an artist, note-book in hand.

He once stood and looked on at the emptying of a certain oil-tube; he did so watch in hand, and accurately timed the operation; and in so doing offered the perfect type of his profession. The fact acquired might never be of use: it was acquired: another link in the world's huge chain of processes was brought down to figures and placed at the service of the engineer. "The very term mensuration sounds *engineer-like*," I find him writing; and in truth what the engineer most properly deals with is that which can be measured, weighed, and numbered. The time of any operation in hours and minutes, its cost in pounds, shillings, and pence, the strain upon a given point in foot-pounds—these are his conquests, with which he must continually furnish his mind, and which, after he has acquired them, he must continually apply and exercise. They must be not only entries in note-books, to be hurriedly consulted; in the actor's phrase, he must be *stale* in them; in a word of my grandfather's, they must be "fixed in the mind like the ten fingers and ten toes."

These are the certainties of the engineer; so

## A FAMILY OF ENGINEERS

far he finds a solid footing and clear views. But the province of formulas and constants is restricted. Even the mechanical engineer comes at last to an end of his figures, and must stand up, a practical man, face to face with the discrepancies of nature and the hiatuses of theory. After the machine is finished, and the steam turned on, the next is to drive it; and experience and an exquisite sympathy must teach him where a weight should be applied or a nut loosened. With the civil engineer, more properly so called (if anything can be proper with this awkward coinage), the obligation starts with the beginning. He is always the practical man. The rains, the winds and the waves, the complexity and the fitfulness of nature, are always before him. He has to deal with the unpredictable, with those forces (in Smeaton's phrase) that "are subject to no calculation"; and still he must predict, still calculate them, at his peril. His work is not yet in being, and he must foresee its influence: how it shall deflect the tide, exaggerate the waves, dam back the rain-water, or attract the thunderbolt. He visits a piece of sea-board: and from the inclination and soil of the beach, from the weeds and shell-fish, from the configuration of the coast and the depth of soundings outside, he must induce what magnitude of waves is to be looked for. He visits a river, its summer water babbling on shallows; and he must not only read, in a thousand indica-

## THE NORTHERN LIGHTS

tions, the measure of winter freshets, but be able to predict the violence of occasional great floods. Nay, and more: he must not only consider that which is, but that which may be. Thus I find my grandfather writing, in a report on the North Esk Bridge: "A less waterway might have sufficed, but *the valleys may come to be meliorated by drainage.*" One field drained after another through all that confluence of vales, and we come to a time when they shall precipitate, by so much a more copious and transient flood, as the gush of the flowing drain-pipe is superior to the leakage of a peat.

It is plain there is here but a restricted use for formulas. In this sort of practice, the engineer has need of some transcendental sense. Smeaton, the pioneer, bade him obey his "feelings"; my father, that "power of estimating obscure forces which supplies a coefficient of its own to every rule." The rules must be everywhere indeed; but they must everywhere be modified by this transcendental coefficient, everywhere bent to the impression of the trained eye and the *feelings* of the engineer. A sentiment of physical laws and of the scale of nature, which shall have been strong in the beginning and progressively fortified by observation must be his guide in the last recourse. I had the most opportunity to observe my father. He would pass hours on the beach, brooding over the waves, counting them, noting their least deflection,

## A FAMILY OF ENGINEERS

noting when they broke. On Tweedside, or by Lyne or Manor, we have spent together whole afternoons; to me, at the time, extremely wearisome; to him, as I am now sorry to think, bitterly mortifying. The river was to me a pretty and various spectacle; I could not see—I could not be made to see—it otherwise. To my father it was a chequer-board of lively forces, which he traced from pool to shallow with minute appreciation and enduring interest. “That bank was being undercut,” he might say; “Why? Suppose you were to put a groin out here, would not the *filum fluminis* be cast abruptly off across the channel? and where would it impinge upon the other shore? and what would be the result? Or suppose you were to blast that boulder, what would happen? Follow it—use the eyes God has given you—can you not see that a great deal of land would be reclaimed upon this side?” It was to me like school in holidays; but to him, until I had worn him out with my invincible triviality, a delight. Thus he pored over the engineer’s voluminous handy-book of nature; thus must, too, have pored my grandfather and uncles.

But it is of the essence of this knowledge, or this knack of mind, to be largely incommunicable. “It cannot be imparted to another,” says my father. The verbal casting-net is thrown in vain over these evanescent, inferential relations. Hence the insignificance of much engineering

## THE NORTHERN LIGHTS

literature. So far as the science can be reduced to formulas or diagrams, the book is to the point; so far as the art depends on intimate study of the ways of nature, the author's words will too often be found vapid. This fact—that engineering looks one way, and literature another—was what my grandfather overlooked. All his life long, his pen was in his hand, piling up a treasury of knowledge, preparing himself against all possible contingencies. Scarce anything fell under his notice but he perceived in it some relation to his work, and chronicled it in the pages of his journal in his always lucid, but sometimes inexact and wordy, style. The Travelling Diary (so he called it) was kept in fascicles of ruled paper, which were at last bound up, rudely indexed, and put by for future reference. Such volumes as have reached me contain a surprising medley: the whole details of his employment in the Northern Lights and his general practice; the whole biography of an enthusiastic engineer. Much of it is useful and curious; much merely otiose; and much can only be described as an attempt to impart that which cannot be imparted in words. Of such are his repeated and heroic descriptions of reefs; monuments of misdirected literary energy, which leave upon the mind of the reader no effect but that of a multiplicity of words and the suggested vignette of a lusty old gentleman scrambling among tangle. It is to be remembered that he

## A FAMILY OF ENGINEERS

came to engineering while yet it was in the egg and without a library, and that he saw the bounds of that profession widen daily. He saw iron ships, steamers, and the locomotive engine, introduced. He lived to travel from Glasgow to Edinburgh in the inside of a forenoon, and to remember that he himself had "often been twelve hours upon the journey, and his grandfather (Lillie) two days"! The profession was still but in its second generation, and had already broken down the barriers of time and space. Who should set a limit to its future encroachments? And hence, with a kind of sanguine pedantry, he pursued his design of "keeping up with the day" and posting himself and his family on every mortal subject. Of this unpractical idealism we shall meet with many instances; there was not a trade, and scarce an accomplishment, but he thought it should form part of the outfit of an engineer; and not content with keeping an encyclopædic diary himself, he would fain have set all his sons to work continuing and extending it. They were more happily inspired. My father's engineering pocket-book was not a bulky volume; with its store of pregnant notes and vital formulas, it served him through life, and was not yet filled when he came to die. As for Robert Stevenson and the Travelling Diary, I should be ungrateful to complain, for it has supplied me with many lively traits for this and subsequent

## THE NORTHERN LIGHTS

chapters; but I must still remember much of the period of my study there as a sojourn in the Valley of the Shadow.

The duty of the engineer is twofold—to design the work, and to see the work done. We have seen already something of the vociferous thoroughness of the man, upon the cleaning of lamps and the polishing of reflectors. In building, in road-making, in the construction of bridges, in every detail and byway of his employments, he pursued the same ideal. Perfection (with a capital P and violently under-scored) was his design. A crack for a penknife, the waste of “six-and-thirty shillings,” “the loss of a day or a tide,” in each of these he saw and was revolted by the finger of the sloven; and to spirits intense as his, and immersed in vital undertakings, the slovenly is the dishonest, and wasted time is instantly translated into lives endangered. On this consistent idealism there is but one thing that now and then trenches with a touch of incongruity, and that is his love of the picturesque. As when he laid out a road on Hogarth’s line of beauty; bade a foreman be careful, in quarrying, not “to disfigure the island”; or regretted in a report that “the great stone, called the *Devil in the Hole*, was blasted or broken down to make road-metal, and for other purposes of the work.”

## CHAPTER III

### THE BUILDING OF THE BELL ROCK

OFF the mouths of the Tay and the Forth, thirteen miles from Fifeness, eleven from Arbroath, and fourteen from the Red Head of Angus, lies the Inchcape or Bell Rock. It extends to a length of about fourteen hundred feet, but the part of it discovered at low water to not more than four hundred and twenty-seven. At a little more than half-flood in fine weather the seamless ocean joins over the reef, and at high-water springs it is buried sixteen feet. As the tide goes down, the higher reaches of the rock are seen to be clothed by *Conferva rupestris* as by a sward of grass; upon the more exposed edges, where the currents are most swift and the breach of the sea heaviest, Baderlock or Henware flourishes; and the great Tangle grows at the depth of several fathoms with luxuriance. Before man arrived, and introduced into the silence of the sea the smoke and clangour of a blacksmith's shop, it was a favourite resting place of seals. The crab and lobster haunt in the crevices; and limpets, mussels, and the white buckie abound.

## THE BELL ROCK

According to tradition, a bell had been once hung upon this rock by an abbot of Arbroath,<sup>1</sup> “and being taken down by a sea-pirate, a year thereafter he perished upon the same rock, with ship and goods, in the righteous judgment of God.” From the days of the abbot and the sea-pirate no man had set foot upon the Inchcape, save fishers from the neighbouring coast, or perhaps—for a moment, before the surges swallowed them—the unfortunate victims of shipwreck. The fishers approached the rock with an extreme timidity; but their harvest appears to have been great, and the adventure no more perilous than lucrative. In 1800, on the occasion of my grandfather’s first landing, and during the two or three hours which the ebb-tide and the smooth water allowed them to pass upon its shelves, his crew collected upwards of two hundredweight of old metal: pieces of a kedge anchor and a cabin stove, crowbars, a hinge and lock of a door, a ship’s marking-iron, a piece of a ship’s caboose, a soldier’s bayonet, a cannon ball, several pieces of money, a shoe-buckle, and the like. Such were the spoils of the Bell Rock. But the number of vessels ac-

<sup>1</sup>This is, of course, the tradition commemorated by Southey in his ballad of “The Inchcape Bell.” Whether true or not, it points to the fact that from the infancy of Scottish navigation the seafaring mind had been fully alive to the perils of this reef. Repeated attempts had been made to mark the place with beacons, but all efforts were unavailing (one such beacon having been carried away within eight days of its erection) until Robert Stevenson conceived and carried out the idea of the stone tower.—[S. C.]

## A FAMILY OF ENGINEERS

tually lost upon the reef was as nothing to those that were cast away in fruitless efforts to avoid it. Placed right in the fairway of two navigations, and one of these the entrance to the only harbour of refuge between the Downs and the Moray Firth, it breathed abroad along the whole coast an atmosphere of terror and perplexity; and no ship sailed that part of the North Sea at night, but what the ears of those on board would be strained to catch the roaring of the seas on the Bell Rock.

From 1794 onward, the mind of my grandfather had been exercised with the idea of a light upon this formidable danger. To build a tower on a sea rock, eleven miles from shore, and barely uncovered at low water of neaps, appeared a fascinating enterprise. It was something yet unattempted, unessayed; and even now, after it has been lighted for more than eighty years, it is still an exploit that has never been repeated.<sup>1</sup> My grandfather was, besides, but a young man,

<sup>1</sup>The particular event which concentrated Mr. Stevenson's attention on the problem of the Bell Rock was the memorable gale of December, 1799, when, among many other vessels, H.M.S. *York*, a seventy-four gun ship, went down with all hands on board. Shortly after this disaster, Mr. Stevenson made a careful survey, and prepared his models for a stone tower, the idea of which was at first received with pretty general scepticism. Smeaton's Eddystone tower could not be cited as affording a parallel, for there the rock is not submerged even at high water, while the problem of the Bell Rock was to build a tower of masonry on a sunken reef far distant from land, covered at every tide to a depth of twelve feet or more, and having thirty-two fathoms' depth of water within a mile of its eastern edge.  
—[S. C.]

## THE BELL ROCK

of an experience comparatively restricted, and a reputation confined to Scotland; and when he prepared his first models, and exhibited them in Merchants' Hall, he can hardly be acquitted of audacity. John Clerk of Eldin stood his friend from the beginning, kept the key of the model room, to which he carried "eminent strangers," and found words of counsel and encouragement beyond price. "Mr. Clerk had been personally known to Smeaton, and used occasionally to speak of him to me," says my grandfather; and again: "I felt regret that I had not the opportunity of a greater range of practice to fit me for such an undertaking; but I was fortified by an expression of my friend Mr. Clerk in one of our conversations. 'This work,' said he, 'is unique, and can be little forwarded by experience of ordinary masonic operations. In this case Smeaton's "Narrative" must be the text-book, and energy and perseverance the pratique.'"

A Bill for the work was introduced into Parliament and lost in the Lords in 1802-3. John Rennie was afterwards, at my grandfather's suggestion, called in council, with the style of chief engineer. The precise meaning attached to these words by any of the parties appears irrecoverable. Chief engineer should have full authority, full responsibility, and a proper share of the emoluments; and there were none of these for Rennie. I find in an appendix a paper which resumes the controversy on this subject;

## A FAMILY OF ENGINEERS

and it will be enough to say here that Rennie did not design the Bell Rock, that he did not execute it, and that he was not paid for it.<sup>1</sup> From so much of the correspondence as has come down to me, the acquaintance of this man, eleven years his senior, and already famous, appears to have been both useful and agreeable to Robert Stevenson. It is amusing to find my grandfather seeking high and low for a brace of pistols which his colleague had lost by the way between Aberdeen and Edinburgh; and writing to Messrs. Dollond, "I have not thought it necessary to

<sup>1</sup>The grounds for the rejection of the Bill by the House of Lords in 1802-3 had been that the extent of coast over which dues were proposed to be levied would be too great. Before going to Parliament again, the Board of Northern Lights, desiring to obtain support and corroboration for Mr. Stevenson's views, consulted first Telford, who was unable to give the matter his attention, and then (on Stevenson's suggestion) Rennie, who concurred in affirming the practicability of a stone tower, and supported the Bill when it came again before Parliament in 1806. Rennie was afterwards appointed by the Commissioners as advising engineer, whom Stevenson might consult in cases of emergency. It seems certain that the title of chief engineer had in this instance no more meaning than the above. Rennie, in point of fact, proposed certain modifications in Stevenson's plans, which the latter did not accept; nevertheless Rennie continued to take a kindly interest in the work, and the two engineers remained in friendly correspondence during its progress. The official view taken by the Board as to the quarter in which lay both the merit and the responsibility of the work may be gathered from a minute of the Commissioners at their first meeting held after Stevenson died; in which they record their regret "at the death of this zealous, faithful, and able officer, to whom is due the honour of conceiving and executing the Bell Rock Lighthouse." The matter is briefly summed up in the *Life of Robert Stevenson* by his son David Stevenson (A. & C. Black, 1878), and fully discussed, on the basis of official facts and figures, by the same writer in a letter to the *Civil Engineers' and Architects' Journal*, 1862.—[S. C.]

## THE BELL ROCK

trouble Mr. Rennie with this order, but *I beg you will see to get two minutes of him as he passes your door*”—a proposal calculated rather from the latitude of Edinburgh than from London, even in 1807. It is pretty, too, to observe with what affectionate regard Smeaton was held in mind by his immediate successors. “Poor old fellow,” writes Rennie to Stevenson, “I hope he will now and then take a peep at us, and inspire you with fortitude and courage to brave all difficulties and dangers to accomplish a work which will, if successful, immortalise you in the annals of fame.” The style might be bettered, but the sentiment is charming.

Smeaton was, indeed, the patron saint of the Bell Rock. Undeterred by the sinister fate of Winstanley, he had tackled and solved the problem of the Eddystone; but his solution had not been in all respects perfect. It remained for my grandfather to outdo him in daring, by applying to a tidal rock those principles which had been already justified by the success of the Eddystone, and to perfect the model by more than one exemplary departure. Smeaton had adopted in his floors the principle of the arch; each therefore exercised an outward thrust upon the walls, which must be met and combated by embedded chains. My grandfather's flooring-stones, on the other hand, were flat, made part of the outer wall, and were keyed and dovetailed into a central stone, so as to bind the work

## A FAMILY OF ENGINEERS

together and be positive elements of strength. In 1703 Winstanley still thought it possible to erect his strange pagoda, with its open gallery, its florid scrolls and candlesticks: like a rich man's folly for an ornamental water in a park. Smeaton followed; then Stevenson in his turn corrected such flaws as were left in Smeaton's design; and with his improvements, it is not too much to say the model was made perfect. Smeaton and Stevenson had between them evolved and finished the sea-tower. No subsequent builder has departed in anything essential from the principles of their design. It remains, and it seems to us as though it must remain for ever, an ideal attained. Every stone in the building, it may interest the reader to know, my grandfather had himself cut out in the model; and the manner in which the courses were fitted, joggled, trenailed, wedged and the bond broken, is intricate as a puzzle and beautiful by ingenuity.

In 1806 a second Bill passed both Houses, and the preliminary works were at once begun. The same year the Navy had taken a great harvest of prizes in the North Sea, one of which, a Prussian fishing dogger, flat-bottomed and rounded at the stem and stern, was purchased to be a floating lightship, and re-named the *Pharos*. By July, 1807, she was overhauled, rigged for her new purpose, and turned into the lee of the Isle of May. "It was proposed that the whole party should meet in her and pass the

## THE BELL ROCK

night; but she rolled from side to side in so extraordinary a manner that even the most seahardy fled. It was humorously observed of this vessel that she was in danger of making a round turn and appearing with her keel uppermost; and that she would even turn a halfpenny if laid upon deck." By two o'clock on the morning of the 15th July this purgatorial vessel was moored by the Bell Rock.

A sloop of forty tons had been in the meantime built at Leith, and named the *Smeaton*; by the 7th of August my grandfather set sail in her—

"carrying with him Mr. Peter Logan, foreman builder, and five artificers selected from their having been somewhat accustomed to the sea, the writer being aware of the distressing trial which the floating light would necessarily inflict upon landsmen from her rolling motion. Here he remained till the 10th and, as the weather was favourable, a landing was effected daily, when the workmen were employed in cutting the large seaweed from the sites of the lighthouse and beacon, which were respectively traced with pickaxes upon the rock. In the meantime the crew of the *Smeaton* was employed in laying down the several sets of moorings within about half a mile of the rock for the convenience of vessels. The artificers, having, fortunately, experienced moderate weather, returned to the workyard of Arbroath with a good report of their treatment afloat; when their comrades ashore began to feel some anxiety to see a place of which they had heard so much, and to change the constant operations with the iron and mallet in the process of hewing for an occasional tide's work on the rock, which they figured to themselves as a state of comparative ease and comfort."

I am now for many pages to let my grandfather speak for himself, and tell in his own words

## A FAMILY OF ENGINEERS

the story of his capital achievement. The tall quarto of 533 pages from which the following narrative has been dug out is practically unknown to the general reader, yet good judges have perceived its merit, and it has been named (with flattering wit) "The Romance of Stone and Lime" and "The Robinson Crusoe of Civil Engineering." The tower was but four years in the building; it took Robert Stevenson, in the midst of his many avocations, no less than fourteen to prepare the *Account*. The title page is a solid piece of literature of upwards of a hundred words; the table of contents runs to thirteen pages; and the dedication (to that revered monarch, George IV.) must have cost him no little study and correspondence. Walter Scott was called in council, and offered one mis-correction which still blots the page. In spite of all this pondering and filing, there remain pages not easy to construe, and inconsistencies not easy to explain away. I have sought to make these disappear, and to lighten a little the baggage with which my grandfather marches; here and there I have rejoined and rearranged a sentence, always with his own words, and all with a reverent and faithful hand; and I offer here to the reader the true monument of Robert Stevenson with a little of the moss removed from the inscription, and the Portrait of the artist with some superfluous canvas cut away.

# THE BELL ROCK

## I

### OPERATIONS OF 1807

Everything being arranged for sailing to the rock on Saturday the 15th, the vessel might have proceeded on the Sunday; but understanding that this would not be so agreeable to the artificers it was deferred until Monday. Here we cannot help observing that the men allotted for the operations at the rock seemed to enter upon the undertaking with a degree of consideration which fully marked their opinion as to the hazardous nature of the undertaking on which they were about to enter. They went in a body to church on Sunday, and whether it was in the ordinary course, or designed for the occasion, the writer is not certain, but the service was, in many respects, suitable to their circumstances.

1807  
Sunday,  
16th Aug.

The tide happening to fall late in the evening of Monday the 17th, the party, counting twenty-four in number, embarked on board of the *Smeaton* about ten o'clock p.m., and sailed from Arbroath with a gentle breeze at west. Our ship's colours having been flying all day in compliment to the commencement of the work, the other vessels in the harbour also saluted, which made a very gay appearance. A number of the friends and acquaintances of those on board having been thus collected, the piers, though at a late hour, were perfectly crowded, and just as the *Smeaton* cleared the harbour, all on board united in giving three hearty cheers, which were returned by those on shore in such good earnest, that, in the still of the evening, the sound must have been heard in all parts of the town, re-echoing from the walls and lofty turrets of the venerable Abbey of Aberbrothwick. The writer felt much satisfaction at the manner of this parting scene, though he must own that the present rejoicing was, on his part, mingled with occasional reflections upon the responsibility of his situation, which extended to the safety of all who should be engaged in this perilous work. With such sensations he retired to his cabin; but as the artificers were rather inclined to move about the deck than to remain in their confined berths below, his repose was transient, and the vessel being small every motion was necessarily heard. Some who were musically

Monday,  
17th Aug.

## A FAMILY OF ENGINEERS

1807 inclined occasionally sung; but he listened with peculiar pleasure to the sailor at the helm, who hummed over Dibdin's characteristic air:—

“They say there's a Providence sits up aloft,  
To keep watch for the life of poor Jack.”

Tuesday,  
18th Aug.

The weather had been very gentle all night, and, about four in the morning of the 18th, the *Smeaton* anchored. Agreeably to an arranged plan of operations, all hands were called at five o'clock a.m., just as the highest part of the Bell Rock began to show its sable head among the light breakers, which occasionally whitened with the foaming sea. The two boats belonging to the floating light attended the *Smeaton*, to carry the artificers to the rock, as her boat could only accommodate about six or eight sitters. Every one was more eager than his neighbour to leap into the boats, and it required a good deal of management on the part of the coxswains to get men unaccustomed to a boat to take their places for rowing and at the same time trimming her properly. The landing-master and foreman went into one boat, while the writer took charge of another, and steered it to and from the rock. This became the more necessary in the early stages of the work, as places could not be spared for more than two, or at most three, seamen to each boat, who were always stationed, one at the bow, to use the boat-hook in fending or pushing off, and the other at the aftermost oar, to give the proper time in rowing, while the middle oars were double-banked, and rowed by the artificers.

As the weather was extremely fine, with light airs of wind from the east, we landed without difficulty upon the central part of the rock at half-past five, but the water had not yet sufficiently left it for commencing the work. This interval, however, did not pass unoccupied. The first and last of all the principal operations at the Bell Rock were accompanied by three hearty cheers from all hands, and, on occasions like the present, the steward of the ship attended, when each man was regaled with a glass of rum. As the water left the rock about six, some began to bore the holes for the great bats or holdfasts, for fixing the beams of the Beacon-house, while the smith was fully attended in laying out the site of his forge, upon a somewhat sheltered spot of the

## THE BELL ROCK

1807

rock, which also recommended itself from the vicinity of a pool of water for tempering his irons. These preliminary steps occupied about an hour, and as nothing further could be done during this tide towards fixing the forge, the workmen gratified their curiosity by roaming about the rock, which they investigated with great eagerness till the tide overflowed it. Those who had been sick picked dulse (*Fucus palmatus*), which they ate with much seeming appetite; others were more intent upon collecting limpets for bait, to enjoy the amusement of fishing when they returned on board of the vessel. Indeed, none came away empty-handed, as everything found upon the Bell Rock was considered valuable, being connected with some interesting association. Several coins, and numerous bits of shipwrecked iron, were picked up, of almost every description; and, in particular, a marking-iron lettered JAMES—a circumstance of which it was thought proper to give notice to the public, as it might lead to the knowledge of some unfortunate shipwreck, perhaps unheard of till this simple occurrence led to the discovery. When the rock began to be overflowed, the landing-master arranged the crews of the respective boats, appointing twelve persons to each. According to a rule which the writer had laid down to himself, he was always the last person who left the rock.

In a short time the Bell Rock was laid completely under water, and the weather being extremely fine, the sea was so smooth that its place could not be pointed out from the appearance of the surface—a circumstance which sufficiently demonstrates the dangerous nature of this rock, even during the day, and in the smoothest and calmest state of the sea. During the interval between the morning and the evening tides, the artificers were variously employed in fishing and reading; others were busy in drying and adjusting their wet clothes, and one or two amused their companions with the violin and German flute.

About seven in the evening the signal bell for landing on the rock was again rung, when every man was at his quarters. In this service it was thought more appropriate to use the bell than to *pipe* to quarters, as the use of this instrument is less known to the mechanic than the sound of the bell. The landing, as in the morning, was at the eastern harbour. During this tide the seaweed was pretty well cleared from the site of the opera-

## A FAMILY OF ENGINEERS

1807

tions, and also from the tracks leading to the different landing-places; for walking upon the rugged surface of the Bell Rock, when covered with seaweed, was found to be extremely difficult and even dangerous. Every hand that could possibly be occupied was now employed in assisting the smith to fit up the apparatus for his forge. At 9 p.m. the boats returned to the tender, after other two hours' work, in the same order as formerly—perhaps as much gratified with the success that attended the work of this day as with any other in the whole course of the operations. Although it could not be said that the fatigues of this day had been great, yet all on board retired early to rest. The sea being calm, and no movement on deck, it was pretty generally remarked in the morning that the bell awakened the greater number on board from their first sleep; and though this observation was not altogether applicable to the writer himself, yet he was not a little pleased to find that thirty people could all at once become so reconciled to a night's quarters within a few hundred paces of the Bell Rock.

Wednesday,  
19th Aug.

Being extremely anxious at this time to get forward with fixing the smith's forge, on which the progress of the work at present depended, the writer requested that he might be called at daybreak to learn the landing-master's opinion of the weather from the appearance of the rising sun, a criterion by which experienced seamen can generally judge pretty accurately of the state of the weather for the following day. About five o'clock, on coming upon deck, the sun's upper limb or disc had just begun to appear as if rising from the ocean, and in less than a minute he was seen in the fullest splendour; but after a short interval he was enveloped in a soft cloudy sky, which was considered emblematical of fine weather. His rays had not yet sufficiently dispelled the clouds which hid the land from view, and the Bell Rock being still overflowed, the whole was one expanse of water. This scene in itself was highly gratifying; and, when the morning bell was tolled, we were gratified with the happy forebodings of good weather and the expectation of having both a morning and an evening tide's work on the rock.

The boat which the writer steered happened to be the last which approached the rock at this tide; and, in standing up in the stern, while at some distance, to see how the leading boat

## THE BELL ROCK

1807

entered the creek, he was astonished to observe something in the form of a human figure, in a reclining posture, upon one of the ledges of the rock. He immediately steered the boat through a narrow entrance to the eastern harbour, with a thousand unpleasant sensations in his mind. He thought a vessel or boat must have been wrecked upon the rock during the night; and it seemed probable that the rock might be strewed with dead bodies, a spectacle which could not fail to deter the artificers from returning so freely to their work. In the midst of these reveries the boat took the ground at an improper landing-place, but, without waiting to push her off, he leapt upon the rock, and making his way hastily to the spot which had privately given him alarm, he had the satisfaction to ascertain that he had only been deceived by the peculiar situation and aspect of the smith's anvil and block, which very completely represented the appearance of a lifeless body upon the rock. The writer carefully suppressed his feelings, the simple mention of which might have had a bad effect upon the artificers, and his haste passed for an anxiety to examine the apparatus of the smith's forge, left in an unfinished state at evening tide.

In the course of this morning's work two or three apparently distant peals of thunder were heard, and the atmosphere suddenly became thick and foggy. But as the *Smeaton*, our present tender, was moored at no great distance from the rock, the crew on board continued blowing with a horn, and occasionally fired a musket, so that the boats got to the ship without difficulty.

The wind this morning inclined from the north-east, and the sky had a heavy and cloudy appearance, but the sea was smooth, though there was an undulating motion on the surface, which indicated easterly winds, and occasioned a slight surf upon the rock. But the boats found no difficulty in landing at the western creek at half-past seven, and, after a good tide's work, left it again about a quarter from eleven. In the evening the artificers landed at half-past seven, and continued till half-past eight, having completed the fixing of the smith's forge, his vice, and a wooden board or bench, which were also batted to a ledge of the rock, to the great joy of all, under a salute of three hearty cheers. From an oversight on the part of the smith, who had neglected to bring his tinder-box and matches from the vessel,

Thursday.

## A FAMILY OF ENGINEERS

1807

the work was prevented from being continued for at least an hour longer.

The smith's shop was, of course, in *open space*: the large bellows were carried to and from the rock every tide, for the serviceable condition of which, together with the tinder-box, fuel, and embers of the former fire, the smith was held responsible. Those who have been placed in situations to feel the inconveniency and want of this useful artisan, will be able to appreciate his value in a case like the present. It often happened, to our annoyance and disappointment, in the early state of the work, when the smith was in the middle of a *favourite heat* in making some useful article, or in sharpening the tools, after the flood-tide had obliged the pickmen to strike work, a sea would come rolling over the rocks, dash out the fire, and endanger his indispensable implement, the bellows. If the sea was smooth, while the smith often stood at work knee-deep in water, the tide rose by imperceptible degrees, first cooling the exterior of the fireplace, or hearth, and then quietly blackening and extinguishing the fire from below. The writer has frequently been amused at the perplexing anxiety of the blacksmith when coaxing his fire and endeavouring to avert the effects of the rising tide.

Friday,  
21st Aug.

Everything connected with the forge being now completed, the artificers found no want of sharp tools, and the work went forward with great alacrity and spirit. It was also alleged that the rock had a more habitable appearance from the volumes of smoke which ascended from the smith's shop and the busy noise of his anvil, the operations of the masons, the movements of the boats, and shipping at a distance—all contributed to give life and activity to the scene. This noise and traffic had, however, the effect of almost completely banishing the herd of seals which had hitherto frequented the rock as a resting-place during the period of low water. The rock seemed to be peculiarly adapted to their habits, for, excepting two or three days at neap-tides, a part of it always dries at low water—at least, during the summer season—and as there was good fishing-ground in the neighbourhood, without a human being to disturb or molest them, it had become a very favourite residence of these amphibious animals, the writer having occasionally counted from fifty to sixty playing about the rock at a time. But when they came

## THE BELL ROCK

1807

to be disturbed every tide, and their seclusion was broken in upon by the kindling of great fires, together with the beating of hammers and picks during low water, after hovering about for a time, they changed their place, and seldom more than one or two were to be seen about the rock upon the more detached out-layers which dry partially, whence they seemed to look with that sort of curiosity which is observable in these animals when following a boat.

Hitherto the artificers had remained on board of the *Smeaton*, which was made fast to one of the mooring buoys at a distance only of about a quarter of a mile from the rock, and, of course, a very great conveniency to the work. Being so near, the seamen could never be mistaken as to the progress of the tide, or state of the sea upon the rock, nor could the boats be much at a loss to pull on board of the vessel during fog, or even in very rough weather; as she could be cast loose from her moorings at pleasure, and brought to the lee side of the rock. But the *Smeaton* being only about forty register tons, her accommodations were extremely limited. It may, therefore, be easily imagined that an addition of twenty-four persons to her own crew must have rendered the situation of those on board rather uncomfortable. The only place for the men's hammocks on board being in the hold, they were unavoidably much crowded; and if the weather had required the hatches to be fastened down, so great a number of men could not possibly have been accommodated. To add to this evil, the *co-boose* or cooking-place being upon deck, it would not have been possible to have cooked for so large a company in the event of bad weather.

Saturday,  
22nd Aug.

The stock of water was now getting short, and some necessaries being also wanted for the floating light, the *Smeaton* was despatched for Arbroath; and the writer, with the artificers, at the same time shifted their quarters from her to the floating light.

Although the rock barely made its appearance at this period of the tides till eight o'clock, yet, having now a full mile to row from the floating light to the rock, instead of about a quarter of a mile from the moorings of the *Smeaton*, it was necessary to be earlier astir, and to form different arrangements; breakfast was accordingly served up at seven o'clock this morning. From the

## A FAMILY OF ENGINEERS

1807

excessive motion of the floating light, the writer had looked forward rather with anxiety to the removal of the workmen to this ship. Some among them, who had been congratulating themselves upon having become sea-hardy while on board of the *Smeaton*, had a complete relapse on returning to the floating light. This was the case with the writer. From the spacious and convenient berthage of the floating light, the exchange to the artificers was, in this respect, much for the better. The boats were also commodious, measuring sixteen feet in length on the keel, so that, in fine weather, their complement of sitters was sixteen persons for each, with which, however, they were rather crowded, but she could not stow two boats of larger dimensions. When there was what is called a breeze of wind and a swell in the sea, the proper number for each boat could not, with propriety, be rated at more than twelve persons.

When the tide-bell rung the boats were hoisted out, and two active seamen were employed to keep them from receiving damage alongside. The floating light being very buoyant, was so quick in her motions that when those who were about to step from her gunwale into a boat, placed themselves upon a cleat or step on the ship's side, with the man or rail ropes in their hands, they had often to wait for some time till a favourable opportunity occurred for stepping into the boat. While in this situation with the vessel rolling from side to side, watching the proper time for letting go the man-ropes, it required the greatest dexterity and presence of mind to leap into the boats. One who was rather awkward would often wait a considerable period in this position: at one time his side of the ship would be so depressed that he would touch the boat to which he belonged, while the next sea would elevate him so much that he would see his comrades in the boat on the opposite side of the ship, his friends in the one boat calling to him to "Jump," while those in the boat on the other side, as he came again and again into their view, would jocosely say "Are you there yet? You seem to enjoy a swing." In this situation it was common to see a person upon each side of the ship for a length of time, waiting to quit his hold.

On leaving the rock to-day a trial of seamanship was proposed amongst the rowers, for by this time the artificers had become

## THE BELL ROCK

1807

tolerably expert in this exercise. By inadvertency some of the oars provided had been made of fir instead of ash, and although a considerable stock had been laid in, the workmen, being at first awkward in the art, were constantly breaking their oars; indeed it was no uncommon thing to see the broken blades of a pair of oars floating astern, in the course of a passage from the rock to the vessel. The men, upon the whole, had but little work to perform in the course of a day; for though they exerted themselves extremely hard while on the rock, yet, in the early state of the operations, this could not be continued for more than three or four hours at a time, and as their rations were large—consisting of one pound and a half of beef, one pound of ship biscuit, eight ounces oatmeal, two ounces barley, two ounces butter, three quarts of small beer, with vegetables and salt—they got into excellent spirits when free of sea-sickness. The rowing of the boats against each other became a favourite amusement, which was rather a fortunate circumstance, as it must have been attended with much inconvenience had it been found necessary to employ a sufficient number of sailors for this purpose. The writer, therefore, encouraged this spirit of emulation, and the speed of their respective boats became a favourite topic. Premiums for boat-races were instituted, which were contended for with great eagerness, and the respective crews kept their stations in the boats with as much precision as they kept their beds on board of the ship. With these and other pastimes, when the weather was favourable, the time passed away among the inmates of the fore-castle and waist of the ship. The writer looks back with interest upon the hours of solitude which he spent in this lonely ship with his small library.

This being the first Saturday that the artificers were afloat, all hands were served with a glass of rum and water at night, to drink the sailors' favourite toast of "Wives and Sweethearts." It was customary, upon these occasions, for the seamen and artificers to collect in the galley, when the musical instruments were put in requisition: for, according to invariable practice, every man must play a tune, sing a song, or tell a story.

Having, on the previous evening, arranged matters with the landing-master as to the business of the day, the signal was given for all hands at half-past seven this morning. In the early

Sunday,  
23rd Aug.

## A FAMILY OF ENGINEERS

1807 state of the spring tides the artificers went to the rock before breakfast, but as the tides fell later in the day, it became necessary to take this meal before leaving the ship. At eight o'clock all hands were assembled on the quarter-deck for prayers, a solemnity which was gone through in as orderly a manner as circumstances would admit. When the weather permitted, the flags of the ship were hung up as an awning or screen, forming the quarter-deck into a distinct compartment; the pendant was also hoisted at the mainmast, and a large ensign flag was displayed over the stern; and lastly, the ship's companion, or top of the staircase, was covered with the *flag proper* of the Lighthouse Service, on which the Bible was laid. A particular toll of the bell called all hands to the quarter-deck, when the writer read a chapter of the Bible, and, the whole ship's company being uncovered, he also read the impressive prayer composed by the Reverend Dr. Brunton, one of the ministers of Edinburgh.

Upon concluding this service, which was attended with becoming reverence and attention, all on board retired to their respective berths to breakfast, and, at half-past nine, the bell again rung for the artificers to take their stations in their respective boats. Some demur having been evinced on board about the propriety of working on Sunday, which had hitherto been touched upon as delicately as possible, all hands being called aft, the writer, from the quarter-deck, stated generally the nature of the service, expressing his hopes that every man would feel himself called upon to consider the erection of a lighthouse on the Bell Rock, in every point of view, as a work of necessity and mercy. He knew that scruples had existed with some, and these had, indeed, been fairly and candidly urged before leaving the shore; but it was expected that, after having seen the critical nature of the rock, and the necessity of the measure, every man would now be satisfied of the propriety of embracing all opportunities of landing on the rock when the state of the weather would permit. The writer further took them to witness that it did not proceed from want of respect for the appointments and established forms of religion that he had himself adopted the resolution of attending the Bell Rock works on the Sunday; but, as he hoped, from a conviction that it was his bounden duty, on the strictest principles of morality. At the same time it was

## THE BELL ROCK

1807

intimated that, if any were of a different opinion, they should be perfectly at liberty to hold their sentiments without the imputation of contumacy or disobedience; the only difference would be in regard to the pay.

Upon stating this much, he stepped into his boat, requesting all who were so disposed to follow him. The sailors, from their habits, found no scruple on this subject, and all of the artificers, though a little tardy, also embarked, excepting four of the masons, who, from the beginning, mentioned that they would decline working on Sundays. It may here be noticed that throughout the whole of the operations it was observable that the men wrought, if possible, with more keenness upon the Sundays than at other times, from an impression that they were engaged in a work of imperious necessity, which required every possible exertion. On returning to the floating light, after finishing the tide's work, the boats were received by the part of the ship's crew left on board with the usual attention of handing ropes to the boats and helping the artificers on board; but the four masons who had absented themselves from the work did not appear upon deck.

The boats left the floating light at a quarter-past nine o'clock this morning, and the work began at three-quarters past nine; but as the neap-tides were approaching the working time at the rock become gradually shorter, and it was now with difficulty that two and a half hours' work could be got. But so keenly had the workmen entered into the spirit of the Beacon-house operations, that they continued to bore the holes in the rock till some of them were knee-deep in water.

The operations at this time were entirely directed to the erection of the beacon, in which every man felt an equal interest, as at this critical period the slightest casualty to any of the boats at the rock might have been fatal to himself individually, while it was perhaps peculiar to the writer more immediately to feel for the safety of the whole. Each log or upright beam of the beacon was to be fixed to the rock by two strong and massive bats or stanchions of iron. These bats, for the fixture of the principal and diagonal beams and bracing chains, required fifty-four holes, each measuring two inches in diameter, and eighteen inches in depth. There had already been so considerable a prog-

Monday,

## A FAMILY OF ENGINEERS

1807

ress made in boring and excavating the holes that the writer's hopes of getting the beacon erected this year began to be more and more confirmed, although it was now advancing towards what was considered the latter end of the proper working season at the Bell Rock. The foreman joiner, Mr. Francis Watt, was accordingly appointed to attend at the rock to-day, when the necessary levels were taken for the step or seat of each particular beam of the beacon, that they might be cut to their respective lengths, to suit the inequalities of the rock; several of the stanchions were also tried into their places, and other necessary observations made, to prevent mistakes on the application of the apparatus, and to facilitate the operations when the beams came to be set up, which would require to be done in the course of a single tide.

Tuesday,  
25th Aug.

We had now experienced an almost unvaried tract of light airs of easterly wind, with clear weather in the fore-part of the day, and fog in the evenings. To-day, however, it sensibly changed; when the wind came to the south-west, and blew a fresh breeze. At nine a.m. the bell rung, and the boats were hoisted out, and though the artificers were now pretty well accustomed to tripping up and down the sides of the floating light, yet it required more seamanship this morning than usual. It therefore afforded some merriment to those who had got fairly seated in their respective boats to see the difficulties which attended their companions, and the hesitating manner in which they quitted hold of the man-ropes in leaving the ship. The passage to the rock was tedious, and the boats did not reach it till half-past ten.

It being now the period of neap-tides, the water only partially left the rock and some of the men who were boring on the lower ledges of the site of the beacon stood knee-deep in water. The situation of the smith to-day was particularly disagreeable, but his services were at all times indispensable. As the tide did not leave the site of the forge, he stood in the water, and as there was some roughness on the surface it was with considerable difficulty that, with the assistance of the sailors, he was enabled to preserve alive his fire; and, while his feet were immersed in water, his face was not only scorched, but continually exposed to volumes of smoke, accompanied with sparks from the fire, which

## THE BELL ROCK

were occasionally set up owing to the strength and direction of the wind.

The wind had shifted this morning to N.N.W., with rain, and was blowing what sailors call a fresh breeze. To speak, perhaps, somewhat more intelligibly, to the general reader, the wind was such that a fishing-boat could just carry full sail. But as it was of importance, specially in the outset of the business, to keep up the spirit of enterprise for landing on all practical occasions, the writer, after consulting with the landing-master, ordered the bell to be rung for embarking, and at half-past eleven the boats reached the rock, and left it again at a quarter-past twelve, without, however, being able to do much work, as the smith could not be set to work from the smallness of the ebb and the strong breach of sea, which lashed with great force among the bars of the forge.

Just as we were about to leave the rock the wind shifted to the S. W., and, from a fresh gale, it became what seamen term a hard gale, or such as would have required the fisherman to take in two or three reefs in his sail. It is a curious fact that the respective tides of ebb and flood are apparent upon the shore about an hour and a half sooner than at the distance of three or four miles in the offing. But what seems chiefly interesting here is that the tides around this small sunken rock should follow exactly the same laws as on the extensive shores of the mainland. When the boats left the Bell Rock to-day it was overflowed by the flood-tide, but the floating light did not swing round to the flood-tide for more than an hour afterwards. Under this disadvantage the boats had to struggle with the ebb-tide and a hard gale of wind, so that it was with the greatest difficulty they reached the floating light. Had this gale happened in spring-tides when the current was strong we must have been driven to sea in a very helpless condition.

The boat which the writer steered was considerably behind the other, one of the masons having unluckily broken his oar. Our prospect of getting on board, of course, became doubtful, and our situation was rather perilous, as the boat shipped so much sea that it occupied two of the artificers to bale and clear her of water. When the oar gave way we were about half a mile from the ship, but, being fortunately to windward, we got into

1807

Wednesday,  
26th Aug.

## A FAMILY OF ENGINEERS

1807

the wake of the floating light, at about 250 fathoms astern, just as the landing-master's boat reached the vessel. He immediately streamed or floated a life-buoy astern, with a line which was always in readiness, and by means of this useful implement the boat was towed alongside of the floating light, where, from her rolling motion, it required no small management to get safely on board, as the men were much worn out with their exertions in pulling from the rock. On the present occasion the crews of both boats were completely drenched with spray, and those who sat upon the bottom of the boats to bale them were sometimes pretty deep in the water before it could be cleared out. After getting on board, all hands were allowed an extra dram, and, having shifted and got a warm and comfortable dinner, the affair, it is believed, was little more thought of.

Thursday,  
27th Aug.

The tides were now in that state which sailors term the dead of the neap, and it was not expected that any part of the rock would be seen above water to-day; at any rate, it was obvious, from the experience of yesterday, that no work could be done upon it, and therefore the artificers were not required to land. The wind was at west, with light breezes, and fine clear weather; and as it was an object with the writer to know the actual state of the Bell Rock at neap-tides, he got one of the boats manned, and, being accompanied by the landing-master, went to it at a quarter-past twelve. The parts of the rock that appeared above water being very trifling, were covered by every wave, so that no landing was made. Upon trying the depth of water with a boat-hook, particularly on the sites of the lighthouse and beacon, on the former, at low water, the depth was found to be three feet, and on the central parts of the latter it was ascertained to be two feet eight inches. Having made these remarks, the boat returned to the ship at two p. m., and the weather being good, the artificers were found amusing themselves with fishing. The *Smeaton* came from Arbroath this afternoon, and made fast to her moorings, having brought letters and newspapers, with parcels of clean linen, etc., for the workmen, who were also made happy by the arrival of three of their comrades from the work-yard ashore. From these men they not only received all the news of the workyard, but seemed themselves to enjoy great pleasure in communicating whatever they considered to be in-

## THE BELL ROCK.

1807

teresting with regard to the rock. Some also got letters from their friends at a distance, the postage of which for the men afloat was always free, so that they corresponded the more readily.

The site of the building having already been carefully traced out with the pick-axe, the artificers this day commenced the excavation of the rock for the foundation or first course of the light-house. Four men only were employed at this work, while twelve continued at the site of the beacon-house, at which every possible opportunity was embraced, till this essential part of the operations should be completed.

The floating light's bell rung this morning at half-past four o'clock, as a signal for the boats to be got ready, and the landing took place at half-past five. In passing the *Smeaton* at her moorings near the rock, her boat followed with eight additional artificers who had come from Arbroath with her at last trip, but there being no room for them in the floating light's boats, they had continued on board. The weather did not look very promising in the morning, the wind blowing pretty fresh from W.S.W.: and had it not been that the writer calculated upon having a vessel so much at command, in all probability he would not have ventured to land. The *Smeaton* rode at what sailors call a *salvagee*, with a cross-head made fast to the floating buoy. This kind of attachment was found to be more convenient than the mode of passing the hawser through the ring of the buoy when the vessel was to be made fast. She had then only to be steered very close to the buoy, when the salvageee was laid hold of with a boat-hook, and the *bite* of the hawser thrown over the cross-head. But the salvageee, by this method, was always left at the buoy, and was, of course, more liable to chafe and wear than a hawser passed through the ring, which could be wattled with canvas, and shifted at pleasure. The salvageee and cross method is, however, much practised; but the experience of this morning showed it to be very unsuitable for vessels riding in an exposed situation for any length of time.

Wednesday,  
2nd Sept.

Soon after the artificers landed they commenced work; but the wind coming to blow hard, the *Smeaton's* boat and crew, who had brought their complement of eight men to the rock, went off to examine her riding ropes, and see that they were in proper order. The boat had no sooner reached the vessel than she went

## A FAMILY OF ENGINEERS

1807      adrift, carrying the boat along with her. By the time that she was got round to make a tack towards the rock, she had drifted at least three miles to leeward, with the praamboat astern; and, having both the wind and a tide against her, the writer perceived, with no little anxiety, that she could not possibly return to the rock till long after its being overflowed; for, owing to the anomaly of the tides formerly noticed, the Bell Rock is completely under water when the ebb abates to the offing.

In this perilous predicament, indeed, he found himself placed between hope and despair—but certainly the latter was by much the most predominant feeling of his mind—situate upon a sunk-en rock in the middle of the ocean, which, in the progress of the flood-tide, was to be laid under water to the depth of at least twelve feet in a stormy sea. There were this morning thirty-two persons in all upon the rock, with only two boats, whose complement, even in good weather, did not exceed twenty-four sitters; but to row to the floating light with so much wind, and in so heavy a sea, a complement of eight men for each boat was as much as could, with propriety, be attempted, so that, in this way, about one-half of our number was unprovided for. Under these circumstances, had the writer ventured to dispatch one of the boats in expectation of either working the *Smeaton* sooner up towards the rock, or in hopes of getting her boat brought to our assistance, this must have given an immediate alarm to the artificers, each of whom would have insisted upon taking to his own boat, and leaving the eight artificers belonging to the *Smeaton* to their chance. Of course a scuffle might have ensued, and it is hard to say, in the ardour of men contending for life, where it might have ended. It has even been hinted to the writer that a party of the *pickmen* were determined to keep exclusively to their own boat against all hazards.

The unfortunate circumstance of the *Smeaton* and her boat having drifted was, for a considerable time, only known to the writer and to the landing-master, who removed to the farther point of the rock, where he kept his eye steadily upon the progress of the vessel. While the artificers were at work, chiefly in sitting or kneeling postures, excavating the rock, or boring with the jumpers, and while their numerous hammers, with the sound of the smith's anvil, continued, the situation of things did not

## THE BELL ROCK

1807

appear so awful. In this state of suspense, with almost certain destruction at hand, the water began to rise upon those who were at work on the lower parts of the sites of the beacon and lighthouse. From the run of sea upon the rock, the forge fire was also sooner extinguished this morning than usual, and the volumes of smoke having ceased, objects in every direction became visible from all parts of the rock. After having had about three hours' work, the men began, pretty generally, to make towards their respective boats for their jackets and stockings, when, to their astonishment, instead of three, they found only two boats, the third being adrift with the *Smeaton*. Not a word was uttered by any one, but all appeared to be silently calculating their numbers, and looking to each other with evident marks of perplexity depicted in their countenances. The landing-master, conceiving that blame might be attached to him, for allowing the boat to leave the rock, still kept at a distance. At this critical moment the author was standing upon an elevated part of Smith's Ledge, where he endeavoured to mark the progress of the *Smeaton*, not a little surprised that her crew did not cut the praam adrift, which greatly retarded her way, and amazed that some effort was not making to bring at least the boat, and attempt our relief. The workmen looked steadfastly upon the writer, and turned occasionally towards the vessel, still far to leeward.<sup>1</sup> All this passed in the most perfect silence, and the melancholy solemnity of the group made an impression never to be effaced from his mind.

The writer had all along been considering of various schemes—providing the men could be kept under command—which might be put in practice for the general safety, in hopes that the *Smeaton* might be able to pick up the boats to leeward, when they were obliged to leave the rock. He was, accordingly, about to address the artificers on the perilous nature of their circumstances, and to propose that all hands should unstrip their upper clothing when the higher parts of the rock were laid under water; that the seamen should remove every unnecessary weight and encumbrance from the boats; that a specified number of men should go into each boat, and that the remainder should

<sup>1</sup>“Nothing was said, but I was *looked out of countenance*,” he says in a letter.

## A FAMILY OF ENGINEERS

1807

hang by the gunwales, while the boats were to be rowed gently towards the *Smeaton*, as the course to the *Pharos*, or floating light, lay rather to windward of the rock. But when he attempted to speak his mouth was so parched that his tongue refused utterance, and he now learned by experience that the saliva is as necessary as the tongue itself for speech. He turned to one of the pools on the rock and lapped a little water, which produced immediate relief. But what was his happiness, when on rising from this unpleasant beverage, some one called out, "A boat! a boat!" and, on looking around, at no great distance, a large boat was seen through the haze making towards the rock. This at once enlivened and rejoiced every heart. The timeous visitor proved to be James Spink, the Bell Rock pilot, who had come express from Arbroath with letters. Spink had for some time seen the *Smeaton*, and had even supposed, from the state of the weather, that all hands were on board of her till he approached more nearly and observed people upon the rock; but not supposing that the assistance of his boat was necessary to carry the artificers off the rock, he anchored on the lee-side and began to fish, waiting, as usual, till the letters were sent for, as the pilot-boat was too large and unwieldy for approaching the rock when there was any roughness or run of the sea at the entrance of the landing creeks.

Upon this fortunate change of circumstances, sixteen of the artificers were sent, at two trips, in one of the boats, with instructions for Spink to proceed with them to the floating light. This being accomplished, the remaining sixteen followed in the two boats belonging to the service of the rock. Every one felt the most perfect happiness at leaving the Bell Rock this morning, though a very hard and even dangerous passage to the floating light still awaited us, as the wind by this time had increased to a pretty hard gale, accompanied with a considerable swell of sea. Every one was as completely drenched in water as if he had been dragged astern of the boats. The writer, in particular, being at the helm, found, on getting on board, that his face and ears were completely coated with a thin film of salt from the sea spray, which broke constantly over the bows of the boat. After much baling of water and severe work at the oars, the three boats reached the floating light, where some new difficulties occurred

## THE BELL ROCK

1807

in getting on board in safety, owing partly to the exhausted state of the men, and partly to the violent rolling of the vessel.

As the tide flowed, it was expected that the *Smeaton* would have got to windward; but, seeing that all was safe, after tacking for several hours and making little progress, she bore away for Arbroath, with the praam-boat. As there was now too much wind for the pilot-boat to return to Arbroath, she was made fast astern of the floating light, and the crew remained on board till next day, when the weather moderated. There can be very little doubt that the appearance of James Spink with his boat on this critical occasion was the means of preventing the loss of lives at the rock this morning: When these circumstances, some years afterwards, came to the knowledge of the Board, a small pension was ordered to our faithful pilot, then in his seventieth year; and he still continues to wear the uniform clothes and badge of the Lighthouse service. Spink is a remarkably strong man, whose *tout ensemble* is highly characteristic of a North-country fisherman. He usually dresses in a *pé-jacket*, cut after a particular fashion, and wears a large, flat, blue bonnet. A striking likeness of Spink in his pilot-dress, with the badge or insignia on his left arm which is characteristic of the boatmen in the service of the Northern Lights, has been taken by Howe, and is in the writer's possession.

The bell rung this morning at five o'clock, but the writer must acknowledge, from the circumstances of yesterday, that its sound was extremely unwelcome. This appears also to have been the feelings of the artificers, for when they came to be mustered, out of twenty-six, only eight, besides the foreman and seamen, appeared upon deck to accompany the writer to the rock. Such are the baneful effects of anything like misfortune or accident connected with a work of this description. The use of argument to persuade the men to embark in cases of this kind would have been out of place, as it is not only discomfort, or even the risk of the loss of a limb, but life itself that becomes the question. The boats, notwithstanding the thinness of our ranks, left the vessel at half-past five. The rough weather of yesterday having proved but a summer's gale, the wind came to-day in gentle breezes; yet, the atmosphere being cloudy, it had not a very

Thursday,  
3rd Sept.

## A FAMILY OF ENGINEERS

1807

favourable appearance. The boats reached the rock at six a. m., and the eight artificers who landed were employed in clearing out the bat-holes for the beacon-house, and had a very prosperous tide of four hours' work, being the longest yet experienced by half an hour.

The boats left the rock again at ten o'clock, and the weather having cleared up as we drew near the vessel, the eighteen artificers who had remained on board were observed upon deck, but as the boats approached they sought their way below, being quite ashamed of their conduct. This was the only instance of refusal to go to the rock which occurred during the whole progress of the work, excepting that of the four men who declined working upon Sunday, a case which the writer did not conceive to be at all analogous to the present. It may here be mentioned, much to the credit of these four men, that they stood foremost in embarking for the rock this morning.

Saturday,  
5th Sept.

It was fortunate that a landing was not attempted this evening, for at eight o'clock the wind shifted to E.S.E., and at ten it had become a hard gale, when fifty fathoms of the floating light's hempen cable were veered out. The gale still increasing, the ship rolled and laboured excessively, and at midnight eighty fathoms of cable were veered out; while the sea continued to strike the vessel with a degree of force which had not before been experienced.

Sunday,  
6th Sept.

During the last night there was little rest on board of the *Pharos*, and daylight, though anxiously wished for, brought no relief, as the gale continued with unabated violence. The sea struck so hard upon the vessel's bows that it rose in great quantities, or in "green seas," as the sailors termed it, which were carried by the wind as far aft as the quarter-deck, and not unfrequently over the stern of the ship altogether. It fell occasionally so heavily on the skylight of the writer's cabin, though so far aft as to be within five feet of the helm, that the glass was broken to pieces before the dead-light could be got into its place, so that the water poured down in great quantities. In shutting out the water, the admission of light was prevented, and in the morning all continued in the most comfortless state of darkness. About ten o'clock a.m. the wind shifted to N.E., and blew, if possible, harder than before, and it was accompanied by a much

## THE BELL ROCK

1807

heavier swell of sea. In the course of the gale, the part of the cable in the hause-hole had been so often shifted that nearly the whole length of one of her hempen cables, of 120 fathoms, had been veered out, besides the chain-moorings. The cable, for its preservation, was also carefully served or wattled with pieces of canvas round the windlass, and with leather well greased in the hause-hole. In this state things remained during the whole day, every sea which struck the vessel—and the seas followed each other in close succession—causing her to shake, and all on board occasionally to tremble. At each of these strokes of the sea the rolling and pitching of the vessel ceased for a time, and her motion was felt as if she had either broke adrift before the wind or were in the act of sinking; but, when another sea came, she ranged up against it with great force, and this became the regular intimation of our being still riding at anchor.

About eleven o'clock, the writer with some difficulty got out of bed, but, in attempting to dress, he was thrown twice upon the floor at the opposite side of the cabin. In an undressed state he made shift to get about half-way up the companion-stairs, with an intention to observe the state of the sea and of the ship upon deck; but he no sooner looked over the companion than a heavy sea struck the vessel, which fell on the quarter-deck, and rushed down-stairs into the officers' cabin in so considerable a quantity that it was found necessary to lift one of the scuttles in the floor, to let the water into the limbers of the ship, as it dashed from side to side in such a manner as to run into the lower tier of beds. Having been foiled in this attempt, and being completely wetted, he again got below and went to bed. In this state of the weather the seamen had to move about the necessary or indispensable duties of the ship with the most cautious use both of hands and feet, while it required all the art of the landsman to keep within the precincts of his bed. The writer even found himself so much tossed about that it became necessary in some measure, to shut himself in bed, in order to avoid being thrown upon the floor. Indeed, such was the motion of the ship that it seemed wholly impracticable to remain in any other than a lying posture. On deck the most stormy aspect presented itself, while below all was wet and comfortless.

About two o'clock p.m. a great alarm was given throughout

## A FAMILY OF ENGINEERS

1807 the ship from the effects of a very heavy sea which struck her, and almost filled the waist, pouring down into the berths below, through every chink and crevice of the hatches and skylights. From the motion of the vessel being thus suddenly deadened or checked, and from the flowing in of the water above, it is believed there was not an individual on board who did not think, at the moment, that the vessel had foundered, and was in the act of sinking. The writer could withstand this no longer, and as soon as she again began to range to the sea he determined to make another effort to get upon deck. In the first instance, however, he groped his way in darkness from his own cabin through the berths of the officers, where all was quietness. He next entered the galley and other compartments occupied by the artificers. Here also all was shut up in darkness, the fire having been drowned out in the early part of the gale. Several of the artificers were employed in prayer, repeating psalms, and other devotional exercises in a full tone of voice; others protesting that, if they should fortunately get once more on shore, no one should ever see them afloat again. With the assistance of the landing-master, the writer made his way, holding on step by step, among the numerous impediments which lay in the way. Such was the creaking noise of the bulkheads or partitions, the dashing of the water, and the whistling noise of the winds, that it was hardly possible to break in upon such a confusion of sounds. In one or two instances, anxious and repeated inquiries were made by the artificers as to the state of things upon deck, to which the captain made the usual answer, that it could not blow long in this way, and that we must soon have better weather. The next berth in succession, moving forward in the ship, was that allotted for the seamen. Here the scene was considerably different. Having reached the middle of this darksome berth without its inmates being aware of any intrusion, the writer had the consolation of remarking that, although they talked of bad weather and the cross accidents of the sea, yet the conversation was carried on in that sort of tone and manner which bespoke an ease and composure of mind highly creditable to them and pleasing to him. The writer immediately accosted the seamen about the state of the ship. To these inquiries they replied that the vessel being light, and having but little hold of the water, no top-rigging,

## THE BELL ROCK

1807

with excellent ground-tackle, and everything being fresh and new, they felt perfect confidence in their situation.

It being impossible to open any of the hatches in the fore part of the ship in communicating with the deck, the watch was changed by passing through the several berths to the companion-stair leading to the quarter-deck. The writer, therefore, made the best of his way aft, and, on a second attempt to look out, he succeeded, and saw indeed an astonishing sight. The sea or waves appeared to be ten or fifteen feet in height of unbroken water, and every approaching billow seemed as if it would overwhelm our vessel, but she continued to rise upon the waves and to fall between the seas in a very wonderful manner. It seemed to be only those seas which caught her in the act of rising which struck her with so much violence and threw such quantities of water aft. On deck there was only one solitary individual looking out, to give the alarm in the event of the ship breaking from her moorings. The seaman on watch continued only two hours; he who kept watch at this time was a tall, slender man of a black complexion; he had no great-coat nor over-all of any kind, but was simply dressed in his ordinary jacket and trousers; his hat was tied under his chin with a napkin, and he stood aft the foremast, to which he had lashed himself with a gasket or small rope round his waist, to prevent his falling upon deck or being washed overboard. When the writer looked up, he appeared to smile, which afforded a further symptom of the confidence of the crew in their ship. This person on watch was as completely wetted as if he had been drawn through the sea, which was given as a reason for his not putting on a great-coat, that he might wet as few of his clothes as possible, and have a dry shift when he went below. Upon deck everything that was movable was out of sight, having either been stowed below, previous to the gale, or been washed overboard. Some trifling parts of the quarter boards were damaged by the breach of the sea; and one of the boats upon deck was about one-third full of water, the oyle-hole or drain having been accidentally stopped up, and part of her gunwale had received considerable injury. These observations were hastily made, and not without occasionally shutting the companion, to avoid being wetted by the successive seas which broke over the bows and fell upon different parts of the deck ac-

## A FAMILY OF ENGINEERS

1807 cording to the impetus with which the waves struck the vessel. By this time it was about three o'clock in the afternoon, and the gale, which had now continued with unabated force for twenty-seven hours, had not the least appearance of going off.

In the dismal prospect of undergoing another night like the last, and being in imminent hazard of parting from our cable, the writer thought it necessary to advise with the master and officers of the ship as to the probable event of the vessel's drifting from her moorings. They severally gave it as their opinion that we had now every chance of riding out the gale, which, in all probability, could not continue with the same fury many hours longer; and that even if she should part from her anchor, the storm-sails had been laid to hand, and could be bent in a very short time. They further stated that from the direction of the wind being N.E., she would sail up the Firth of Forth to Leith Roads. But if this should appear doubtful, after passing the Island and Light of May, it might be advisable at once to steer for Tynningham Sands, on the western side of Dunbar, and there run the vessel ashore. If this should happen at the time of high-water, or during the ebbing of the tide, they were of opinion, from the flatness and strength of the floating light, that no danger would attend her taking the ground, even with a very heavy sea. The writer, seeing the confidence which these gentlemen possessed with regard to the situation of things, found himself as much relieved with this conversation as he had previously been with the seeming indifference of the fore-castle-men, and the smile of the watch upon deck, though literally lashed to the foremast. From this time he felt himself almost perfectly at ease; at any rate, he was entirely resigned to the ultimate result.

About six o'clock in the evening the ship's company was heard moving upon deck, which on the present occasion was rather the cause of alarm. The writer accordingly rang his bell to know what was the matter, when he was informed by the steward that the weather looked considerably better, and that the men upon deck were endeavouring to ship the smoke-funnel of the galley that the people might get some meat. This was a more favourable account than had been anticipated. During the last twenty-one hours he himself had not only had nothing to eat but he had almost never passed a thought on the subject. Upon the

## THE BELL ROCK

1807

mention of a change of weather, he sent the steward to learn how the artificers felt, and on his return he stated that they now seemed to be all very happy, since the cook had begun to light the galley-fire and make preparations for the suet-pudding of Sunday, which was the only dish to be attempted for the mess from the ease with which it could both be cooked and served up.

The principal change felt upon the ship as the wind abated was her increased rolling motion, but the pitching was much diminished, and now hardly any sea came farther aft than the foremast; but she rolled so extremely hard as frequently to dip and take in water over the gunwales and rails in the waist. By nine o'clock all hands had been refreshed by the exertions of the cook and steward, and were happy in the prospect of the worst of the gale being over. The usual complement of men was also now set on watch, and more quietness was experienced throughout the ship. Although the previous night had been a very restless one, it had not the effect of inducing repose in the writer's berth on the succeeding night; for having been so much tossed about in bed during the last thirty hours, he found no easy spot to turn to, and his body was all sore to the touch, which ill accorded with the unyielding materials with which his bed-place was surrounded.

This morning, about eight o'clock, the writer was agreeably surprised to see the scuttle of his cabin skylight removed, and the bright rays of the sun admitted. Although the ship continued to roll excessively and the sea was still running very high, yet the ordinary business on board seemed to be going forward on deck. It was impossible to steady a telescope, so as to look minutely at the progress of the waves and trace their breach upon the Bell Rock; but the height to which the cross-running waves rose in sprays when they met each other was truly grand, and the continued roar and noise of the sea was very perceptible to the ear. To estimate the height of the sprays at forty or fifty feet would surely be within the mark. Those of the workmen who were not much afflicted with sea-sickness came upon deck, and the wetness below being dried up, the cabins were again brought into a habitable state. Every one seemed to meet as if after a long absence, congratulating his neighbour upon the re-

Monday,

## A FAMILY OF ENGINEERS

1807

turn of good weather. Little could be said as to the comfort of the vessel, but after riding out such a gale, no one felt the least doubt or hesitation as to the safety and good condition of her moorings. The master and mate were extremely anxious, however, to heave in the hempen cable, and see the state of the clinch or iron ring of the chain-cable. But the vessel rolled at such a rate that the seamen could not possibly keep their feet at the windlass nor work the handspikes, though it had been several times attempted since the gale took off.

About twelve noon, however, the vessel's motion was observed to be considerably less, and the sailors were enabled to walk upon deck with some degree of freedom. But, to the astonishment of every one, it was soon discovered that the floating light was adrift! The windlass was instantly manned, and the men soon gave out that there was no strain upon the cable. The mizzen sail, which was bent for the occasional purpose of making the vessel ride more easily to the tide, was immediately set, and the other sails were also hoisted in a short time, when, in no small consternation, we bore away about one mile to the south-westward of the former station, and there let go the best bower anchor and cable in twenty fathoms water, to ride until the swell of the sea should fall, when it might be practicable to grapple for the moorings, and find a better anchorage for the ship.

Tuesday,  
15th Sept.

This morning, at five a.m., the bell rung as a signal for landing upon the rock, a sound which, after a lapse of ten days, it is believed was welcomed by every one on board. There being a heavy breach of sea at the eastern creek, we landed, though not without difficulty, on the western side, every one seeming more eager than another to get upon the rock; and never did hungry men sit down to a hearty meal with more appetite than the artificers began to pick the dulse from the rocks. This marine plant had the effect of reviving the sickly, and seemed to be no less relished by those who were more hardy.

While the water was ebbing, and the men were roaming in quest of their favourite morsel, the writer was examining the effects of the storm upon the forge and loose apparatus left upon the rock. Six large blocks of granite which had been landed, by way of experiment, on the 1st instant, were now removed from

## THE BELL ROCK

1807

their places and, by the force of the sea, thrown over a rising ledge into a hole at the distance of twelve or fifteen paces from the place on which they had been landed. This was a pretty good evidence both of the violence of the storm and the agitation of the sea upon the rock. The safety of the smith's forge was always an object of essential regard. The ash-pan of the hearth or fireplace, with its weighty cast-iron back, had been washed from their places of supposed security; the chains of attachment had been broken, and these ponderous articles were found at a very considerable distance in a hole on the western side of the rock; while the tools and picks of the Aberdeen masons were scattered about in every direction. It is however remarkable that not a single article was ultimately lost.

This being the night on which the floating light was advertised to be lighted, it was accordingly exhibited, to the great joy of every one.

The writer was made happy to-day by the return of the Lighthouse yacht from a voyage to the Northern Lighthouses. Having immediately removed on board of this fine vessel of eighty-one-tons register, the artificers gladly followed; for, though they found themselves more pinched for accommodation on board of the yacht, and still more so in the *Smeaton*, yet they greatly preferred either of these to the *Pharos*, or floating light, on account of her rolling motion, though in all respects fitted up for their convenience.

Wednesday,  
16th Sept.

The writer called them to the quarter-deck and informed them that, having been one month afloat, in terms of their agreement they were now at liberty to return to the workyard at Arbroath if they preferred this to continuing at the Bell Rock. But they replied that, in the prospect of soon getting the beacon erected upon the rock, and having made a change from the floating light, they were now perfectly reconciled to their situation, and would remain afloat till the end of the working season.

The wind was at N. E. this morning, and though there were only light airs, yet there was a pretty heavy swell coming ashore upon the rock. The boats landed at half-past seven o'clock a.m., at the creek on the southern side of the rock, marked Port Hamilton. But as one of the boats was in the act of entering this creek, the seaman at the bow-oar, who had just entered the

Thursday,  
17th Sept.

## A FAMILY OF ENGINEERS

1807

service, having inadvertently expressed some fear from a heavy sea which came rolling towards the boat, and one of the artificers having at the same time looked round and missed a stroke with his oar, such a preponderance was thus given to the rowers upon the opposite side that when the wave struck the boat it threw her upon a ledge of shelving rocks, where the water left her, and she having *kanted* to seaward, the next wave completely filled her with water. After making considerable efforts the boat was again got afloat in the proper track of the creek, so that we landed without any other accident than a complete ducking. There being no possibility of getting a shift of clothes, the artificers began with all speed to work, so as to bring themselves into heat, while the writer and his assistants kept as much as possible in motion. Having remained more than an hour upon the rock, the boats left it at half-past nine; and, after getting on board, the writer recommended to the artificers, as the best mode of getting into a state of comfort, to strip off their wet clothes and go to bed for an hour or two. No further inconveniency was felt, and no one seemed to complain of the affection called "catching cold."

Friday,  
18th Sept.

An important occurrence connected with the operations of this season was the arrival of the *Smeaton* at four p.m., having in tow the six principal beams of the beacon-house, together with all the stanchions and other work on board for fixing it on the rock. The mooring of the floating light was a great point gained, but in the erection of the beacon at this late period of the season new difficulties presented themselves. The success of such an undertaking at any season was precarious, because a single day of bad weather occurring before the necessary fixtures could be made might sweep the whole apparatus from the rock. Notwithstanding these difficulties, the writer had determined to make the trial, although he could almost have wished, upon looking at the state of the clouds and the direction of the wind, that the apparatus for the beacon had been still in the workyard.

Saturday,  
19th Sept.

The main beams of the beacon were made up in two separate rafts, fixed with bars and bolts of iron. One of these rafts, not being immediately wanted, was left astern of the floating light, and the other was kept in tow by the *Smeaton*, at the buoy near-

## THE BELL ROCK

est to the rock. The Lighthouse yacht rode at another buoy with all hands on board that could possibly be spared out of the floating light. The party of artificers and seamen which landed on the rock counted altogether forty in number. At half-past eight o'clock a derrick, or mast of thirty feet in height, was erected and properly supported with guy-ropes, for suspending the block for raising the first principal beam of the beacon; and a winch machine was also bolted down to the rock for working the purchase-tackle.

Upon raising the derrick, all hands on the rock spontaneously gave three hearty cheers, as a favourable omen of our future exertions in pointing out more permanently the position of the rock. Even to this single spar of timber, could it be preserved, a drowning man might lay hold. When the *Smeaton* drifted on the 2nd of this month such a spar would have been sufficient to save us till she could have come to our relief.

The wind this morning was variable, but the weather continued extremely favourable for the operations throughout the whole day. At six a.m. the boats were in motion, and the raft, consisting of four of the six principal beams of the beacon-house, each measuring about sixteen inches square, and fifty feet in length, was towed to the rock, where it was anchored, that it might *ground* upon it as the water ebbed. The sailors and artificers, including all hands, to-day counted no fewer than fifty-two, being perhaps the greatest number of persons ever collected upon the Bell Rock. It was early in the tide when the boats reached the rock, and the men worked a considerable time up to their middle in water, every one being more eager than his neighbour to be useful. Even the four artificers who had hitherto declined working on Sunday were to-day most zealous in their exertions. They had indeed become so convinced of the precarious nature and necessity of the work that they never afterwards absented themselves from the rock on Sunday when a landing was practicable.

Having made fast a piece of very good new line, at about two-thirds from the lower end of one of the beams, the purchase-tackle of the derrick was hooked into the turns of the line, and it was speedily raised by the number of men on the rock and the power of the winch tackle. When this log was lifted to a suffi-

1807

Sunday,  
20th Sept.

## A FAMILY OF ENGINEERS

1807

cient height, its foot, or lower end, was *stepped* into the spot which had been previously prepared for it. Two of the great iron stanchions were then set into their respective holes on each side of the beam, when a rope was passed round them and the beam, to prevent it from slipping till it could be more permanently fixed. The derrick, or upright spar used for carrying the tackle to raise the first beam, was placed in such a position as to become useful for supporting the upper end of it, which now became, in its turn, the prop of the tackle for raising the second beam. The whole difficulty of this operation was in the raising and propping of the first beam, which became a convenient derrick for raising the second, these again a pair of shears for lifting the third, and the shears a triangle for raising the fourth. Having thus got four of the six principal beams set on end, it required a considerable degree of trouble to get their upper ends to fit. Here they formed the apex of a cone, and were all together mortised into a large piece of beechwood, and secured, for the present, with ropes, in a temporary manner. During the short period of one tide all that could further be done for their security was to put a single screw-bolt through the great kneed bats or stanchions on each side of the beams, and screw the nut home.

In this manner these four principal beams were erected, and left in a pretty secure state. The men had commenced while there was about two or three feet of water upon the side of the beacon, and as the sea was smooth they continued the work equally long during flood-tide. Two of the boats being left at the rock to take off the joiners, who were busily employed on the upper parts till two o'clock p.m., this tide's work may be said to have continued for about seven hours, which was the longest that had hitherto been got upon the rock by at least three hours.

When the first boats left the rock with the artificers employed on the lower part of the work during the flood-tide, the beacon had quite a novel appearance. The beams erected formed a common base of about thirty-three feet, meeting at the top, which was about forty-five feet above the rock, and here half a dozen of the artificers were still at work. After clearing the rock the boats made a stop, when three hearty cheers were given,

## THE BELL ROCK

1807

which were returned with equal goodwill by those upon the beacon, from the personal interest which every one felt in the prosperity of this work, so intimately connected with his safety.

All hands having returned to their respective ships, they got a shift of dry clothes and some refreshment. Being Sunday, they were afterwards convened by signal on board of the Lighthouse yacht, when prayers were read; for every heart upon this occasion felt gladness, and every mind was disposed to be thankful for the happy and successful termination of the operations of this day.

The remaining two principal beams were erected in the course of this tide, which, with the assistance of those set up yesterday, was found to be a very simple operation. Monday,  
21st Sept.

The six principal beams of the beacon were thus secured, at least in a temporary manner, in the course of two tides, or in the short space of about eleven hours and a half. Such is the progress that may be made when active hands and willing minds set properly to work in operations of this kind. Having now got the weighty part of this work over, and being thereby relieved of the difficulty both of landing and victualling such a number of men, the *Smeaton* could now be spared, and she was accordingly despatched to Arbroath for a supply of water and provisions, and carried with her six of the artificers who could best be spared. Tuesday,  
22nd Sept.

In going out of the eastern harbour, the boat which the writer steered shipped a sea, that filled her about one-third with water. She had also been hid for a short time, by the waves breaking upon the rock, from the sight of the crew of the preceding boat, who were much alarmed for our safety, imagining for a time that she had gone down. Wednesday,  
23rd Sept.

The *Smeaton* returned from Arbroath this afternoon, but there was so much sea that she could not be made fast to her moorings, and the vessel was obliged to return to Arbroath without being able either to deliver the provisions or take the artificers on board. The Lighthouse yacht was also soon obliged to follow her example, as the sea was breaking heavily over her bows. After getting two reefs in the mainsail, and the third or storm-jib set, the wind being S.W., she bent to windward, though blow-

## A FAMILY OF ENGINEERS

1807

ing a hard gale, and got into St. Andrews Bay, where we passed the night under the lee of Fifeness.

Thursday,  
24th Sept.

At two o'clock this morning we were in St. Andrews Bay, standing off and on shore, with strong gales of wind at S.W.; at seven we were off the entrance of the Tay; at eight stood towards the rock, and at ten passed to leeward of it, but could not attempt a landing. The beacon, however, appeared to remain in good order, and by six p.m. the vessel had again beaten up to St. Andrews Bay, and got into somewhat smoother water for the night.

Friday,  
25th Sept.

At seven o'clock bore away for the Bell Rock, but finding a heavy sea running on it were unable to land. The writer, however, had the satisfaction to observe, with his telescope, that everything about the beacon appeared entire; and although the sea had a most frightful appearance, yet it was the opinion of every one that, since the erection of the beacon, the Bell Rock was divested of many of its terrors, and had it been possible to have got the boats hoisted out and manned, it might have even been found practicable to land. At six it blew so hard that it was found necessary to strike the topmast and take in a third reef of the mainsail, and under this low canvas we soon reached St. Andrews Bay, and got again under the lee of the land for the night. The artificers, being sea-hardy, were quite reconciled to their quarters on board of the Lighthouse yacht; but it is believed that hardly any consideration would have induced them again to take up their abode in the floating light.

Saturday,  
26th Sept.

At daylight the yacht steered towards the Bell Rock, and at eight a.m. made fast to her moorings; at ten, all hands, to the amount of thirty, landed, when the writer had the happiness to find that the beacon had withstood the violence of the gale and the heavy breach of sea, everything being found in the same state in which it had been left on the 21st. The artificers were now enabled to work upon the rock throughout the whole day, both at low and high water, but it required the strictest attention to the state of weather, in case of their being overtaken with a gale, which might prevent the possibility of getting them off the rock.

Two somewhat memorable circumstances in the annals of the Bell Rock attended the operations of this day: one was the re-

## THE BELL ROCK

1807

removal of Mr. James Dove, the foreman smith, with his apparatus, from the rock to the upper part of the beacon, where the forge was now erected on a temporary platform, laid on the cross beams or upper framing. The other was the artificers having dined for the first time upon the rock, their dinner being cooked on board of the yacht, and sent to them by one of the boats. But what afforded the greatest happiness and relief was the removal of the large bellows, which had all along been a source of much trouble and perplexity, by their hampering and incommoding the boat which carried the smiths and their apparatus.

The wind being west to-day, the weather was very favourable for operations at the rock, and during the morning and evening tides, with the aid of torch-light, the masons had seven hours' work upon the site of the building. The smiths and joiners, who landed at half-past six a.m., did not leave the rock till a quarter-past eleven p.m., having been at work, with little intermission, for sixteen hours and three-quarters. When the water left the rock, they were employed at the lower parts of the beacon, and as the tide rose or fell, they shifted the place of their operations. From these exertions, the fixing and securing of the beacon made rapid advancement, as the men were now landed in the morning, and remained throughout the day. But, as a sudden change of weather might have prevented their being taken off at the proper time of tide, a quantity of bread and water was always kept on the beacon.

Saturday,  
3rd Oct.

During this period of working at the beacon all the day, and often a great part of the night, the writer was much on board of the tender; but, while the masons could work on the rock, and frequently also while it was covered by the tide, he remained on the beacon; especially during the night, as he made a point of being on the rock to the latest hour, and was generally the last person who stepped into the boat. He had laid this down as part of his plan of procedure; and in this way had acquired, in the course of the first season, a pretty complete knowledge and experience of what could actually be done at the Bell Rock, under all circumstances of the weather. By this means also his assistants, and the artificers and mariners, got into a systematic habit of proceeding at the commencement of the work, which, it is believed, continued throughout the whole of the operations.

## A FAMILY OF ENGINEERS

1807  
Sunday,  
4th Oct.

The external part of the beacon was now finished, with its supports and bracing-chains, and whatever else was considered necessary for its stability, in so far as the season would permit; and although much was still wanting to complete this fabric, yet it was in such a state that it could be left without much fear of the consequences of a storm. The painting of the upper part was nearly finished this afternoon; and the *Smeaton* had brought off a quantity of brushwood and other articles, for the purpose of heating or charring the lower part of the principal beams, before being laid over with successive coats of boiling pitch, to the height of from eight to twelve feet, or as high as the rise of spring-tides. A small flagstaff having also been erected to-day, a flag was displayed for the first time from the beacon, by which its perspective effect was greatly improved. On this, as on all like occasions at the Bell Rock, three hearty cheers were given; and the steward served out a dram of rum to all hands, while the Lighthouse yacht, *Smeaton*, and floating light, hoisted their colours in compliment to the erection.

Monday,  
5th Oct.

In the afternoon, and just as the tide's work was over, Mr. John Rennie, engineer, accompanied by his son Mr. George, on their way to the harbour works of Fraserburgh, in Aberdeenshire, paid a visit to the Bell Rock, in a boat from Arbroath. It being then too late in the tide for landing, they remained on board of the Lighthouse yacht all night, when the writer, who had now been secluded from society for several weeks, enjoyed much of Mr. Rennie's interesting conversation, both on general topics, and professionally upon the progress of the Bell Rock works, on which he was consulted as chief engineer.

Tuesday,  
6th Oct.

The artificers landed this morning at nine, after which one of the boats returned to the ship for the writer and Messrs. Rennie, who, upon landing, were saluted with a display of the colours from the beacon and by three cheers from the workmen. Everything was now in a prepared state for leaving the rock, and giving up the works afloat for this season, excepting some small articles, which would still occupy the smiths and joiners for a few days longer. They accordingly shifted on board of the *Smeaton*, while the yacht left the rock for Arbroath, with Messrs. Rennie, the writer, and the remainder of the artificers. But, before taking leave, the steward served out a farewell glass,

# THE BELL ROCK

when three hearty cheers were given, and an earnest wish expressed that everything, in the spring of 1808, might be found in the same state of good order as it was now about to be left.

1808

## II

### OPERATIONS OF 1808

The writer sailed from Arbroath at one a.m. in the Lighthouse yacht. At seven the floating light was hailed, and all on board found to be well. The crew were observed to have a very healthy-like appearance, and looked better than at the close of the works upon the rock. They seemed only to regret one thing, which was the secession of their cook, Thomas Elliot—not on account of his professional skill, but for his facetious and curious manner. Elliot had something peculiar in his history, and was reported by his comrades to have seen better days. He was, however, happy with his situation on board of the floating light, and, having a taste for music, dancing, and acting plays, he contributed much to the amusement of the ship's company in their dreary abode during the winter months. He had also recommended himself to their notice as a good shipkeeper, for as it did not answer Elliot to go often ashore, he had always given up his turn of leave to his neighbours. At his own desire he was at length paid off, when he had a considerable balance of wages to receive, which he said would be sufficient to carry him to the West Indies, and he accordingly took leave of the Lighthouse service.

Monday,  
29th Feb.

At daybreak the Lighthouse yacht, attended by a boat from the floating light, again stood towards the Bell Rock. The weather felt extremely cold this morning, the thermometer being at 34 degrees, with the wind at east, accompanied by occasional showers of snow, and the marine barometer indicated 29.80. At half-past seven the sea ran with such force upon the rock that it seemed doubtful if a landing could be effected. At half-past eight, when it was fairly above water, the writer took his place in the floating light's boat with the artificers, while the yacht's boat followed, according to the general rule of having two boats afloat in landing expeditions of this kind, that, in case of accident to one boat, the other might assist. In several unsuccessful at-

Tuesday,

## A FAMILY OF ENGINEERS

1808

tempts the boats were beat back by the breach of the sea upon the rock. On the eastern side it separated into two distinct waves, which came with a sweep round to the western side, where they met; and at the instant of their confluence the water rose in spray to a considerable height. Watching what the sailors term a *smooth*, we caught a favourable opportunity, and in a very dexterous manner the boats were rowed between the two seas, and made a favourable landing at the western creek.

At the latter end of last season, as was formerly noticed, the beacon was painted white, and from the bleaching of the weather and the sprays of the sea the upper parts were kept clean; but within the range of the tide the principal beams were observed to be thickly coated with a green stuff, the *conferva* of botanists. Notwithstanding the intrusion of these works, which had formerly banished the numerous seals that played about the rock, they were now seen in great numbers, having been in an almost undisturbed state for six months. It had now also, for the first time, got some inhabitants of the feathered tribe: in particular the scarth or cormorant, and the large herring-gull, had made the beacon a resting-place, from its vicinity to their fishing-grounds. About a dozen of these birds had rested upon the cross-beams, which, in some places, were coated with their dung, and their flight, as the boats approached, was a very unlooked-for indication of life and habitation on the Bell Rock, conveying the momentary idea of the conversion of this fatal rock, from being a terror to the mariner, into a residence of man and a safeguard to shipping.

Upon narrowly examining the great iron stanchions with which the beams were fixed to the rock, the writer had the satisfaction of finding that there was not the least appearance of working or shifting at any of the joints or places of connection; and, excepting the loosening of the bracing-chains, everything was found in the same entire state in which it had been left in the month of October. This, in the estimation of the writer, was a matter of no small importance to the future success of the work. He from that moment saw the practicability and propriety of fitting up the beacon, not only as a place of refuge in case of accident to the boats in landing, but as a residence for the artificers during the working months.

## THE BELL ROCK

1808

While upon the top of the beacon the writer was reminded by the landing-master that the sea was running high, and that it would be necessary to set off while the rock afforded anything like shelter to the boats, which by this time had been made fast by a long line to the beacon, and rode with much agitation, each requiring two men with boat-hooks to keep them from striking each other, or from ranging up against the beacon. But even under these circumstances the greatest confidence was felt by every one, from the security afforded by this temporary erection. For, supposing that the wind had suddenly increased to a gale, and that it had been found inadvisable to go into the boats; or, supposing they had drifted or sprung a leak from striking upon the rocks; in any of these possible and not at all improbable cases, those who might thus have been left upon the rock had now something to lay hold of, and, though occupying this dreary habitation of the sea-gull and the cormorant, affording only bread and water, yet *life* would be preserved, and the mind would still be supported by the hope of being ultimately relieved.

On the 25th of May the writer embarked at Arbroath, on board of the *Sir Joseph Banks*, for the Bell Rock, accompanied by Mr. Logan senior, foreman builder, with twelve masons, and two smiths, together with thirteen seamen, including the master mate, and steward.

Wednesday,  
25th May.

Mr. James Wilson, now commander of the *Pharos* floating light, and landing-master, in the room of Mr. Sinclair, who had left the service, came into the writer's cabin this morning at six o'clock, and intimated that there was a good appearance of landing on the rock. Everything being arranged, both boats proceeded in company, and at eight a.m. they reached the rock. The lighthouse colours were immediately hoisted upon the flag-staff of the beacon, a compliment which was duly returned by the tender and floating light, when three hearty cheers were given, and a glass of rum was served out to all hands to drink success to the operations of 1808.

Thursday,  
26th May.

This morning the wind was at east, blowing a fresh gale, the weather being hazy, with a considerable breach of sea setting in upon the rock. The morning bell was therefore rung, in some doubt as to the practicability of making a landing. After allowing the rock to get fully up, or to be sufficiently left by the tide,

Friday,  
27th May.

## A FAMILY OF ENGINEERS

1808

that the boats might have some shelter from the range of the sea, they proceeded at eight a.m., and upon the whole made a pretty good landing; and after two hours and three-quarters' work returned to the ship in safety.

In the afternoon the wind considerably increased, and, as a pretty heavy sea was still running, the tender rode very hard, when Mr. Taylor, the commander, found it necessary to take in the bowsprit, and strike the fore and main topmasts, that she might ride more easily. After consulting about the state of the weather, it was resolved to leave the artificers on board this evening, and carry only the smiths to the rock, as the sharpening of the irons was rather behind, from their being so much broken and blunted by the hard and tough nature of the rock, which became much more compact and hard as the depth of excavation was increased. Besides avoiding the risk of encumbering the boats with a number of men who had not yet got the full command of the oar in a breach of sea, the writer had another motive for leaving them behind. He wanted to examine the site of the building without interruption, and to take the comparative levels of the different inequalities of its area; and as it would have been painful to have seen men standing idle upon the Bell Rock, where all moved with activity, it was judged better to leave them on board. The boats landed at half-past seven p.m., and the landing-master, with the seamen, was employed during this tide in cutting the seaweeds from the several paths leading to the landing-places, to render walking more safe, for, from the slippery state of the surface of the rock, many severe tumbles had taken place. In the meantime the writer took the necessary levels, and having carefully examined the site of the building and considered all its parts, it still appeared to be necessary to excavate to the average depth of fourteen inches over the whole area of the foundation.

Saturday,  
28th May.

The wind still continued from the eastward with a heavy swell; and to-day it was accompanied with foggy weather and occasional showers of rain. Notwithstanding this, such was the confidence which the erection of the beacon had inspired that the boats landed the artificers on the rock under very unpromising circumstances, at half-past eight, and they continued at work till half-past eleven, being a period of three hours, which was

## THE BELL ROCK

1808

considered a great tide's work in the present low state of the foundation. Three of the masons on board were so afflicted with sea-sickness that they had not been able to take any food for almost three days, and they were literally assisted into the boats this morning by their companions. It was, however, not a little surprising to see how speedily these men revived upon landing on the rock and eating a little dulse. Two of them afterwards assisted the sailors in collecting the chips of stone and carrying them out of the way of the pickmen; but the third complained of a pain in his head, and was still unable to do anything. Instead of returning to the tender with the boats, these three men remained on the beacon all day, and had their victuals sent to them along with the smiths'. From Mr. Dove, the foreman smith, they had much sympathy, for he preferred remaining on the beacon at all hazards, to be himself relieved from the malady of sea-sickness. The wind continuing high, with a heavy sea, and the tide falling late, it was not judged proper to land the artificers this evening, but in the twilight the boats were sent to fetch the people on board who had been left on the rock.

The wind was from the S.W. to-day, and the signal-bell rung, as usual, about an hour before the period for landing on the rock. The writer was rather surprised, however, to hear the landing-master repeatedly call, "All hands for the rock!" and, coming on deck, he was disappointed to find the seamen only in the boats. Upon inquiry, it appeared that some misunderstanding had taken place about the wages of the artificers for Sundays. They had preferred wages for seven days statedly to the former mode of allowing a day for each tide's work on Sunday, as they did not like the appearance of working for double or even treble wages on Sunday, and would rather have it understood that their work on that day arose more from the urgency of the case than with a view to emolument. This having been judged creditable to their religious feelings, and readily adjusted to their wish, the boats proceeded to the rock, and the work commenced at nine a.m.

Sunday,  
29th May.

Mr. Francis Watt commenced, with five joiners, to fit up a temporary platform upon the beacon, about twenty-five feet above the highest part of the rock. This platform was to be used as the site of the smith's forge, after the beacon should be

Monday,  
30th May.

## A FAMILY OF ENGINEERS

1808 fitted up as a barrack; and here also the mortar was to be mixed and prepared for the building, and it was accordingly termed the Mortar Gallery.

The landing-master's crew completed the discharging from the *Smeaton* of her cargo of the cast-iron rails and timber. It must not here be omitted to notice that the *Smeaton* took in ballast from the Bell Rock, consisting of the shivers or chips of stone produced by the workmen in preparing the site of the building, which were now accumulating in great quantities on the rock. These the boats loaded, after discharging the iron. The object in carrying off these chips, besides ballasting the vessel, was to get them permanently out of the way, as they were apt to shift about from place to place with every gale of wind; and it often required a considerable time to clear the foundation a second time of this rubbish. The circumstance of ballasting a ship at the Bell Rock afforded great entertainment, especially to the sailors; and it was perhaps with truth remarked that the *Smeaton* was the first vessel that had ever taken on board ballast at the Bell Rock. Mr. Pool, the commander of this vessel, afterwards acquainted the writer that, when the ballast was landed upon the quay at Leith, many persons carried away specimens of it, as part of a cargo from the Bell Rock; when he added, that such was the interest excited, from the number of specimens carried away, that some of his friends suggested that he should have sent the whole to the Cross of Edinburgh, where each piece might have sold for a penny.

Tuesday,  
31st May.

In the evening the boats went to the rock, and brought the joiners and smiths, and their sickly companions, on board of the tender. These also brought with them two baskets full of fish, which they had caught at high-water from the beacon, reporting, at the same time, to their comrades, that the fish were swimming in such numbers over the rock at high-water that it was completely hid from their sight, and nothing seen but the movement of thousands of fish. They were almost exclusively of the species called the podlie, or young coal-fish. This discovery, made for the first time to-day by the workmen, was considered fortunate, as an additional circumstance likely to produce an inclination among the artificers to take up their residence in the beacon, when it came to be fitted up as a barrack.

## THE BELL ROCK

At three o'clock in the morning the ship's bell was rung as the signal for landing at the rock. When the landing was to be made before breakfast, it was customary to give each of the artificers and seamen a dram and a biscuit, and coffee was prepared by the steward for the cabins. Exactly at four o'clock the whole party landed from three boats, including one of those belonging to the floating light, with a part of that ship's crew, which always attended the works in moderate weather. The landing-master's boat, called the *Seaman*, but more commonly called the *Lifeboat*, took the lead. The next boat, called the *Mason*, was generally steered by the writer; while the floating light's boat, *Pharos*, was under the management of the boatswain of that ship.

1808  
Tuesday,  
7th June.

Having now so considerable a party of workmen and sailors on the rock, it may be proper here to notice how their labours were directed. Preparations having been made last month for the erection of a second forge upon the beacon, the smiths commenced their operations both upon the lower and higher platforms. They were employed in sharpening the picks and irons for the masons, and in making bats and other apparatus of various descriptions connected with the fitting of the railways. The landing-master's crew were occupied in assisting the millwrights in laying the railways to hand. Sailors, of all other descriptions of men, are the most accommodating in the use of their hands. They worked freely with the boring-irons, and assisted in all the operations of the railways, acting by turns as boatmen, seamen, and artificers. We had no such character on the Bell Rock as the common labourer. All the operations of this department were cheerfully undertaken by the seamen, who, both on the rock and on shipboard, were the inseparable companions of every work connected with the erection of the Bell Rock Lighthouse. It will naturally be supposed that about twenty-five masons, occupied with their picks in executing and preparing the foundation of the lighthouse, in the course of a tide of about three hours, would make a considerable impression upon an area even of forty-two feet in diameter. But in proportion as the foundation was deepened, the rock was found to be much more hard and difficult to work, while the baling and pumping of water became much more troublesome. A joiner was kept almost constantly

## A FAMILY OF ENGINEERS

1808

employed in fitting the picks to their handles, which, as well as the points to the irons, were very frequently broken.

The Bell Rock this morning presented by far the most busy and active appearance it had exhibited since the erection of the principal beams of the beacon. The surface of the rock was crowded with men, the two forges flaming, the one above the other, upon the beacon, while the anvils thundered with the rebounding noise of their wooden supports, and formed a curious contrast with the occasional clamour of the surges. The wind was westerly, and the weather being extremely agreeable, as soon after breakfast as the tide had sufficiently overflowed the rock to float the boats over it, the smiths, with a number of the artificers, returned to the beacon, carrying their fishing-tackle along with them. In the course of the forenoon the beacon exhibited a still more extraordinary appearance than the rock had done in the morning. The sea being smooth, it seemed to be afloat upon the water, with a number of men supporting themselves in all the variety of attitude and position: while, from the upper part of this wooden house, the volumes of smoke which ascended from the forges gave the whole a very curious and fanciful appearance.

In the course of this tide it was observed that a heavy swell was setting in from the eastward, and the appearance of the sky indicated a change of weather, while the wind was shifting about. The barometer also had fallen from 30 in. to 29.6. It was, therefore, judged prudent to shift the vessel to the S.W. or more distant buoy. Her bowsprit was also soon afterwards taken in, the topmasts struck, and everything made *snug*, as seamen term it, for a gale. During the course of the night the wind increased and shifted to the eastward, when the vessel rolled very hard, and the sea often broke over her bows with great force.

Wednesday,  
8th June.

Although the motion of the tender was much less than that of the floating light—at least in regard to the rolling motion—yet she *sended*, or pitched, much. Being also of a very handsome build, and what seamen term very *clean aft*, the sea often struck her counter with such force that the writer, who possessed the aftermost cabin, being unaccustomed to this new vessel, could not divest himself of uneasiness; for when her stern fell into the sea, it struck with so much violence as to be more like the resist-

## THE BELL ROCK

1808

ance of a rock than the sea. The water, at the same time, often rushed with great force up the rudder-case, and, forcing up the valve of the water-closet, the floor of his cabin was at times laid under water. The gale continued to increase, and the vessel rolled and pitched in such a manner that the hawser by which the tender was made fast to the buoy snapped, and she went adrift. In the act of swinging round to the wind she shipped a very heavy sea, which greatly alarmed the artificers, who imagined that we had got upon the rock; but this, from the direction of the wind, was impossible. The writer, however, sprung upon deck, where he found the sailors busily employed in rigging out the bowsprit and in setting sail. From the easterly direction of the wind, it was considered most advisable to steer for the Firth of Forth, and there wait a change of weather. At two p.m. we accordingly passed the Isle of May, at six anchored in Leith Roads, and at eight the writer landed, when he came in upon his friends, who were not a little surprised at his unexpected appearance, which gave an instantaneous alarm for the safety of things at the Bell Rock.

The wind still continued to blow very hard at E. by N., and the *Sir Joseph Banks* rode heavily, and even drifted with both anchors ahead, in Leith Roads. The artificers did not attempt to leave the ship last night; but there being upwards of fifty people on board, and the decks greatly lumbered with the two large boats, they were in a very crowded and impatient state on board. But to-day they got ashore, and amused themselves by walking about the streets of Edinburgh, some in very humble apparel, from having only the worst of their jackets with them which, though quite suitable for their work, were hardly fit for public inspection, being not only tattered, but greatly stained with the red colour of the rock.

Thursday,  
9th June.

To-day the wind was at S.E., with light breezes and foggy weather. At six a.m. the writer again embarked for the Bell Rock, when the vessel immediately sailed. At eleven p.m., there being no wind, the kedge-anchor was *let go* off Anstruther, one of the numerous towns on the coast of Fife, where we waited the return of the tide.

Friday,  
10th June.

At six a.m. the *Sir Joseph* got under weigh, and at eleven was again made fast to the southern buoy at the Bell Rock. Though

Saturday,  
11th June.

## A FAMILY OF ENGINEERS

1808

it was now late in the tide, the writer, being anxious to ascertain the state of things after the gale, landed with the artificers, to the number of forty-four. Everything was found in an entire state; but, as the tide was nearly gone, only half an hour's work had been got when the site of the building was overflowed. In the evening the boats again landed at nine, and, after a good tide's work of three hours with torch-light, the work was left off at midnight. To the distant shipping the appearance of things under night on the Bell Rock, when the work was going forward, must have been very remarkable, especially to those who were strangers to the operations. Mr. John Reid, principal light-keeper, who also acted as master of the floating light during the working months at the rock, described the appearance of the numerous lights situated so low in the water, when seen at the distance of two or three miles, as putting him in mind of Milton's description of the fiends in the lower regions, adding, "for it seems greatly to surpass Will-o'-the-wisp, or any of those earthly spectres of which we have so often heard."

Monday,  
13th June.

From the difficulties attending the landing on the rock, owing to the breach of sea which had for days past been around it, the artificers showed some backwardness at getting into the boats this morning; but after a little explanation this was got over. It was always observable that for some time after anything like danger had occurred at the rock, the workmen became much more cautious, and on some occasions their timidity was rather troublesome. It fortunately happened, however, that along with the writer's assistants and the sailors there were also some of the artificers themselves who felt no such scruples, and in this way these difficulties were the more easily surmounted. In matters where life is in danger it becomes necessary to treat even unfounded prejudices with tenderness, as an accident, under certain circumstances, would not only have been particularly painful to those giving directions, but have proved highly detrimental to the work, especially in the early stages of its advancement.

At four o'clock fifty-eight persons landed; but the tides being extremely languid, the water only left the higher parts of the rock, and no work could be done at the site of the building. A third forge was, however, put in operation during a short time,

## THE BELL ROCK

1808

for the greater conveniency of sharpening the picks and irons, and for purposes connected with the preparations for fixing the railways on the rock. The weather towards the evening became thick and foggy, and there was hardly a breath of wind to ruffle the surface of the water. Had it not, therefore, been the noise from the anvils of the smiths who had been left on the beacon throughout the day, which afforded a guide for the boats, a landing could not have been attempted this evening, especially with such a company of artificers. This circumstance confirmed the writer's opinion with regard to the propriety of connecting large bells to be rung with machinery in the lighthouse, to be tolled day and night during the continuance of foggy weather.

The boats landed this evening, when the artificers had again two hours' work. The weather still continuing very thick and foggy, more difficulty was experienced in getting on board of the vessels to-night than had occurred on any previous occasion, owing to a light breeze of wind which carried the sound of the bell and the other signals made on board of the vessels away from the rock. Having fortunately made out the position of the sloop *Smeaton* at the N.E. buoy—to which we were much assisted by the barking of the ship's dog,—we parted with the *Smeaton's* boat, when the boats of the tender took a fresh departure for that vessel, which lay about half a mile to the south-westward. Yet such is the very deceiving state of the tides, that, although there was a small binnacle and compass in the landing-master's boat we had, nevertheless, passed the *Sir Joseph* a good way, when, fortunately, one of the sailors caught the sound of a blowing horn. The only fire-arms on board were a pair of swivels of one-inch calibre; but it is quite surprising how much the sound is lost in foggy weather, as the report was heard but at a very short distance. The sound from the explosion of gunpowder is so instantaneous that the effect of the small guns was not so good as either the blowing of a horn or the tolling of a bell, which afforded a more constant and steady direction for the pilot.

Thursday,  
23rd June.

Landed on the rock with the three boats belonging to the tender at five p.m., and began immediately to bale the water out of the foundation-pit with a number of buckets, while the pumps

Wednesday,  
6th July.

## A FAMILY OF ENGINEERS

1808

were also kept in action with relays of artificers and seamen. The work commenced upon the higher parts of the foundation as the water left them, but it was now pretty generally reduced to a level. About twenty men could be conveniently employed at each pump, and it is quite astonishing in how short a time so great a body of water could be drawn off. The water in the foundation-pit at this time measured about two feet in depth, on an area of forty-two feet in diameter, and yet it was drawn off in the course of about half an hour. After this the artificers commenced with their picks and continued at work for two hours and a half, some of the sailors being at the same time busily employed in clearing the foundation of chips and in conveying the irons to and from the smiths on the beacon, where they were sharpened. At eight o'clock the sea broke in upon us and overflowed the foundation-pit, when the boats returned to the tender.

Thursday,  
7th July.

The landing-master's bell rung this morning about four o'clock, and at half-past five, the foundation being cleared, the work commenced on the site of the building. But from the moment of landing, the squad of joiners and millwrights was at work upon the higher parts of the rock in laying the railways, while the anvils of the smiths resounded on the beacon, and such columns of smoke ascended from the forges that they were often mistaken by strangers at a distance for a ship on fire. After continuing three hours at work the foundation of the building was again overflowed, and the boats returned to the ship at half-past eight o'clock. The masons and pickmen had, at this period, a pretty long day on board of the tender, but the smiths and joiners were kept constantly at work upon the beacon, the stability and great conveniency of which had now been so fully shown that no doubt remained as to the propriety of fitting it up as a barrack. The workmen were accordingly employed, during the period of high-water, in making preparations for this purpose.

The foundation-pit now assumed the appearance of a great platform, and the late tides had been so favourable that it became apparent that the first course, consisting of a few irregular and detached stones for making up certain inequalities in the interior parts of the site of the building, might be laid in the course of the present spring-tides. Having been enabled to-day to get the dimensions of the foundation, or first stone, accurately

## THE BELL ROCK

taken, a mould was made of its figure, when the writer left the rock, after the tide's work of this morning, in a fast rowing-boat for Arbroath; and, upon landing, two men were immediately set to work upon one of the blocks from Mylnefield quarry, which was prepared in the course of the following day, as the stone-cutters relieved each other, and worked both night and day, so that it was sent off in one of the stone-lighters without delay.

1808

The site of the foundation-stone was very difficult to work, from its depth in the rock; but being now nearly prepared, it formed a very agreeable kind of pastime at high-water for all hands to land the stone itself upon the rock. The landing-master's crew and artificers accordingly entered with great spirit into this operation. The stone was placed upon the deck of the *Hedderwick* praam-boat, which had just been brought from Leith, and was decorated with colours for the occasion. Flags were also displayed from the shipping in the offing, and upon the beacon. Here the writer took his station with the greater part of the artificers, who supported themselves in every possible position while the boats towed the praam from her moorings and brought her immediately over the site of the building, where her grappling anchors were let go. The stone was then lifted off the deck by a tackle hooked into a Lewis bat inserted into it, when it was gently lowered into the water and grounded on the site of the building, amidst the cheering acclamations of about sixty persons.

Saturday,  
9th July.

At eleven o'clock the foundation-stone was laid to hand. It was of a square form, containing about twenty cubic feet, and had the figures, or date, of 1808 simply cut upon it with a chisel. A derrick, or spar of timber, having been erected at the edge of the hole and guyed with ropes, the stone was then hooked to the tackle and lowered into its place, when the writer, attended by his assistants—Mr. Peter Logan, Mr. Francis Watt, and Mr. James Wilson,—applied the square, the level, and the mallet, and pronounced the following benediction: "May the Great Architect of the Universe complete and bless this building," on which three hearty cheers were given, and success to the future operations was drunk with the greatest enthusiasm.

Sunday,  
10th July.

The wind being at S.E. this evening, we had a pretty heavy

Tuesday,  
26th July.

## A FAMILY OF ENGINEERS

1808 swell of sea upon the rock, and some difficulty attended our getting off in safety, as the boats got aground in the creek and were in danger of being upset. Upon extinguishing the torch-lights, about twelve in number, the darkness of the night seemed quite horrible; the water being also much charged with the phosphorescent appearance which is familiar to every one on ship-board, the waves, as they dashed upon the rock, were in some degree like so much liquid flame. The scene, upon the whole, was truly awful!

Wednesday,  
27th July. In leaving the rock this evening, everything, after the torches were extinguished, had the same dismal appearance as last night, but so perfectly acquainted were the landing-master and his crew with the position of things at the rock, that comparatively little inconveniency was experienced on these occasions when the weather was moderate; such is the effect of habit, even in the most unpleasant situations. If, for example, it had been proposed to a person accustomed to a city life, at once to take up his quarters off a sunken reef and land upon it in boats at all hours of the night, the proposition must have appeared quite impracticable and extravagant; but this practice coming progressively upon the artificers, it was ultimately undertaken with the greatest alacrity. Notwithstanding this, however, it must be acknowledged that it was not till after much labour and peril, and many an anxious hour, that the writer is enabled to state that the site of the Bell Rock Lighthouse is fully prepared for the first entire course of the building.

Friday,  
12th Aug. The artificers landed this morning at half-past ten, and after an hour and a half's work eight stones were laid, which completed the first entire course of the building, consisting of 123 blocks, the last of which was laid with three hearty cheers.

Saturday,  
10th Sept. Land at nine a.m., and by a quarter-past twelve noon twenty-three stones had been laid. The works being now somewhat elevated by the lower courses, we got quit of the very serious inconvenience of pumping water to clear the foundation-pit. This gave much facility to the operations, and was noticed with expressions of as much happiness by the artificers as the seamen had shown when relieved of the continual trouble of carrying the smith's bellows off the rock prior to the erection of the beacon.

Wednesday,  
21st Sept. Mr. Thomas Macurich, mate of the *Smeaton*, and James Scott,

## THE BELL ROCK

1808

one of the crew, a young man about eighteen years of age, immediately went into their boat to make fast a hawser to the ring in the top of the floating buoy of the moorings, and were forthwith to proceed to land their cargo, so much wanted, at the rock. The tides at this period were very strong, and the mooring-chain, when sweeping the ground, had caught hold of a rock or piece of wreck by which the chain was so shortened that when the tide flowed the buoy got almost under water, and little more than the ring appeared at the surface. When Macurich and Scott were in the act of making the hawser fast to the ring, the chain got suddenly disentangled at the bottom, and this large buoy, measuring about seven feet in height and three feet in diameter at the middle, tapering to both ends, being what seamen term a *Nun-buoy*, vaulted or sprung up with such force that it upset the boat, which instantly filled with water. Mr. Macurich, with much exertion, succeeded in getting hold of the boat's gunwale, still above the surface of the water, and by this means was saved; but the young man Scott was unfortunately drowned. He had in all probability been struck about the head by the ring of the buoy, for although surrounded with the oars and the thwarts of the boat which floated near him, yet he seemed entirely to want the power of availing himself of such assistance, and appeared to be quite insensible, while Pool, the master of the *Smeaton*, called loudly to him; and before assistance could be got from the tender, he was carried away by the strength of the current, and disappeared.

The young man Scott was a great favourite in the service, having had something uncommonly mild and complaisant in his manner; and his loss was therefore universally regretted. The circumstances of his case were also peculiarly distressing to his mother, as her husband, who was a seaman, had for three years past been confined to a French prison, and the deceased was the chief support of the family. In order in some measure to make up the loss to the poor woman for the monthly aliment regularly allowed her by her late son, it was suggested that a younger boy, a brother of the deceased, might be taken into the service. This appeared to be rather a delicate proposition, but it was left to the landing-master to arrange according to circumstances; such was the resignation, and at the same time the

## A FAMILY OF ENGINEERS

1808

spirit, of the poor woman, that she readily accepted the proposal, and in a few days the younger Scott was actually afloat in the place of his brother. On representing this distressing case to the Board, the Commissioners were pleased to grant an annuity of £5 to Scott's mother.

The *Smeaton*, not having been made fast to the buoy, had, with the ebb-tide, drifted to leeward a considerable way eastward of the rock, and could not, till the return of the flood-tide, be worked up to her moorings, so that the present tide was lost notwithstanding all exertions which had been made both ashore and afloat with this cargo. The artificers landed at six a.m.; but, as no materials could be got upon the rock this morning, they were employed in boring trenail holes and in various other operations, and after four hours' work they returned on board the tender. When the *Smeaton* got up to her moorings, the landing-master's crew immediately began to unload her. There being too much wind for towing the praams in the usual way, they were warped to the rock in the most laborious manner by their windlasses, with successive grapplings and hawsers laid out for this purpose. At six p.m. the artificers landed, and continued at work till half-past ten, when the remaining seventeen stones were laid which completed the third entire course, or fourth of the lighthouse, with which the building operations were closed for the season.

### III

#### OPERATIONS OF 1809

1809  
Wednesday,  
24th May.

The last night was the first that the writer had passed in his old quarters on board of the floating light for about twelve months, when the weather was so fine and the sea so smooth that even here he felt but little or no motion, excepting at the turn of the tide, when the vessel gets into what the seamen term the *trough of the sea*. At six a.m. Mr. Watt, who conducted the operations of the railways and beacon-house, had landed with nine artificers. At half-past one p.m. Mr. Peter Logan had also landed with fifteen masons, and immediately proceeded to set up the crane. The sheer-crane or apparatus for lifting the stones out of the praam-boats at the eastern creek had been

## THE BELL ROCK

1809

already erected, and the railways now formed about two-thirds of an entire circle round the building: some progress had likewise been made with the reach towards the western landing-place. The floors being laid, the beacon now assumed the appearance of a habitation. The *Smeaton* was at her moorings, with the *Fernie* praam-boat astern, for which she was laying down moorings, and the tender being also at her station, the Bell Rock had again put on its former busy aspect.

The landing-master's bell, often no very favourite sound, rung at six this morning; but on this occasion, it is believed, it was gladly received by all on board, as the welcome signal of the return of better weather. The masons laid thirteen stones to-day, which the seamen had landed, together with other building materials. During these twenty-four hours the wind was from the south, blowing fresh breezes, accompanied with showers of snow. In the morning the snow showers were so thick that it was with difficulty the landing-master, who always steered the leading boat, could make his way to the rock through the drift. But at the Bell Rock neither snow nor rain, nor fog nor wind, retarded the progress of the work, if unaccompanied by a heavy swell or breach of the sea.

Wednesday,  
31st May.

The weather during the months of April and May had been uncommonly boisterous, and so cold that the thermometer seldom exceeded 40°, while the barometer was generally about 29.50. We had not only hail and sleet, but the snow on the last day of May lay on the decks and rigging of the ship to the depth of about three inches; and although now entering upon the month of June, the length of the day was the chief indication of summer. Yet such is the effect of habit, and such was the expertness of the landing-master's crew, even in this description of weather, that seldom a tide's work was lost. Such was the ardour and zeal of the heads of the several departments at the rock, including Mr. Peter Logan, foreman builder, Mr. Francis Watt, foreman millwright, and Captain Wilson, landing-master, that it was on no occasion necessary to address them, excepting in the way of precaution or restraint. Under these circumstances, however, the writer not unfrequently felt considerable anxiety, of which this day's experience will afford an example.

This morning, at a quarter-past eight, the artificers were land-

## A FAMILY OF ENGINEERS

1809

ed as usual, and, after three hours and three-quarters' work, five stones were laid, the greater part of this tide having been taken up in completing the boring and trenailing of the stones formerly laid. At noon the writer, with the seamen and artificers, proceeded to the tender, leaving on the beacon the joiners, and several of those who were troubled with sea-sickness—among whom was Mr. Logan, who remained with Mr. Watt—counting altogether eleven persons. During the first and middle parts of these twenty-four hours the wind was from the east, blowing what the seamen term “fresh breezes”; but in the afternoon it shifted to E.N.E., accompanied with so heavy a swell of sea that the *Smeaton* and tender struck their topmasts, launched in their boltsprits, and “made all snug” for a gale. At four p.m. the *Smeaton* was obliged to slip her moorings, and passed the tender, drifting before the wind, with only the foresail set. In passing, Mr. Pool hailed that he must run for the Firth of Forth to prevent the vessel from “riding under.”

On board of the tender the writer's chief concern was about the eleven men left upon the beacon. Directions were accordingly given that everything about the vessel should be put in the best possible state, to present as little resistance to the wind as possible, that she might have the better chance of riding out the gale. Among these preparations the best bower cable was bent, so as to have a second anchor in readiness in case the mooring-hawser should give way, that every means might be used for keeping the vessel within sight of the prisoners on the beacon, and thereby keep them in as good spirits as possible. From the same motive the boats were kept afloat that they might be less in fear of the vessel leaving her station. The landing-master had, however, repeatedly expressed his anxiety for the safety of the boats, and wished much to have them hoisted on board. At seven p.m. one of the boats, as he feared, was unluckily filled with sea from a wave breaking into her, and it was with great difficulty that she could be baled out and got on board, with the loss of her oars, rudder, and loose thwarts. Such was the motion of the ship that in taking this boat on board her gunwale was stove in, and she otherwise received considerable damage. Night approached, but it was still found quite impossible to go near the rock. Consulting, therefore, the safety

## THE BELL ROCK

of the second boat, she also was hoisted on board of the tender.

1809

At this time the cabins of the beacon were only partially covered, and had neither been provided with bedding nor a proper fireplace, while the stock of provisions was but slender. In these uncomfortable circumstances the people on the beacon were left for the night, nor was the situation of those on board of the tender much better. The rolling and pitching motion of the ship was excessive; and, excepting to those who had been accustomed to a residence in the floating light, it seemed quite intolerable. Nothing was heard but the hissing of the winds and the creaking of the bulkheads or partitions of the ship; the night was, therefore, spent in the most unpleasant reflections upon the condition of the people on the beacon, especially in the prospect of the tender being driven from her moorings. But, even in such a case, it afforded some consolation that the stability of the fabric was never doubted, and that the boats of the floating light were at no great distance, and ready to render the people on the rock the earliest assistance which the weather would permit. The writer's cabin being in the sternmost part of the ship, which had what sailors term a good entry, or was sharp built, the sea, as before noticed, struck her counter with so much violence that the water, with a rushing noise, continually forced its way up the rudder-case, lifted the valve of the water-closet, and overran the cabin floor. In these circumstances daylight was eagerly looked for, and hailed with delight, as well by those afloat as by the artificers upon the rock.

In the course of the night the writer held repeated conversations with the officer on watch, who reported that the weather continued much in the same state, and that the barometer still indicated 29.20 inches. At six a.m. the landing-master considered the weather to have somewhat moderated; and, from certain appearances of the sky, he was of opinion that a change for the better would soon take place. He accordingly proposed to attempt a landing at low water, and either get the people off the rock, or at least ascertain what state they were in. At nine a.m. he left the vessel with a boat well-manned, carrying with him a supply of cooked provisions and a tea-kettle full of mulled

Friday,  
2nd June.

## A FAMILY OF ENGINEERS

1809 port wine for the people on the beacon, who had not had any regular diet for about thirty hours, while they were exposed during that period, in a great measure, both to the winds and the sprays of the sea. The boat having succeeded in landing, she returned at eleven a.m. with the artificers, who had got off with considerable difficulty, and who were heartily welcomed by all on board.

Upon inquiry it appeared that three of the stones last laid upon the building had been partially lifted from their beds by the force of the sea, and were now held only by the trenails, and that the cast-iron sheer-crane had again been thrown down and completely broken. With regard to the beacon, the sea at high-water had lifted part of the mortar gallery or lowest floor, and washed away all the lime-casks and other movable articles from it; but the principal parts of this fabric had sustained no damage. On pressing Messrs. Logan and Watt on the situation of things in the course of the night, Mr. Logan emphatically said: "That the beacon had an *ill-faured*<sup>1</sup> *twist* when the sea broke upon it at high-water, but that they were not very apprehensive of danger." On inquiring as to how they spent the night, it appeared that they had made shift to keep a small fire burning, and by means of some old sails defended themselves pretty well from the sea sprays.

It was particularly mentioned that by the exertions of James Glen, one of the joiners, a number of articles were saved from being washed off the mortar gallery. Glen was also very useful in keeping up the spirits of the forlorn party. In the early part of life he had undergone many curious adventures at sea, which he now recounted somewhat after the manner of the tales of the *Arabian Nights*. When one observed that the beacon was a most comfortless lodging, Glen would presently introduce some of his exploits and hardships, in comparison with which the state of things at the beacon bore an aspect of comfort and happiness. Looking to their slender stock of provisions, and their perilous and uncertain chance of speedy relief, he would launch out into an account of one of his expeditions in the North Sea, when the vessel, being much disabled in a storm, was driven before the wind with the loss of almost all their provisions; and

<sup>1</sup>Ill-formed—ugly.—[R. L. S.]

## THE BELL ROCK

1809

the ship being much infested with rats, the crew hunted these vermin with great eagerness to help their scanty allowance. By such means Glen had the address to make his companions, in some measure, satisfied, or at least passive, with regard to their miserable prospects upon this half-tide rock in the middle of the ocean. This incident is noticed, more particularly, to show the effects of such a happy turn of mind, even under the most distressing and ill-fated circumstances.

At eight a.m. the artificers and sailors, forty-five in number, landed on the rock, and after four hours' work seven stones were laid. The remainder of this tide, from the threatening appearance of the weather, was occupied in trenailing and making all things as secure as possible. At twelve noon the rock and building were again overflowed, when the masons and seamen went on board of the tender, but Mr. Watt, with his squad of ten men, remained on the beacon throughout the day. As it blew fresh from the N.W. in the evening, it was found impracticable either to land the building artificers or to take the artificers off the beacon, and they were accordingly left there all night, but in circumstances very different from those of the 1st of this month. The house, being now in a more complete state, was provided with bedding, and they spent the night pretty well, though they complained of having been much disturbed at the time of high-water by the shaking and tremulous motion of their house and by the plashing noise of the sea upon the mortar gallery. Here James Glen's versatile powers were again at work in cheering up those who seemed to be alarmed, and in securing everything as far as possible. On this occasion he had only to recall to the recollections of some of them the former night which they had spent on the beacon, the wind and sea being then much higher, and their habitation in a far less comfortable state.

Saturday,  
17th June.

The wind still continuing to blow fresh from the N.W., at 5 p.m. the writer caused a signal to be made from the tender for the *Smeaton* and *Patriot* to slip their moorings, when they ran for Lunan Bay, an anchorage on the east side of the Red-head. Those on board of the tender spent but a very rough night, and perhaps slept less soundly than their companions on the beacon, especially as the wind was at N.W., which caused the vessel to ride with her stern towards the Bell Rock; so that,

## A FAMILY OF ENGINEERS

1809 in the event of anything giving way, she could hardly have escaped being stranded upon it.

Sunday,  
18th June. The weather having moderated to-day, the wind shifted to the westward. At a quarter-past nine a.m. the artificers landed from the tender and had the pleasure to find their friends who had been left on the rock quite hearty, alleging that the beacon was the preferable quarters of the two.

Saturday,  
24th June. Mr. Peter Logan, the foreman builder, and his squad, twenty-one in number, landed this morning at three o'clock, and continued at work four hours and a quarter, and after laying seventeen stones returned to the tender. At six a.m. Mr. Francis Watt and his squad of twelve men landed, and proceeded with their respective operations at the beacon and railways, and were left on the rock during the whole day without the necessity of having any communication with the tender, the kitchen of the beacon-house being now fitted up. It was to-day, also, that Peter Fortune—a most obliging and well-known character in the Lighthouse service—was removed from the tender to the beacon as cook and steward, with a stock of provisions as ample as his limited storeroom would admit.

When as many stones were built as comprised this day's work, the demand for mortar was proportionally increased, and the task of the mortar-makers on these occasions was both laborious and severe. This operation was chiefly performed by John Watt—a strong, active quarrier by profession,—who was a perfect character in his way, and extremely zealous in his department. While the operations of the mortar-makers continued, the forge upon their gallery was not generally in use; but, as the working hours of the builders extended with the height of the building, the forge could not be so long wanted, and then a sad confusion often ensued upon the circumscribed floor of the mortar gallery, as the operations of Watt and his assistants trenched greatly upon those of the smiths. Under these circumstances the boundary of the smiths was much circumscribed, and they were personally annoyed, especially in blowy weather, with the dust of the lime in its powdered state. The mortar-makers, on the other hand, were often not a little distressed with the heat of the fire and the sparks elicited on the anvil, and not unaptly complained that they were placed between the "devil and the deep sea."

## THE BELL ROCK

The work being now about ten feet in height, admitted of a rope-ladder being distended<sup>1</sup> between the beacon and the building. By this "Jacob's Ladder," as the seamen termed it, a communication was kept up with the beacon while the rock was considerably under water. One end of it being furnished with tackle-blocks, was fixed to the beams of the beacon, at the level of the mortar gallery, while the further end was connected with the upper course of the building by means of two Lewis bats which were lifted from course to course as the work advanced. In the same manner a rope furnished with a travelling pulley was distended for the purpose of transporting the mortar-buckets and other light articles between the beacon and the building, which also proved a great conveniency to the work. At this period the rope-ladder and tackle for the mortar had a descent from the beacon to the building; by and by they were on a level, and towards the end of the season, when the solid part had attained its full height, the ascent was from the mortar-gallery to the building.

1809  
Sunday,  
25th June.

The artificers landed on the rock this morning at a quarter-past six, and remained at work five hours. The cooking apparatus being now in full operation, all hands had breakfast on the beacon at the usual hour, and remained there throughout the day. The crane upon the building had to be raised to-day from the eighth to the ninth course, an operation which now required all the strength that could be mustered for working the guy-tackles; for as the top of the crane was at this time about thirty-five feet above the rock, it became much more unmanageable. While the beam was in the act of swinging round from one guy to another, a great strain was suddenly brought upon the opposite tackle, with the end of which the artificers had very improperly neglected to take a turn round some stationary object, which would have given them the complete command of the tackle. Owing to this simple omission, the crane got a preponderancy to one side, and fell upon the building with a terrible crash. The surrounding artificers immediately flew in every direction to get out of its way; but Michael Wishart, the principal builder, having unluckily stumbled upon one of the uncut trenails, fell upon

Friday,<sup>1</sup>  
30th June.

<sup>1</sup>This is an incurable illusion of my grandfather's; he always writes "distended" for "extended."—[R. L.S.]

## A FAMILY OF ENGINEERS

1809

his back. His body fortunately got between the movable beam and the upright shaft of the crane, and was thus saved; but his feet got entangled with the wheels of the crane and were severely injured. Wishart, being a robust young man, endured his misfortune with wonderful firmness; he was laid upon one of the narrow framed beds of the beacon and despatched in a boat to the tender, where the writer was when this accident happened, not a little alarmed on missing the crane from the top of the building, and at the same time seeing a boat rowing towards the vessel with great speed. When the boat came alongside with poor Wishart, stretched upon a bed covered with blankets, a moment of great anxiety followed, which was, however, much relieved when, on stepping into the boat, he was accosted by Wishart, though in a feeble voice, and with an aspect pale as death from excessive bleeding. Directions having been immediately given to the coxswain to apply to Mr. Kennedy at the workyard to procure the best surgical aid, the boat was sent off without delay to Arbroath. The writer then landed at the rock, when the crane was in a very short time got into its place and again put in a working state.

Monday,  
3rd July.

The writer having come to Arbroath with the yacht, had an opportunity of visiting Michael Wishart, the artificer who had met with so severe an accident at the rock on the 30th ult., and had the pleasure to find him in a state of recovery. From Dr. Stevenson's account, under whose charge he had been placed, hopes were entertained that amputation would not be necessary, as his patient still kept free of fever or any appearance of mortification; and Wishart expressed a hope that he might, at least, be ultimately capable of keeping the light at the Bell Rock, as it was not now likely that he would assist further in building the house.

Saturday,  
8th July.

It was remarked to-day, with no small demonstration of joy, that the tide, being neap, did not, for the first time, overflow the building at high-water. Flags were accordingly hoisted on the beacon-house, and crane on the top of the building, which were repeated from the floating light, Lighthouse yacht, tender, *Smeaton*, *Patriot*, and the two praams. A salute of three guns was also fired from the yacht at high-water, when, all the artificers being collected on the top of the building, three cheers were given in testimony of this important circumstance. A glass of

## THE BELL ROCK

rum was then served out to all hands on the rock and on board of the respective ships.

1809

Besides laying, boring, trenailing, wedging, and grouting thirty-two stones, several other operations were proceeded with on the rock at low-water, when some of the artificers were employed at the railways, and at high-water at the beacon-house. The seamen having prepared a quantity of tarpaulin, or cloth laid over with successive coats of hot tar, the joiners had just completed the covering of the roof with it. This sort of covering was lighter and more easily managed than sheet-lead in such a situation. As a further defence against the weather the whole exterior of this temporary residence was painted with three coats of white-lead paint. Between the timber framing of the habitable part of the beacon the interstices were to be stuffed with moss, as a light substance that would resist dampness and check sifting winds; the whole interior was then to be lined with green baize cloth, so that both without and within the cabins were to have a very comfortable appearance.

Sunday,  
16th July.

Although the building artificers generally remained on the rock throughout the day, and the millwrights, joiners, and smiths, while their number was considerable, remained also during the night, yet the tender had hitherto been considered as their night quarters. But the wind having in the course of the day shifted to the N.W., and as the passage to the tender, in the boats, was likely to be attended with difficulty, the whole of the artificers, with Mr. Logan, the foreman, preferred remaining all night on the beacon, which had of late become the solitary abode of George Forsyth, a jobbing upholsterer, who had been employed in lining the beacon-house with cloth and in fitting up the bedding. Forsyth was a tall, thin, and rather loose-made man, who had an utter aversion at climbing upon the trap-ladders of the beacon, but especially at the process of boating, and the motion of the ship, which he said "was death itself." He therefore pertinaciously insisted with the landing-master in being left upon the beacon, with a small black dog as his only companion. The writer, however, felt some delicacy in leaving a single individual upon the rock, who must have been so very helpless in case of accident. This fabric had, from the beginning, been rather intended by the writer to guard against accident from the loss or

## A FAMILY OF ENGINEERS

1809

damage of a boat, and as a place for making mortar, a smith's shop, and a store for tools during the working months, than as permanent quarters; nor was it at all meant to be possessed until the joiner-work was completely finished, and his own cabin, and that for the foreman, in readiness, when it was still to be left to the choice of the artificers to occupy the tender or the beacon. He, however, considered Forsyth's partiality and confidence in the latter as rather a fortunate occurrence.

Wednesday,  
19th July.

The whole of the artificers, twenty-three in number, now removed of their own accord from the tender, to lodge in the beacon, together with Peter Fortune, a person singularly adapted for a residence of this kind, both from the urbanity of his manners and the versatility of his talents. Fortune, in his person, was of small stature, and rather corpulent. Besides being a good Scots cook, he had acted both as groom and house-servant; he had been a soldier, a sutler, a writer's clerk, and an apothecary, from which he possessed the art of writing and suggesting recipes, and had hence, also, perhaps, acquired a turn for making collections in natural history. But in his practice in surgery on the Bell Rock, for which he received an annual fee of three guineas, he is supposed to have been rather partial to the use of the lancet. In short, Peter was the *factotum* of the beacon-house, where he ostensibly acted in the several capacities of cook, steward, surgeon, and barber, and kept a statement of the rations or expenditure of the provisions with the strictest integrity.

In the present important state of the building, when it had just attained the height of sixteen feet, and the upper courses, and especially the imperfect one, were in the wash of the heaviest seas, an express boat arrived at the rock with a letter from Mr. Kennedy, of the workyard, stating that in consequence of the intended expedition to Walcheren, an embargo had been laid on shipping at all the ports of Great Britain: that both the *Smeaton* and *Patriot* were detained at Arbroath, and that but for the proper view which Mr. Ramsey, the port-officer, had taken of his orders, neither the express boat nor one which had been sent with provisions and necessaries for the floating light would have been permitted to leave the harbour. The writer set off without delay for Arbroath, and on landing used every possible means with the official people, but their orders were deemed so peremptory

## THE BELL ROCK

1809

that even boats were not permitted to sail from any port upon the coast. In the meantime, the collector of the Customs at Montrose applied to the Board at Edinburgh, but could, of himself, grant no relief to the Bell Rock shipping.

At this critical period Mr. Adam Duff, then Sheriff of Forfarshire, now of the county of Edinburgh, and *ex officio* one of the Commissioners of the Northern Lighthouses, happened to be at Arbroath. Mr. Duff took an immediate interest in representing the circumstances of the case to the Board of Customs at Edinburgh. But such were the doubts entertained on the subject that, on having previously received the appeal from the collector at Montrose, the case had been submitted to the consideration of the Lords of the Treasury, whose decision was now waited for.

In this state of things the writer felt particularly desirous to get the thirteenth course finished, that the building might be in a more secure state in the event of bad weather. An opportunity was therefore embraced on the 25th, in sailing with provisions for the floating light, to carry the necessary stones to the rock for this purpose, which were landed and built on the 26th and 27th. But so closely was the watch kept up that a Custom-house officer was always placed on board of the *Smeaton* and *Patriot* while they were afloat, till the embargo was especially removed from the lighthouse vessels. The artificers at the Bell Rock had been reduced to fifteen, who were regularly supplied with provisions along with the crew of the floating light, mainly through the port officer's liberal interpretation of his orders.

There being a considerable swell and breach of sea upon the rock yesterday, the stones could not be got landed till the day following, when the wind shifted to the southward and the weather improved. But to-day no less than seventy-eight blocks of stone were landed, of which forty were built, which completed the fourteenth and part of the fifteenth courses. The number of workmen now resident in the beacon-house were augmented to twenty-four, including the landing-master's crew from the tender and the boat's crew from the floating light, who assisted at landing the stones. Those daily at work upon the rock at this period amounted to forty-six. A cabin had been laid out for the writer on the beacon, but his apartment had been the last which was finished, and he had not yet taken possession of it; for though he

Tuesday,  
1st Aug.

## A FAMILY OF ENGINEERS

1809 generally spent the greater part of the day, at this time, upon the rock, yet he always slept on board of the tender.

Friday, 11th Aug. The wind was at S.E. on the 11th, and there was so very heavy a swell of sea upon the rock that no boat could approach it.

Saturday, 12th Aug. The gale still continuing from the S.E., the sea broke with great violence both upon the building and the beacon. The former being twenty-three feet in height, the upper part of the crane erected on it having been lifted from course to course as the building advanced, was now about thirty-six feet above the rock. From observations made on the rise of the sea by this crane, the artificers were enabled to estimate its height to be about fifty feet above the rock, while the sprays fell with a most alarming noise upon their cabins. At low-water, in the evening, a signal was made from the beacon, at the earnest desire of some of the artificers, for the boats to come to the rock; and although this could not be effected without considerable hazard, it was, however, accomplished, when twelve of their number, being much afraid, applied to the foreman to be relieved, and went on board of the tender. But the remaining fourteen continued on the rock, with Mr. Peter Logan, the foreman builder. Although this rule of allowing an option to every man either to remain on the rock or return to the tender was strictly adhered to, yet, as it would have been extremely inconvenient to have had the men parcelled out in this manner, it became necessary to embrace the first opportunity of sending those who had left the beacon to the work-yard, with as little appearance of intention as possible, lest it should hurt their feelings, or prevent others from acting according to their wishes, either in landing on the rock or remaining on the beacon.

Tuesday, 15th Aug. The wind had fortunately shifted to the S.W. this morning and though a considerable breach was still upon the rock, yet the landing-master's crew were enabled to get one pram-boat, lightly loaded with five stones, brought in safety to the western creek; these stones were immediately laid by the artificers, who gladly embraced the return of good weather to proceed with their operations. The writer had this day taken possession of his cabin in the beacon-house. It was small, but commodious, and was found particularly convenient in coarse and blowing weather, instead of being obliged to make a passage to the tender in an

## THE BELL ROCK

open boat at all times, both during the day and the night, which was often attended with much difficulty and danger. 1809

For some days past the weather had been occasionally so thick and foggy that no small difficulty was experienced in going even between the rock and the tender, though quite at hand. But the floating light's boat lost her way so far in returning on board that the first land she made, after rowing all night, was Fifeness, a distance of about fourteen miles. The weather having cleared in the morning, the crew stood off again for the floating light, and got on board in a half-famished and much exhausted state, having been constantly rowing for about sixteen hours. Saturday,  
19th Aug.

The weather being very favourable to-day, fifty-three stones were landed, and the builders were not a little gratified in having built the twenty-second course, consisting of fifty-one stones, being the first course which had been completed in one day. This, as a matter of course, produced three hearty cheers. At twelve noon prayers were read for the first time on the Bell Rock; those present, counting thirty, were crowded into the upper apartment of the beacon, where the writer took a central position while two of the artificers, joining hands, supported the Bible. Sunday,  
20th Aug.

To-day the artificers laid forty-five stones, which completed the twenty-fourth course, reckoning above the first entire one, and the twenty-sixth above the rock. This finished the solid part of the building, and terminated the height of the outward casing of granite, which is thirty-one feet six inches above the rock or site of the foundation-stone, and about seventeen feet above high-water of spring-tides. Being a particular crisis in the progress of the lighthouse, the landing and laying of the last stone for the season was observed with the usual ceremonies. Friday,  
25th Aug.

From observations often made by the writer, in so far as such can be ascertained, it appears that no wave in the open seas, in an unbroken state, rises more than from seven to nine feet above the general surface of the ocean. The Bell Rock Lighthouse may therefore now be considered at from eight to ten feet above the height of the waves; and, although the sprays and heavy seas have often been observed, in the present state of the building, to rise to the height of fifty feet, and fall with a tremendous noise on the beacon-house, yet such seas were not likely to make any

## A FAMILY OF ENGINEERS

1809

impression on a mass of solid masonry, containing about 1,400 tons.

Wednesday,  
30th Aug.

The whole of the artificers left the rock at mid-day, when the tender made sail for Arbroath, which she reached about six p.m. The vessel being decorated with colours, and having fired a salute of three guns on approaching the harbour, the workyard artificers, with a multitude of people, assembled at the harbour, when mutual cheering and congratulations took place between those afloat and those on the quays. The tender had now, with little exception, been six months on the station at the Bell Rock, and during the last four months few of the squad of builders had been ashore. In particular, Mr. Peter Logan, the foreman, and Mr. Robert Selkirk, principal builder, had never once left the rock. The artificers, having made good wages during their stay, like seamen upon a return voyage, were extremely happy, and spent the evening with much innocent mirth and jollity.

In reflecting upon the state of the matters at the Bell Rock during the working months, when the writer was much with the artificers, nothing can equal the happy manner in which these excellent workmen spent their time. They always went from Arbroath to their arduous task cheering; and they generally returned in the same hearty state. While at the rock, between the tides, they amused themselves in reading, fishing, music, playing cards, draughts, etc., or in sporting with one another. In the workyard at Arbroath the young men were, almost without exception, employed in the evening at school, in writing and arithmetic, and not a few were learning architectural drawing, for which they had every convenience and facility, and were, in a very obliging manner, assisted in their studies by Mr. David Logan, clerk of the works. It therefore affords the most pleasing reflections to look back upon the pursuits of about sixty individuals who for years conducted themselves, on all occasions, in a sober and rational manner.

### IV

#### OPERATIONS OF 1810

1810  
Thursday,  
10th May.

The wind had shifted to-day to W.N.W., when the writer, with considerable difficulty, was enabled to land upon the rock

## THE BELL ROCK

1810

for the first time this season, at ten a.m. Upon examining the state of the building, and apparatus in general, he had the satisfaction to find everything in good order. The mortar in all the joints was perfectly entire. The building, now thirty feet in height, was thickly coated with *fuci* to the height of about fifteen feet, calculating from the rock: on the eastern side, indeed, the growth of seaweed was observable to the full height of thirty feet, and even on the top or upper bed of the last-laid course, especially towards the eastern side, it had germinated, so as to render walking upon it somewhat difficult.

The beacon-house was in a perfectly sound state, and apparently just as it had been left in the month of November. But the tides being neap, the lower parts, particularly where the beams rested on the rock, could not now be seen. The floor of the mortar gallery having been already laid down by Mr. Watt and his men on a former visit, was merely soaked with the sprays; but the joisting-beams which supported it had, in the course of the winter, been covered with a fine downy *conferva* produced by the range of the sea. They were also a good deal whitened with the mute of the cormorant and other sea-fowls, which had roosted upon the beacon in winter. Upon ascending to the apartments, it was found that the motion of the sea had thrown open the door of the cook-house: this was only shut with a single latch, that in case of shipwreck at the Bell Rock the mariner might find ready access to the shelter of this forlorn habitation, where a supply of provisions was kept; and being within two miles and a half of the floating light, a signal could readily be observed, when a boat might be sent to his relief as soon as the weather permitted. An arrangement for this purpose formed one of the instructions on board of the floating light, but happily no instance occurred for putting it in practice. The hearth or fireplace of the cook-house was built of brick in as secure a manner as possible, to prevent accident from fire; but some of the plaster-work had shaken loose, from its damp state, and the tremulous motion of the beacon in stormy weather. The writer next ascended to the floor which was occupied by the cabins of himself and his assistants, which were in tolerably good order, having only a damp and musty smell. The barrack for the artificers, over all, was next visited; it had now a very dreary and

## A FAMILY OF ENGINEERS

1810

deserted appearance when its former thronged state was recollected. In some parts the water had come through the boarding, and had discoloured the lining of green cloth, but it was, nevertheless, in a good habitable condition. While the seamen were employed in landing a stock of provisions, a few of the artificers set to work with great eagerness to sweep and clean the several apartments. The exterior of the beacon was, in the meantime, examined, and found in perfect order. The painting, though it had a somewhat blanched appearance, adhered firmly both on the sides and roof, and only two or three panes of glass were broken in the cupola, which had either been blown out by the force of the wind or perhaps broken by sea-fowl.

Having on this occasion continued upon the building and beacon a considerable time after the tide had begun to flow, the artificers were occupied in removing the forge from the top of the building, to which the gangway or wooden bridge gave great facility; and, although it stretched or had a span of forty-two feet, its construction was extremely simple, while the roadway was perfectly firm and steady. In returning from this visit to the rock every one was pretty well soused in spray before reaching the tender at two o'clock p.m., where things awaited the landing party in as comfortable a way as such a situation would admit.

The wind was still easterly, accompanied with rather a heavy swell of sea for the operations in hand. A landing was, however, made this morning, when the artificers were immediately employed in scraping the seaweed off the upper course of the building, in order to apply the moulds of the first course of the staircase, that the joggle-holes might be marked off in the upper course of the solid. This was also necessary previously to the writer's fixing the position of the entrance-door, which was regulated chiefly by the appearance of the growth of the seaweed on the building, indicating the direction of the heaviest seas, on the opposite side of which the door was placed. The landing-master's crew succeeded in towing into the creek on the western side of the rock the praam-boat with the balance-crane, which had now been on board of the praam for five days. The several pieces of this machine, having been conveyed along the railways upon the waggons to a position immediately under the

Friday,  
11th May.

## THE BELL ROCK

1810

bridge, were elevated to its level, or thirty feet above the rock, in the following manner. A chain-tackle was suspended over a pulley from the cross-beam connecting the tops of the kingposts of the bridge, which was worked by a winch-machine with wheel pinion, and barrel, round which last the chain was wound. This apparatus was placed on the beacon side of the bridge, at the distance of about twelve feet from the cross-beam and pulley in the middle of the bridge. Immediately under the cross-beam a hatch was formed in the roadway of the bridge, measuring seven feet in length and five feet in breadth, made to shut with folding boards like a double door, through which stones and other articles were raised; the folding doors were then let down, and the stone or load was gently lowered upon a waggon which was wheeled on railway trucks towards the lighthouse. In this manner the several castings of the balance-crane were got up to the top of the solid of the building.

The several apartments of the beacon-house having been cleaned out and supplied with bedding, a sufficient stock of provisions was put into the store, when Peter Fortune, formerly noticed, lighted his fire in the beacon for the first time this season. Sixteen artificers at the same time mounted to their barrack-room, and the foremen of the works also took possession of their cabin, all heartily rejoiced at getting rid of the trouble of boating and the sickly motion of the tender.

The wind was at E.N.E., blowing so fresh, and accompanied with so much sea, that no stones could be landed to-day. The people on the rock, however, were busily employed in screwing together the balance-crane, cutting out the joggle-holes in the upper course, and preparing all things for commencing the building operations.

Saturday.  
12th May.

The weather still continues boisterous, although the barometer has all the while stood at about 30 inches. Towards evening the wind blew so fresh at E. by S. that the boats both of the *Smeaton* and tender were obliged to be hoisted in, and it was feared that the *Smeaton* would have to slip her moorings. The people on the rock were seen busily employed, and had the balance-crane apparently ready for use, but no communication could be had with them to-day.

Sunday.  
13th May.

The wind continued to blow so fresh, and the *Smeaton* rode

Monday.  
14th May.

## A FAMILY OF ENGINEERS

1810

so heavily with her cargo, that at noon a signal was made for her getting under weigh, when she stood towards Arbroath; and on board of the tender we are still without any communication with the people on the rock, where the sea was seen breaking over the top of the building in great sprays, and raging with much agitation among the beams of the beacon.

Thursday,  
17th May.

The wind, in the course of the day, had shifted from north to west; the sea being also considerably less, a boat landed on the rock at six p.m., for the first time since the 11th, with the provisions and water brought off by the *Patriot*. The inhabitants of the beacon were all well, but tired above measure for want of employment, as the balance-crane and apparatus was all in readiness. Under these circumstances they felt no less desirous of the return of good weather than those afloat, who were continually tossed with the agitation of the sea. The writer, in particular, felt himself almost as much fatigued and worn-out as he had been at any period since the commencement of the work. The very backward state of the weather at so advanced a period of the season unavoidably created some alarm lest he should be overtaken with bad weather at a late period of the season, with the building operations in an unfinished state. These apprehensions were, no doubt, rather increased by the inconveniences of his situation afloat, as the tender rolled and pitched excessively at times. This being also his first off-set for the season, every bone of his body felt sore with preserving a sitting posture while he endeavoured to pass away the time in reading; as for writing, it was wholly impracticable. He had several times entertained thoughts of leaving the station for a few days and going into Arbroath with the tender till the weather should improve; but as the artificers had been landed on the rock he was averse to this at the commencement of the season, knowing also that he would be equally uneasy in every situation till the first cargo was landed: and he therefore resolved to continue at his post until this should be effected.

Friday,  
18th May.

The wind being now N.W., the sea was considerably run down, and this morning at five o'clock the landing-master's crew, thirteen in number, left the tender; and having now no detention with the landing of artificers, they proceeded to unmoor the *Hedderwick* praaam-boat, and towed her alongside of the *Smeaton*:

## THE BELL ROCK

1810

and in the course of the day twenty-three blocks of stone, three casks of pozzolano, three of sand, three of lime, and one of Roman cement, together with three bundles of trenails and three of wedges, were all landed on the rock and raised to the top of the building by means of the tackle suspended from the cross-beam on the middle of the bridge. The stones were then moved along the bridge on the waggon to the building within reach of the balance-crane, with which they were laid in their respective places on the building. The masons immediately thereafter proceeded to bore the trenail-holes into the course below, and otherwise to complete the one in hand. When the first stone was to be suspended by the balance-crane, the bell on the beacon was rung, and all the artificers and seamen were collected on the building. Three hearty cheers were given while it was lowered into its place, and the steward served round a glass of rum, when success was drunk to the further progress of the building.

The wind was southerly to-day, but there was much less sea than yesterday, and the landing-master's crew were enabled to discharge and land twenty-three pieces of stone and other articles for the work. The artificers had completed the laying of the twenty-seventh or first course of the staircase this morning, and in the evening they finished the boring, trenailing, wedging, and grouting it with mortar. At twelve o'clock noon the beacon-house bell was rung, and all hands were collected on the top of the building, where prayers were read for the first time on the lighthouse, which forcibly struck every one, and had, upon the whole, a very impressive effect.

Sunday,  
20th May.

From the hazardous situation of the beacon-house with regard to fire, being composed wholly of timber, there was no small risk from accident; and on this account one of the most steady of the artificers was appointed to see that the fire of the cooking-house, and the lights in general, were carefully extinguished at stated hours.

This being the birthday of our much-revered Sovereign King George III., now in the fiftieth year of his reign, the shipping of the Lighthouse service were this morning decorated with colours according to the taste of their respective captains. Flags were also hoisted upon the beacon-house and balance-crane on the top of the building. At twelve noon a salute was fired from the

Monday,  
4th June.

## A FAMILY OF ENGINEERS

1810

tender, when the King's health was drunk, with all the honours, both on the rock and on board of the shipping.

Tuesday,  
5th June.

As the lighthouse advanced in height, the cubical contents of the stones were less, but they had to be raised to a greater height; and the walls, being thinner, were less commodious for the necessary machinery and the artificers employed, which considerably retarded the work. Inconvenience was also occasionally experienced from the men dropping their coats, hats, mallets, and other tools, at high-water, which were carried away by the tide; and the danger to the people themselves was now greatly increased. Had any of them fallen from the beacon or building at high-water, while the landing-master's crew were generally engaged with the craft at a distance, it must have rendered the accident doubly painful to those on the rock, who at this time had no boat, and consequently no means of rendering immediate and prompt assistance. In such cases it would have been too late to have got a boat by signal from the tender. A small boat, which could be lowered at pleasure, was therefore suspended by a pair of davits projected from the cook-house, the keel being about thirty feet from the rock. This boat, with its tackle, was put under the charge of James Glen, of whose exertions on the beacon mention has already been made, and who, having in early life been a seaman, was also very expert in the management of a boat. A life-buoy was likewise suspended from the bridge; to which a coil of line two hundred fathoms in length was attached, which could be let out to a person falling into the water, or to the people in the boat, should they not be able to work her with the oars.

Thursday,  
7th June.

To-day twelve stones were landed on the rock, being the remainder of the *Patriot's* cargo; and the artificers built the thirtieth course, consisting of fourteen stones. The Bell Rock works had now a very busy appearance, as the lighthouse was daily getting more into form. Besides the artificers and their cook the writer and his servant were also lodged on the beacon, counting in all twenty-nine; and at low-water the landing-master's crew, consisting of from twelve to fifteen seamen, were employed in transporting the building materials, working the landing apparatus on the rock, and dragging the stone waggons along the railways.

Friday,  
8th June.

In the course of this day the weather varied much. In the

## THE BELL ROCK

1810

morning it was calm, in the middle part of the day there were light airs of wind from the south, and in the evening fresh breezes from the east. The barometer in the writer's cabin in the beacon-house oscillated from 30 inches to 30.42, and the weather was extremely pleasant. This, in any situation, forms one of the chief comforts of life; but, as may easily be conceived, it was doubly so to people stuck, as it were, upon a pinnacle in the middle of the ocean.

One of the praam-boats had been brought to the rock with eleven stones, notwithstanding the perplexity which attended the getting of those formerly landed taken up to the building. Mr. Peter Logan, the foreman builder, interposed, and prevented this cargo from being delivered; but the landing-master's crew were exceedingly averse to this arrangement, from an idea that "ill luck" would in future attend the praam, her cargo, and those who navigated her, from thus reversing her voyage. It may be noticed that this was the first instance of a praam-boat having been sent from the Bell Rock with any part of her cargo on board, and was considered so uncommon an occurrence that it became a topic of conversation among the seamen and artificers.

Sunday,  
10th June.

To-day the stones formerly sent from the rock were safely landed, notwithstanding the augury of the seamen, in consequence of their being sent away two days before.

Tuesday,  
12th June.

To-day twenty-seven stones and eleven joggle-pieces were landed, part of which consisted of the forty-seventh course, forming the store-room floor. The builders were at work this morning by four o'clock, in the hopes of being able to accomplish the laying of the eighteen stones of this course. But at eight o'clock in the evening they had still two to lay, and as the stones of this course were very unwieldy, being six feet in length, they required much precaution and care both in lifting and laying them. It was only on the writer's suggestion to Mr. Logan that the artificers were induced to leave off, as they had intended to complete this floor before going to bed. The two remaining stones were, however, laid in their places without mortar when the bell on the beacon was rung, and, all hands being collected on the top of the building, three hearty cheers were given on covering the first apartment. The steward then served out a dram to each, when the whole retired to their barrack much fatigued, but

Thursday,  
14th June.

## A FAMILY OF ENGINEERS

1810

with the anticipation of the most perfect repose even in the "hurricane-house," amidst the dashing seas on the Bell Rock.

While the workmen were at breakfast and dinner it was the writer's usual practice to spend his time on the walls of the building, which, notwithstanding the narrowness of the track, nevertheless formed his principal walk when the rock was under water. But this afternoon he had his writing-desk set upon the store-room floor, when he wrote to Mrs. Stevenson—certainly the first letter dated from the Bell Rock *Lighthouse*—giving a detail of the fortunate progress of the work, with an assurance that the lighthouse would soon be completed at the rate at which it now proceeded; and, the *Patriot* having sailed for Arbroath in the evening, he felt no small degree of pleasure in despatching this communication to his family.

The weather still continuing favourable for the operations at the rock, the work proceeded with much energy, through the exertions both of the seamen and artificers. For the more speedy and effectual working of the several tackles in raising the materials as the building advanced in height, and there being a great extent of railway to attend to, which required constant repairs, two additional millwrights were added to the complement on the rock, which, including the writer, now counted thirty-one in all. So crowded was the men's barrack that the beds were ranged five tier in height, allowing only about one foot eight inches for each bed. The artificers commenced this morning at five o'clock, and, in the course of the day, they laid the forty-eighth and forty-ninth courses, consisting each of sixteen blocks. From the favourable state of the weather, and the regular manner in which the work now proceeded the artificers had generally from four to seven extra hours' work, which, including their stated wages of 3s. 4d., yielded them from 5s. 4d. to about 6s. 10d. per day, besides their board; even the postage of their letters was paid while they were at the Bell Rock. In these advantages the foremen also shared, having about double the pay and amount of premiums of the artificers. The seamen being less out of their element in the Bell Rock operations than the landsmen, their premiums consisted in a slump sum payable at the end of the season, which extended from three to ten guineas.

As the laying of the floors was somewhat tedious, the landing-

## THE BELL ROCK

1810

master and his crew had got considerably beforehand with the building artificers in bringing materials faster to the rock than they could be built. The seamen having, therefore, some spare time, were occasionally employed during fine weather in dredging or grappling for the several mushroom anchors and mooring-chains which had been lost in the vicinity of the Bell Rock during the progress of the work by the breaking loose and drifting of the floating buoys. To encourage their exertions in this search, five guineas were offered as a premium for each set they should find; and, after much patient application, they succeeded to-day in hooking one of these lost anchors with its chain.

It was a general remark at the Bell Rock, as before noticed, that fish were never plenty in its neighbourhood excepting in good weather. Indeed, the seamen used to speculate about the state of the weather from their success in fishing. When the fish disappeared at the rock, it was considered a sure indication that a gale was not far off, as the fish seemed to seek shelter in deeper water from the roughness of the sea during these changes in the weather. At this time the rock, at high water, was completely covered with podlies, or the fry of the coal-fish, about six or eight inches in length. The artificers sometimes occupied half an hour after breakfast and dinner in catching these little fishes, but were more frequently supplied from the boats of the tender.

The landing-master having this day discharged the *Smeaton* and loaded the *Hedderwick* and *Dickie* praam-boats with nineteen stones, they were towed to their respective moorings, when Captain Wilson, in consequence of the heavy swell of sea, came in his boat to the beacon-house to consult with the writer as to the propriety of venturing the loaded praam-boats with their cargoes to the rock while so much sea was running. After some dubiety expressed on the subject, in which the ardent mind of the landing-master suggested many arguments in favour of his being able to convey the praams in perfect safety, it was acceded to. In bad weather, and especially on occasions of difficulty like the present, Mr. Wilson, who was an extremely active seaman, measuring about five feet three inches in height, of a robust habit, generally dressed himself in what he called a *monkey jacket*, made of thick duffle-cloth, with a pair of Dutchman's petticoat trousers, reaching only to his knees, where they were

Saturday,  
16th June.

## A FAMILY OF ENGINEERS

1810

met with a pair of long water-tight boots; with this dress, his glazed hat, and his small brass speaking-trumpet in his hand, he bade defiance to the weather. When he made his appearance in this most suitable attire for the service, his crew seemed to possess additional life, never failing to use their utmost exertions when the captain put on his *storm rigging*. They had this morning commenced loading the praam-boats at four o'clock and proceeded to tow them into the eastern landing-place, which was accomplished with much dexterity, though not without the risk of being thrown, by the force of the sea, on certain projecting ledges of the rock. In such a case the loss even of a single stone would have greatly retarded the work. For the greater safety in entering the creek, it was necessary to put out several warps and guy-ropes to guide the boats into its narrow and intricate entrance; and it frequently happened that the sea made a clean breach over the praams, which not only washed their decks, but completely drenched the crew in water.

Sunday,  
17th June.

It was fortunate, in the present state of the weather, that the fiftieth course was in a sheltered spot, within the reach of the tackle of the winch-machine upon the bridge; a few stones were stowed upon the bridge itself, and the remainder upon the building, which kept the artificers at work. The stowing of the materials upon the rock was the department of Alexander Brebner, mason, who spared no pains in attending to the safety of the stones, and who, in the present state of the work, when the stones were landed faster than could be built, generally worked till the water rose to his middle. At one o'clock to-day the bell rung for prayers, and all hands were collected into the upper barrack-room of the beacon-house, when the usual service was performed.

The wind blew very hard in the course of last night from N.E., and to-day the sea ran so high that no boat could approach the rock. During the dinner-hour, when the writer was going to the top of the building as usual, but just as he had entered the door and was about to ascend the ladder, a great noise was heard overhead, and in an instant he was soused in water from a sea which had most unexpectedly come over the walls, though now about fifty-eight feet in height. On making his retreat, he found himself completely whitened by the lime, which had mixed with the water while dashing down through the different floors; and, as

## THE BELL ROCK

1810

nearly as he could guess, a quantity equal to about a hogshead had come over the walls, and now streamed out at the door. After having shifted himself, he again sat down in his cabin, the sea continuing to run so high that the builders did not resume their operations on the walls this afternoon. The incident just noticed did not create more surprise in the mind of the writer than the sublime appearance of the waves as they rolled majestically over the rock. This scene he greatly enjoyed while sitting at his cabin window; each wave approached the beacon like a vast scroll unfolding; and in passing discharged a quantity of air, which he not only distinctly felt but was even sufficient to lift the leaves of a book which lay before him. These waves might be ten or twelve feet in height and about 250 feet in length, their smaller end being towards the north, where the water was deep, and they were opened or cut through by the interposition of the building and beacon. The gradual manner in which the sea, upon these occasions, is observed to become calm or to subside, is a very remarkable feature of this phenomenon. For example, when a gale is succeeded by a calm, every third or fourth wave forms one of these great seas, which occur in spaces of from three to five minutes, as noted by the writer's watch; but in the course of the next tide they become less frequent, and take off so as to occur only in ten or fifteen minutes; and, singular enough, at the third tide after such gales, the writer has remarked that only one or two of these great waves appear in the course of the whole tide.

The 19th was a very unpleasant and disagreeable day, both for the seamen and artificers, as it rained throughout with little intermission from four a.m. till eleven p.m., accompanied with thunder and lightning, during which period the work nevertheless continued unremittingly, and the builders laid the fifty-first and fifty-second courses. This state of weather was no less severe upon the mortar-makers, who required to temper or prepare the mortar of a thicker or thinner consistency, in some measure, according to the state of the weather. From the elevated position of the building the mortar gallery on the beacon was now much lower, and the lime-buckets were made to traverse upon a rope distended between it and the building. On occasions like the present, however, there was often a difference of

Tuesday,  
19th June.

## A FAMILY OF ENGINEERS

1810

opinion between the builders and the mortar-makers. John Watt, who had the principal charge of the mortar, was a most active worker, but, being somewhat of an irascible temper, the builders occasionally amused themselves at his expense: for while he was eagerly at work with his large iron-shod pestle in the mortar-tub, they often sent down contradictory orders, some crying, "Make it a little stiffer, or thicker, John," while others called out to make it "thinner," to which he generally returned very speedy and sharp replies, so that these conversations at times were rather amusing.

During wet weather the situation of the artificers on the top of the building was extremely disagreeable; for although their work did not require great exertion, yet, as each man had his particular part to perform, either in working the crane or in laying the stones, it required the closest application and attention, not only on the part of Mr. Peter Logan, the foreman, who was constantly on the walls, but also of the chief workmen. Robert Selkirk, the principal builder, for example, had every stone to lay in its place. David Cumming, a mason, had the charge of working the tackle of the balance-weight, and James Scott, also a mason, took charge of the purchase with which the stones were laid; while the pointing the joints of the walls with cement was intrusted to William Reid and William Kennedy, who stood upon a scaffold suspended over the walls in rather a frightful manner. The least act of carelessness or inattention on the part of any of these men might have been fatal, not only to themselves, but also to the surrounding workmen, especially if any accident had happened to the crane itself, while the material damage or loss of a single stone would have put an entire stop to the operations until another could have been brought from Arbroath. The artificers, having wrought seven and a half hours of extra time to-day, had 3s. 9d. of extra pay, while the foremen had 7s. 6d. over and above their stated pay and board. Although, therefore, the work was both hazardous and fatiguing, yet, the encouragement being considerable, they were always very cheerful, and perfectly reconciled to the confinement and other disadvantages of the place.

During fine weather, and while the nights were short, the duty on board of the floating light was literally nothing but a waiting

## THE BELL ROCK

1810

on, and therefore one of her boats, with a crew of five men, daily attended the rock, but always returned to the vessel at night. The carpenter, however, was one of those who was left on board of the ship, as he also acted in the capacity of assistant light-keeper, being, besides, a person who was apt to feel discontent and to be averse to changing his quarters, especially to work with the millwrights and joiners at the rock, who often, for hours together, wrought knee-deep, and not unfrequently up to the middle in water. Mr. Watt having about this time made a requisition for another hand, the carpenter was ordered to attend the rock in the floating light's boat. This he did with great reluctance, and found so much fault that he soon got into discredit with his messmates. On this occasion he left the Lighthouse service, and went as a sailor in a vessel bound for America—a step which, it is believed, he soon regretted, as, in the course of things, he would, in all probability, have accompanied Mr. John Reid, the principal light-keeper of the floating light, to the Bell Rock Lighthouse as his principal assistant. The writer had a wish to be of service to this man, as he was one of those who came off to the floating light in the month of September, 1807, while she was riding at single anchor after the severe gale of the 7th, at a time when it was hardly possible to make up this vessel's crew; but the crossness of his manner prevented his reaping the benefit of such intentions.

The building operations had for some time proceeded more slowly, from the higher parts of the lighthouse requiring much longer time than an equal tonnage of the lower courses. The duty of the landing-master's crew had, upon the whole, been easy of late; for though the work was occasionally irregular, yet the stones being lighter, they were more speedily lifted from the hold of the stone vessel to the deck of the praam-boat, and again to the waggons on the railway, after which they came properly under the charge of the foreman builder. It is, however, a strange, though not an uncommon, feature in the human character, that, when people have least to complain of they are most apt to become dissatisfied, as was now the case with the seamen employed in the Bell Rock service about their rations of beer. Indeed, ever since the carpenter of the floating light, formerly noticed, had been brought to the rock, expressions of discontent

Friday,  
22nd June.

## A FAMILY OF ENGINEERS

1810

had been manifested upon various occasions. This being represented to the writer, he sent for Captain Wilson, the landing-master, and Mr. Taylor, commander of the tender, with whom he talked over the subject. They stated that they considered the daily allowance of the seamen in every respect ample, and that, the work being now much lighter than formerly, they had no just ground for complaint; Mr. Taylor adding that, if those who now complained "were even to be fed upon soft bread and turkeys, they would not think themselves right." At twelve noon the work of the landing-master's crew was completed for the day; but at four o'clock, while the rock was under water, those on the beacon were surprised by the arrival of a boat from the tender without any signal having been made from the beacon. It brought the following note to the writer from the landing-master's crew:—

*"Sir Joseph Banks Tender.*

"SIR,—We are informed by our masters that our allowance is to be as before, and it is not sufficient to serve us, for we have been at work since four o'clock this morning, and we have come on board to dinner, and there is no beer for us before to-morrow morning, to which a sufficient answer is required before we go from the beacon; and we are, Sir, your most obedient servants."

On reading this, the writer returned a verbal message, intimating that an answer would be sent on board of the tender, at the same time ordering the boat instantly to quit the beacon. He then addressed the following note to the landing-master:—

*"Beacon-house, 22nd June, 1810,  
Five o'clock p.m.*

"SIR,—I have just now received a letter purporting to be from the landing-master's crew and seamen on board of the *Sir Joseph Banks*, though without either date or signature; in answer to which I enclose a statement of the daily allowance of provisions for the seamen in this service, which you will post up in the ship's galley, and at seven o'clock this evening I will come on board to inquire into this unexpected and most unnecessary demand for an additional allowance of beer. In the enclosed you will not

## THE BELL ROCK

1810

find any alteration from the original statement, fixed in the galley at the beginning of the season. I have, however, judged this mode of giving your people an answer preferable to that of conversing with them on the beacon.—I am, Sir, your most obedient servant,

“ROBERT STEVENSON.

“TO CAPTAIN WILSON.”

“*Beacon House, 22nd June, 1810.*—Schedule of the daily allowance of provisions to be served out on board of the *Sir Joseph Banks* tender: 1½ lb. beef; 1 lb. bread; 8 oz. oat meal; 2 oz. barley; 2 oz. butter; 3 quarts beer; vegetables and salt, no stated allowance. When the seamen are employed in unloading the *Smeaton* and *Patriot*, a draught of beer is, as formerly, to be allowed from the stock of these vessels. Further, in wet and stormy weather, when the work commences very early in the morning, or continues till a late hour at night, a glass of spirits will also be served out to the crew as heretofore, on the requisition of the landing-master.

“ROBERT STEVENSON.”

On writing this letter and schedule, a signal was made on the beacon for the landing-master's boat, which immediately came to the rock, and the schedule was afterwards stuck up in the tender's gallery. When sufficient time had been allowed to the crew to consider of their conduct, a second signal was made for a boat, and at seven o'clock the writer left the Bell Rock, after a residence of four successive weeks in the beacon-house. The first thing which occupied his attention on board of the tender was to look round upon the lighthouse, which he saw, with some degree of emotion and surprise, now vying in height with the beacon-house; for although he had often viewed it from the extremity of the western railway on the rock, yet the scene, upon the whole, seemed far more interesting from the tender's moorings at the distance of about half a mile.

The *Smeaton* having just arrived at her moorings with a cargo, a signal was made for Captain Pool to come on board of the tender, that he might be at hand to remove from the service any of those who might persist in their discontented conduct.

## A FAMILY OF ENGINEERS

1810

One of the two principal leaders in this affair, the master of one of the praam-boats, who had also steered the boat which brought the letter to the beacon, was first called upon deck, and asked if he had read the statement fixed up in the galley this afternoon, and whether he was satisfied with it. He replied that he had read the paper, but was not satisfied, as it held out no alteration on the allowance, on which he was immediately ordered into the *Smeaton's* boat. The next man called had but lately entered the service, and, being also interrogated as to his resolution, he declared himself to be of the same mind with the praam-master, and was also forthwith ordered into the boat. The writer, without calling any more of the seamen, went forward to the gangway, where they were collected and listening to what was passing upon deck. He addressed them at the hatchway, and stated that two of their companions had just been dismissed the service and sent on board of the *Smeaton* to be conveyed to Arbroath. He therefore wished each man to consider for himself how far it would be proper, by any unreasonableness of conduct, to place themselves in a similar situation, especially as they were aware that it was optional in him either to dismiss them or send them on board a man-of-war. It might appear that much inconvenience would be felt at the rock by a change of hands at this critical period, by checking for a time the progress of a building so intimately connected with the best interests of navigation; yet this would be but of a temporary nature, while the injury to themselves might be irreparable. It was now, therefore, required of any man who, in this disgraceful manner, chose to leave the service, that he should instantly make his appearance on deck while the *Smeaton's* boat was alongside. But those below having expressed themselves satisfied with their situation—viz., William Brown, George Gibb, Alexander Scott, John Dick, Robert Couper, Alexander Shephard, James Grieve, David Carey, William Pearson, Stuart Eaton, Alexander Lawrence, and John Spink—were accordingly considered as having returned to their duty. This disposition to mutiny, which had so strongly manifested itself, being now happily suppressed, Captain Pool got orders to proceed for Arbroath Bay, and land the two men he had on board, and to deliver the following letter at the office of the workyard:—

## THE BELL ROCK

“On board of the Tender off the Bell Rock,  
22nd June, 1810, eight o'clock p.m.

1810

“DEAR SIR,—A discontented and mutinous spirit having manifested itself of late among the landing-master's crew, they struck work to-day and demanded an additional allowance of beer, and I have found it necessary to dismiss D—d and M—e who are now sent on shore with the *Smeaton*. You will therefore be so good as to pay them their wages, including this day only. Nothing can be more unreasonable than the conduct of the seamen on this occasion, as the landing-master's crew not only had their own allowance on board of the tender, but, in the course of this day, they had drawn no fewer than twenty-four quart pots of beer from the stock of the *Patriot* while unloading her.—I remain, yours truly,

“ROBERT STEVENSON.

“TO MR. LACHLAN KENNEDY,  
Bell Rock Office, Arbroath.”

On despatching this letter to Mr. Kennedy the writer returned to the beacon about nine o'clock, where this afternoon's business had produced many conjectures, especially when the *Smeaton* got under weigh, instead of proceeding to land her cargo. The bell on the beacon being rung, the artificers were assembled on the bridge, when the affair was explained to them. He, at the same time, congratulated them upon the first appearance of mutiny being happily set at rest by the dismissal of its two principal abettors.

At the rock, the landing of the materials and the building operations of the light-room store went on successfully, and in a way similar to those of the provision store. To-day it blew fresh breezes; but the seamen nevertheless landed twenty-eight stones, and the artificers built the fifty-eighth and fifty-ninth courses. The works were visited by Mr. Murdoch, junior, from Messrs. Boulton and Watt's works of Soho. He landed just as the bell rung for prayers, after which the writer enjoyed much pleasure from his very intelligent conversation; and, having been almost the only stranger he had seen for some weeks, he parted with him after a short interview, with much regret.

Sunday,  
24th June.

Last night the wind had shifted to north-east, and, blowing

Thursday,  
28th June.

## A FAMILY OF ENGINEERS

1810

fresh, was accompanied with a heavy surf upon the rock. Towards high-water it had a very grand and wonderful appearance. Waves of considerable magnitude rose as high as the solid or level of the entrance-door, which, being open to the south-west, was fortunately to the leeward; but on the windward side the sprays flew like lightning up the sloping sides of the building; and although the walls were now elevated sixty-four feet above the rock, and about fifty-two feet from high-water mark, yet the artificers were nevertheless wetted, and occasionally interrupted, in their operations on the top of the walls. These appearances were in a great measure new at the Bell Rock, there having till of late been no building to conduct the seas, or object to compare with them. Although, from the description of the Eddystone Lighthouse, the mind was prepared for such effects, yet they were not expected to the present extent in the summer season; the sea being most awful to-day, whether observed from the beacon or the building. To windward, the sprays fell from the height above noticed in the most wonderful cascades, and streamed down the walls of the building in froth as white as snow. To leeward of the lighthouse the collision or meeting of the waves produced a pure white kind of *drift*; it rose about thirty feet in height, like a fine downy mist, which, in its fall, felt upon the face and hands more like a dry powder than a liquid substance. The effects of these seas, as they raged among the beams and dashed upon the higher parts of the beacon, produced a temporary tremulous motion throughout the whole fabric, which to a stranger must have been frightful.

The writer had now been at the Bell Rock since the latter end of May, or about six weeks, during four of which he had been a constant inhabitant of the beacon without having been once off the rock. After witnessing the laying of the sixty-seventh or second course of the bed-room apartment, he left the rock with the tender and went ashore, as some arrangements were to be made for the future conduct of the works at Arbroath, which were soon to be brought to a close; the landing-master's crew having in the meantime, shifted on board of the *Patriot*. In leaving the rock, the writer kept his eyes fixed upon the lighthouse, which had recently got into the form of a house, having several tiers or stories of windows. Nor was he unmindful of his habitation in

Sunday,  
1st July.

## THE BELL ROCK

1810

the beacon—now far overtopped by the masonry,—where he had spent several weeks in a kind of active retirement, making practical experiment of the fewness of the positive wants of man. His cabin measured not more than four feet three inches in breadth on the floor; and through, from the oblique direction of the beams of the beacon, it widened towards the top, yet it did not admit of the full extension of his arms when he stood on the floor; while its length was little more than sufficient for suspending a cot-bed during the night, calculated for being triced up to the roof through the day, which left free room for the admission of occasional visitants. His folding table was attached with hinges immediately under the small window of the apartment, and his books, barometer, thermometer, portmanteau, and two or three camp-stools, formed the bulk of his movables. His diet being plain, the paraphernalia of the table were proportionally simple; though everything had the appearance of comfort, and even of neatness, the walls being covered with green cloth formed into panels with red tape, and his bed festooned with curtains of yellow cotton-stuff. If, in speculating upon the abstract wants of man in such a state of exclusion, one were reduced to a single book, the Sacred Volume—whether considered for the striking diversity of its story, the morality of its doctrine, or the important truths of its gospel—would have proved by far the greatest treasure.

In walking over the workyard at Arbroath this morning, the writer found that the stones of the course immediately under the cornice were all in hand, and that a week's work would now finish the whole, while the intermediate courses lay ready numbered and marked for shipping to the rock. Among other subjects which had occupied his attention to-day was a visit from some of the relations of George Dall, a young man who had been impressed near Dundee in the month of February last; a dispute had arisen between the magistrates of that burgh and the Regulating Officer as to his right of impressing Dall, who was *bona fide* one of the protected seamen in the Bell Rock service. In the meantime, the poor lad was detained, and ultimately committed to the prison of Dundee, to remain until the question should be tried before the Court of Session. His friends were naturally very desirous to have him relieved upon bail. But, as this was

Monday,  
2nd July.

## A FAMILY OF ENGINEERS

1810

only to be done by the judgment of the Court, all that could be said was that his pay and allowances should be continued in the same manner as if he had been upon the sick-list. The circumstances of Dall's case were briefly these:—He had gone to see some of his friends in the neighbourhood of Dundee, in winter, while the works were suspended, having got leave of absence from Mr. Taylor, who commanded the Bell Rock tender, and had in his possession one of the Protection Medals. Unfortunately, however, for Dall, the Regulating Officer thought proper to disregard these documents, as, according to the strict and literal interpretation of the Admiralty regulations, a seaman does not stand protected unless he is actually on board of his ship, or in a boat belonging to her, or has the Admiralty protection in his possession. This order of the Board, however, cannot be rigidly followed in practice; and therefore, when the matter is satisfactorily stated to the Regulating Officer, the impressed man is generally liberated. But in Dall's case this was peremptorily refused and he was retained at the instance of the magistrates. The writer having brought the matter under the consideration of the Commissioners of the Northern Lighthouses, they authorised it to be tried on the part of the Lighthouse Board, as one of extreme hardship. The Court, upon the first hearing, ordered Dall to be liberated from prison; and the proceedings never went further.

Wednesday,  
4th July.

Being now within twelve courses of being ready for building the cornice, measures were taken for getting the stones of it and the parapet-wall of the light-room brought from Edinburgh, where, as before noticed, they had been prepared and were in readiness for shipping. The honour of conveying the upper part of the lighthouse, and of landing the last stone of the building on the rock, was considered to belong to Captain Pool of the *Smeaton*, who had been longer in the service than the master of the *Patriot*. The *Smeaton* was, therefore, now partly loaded with old iron, consisting of broken railways and other lumber which had been lying about the rock. After landing these at Arbroath, she took on board James Craw, with his horse and cart, which could now be spared at the workyard, to be employed in carting the stones from Edinburgh to Leith. Alexander Davidson and William Kennedy, two careful masons, were also sent to take charge of the loading of the stones at Greenside and stowing

## THE BELL ROCK

1810

them on board of the vessel at Leith. The writer also went on board, with a view to call at the Bell Rock and to take his passage up the Firth of Forth. The wind, however, coming to blow very fresh from the eastward, with thick and foggy weather, it became necessary to reef the mainsail and set the second-jib. When in the act of making a tack towards the tender, the sailors who worked the head-sheets were, all of a sudden, alarmed with the sound of a smith's hammer and anvil on the beacon, and had just time to put the ship about to save her from running ashore on the north-western point of the rock, marked "James Crow's Horse." On looking towards the direction from whence the sound came, the building and beacon-house were seen, with consternation, while the ship was hailed by those on the rock, who were no less confounded at seeing the near approach of the *Smeaton*; and, just as the vessel cleared the danger, the smith and those in the mortar gallery made signs in token of their happiness at our fortunate escape. From this occurrence the writer had an experimental proof of the utility of the large bells which were in preparation to be rung by the machinery of the revolving light; for, had it not been the sound of the smith's anvil, the *Smeaton*, in all probability, would have been wrecked upon the rock. In case the vessel had struck, those on board might have been safe, having now the beacon-house as a place of refuge; but the vessel, which was going at a great velocity, must have suffered severely, and it was more than probable that the horse would have been drowned, there being no means of getting him out of the vessel. Of this valuable animal and his master we shall take an opportunity of saying more in another place.

The weather cleared up in the course of the night, but the wind shifted to the N.E. and blew very fresh. From the force of the wind, being now the period of spring-tides, a very heavy swell was experienced at the rock. At two o'clock on the following morning the people on the beacon were in a state of great alarm about their safety, as the sea had broke up part of the floor of the mortar gallery, which was thus cleared of the lime-casks and other buoyant articles; and, the alarm-bell being rung, all hands were called to render what assistance was in their power for the safety of themselves and the materials. At this time some would willingly have left the beacon and gone into the building: the

Thursday,  
5th July.

## A FAMILY OF ENGINEERS

1810

sea, however, ran so high that there was no passage along the bridge of communication, and, when the interior of the lighthouse came to be examined in the morning, it appeared that great quantities of water had come over the walls—now eighty feet in height—and had run down through the several apartments and out at the entrance door.

The upper course of the lighthouse at the workyard of Arbroath was completed on the 6th, and the whole of the stones were, therefore, now ready for being shipped to the rock. From the present state of the works it was impossible that the two squads of artificers at Arbroath and the Bell Rock could meet together at this period; and as in public works of this kind, which had continued for a series of years, it is not customary to allow the men to separate without what is termed a “finishing-pint,” five guineas were for this purpose placed at the disposal of Mr. David Logan, clerk of works. With this sum the stone-cutters at Arbroath had a merry meeting in their barrack, collected their sweethearts and friends, and concluded their labours with a dance. It was remarked, however, that their happiness on this occasion was not without alloy. The consideration of parting and leaving a steady and regular employment, to go in quest of work and mix with other society, after having been harmoniously lodged for years together in one large “guildhall or barrack,” was rather painful.

Friday,  
6th July.

While the writer was at Edinburgh he was fortunate enough to meet with Mrs. Dickson, only daughter of the late celebrated Mr. Smeaton, whose works at the Eddystone Lighthouse had been of such essential consequence to the operations at the Bell Rock. Even her own elegant accomplishments are identified with her father's work, she having herself made the drawing of the vignette on the title-page of the *Narrative of the Eddystone Lighthouse*. Every admirer of the works of that singularly eminent man must also feel an obligation to her for the very comprehensive and distinct account given of his life, which is attached to his reports, published, in three volumes quarto, by the Society of Civil Engineers. Mrs. Dickson, being at this time returning from a tour to the Hebrides and Western Highlands of Scotland, had heard of the Bell Rock works, and from their similarity to those of the Eddystone, was strongly impress-

## THE BELL ROCK

1810

ed with a desire of visiting the spot. But on inquiring for the writer at Edinburgh, and finding from him that the upper part of the lighthouse, consisting of nine courses, might be seen in the immediate vicinity, and also that one of the vessels, which, in compliment to her father's memory, had been named the *Smeaton*, might also now be seen in Leith, she considered herself extremely fortunate; and having first visited the works at Green-side, she afterwards went to Leith to see the *Smeaton*, then loading for the Bell Rock. On stepping on board, Mrs. Dickson seemed to be quite overcome with so many concurrent circumstances, tending in a peculiar manner to revive and enliven the memory of her departed father, and on leaving the vessel she would not be restrained from presenting the crew with a piece of money. The *Smeaton* had been named spontaneously, from a sense of the obligation which a public work of the description of the Bell Rock owed to the labours and abilities of Mr. Smeaton. The writer certainly never could have anticipated the satisfaction which he this day felt in witnessing the pleasure it afforded to the only representative of this great man's family.

The gale from the N.E. still continued so strong, accompanied with a heavy sea, that the *Patriot* could not approach her moorings; and although the tender still kept her station, no landing was made to-day at the rock. At high-water it was remarked that the spray rose to the height of about sixty feet upon the building. The *Smeaton* now lay in Leith loaded, but, the wind and weather being so unfavourable for her getting down the Firth, she did not sail till this afternoon. It may here be proper to notice that the loading of the centre of the light-room floor, or last principal stone of the building, did not fail, when put on board, to excite an interest among those connected with the work. When the stone was laid upon the cart to be conveyed to Leith, the seamen fixed an ensign-staff and flag into the circular hole in the centre of the stone, and decorated their own hats, and that of James Crow, the Bell Rock carter, with ribbons; even his faithful and trusty horse Bassey was ornamented with bows and streamers of various colours. The masons also provided themselves with new aprons, and in this manner the cart was attended in its progress to the ship. When the cart came opposite the Trinity House of Leith, the officer of that Corpora-

Friday,  
20th July.

## A FAMILY OF ENGINEERS

1810

tion made his appearance dressed in his uniform, with his staff of office; and when it reached the harbour, the shipping in the different tiers where the *Smeaton* lay hoisted their colours, manifesting by these trifling ceremonies the interest with which the progress of this work was regarded by the public, as ultimately tending to afford safety and protection to the mariner. The wind had fortunately shifted to the S.W., and about five o'clock this afternoon the *Smeaton* reached the Bell Rock.

Friday,  
27th July.

The artificers had finished the laying of the balcony course, excepting the centre-stone of the light-room floor, which, like the centres of the other floors, could not be laid in its place till after the removal of the foot and shaft of the balance-crane. During the dinner-hour, when the men were off work, the writer generally took some exercise by walking round the walls when the rock was under water; but to-day his boundary was greatly enlarged, for, instead of the narrow wall as a path, he felt no small degree of pleasure in walking round the balcony and passing out and in at the space allotted for the light-room door. In the labours of this day both the artificers and seamen felt their work to be extremely easy compared with what it had been for some days past.

Sunday,  
29th July.

Captain Wilson and his crew had made preparations for landing the last stone, and, as may well be supposed, this was a day of great interest at the Bell Rock. "That it might lose none of its honours," as he expressed himself, the *Hedderwick* praam-boat, with which the first stone of the building had been landed, was appointed also to carry the last. At seven o'clock this evening the seamen hoisted three flags upon the *Hedderwick*, when the colours of the *Dickie* praam-boat, tender, *Smeaton*, floating light, beacon-house, and lighthouse, were also displayed; and, the weather being remarkably fine, the whole presented a very gay appearance, and, in connection with the associations excited, the effect was very pleasing. The praam which carried the stone was towed by the seamen in gallant style to the rock, and, on its arrival, cheers were given as a finale to the landing department.

Monday,  
30th July.

The ninetieth or last course of the building having been laid to-day, which brought the masonry to the height of one hundred and two feet six inches, the lintel of the light-room door, being the finishing-stone of the exterior walls, was laid with due for-

## THE BELL ROCK

1810

mality by the writer, who, at the same time, pronounced the following benediction: "May the Great Architect of the Universe, under whose blessing this perilous work has prospered, preserve it as a guide to the mariner."

At three p.m., the necessary preparations having been made, the artificers commenced the completing of the floors of the several apartments, and at seven o'clock the centre stone of the light-room floor was laid, which may be held as finishing the masonry of this important national edifice. After going through the usual ceremonies observed by the brotherhood on occasions of this kind, the writer, addressing himself to the artificers and seamen who were present, briefly alluded to the utility of the undertaking as a monument of the wealth of British commerce, erected through the spirited measures of the Commissioners of the Northern Lighthouses by means of the able assistance of those who now surrounded him. He then took an opportunity of stating that toward those connected with this arduous work he would ever retain the most heartfelt regard in all their interests.

Friday,  
3rd Aug.

When the bell was rung as usual on the beacon this morning, every one seemed as if he were at a loss what to make of himself. At this period the artificers at the rock consisted of eighteen masons, two joiners, one millwright, one smith, and one mortar-maker, besides Messrs. Peter Logan and Francis Watt, foremen, counting in all twenty-five; and matters were arranged for proceeding to Arbroath this afternoon with all hands. The *Sir Joseph Banks* tender had by this time been afloat, with little intermission, for six months, during the greater part of which the artificers had been almost constantly off at the rock, and were now much in want of necessaries of almost every description. Not a few had lost different articles of clothing, which had dropped into the sea from the beacon and building. Some wanted jackets; others, from want of hats, wore nightcaps; each was, in fact, more or less curtailed in his wardrobe, and, it must be confessed, that at best the party were but in a very tattered condition. This morning was occupied in removing the artificers and their bedding on board of the tender; and, although their personal luggage was easily shifted, the boats had, nevertheless, many articles to remove from the beacon-house,

Saturday,  
4th Aug.

## A FAMILY OF ENGINEERS

1810

and were consequently employed in this service till eleven a.m. All hands being collected and just ready to embark, as the water had nearly overflowed the rock, the writer, in taking leave, after alluding to the harmony which had ever marked the conduct of those employed on the Bell Rock, took occasion to compliment the great zeal, attention, and abilities of Mr. Peter Logan and Mr. Francis Watt, foremen; Captain James Wilson, landing-master; and Captain David Taylor, commander of the tender, who, in their several departments, had so faithfully discharged the duties assigned to them, often under circumstances the most difficult and trying. The health of these gentlemen was drunk with much warmth of feeling by the artificers and seamen, who severally expressed the satisfaction they had experienced in acting under them; after which the whole party left the rock.

In sailing past the floating light mutual compliments were made by a display of flags between that vessel and the tender; and at five p.m. the latter vessel entered the harbour of Arbroath where the party were heartily welcomed by a numerous company of spectators, who had collected to see the artificers arrive after so long an absence from the port. In the evening the writer invited the foremen and captains of the service, together with Mr. David Logan, clerk of works at Arbroath, and Mr. Lachlan Kennedy, engineer's clerk and book-keeper, and some of their friends, to the principal inn, where the evening was spent very happily; and after "His Majesty's Health" and "The Commissioners of the Northern Lighthouses" had been given, "Stability to the Bell Rock Lighthouse" was hailed as a standing toast in the Lighthouse service.

Sunday,  
5th Aug.

The author has formerly noticed the uniformly decent and orderly deportment of the artificers who were employed at the Bell Rock Lighthouse, and to-day, it is believed, they very generally attended church, no doubt with grateful hearts for the narrow escapes from personal danger which all of them had more or less experienced during their residence at the rock.

Tuesday,  
14 Aug.

The *Smeaton* sailed to-day at one p.m., having on board sixteen artificers, with Mr. Peter Logan, together with a supply of provisions and necessaries, who left the harbour pleased and happy to find themselves once more afloat in the Bell Rock service. At seven o'clock the tender was made fast to her moor-

## THE BELL ROCK

1810

ings, when the artificers landed on the rock and took possession of their old quarters in the beacon-house, with feelings very different from those of 1807, when the works commenced.

The barometer for some days past had been falling from 20.90 and to-day it was 29.50, with the wind at N.E., which, in the course of this day, increased to a strong gale accompanied with a sea which broke with great violence upon the rock. At twelve noon the tender rode very heavily at her moorings, when her chain broke at about ten fathoms from the ship's bows. The kedge-anchor was immediately let go, to hold her till the floating buoy and broken chain should be got on board. But while this was in operation the hawser of the kedge was chafed through on the rocky bottom and parted, when the vessel was again adrift. Most fortunately, however, she cast off with her head from the rock, and narrowly cleared it, when she sailed up the Firth of Forth to wait the return of better weather. The artificers were thus left upon the rock with so heavy a sea running that it was ascertained to have risen to the height of eighty feet on the building. Under such perilous circumstances it would be difficult to describe the feelings of those who, at this time, were cooped up in the beacon in so forlorn a situation, with the sea not only raging under them, but occasionally falling from a great height upon the roof of their temporary lodging, without even the attending vessel in view to afford the least gleam of hope in the event of any accident. It is true that they had now the masonry of the lighthouse to resort to, which, no doubt, lessened the actual danger of their situation; but the building was still without a roof, and the dead-lights, or storm-shutters, not being yet fitted, the windows of the lower story were stove in and broken, and at highwater the sea ran in considerable quantities out at the entrance door.

The gale continues with unabated violence to-day, and the sprays rise to a still greater height, having been carried over the masonry of the building, or about ninety feet above the level of the sea. At four o'clock this morning it was breaking into the cook's berth, when he rang the alarm-bell, and all hands turned out to attend to their personal safety. The floor of the smith's, or mortar-gallery, was now completely burst up by the force of the sea, when the whole of the deals and the remaining

Thursday,  
16th Aug.

## A FAMILY OF ENGINEERS

1810

articles upon the floor were swept away, such as the cast-iron mortar-tubs, the iron hearth of the forge, the smith's bellows, and even his anvil were thrown down upon the rock. Before the tide rose to its full height to-day some of the artificers passed along the bridge into the lighthouse, to observe the effects of the sea upon it, and they reported that they had felt a slight tremulous motion in the building when great seas struck it in a certain direction, about highwater mark. On this occasion the sprays were again observed to wet the balcony, and even to come over the parapet wall into the interior of the light-room.

Thursday,  
23rd Aug.

The wind being at W.S.W., and the weather more moderate, both the tender and the *Smeaton* got to their moorings on the 23rd, when all hands were employed in transporting the sash-frames from on board of the *Smeaton* to the rock. In the act of setting up one of these frames upon the bridge, it was unguardedly suffered to lose its balance, and in saving it from damage Captain Wilson met with a severe bruise in the groin, on the seat of a gun-shot wound received in the early part of his life. This accident laid him aside for several days.

Monday,  
27th Aug.

The sash-frames of the light-room, eight in number, and weighing each 254 pounds, having been got safely up to the top of the building, were ranged on the balcony in the order in which they were numbered for their places on the top of the parapet-wall; and the balance-crane, that useful machine having now lifted all the heavier articles, was unscrewed and lowered, to use the landing-master's phrase, "in mournful silence."

Sunday,  
2nd Sept.

The steps of the stair being landed, and all the weightier articles of the light-room got up to the balcony, the wooden bridge was now to be removed, as it had a very powerful effect upon the beacon when a heavy sea struck it, and could not possibly have withstood the storms of a winter. Everything having been cleared from the bridge, and nothing left but the two principal beams with their horizontal braces, James Glen, at high-water, proceeded with a saw to cut through the beams at the end next the beacon, which likewise disengaged their opposite extremity, inserted a few inches into the building. The frame was then gently lowered into the water, and floated off to the *Smeaton* to be towed to Arbroath, to be applied as part of the materials in the erection of the lightkeepers' houses. After the

removal of the bridge, the aspect of things at the rock was much altered. The beacon-house and building had both a naked look to those accustomed to their former appearance; a curious optical deception was also remarked, by which the lighthouse seemed to incline from the perpendicular towards the beacon. The horizontal rope-ladder before noticed was again stretched to preserve the communication, and the artificers were once more obliged to practise the awkward and straddling manner of their passage between them during 1809.

At twelve noon the bell rung for prayers, after which the artificers went to dinner, when the writer passed along the rope-ladder to the lighthouse, and went through the several apartments, which were now cleared of lumber. In the afternoon all hands were summoned to the interior of the house, when he had the satisfaction of laying the upper step of the stair, or last stone of the building. This ceremony concluded with three cheers, the sound of which had a very loud and strange effect within the walls of the lighthouse. At six o'clock Mr. Peter Logan and eleven of the artificers embarked with the writer for Arbroath, leaving Mr. James Glen with the special charge of the beacon and railways, Mr. Robert Selkirk with the building, with a few artificers to fit the temporary windows to render the house habitable.

On returning from his voyage to the Northern Lighthouses, the writer landed at the Bell Rock on Sunday, the 14th of October, and had the pleasure to find, from the very favourable state of the weather, that the artificers had been enabled to make great progress with the fitting up of the light-room.

Sunday,  
14th Oct.

The light-room work had proceeded, as usual, to-day under the direction of Mr. Dove, assisted in the plumber-work by Mr. John Gibson, and in the brazier work by Mr. Joseph Fraser; while Mr. James Slight, with the joiners, were fitting up the storm-shutters of the windows. In these several departments the artificers were at work till seven o'clock p.m., and it being then dark, Mr. Dove gave orders to drop work in the light-room; and all hands proceeded from thence to the beacon-house, when Charles Henderson, smith, and Henry Dickson, brazier, left the work together. Being both young men, who had been for several weeks upon the rock they had become familiar, and even

playful, on the most difficult parts about the beacon and building. This evening they were trying to outrun each other in descending from the light-room, when Henderson led the way; but they were in conversation with each other till they came to the rope-ladder distended between the entrance-door of the lighthouse and the beacon. Dickson, on reaching the cook-room, was surprised at not seeing his companion, and inquired hastily for Henderson. Upon which the cook replied, "Was he before you upon the rope-ladder?" Dickson answered, "Yes; and I thought I heard something fall." Upon this the alarm was given, and links were immediately lighted, with which the artificers descended on the legs of the beacon, as near the surface of the water as possible, it being then about full tide, and the sea breaking to a considerable height upon the building, with the wind at S.S.E. But, after watching till low-water, and searching in every direction upon the rock, it appeared that poor Henderson must have unfortunately fallen through the rope-ladder, and been washed into the deep water.

The deceased had passed along this rope-ladder many hundred times, both by day and night, and the operations in which he was employed being nearly finished, he was about to leave the rock when this melancholy catastrophe took place. The unfortunate loss of Henderson cast a deep gloom upon the minds of all who were at the rock, and it required some management on the part of those who had charge to induce the people to remain patiently at their work; as the weather now became more boisterous, and the nights long, they found their habitation extremely cheerless, while the winds were howling about their ears, and the waves lashing with fury against the beams of their insulated habitation.

The wind had shifted in the night to N.W., and blew a fresh gale, while the sea broke with violence upon the rock. It was found impossible to land, but the writer, from the boat, hailed Mr. Dove, and directed the ball to be immediately fixed. The necessary preparations were accordingly made, while the vessel made short tacks on the southern side of the rock, in comparatively smooth water. At noon Mr. Dove, assisted by Mr. James Slight, Mr. Robert Selkirk, Mr. James Glen, and Mr. John Gibson, plumber, with considerable difficulty, from the boister-

## THE BELL ROCK

ous state of the weather, got the gilded ball screwed on, measuring two feet in diameter, and forming the principal ventilator at the upper extremity of the cupola of the light-room. At Mr. Hamilton's desire, a salute of seven guns was fired on this occasion, and, all hands being called to the quarter-deck, "Stability to the Bell Rock Lighthouse" was not forgotten.

On reaching the rock it was found that a very heavy sea still ran upon it; but the writer having been disappointed on two former occasions, and, as the erection of the house might now be considered complete, there being nothing wanted externally, excepting some of the storm-shutters for the defence of the windows, he was the more anxious at this time to inspect it. Two well-manned boats were therefore ordered to be in attendance; and, after some difficulty, the wind being at N.N.E., they got safely into the western creek, though not without encountering plentiful sprays. It would have been impossible to have attempted a landing to-day, under any other circumstances than with boats perfectly adapted to the purpose, and with seamen who knew every ledge of the rock, and even the length of the seaweeds at each particular spot, so as to dip their oars into the water accordingly, and thereby prevent them from getting entangled. But what was of no less consequence to the safety of the party, Captain Wilson, who always steered the boat, had a perfect knowledge of the set of the different waves, while the crew never shifted their eyes from observing his motions, and the strictest silence was preserved by every individual except himself.

On entering the house, the writer had the pleasure to find it in a somewhat habitable condition, the lower apartments being closed in with temporary windows, and fitted with proper storm-shutters. The lowest apartment at the head of the staircase was occupied with water, fuel, and provisions, put up in a temporary way until the house could be furnished with proper utensils. The second, or light-room store, was at present much encumbered with various tools and apparatus for the use of the workmen. The kitchen immediately over this had, as yet, been supplied only with a common ship's caboose and plate-iron funnel, while the necessary cooking utensils had been taken from the beacon. The bedroom was for the present used as the join-

ers' workshop, and the strangers' room, immediately under the light-room, was occupied by the artificers, the beds being ranged in tiers, as was done in the barrack of the beacon. The light-room, though unprovided with its machinery, being now covered over with the cupola, glazed and painted, had a very complete and cleanly appearance. The balcony was only as yet fitted with a temporary rail, consisting of a few iron stanchions, connected with ropes; and in this state it was necessary to leave it during the winter.

Having gone over the whole of the low-water works on the rock, the beacon, and lighthouse, and being satisfied that only the most untoward accident in the landing of the machinery could prevent the exhibition of the light in the course of the winter, Mr. John Reid, formerly of the floating light, was now put in charge of the lighthouse as principal keeper; Mr. James Slight had charge of the operations of the artificers, while Mr. James Dove and the smiths, having finished the frame of the light-room, left the rock for the present. With these arrangements the writer bade adieu to the works for the season. At eleven a.m. the tide was far advanced; and there being now little or no shelter for the boats at the rock, they had to be pulled through the breach of sea, which came on board in great quantities, and it was with extreme difficulty that they could be kept in the proper direction of the landing-creek. On this occasion he may be permitted to look back with gratitude on the many escapes made in the course of this arduous undertaking, now brought so near to a successful conclusion.

Monday,  
5th Nov.

On Monday, the 5th, the yacht again visited the rock, when Mr. Slight and the artificers returned with her to the workyard, where a number of things were still to prepare connected with the temporary fitting up of the accommodation for the lightkeepers. Mr. John Reid and Peter Fortune were now the only inmates of the house. This was the smallest number of persons hitherto left in the lighthouse. As four lightkeepers were to be the complement, it was intended that three should always be at the rock. Its present inmates, however, could hardly have been better selected for such a situation; Mr. Reid being a person possessed of the strictest notions of duty and habits of regularity from long service on board of a man-of-war, while Mr.

## THE BELL ROCK

Fortune had one of the most happy and contented dispositions imaginable.

From Saturday the 10th till Tuesday the 13th, the wind had been from N. E. blowing a heavy gale; but to-day, the weather having greatly moderated, Captain Taylor, who now commanded the *Smeaton*, sailed at two o'clock a.m. for the Bell Rock. At five the floating light was hailed and found to be all well. Being a fine moonlight morning, the seamen were changed from the one ship to the other. At eight, the *Smeaton* being off the rock, the boats were manned, and taking a supply of water, fuel, and other necessaries, landed at the western side, when Mr. Reid and Mr. Fortune were found in good health and spirits.

Mr. Reid stated that during the late gales, particularly on Friday, the 30th, the wind veering from S.E. to N.E., both he and Mr. Fortune sensibly felt the house tremble when particular seas struck, about the time of high-water; the former observing that it was a tremor of that sort which rather tended to convince him that everything about the building was sound, and reminded him of the effect produced when a good log of timber is struck sharply with a mallet; but, with every confidence in the stability of the building, he nevertheless confessed that, in so forlorn a situation, they were not insensible to those emotions which, he emphatically observed, "made a man look back upon his former life."

The day, long wished for, on which the mariner was to see a light exhibited on the Bell Rock at length arrived. Captain Wilson, as usual, hoisted the float's lanterns to the topmast on the evening of the 1st of February, but the moment that the light appeared on the rock the crew, giving three cheers, lowered them, and finally extinguished the lights.
